The 4th May 1891.

P. C. GHOSHA,

Registrar of Companies.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 27th June, 1891.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.	*Western Districts.*		
1 (Burdwan Divn.)	Burdwan June 27, '91	Nil	Weather—unseasonably sultry. Rain very much wanted. *Aman* paddy is being sown. Germination retarded for want of moisture. If rain does not fall next week affairs will get serious. Prices of common rice:— Burdwan ... 17½ Srs.; Culna ... 16; Cutwa ... 16½; Raneegunge ... 17 per rupee.
2	Bankoora „ 27, '91	0·01	Weather—hot and cloudy; most oppressive. Rain badly wanted for rice seedlings. Sugarcane and cotton doing well. No change in prices.
3	Birbhum „ 27, '91 Rampore Haut ...	0·01 0·25	Weather—very warm; windy in the afternoon. Sugarcane and paddy seedlings doing well, but rain wanted. Flights of locusts in different places, but no appreciable injury done to crops. Prices of rice from 16½ to 21 seers per rupee.
4	Midnapur „ 27, '91	Nil	Weather—extremely hot. Rain urgently required everywhere. Paddy seedlings dying for want of it. Prices of common rice:— Sudder ... 18 Srs.; Contai ... 18; Tamluk ... 16; Ghatal ... 17 per rupee.
5	Hooghly „ 27, '91	Nil	Weather—very hot; more cloudy than last week. *Aus* and jute crops in danger from drought. *Aman* cultivation at a standstill and seedlings withering. Prices of common rice:— Sudder ... 14 Srs.; Serampore ... 15½; Jehanabad ... 17 per rupee.
6	Howrah „ 27, '91	Nil	Weather—very hot. Jute and paddy plants suffering for want of rain. Price of common rice 14½ to 15 seers per rupee.
	Central Districts.		
7 (Presidency Divn.)	24-Perghs. June 30, '91	Nil	Weather—seasonable. Up to Saturday there was no rain, and all reports show that the seedlings of paddy and also the *aus*, jute and sugarcane crops are suffering. The rain of the last three days has done much good. Common rice sells at from 14½ to 16 seers per rupee.
8	Nuddea „ 27, '91 Kushtea ... Meherpur ... Chuadanga ...	Nil 0·5 1·15 0·32	Weather—very hot. *Aus* paddy suffering for want of rain. Harvesting of *aus* on chur lands in the Kushtea subdivision has commenced.
9	Khoolna „ 27, '91	Nil	Weather—intensely hot; occasionally cloudy during the last two days. The total cessation of rain for the last fortnight has caused considerable anxiety, and agricultural work has been retarded. Prospects uncertain.
10	Jessore „ 27, '91 Magurah ... Narail ...	Nil 0·28 0·37	Weather—hot and cloudy. A fall of rain to-day (27th) which will be very beneficial. It is wanted everywhere. Prospects favourable. Prices stationary.
11	Murshedabad „ 29, '91	0·16	Weather—hot and cloudy. *Bhadoi* and jute plants thriving. Rain much wanted.
12 (Rajshahye Divn.)	Dinagepur „ 27, '91	0·97	Weather—hot and cloudy. Rain wanted for the cultivation of *haimanti* paddy. Price of rice 15 seers per rupee.
13	Rajshahye „ 27, '91 Nattore ... Nowgong ...	1·18 1·94 0·30	Weather—extremely hot. Jute, *aus*, and *aman* all flourishing, but more rain wanted. *Til* is still being harvested.
14	Rungpur „ 27, '91 Nilphamari ... Gaibanda ... Kurigram ...	7·31 0·14 3·42 3·39	The rains have broken with the usual monsoon weather. Prospects everywhere excellent.
15	Bogra „ 27, '91 Nowkhilla ...	0·97 1·76	Weather—very hot and damp. All crops thriving well. Common rice selling at 17 seers per rupee.
16	Pubna „ 27, '91	0·08	Weather—sultry. Jute and paddy doing well, but some rain wanted. Common rice selling at from 13 seers 5 chittacks to 14 seers 8 chittacks per rupee. Fodder sufficient.
17	Darjeeling „ 27, '91	1·48	Weather—fair. *Bhadoi* and jute doing well. Lands being prepared for *haimanti* paddy.
18	Julpigoree „ 27, '91	4·24	Weather—very hot and sultry; cloudy at intervals. Weeding going on rapidly. Prospects of jute and *bhadoi* much improved. Transplantation of *haimanti* paddy going on slowly. More rain wanted. Common rice sells at 15 seers per rupee.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*			
	Eastern Districts.		
DACCA DIVN.			
19	Dacca June 27, '91	Nil	Weather—excessive heat. *Aus* paddy and jute thriving. Prospects of crops on the whole fair. Cheapest rice sold at from 14 to 16 seers per rupee.
20	Furreedpur „ 27, '91	0·25	Weather—very hot. Growing crops promising. Rice selling at 15, 15, and 16 seers per rupee at Sudder, Goalundo, and Madaripore respectively.
21	Backergunge „ 27, '91	Nil	Weather—very hot, but rains seem to be setting in to-day (27th). Crops suffering for want of rain. Common rice selling at from 13 to 18 seers per rupee.
22	Mymensingh „ 27, '91	1·92	Weather—unbearably hot. Harvesting of *aus* has just commenced in some places. Prospects of *aus* and jute generally not good. Common rice sells at 13 seers per rupee.
CHITTAGONG DIVN.			
23	Chittagong „ 27, '91	Nil	Weather—sultry during first part of week, but since seasonable. *Aus* crop has suffered a little, and ploughing is impeded owing to want of rain. Prices stationary.
24	Noakholly „ 27, '91	0·35	Weather—very hot and oppressive: unsettled to-day (27th). *Aman* sowings still going on. Crop slightly damaged for want of rain. Price of rice 17 seers in Feuny and 17½ in Sudder.
25	Tipperah „ 27, '91	1·75	Weather—seasonable; hot with occasional storms of wind and rain. *Aus* being reaped. Rice and jute doing well. Weather favourable for agricultural operations. Prices stationary.
26	Chittagong Hill Tracts. „ 25, '91	0·4	Weather—excessively hot throughout the week. Rain badly wanted. *Jum* paddy and cotton plants suffering from drought. Ploughing in low lands nearly stopped owing to want of rain. Common rice being sold at 14½ seers per rupee.
BEHAR.			
PATNA DIVN.			
27	Patna „ 27, '91	Nil	Weather—clear, but cloudy at times; oppressively hot. Lands being prepared for *bhadoi* and paddy sowings. In places sowings in progress. Rain badly wanted all over the district. Locusts at Mokameh, Bukhtiarpur, and Futwah, but no damage. Prices showing a tendency to rise.
28	Gya „ 27, '91	1·02	Weather—hot. Sugarcane injured by excessive heat and also by locusts to some extent. Prices stationary.
29	Shahabad „ 27, '91	Nil	Weather—very hot and stifling; east winds. Sugarcane doing well. Rain badly wanted for paddy and *bhadoi* sowings, and should it be much further delayed, the consequences will be serious. The west winds that prevailed up to the beginning of the week have dried up all moisture left by showers which fell in early June. Prices stationary.
30	Durbhanga „ 27, '91	0·06	Weather—very hot; occasionally cloudy and threatening. *Bhadoi* sowings still being pushed on. Rain now wanted for transplanting *marua* and paddy. Indigo doing well. Prices remain unchanged.
31	Mozufferpur „ 27, '91 Sitamarhi ...	Nil 7·19	Weather—hot and damp. Except in Sitamarhi subdivision, rain is wanted for crops recently sown. Locusts appeared in Belsand thana, but passed away.
32	Sarun ...	...	Report not received.
33	Chumparun „ 27, '91	0·96	Weather—cloudy and rainy. Rainfall of the week has facilitated transplantation of paddy. *Bhadoi* sowings progressing. Indigo continues to be cut. Prices stationary.
BHAGULPUR DIVN.			
34	Monghyr „ 27, '91	0·03	Weather—very hot and sultry; cloudy in the latter part of the week. Rain urgently required throughout the district for paddy seedlings and *makai*, which will suffer much from a continuance of the drought. Repeated flights of locusts have visited many parts of the district, and are reported to have done great damage to indigo and *makai* in parts of the Beguserai subdivision and also at Lukhiserai in the Sudder.
35	Bhagulpur „ 27, '91 Mudhepura ... Soopole ...	Nil 0·21 0·16	Weather—cooler lately with east winds. Rain now much wanted, especially in Banka, for completion of *bhadoi* sowings and growing crops. Locusts passed from south-east to north-west and did most damage in Sudder subdivision, especially on the dearas. About 4 annas of *makai* injured, but with early rain this will shoot again. *Marua* and rice not much touched. Damage to indigo heaviest.
36	Purneah „ 27, '91 Kishengunge ... Arrareah ...	0·05 0·83 1·76	Weather—hot. Rain threatening, but clouds not very heavy. In Arrareah the *bhadoi* rice sown is 16 annas of the usual area. At present it promises a full outturn. No crops except indigo seem to have been much damaged by locusts. Rain wanted. Jute crop in Kishengunge estimated to be sown on 12 annas of the usual area. Heavy rain retarded its growth, and the outturn is likely to be below the average.
37	Maldah „ 27, '91 Shibgunge ...	Nil 0·36	Weather—hot and oppressive. No sign of rain. All standing crops beginning to suffer for want of rain. Locusts passed over the district, doing but little damage to *kheri* and *bhadoi* crops in thanas Nawabgunge, Kaliachak, and Gazole. Price of common rice stationary.
38	Sonthal Perghs. „ 27, 91	0·57	Weather—very hot and oppressive. Ploughing and sowing in most parts of the district at a standstill for want of rain. Young *janera* and paddy seedlings reported to be dying. From 2 to 4 annas of what was sown is dead; fortunately not much was sown. It has been cloudy since yesterday (26th), and a shower in the course of the night may be expected.

No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn. 39	Cuttack	June 27, '91	Nil	Weather—very hot. Sowing in progress and almost completed. Seedlings of *beali* and *sarad* suffering from want of rain.
40	Pooree	" 25, '91	Nil	Weather—very hot. Sowing of winter rice going on. Seedlings beginning to wither for want of rain. Miscellaneous crops doing well. Price of common rice stationary.
41	Balasore	" 27, '91	0·15	Weather—very hot. Rice sowings nearly over. Rain much wanted.
CHOTA NAGPORE				
South-West Frontier Agency.				
Chota Nagpore Divn. 42	Hazaribagh	June 27, '91	Nil	Weather—hot and sultry. Paddy seedlings dying for want of rain, which is becoming serious. Locusts have done some damage in places.
43	Lohardugga	" 27, '91	Nil	Weather—very hot. Ploughing continues. Crops already germinated are suffering much for want of rain. Sugarcane doing well in Palamow subdivision. Prices steady.
44	Singbhoom	" 27, '91	Nil	No rain. Excessive heat. Agricultural operations entirely suspended for want of rain. Young crops suffering much. Flights of locusts have visited the district, but only in one outpost are they reported to have done much damage.
45	Manbhoom	" 27, '91	0·61	Weather—very hot and dry up to yesterday (26th) when a heavy storm occurred. Paddy seedlings damaged to some extent by drought and locusts. It is, however, not too late for a second sowing. Common rice selling at from 17 to 20 seers per rupee.

Published for general information.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last. The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the [illegible] means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the most stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fall.

for the week ending Saturday, the 27th of June 1891.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 30*th June* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 27TH OF JUNE 1891.

THE meteorological conditions which obtained over the province during the previous week were an almost complete absence of rain except over parts of East and North Bengal, cloud proportion lower than usual, pressure rather above the normal, together with abnormally high temperature, which was also accompanied by high humidity over the greater part of the province. In the centre and south of the Bay a rather strong monsoon current was blowing, and had indeed been reported for a considerable period, but owing apparently to a slight whirl or wind circulation which existed off the Arakan coast, the monsoon winds could not advance direct up towards the head of the Bay, but were being deflected in an easterly direction over Burma. These conditions remained practically unaltered both in Bengal and over the Bay (except that pressure became somewhat lower) up till the 25th June, when the circulation of winds existing off the Arakan coast disappeared, and it became possible for the monsoon current to advance northwards up the Bay towards Bengal instead of being steadily deflected towards the east of the Bay. Up to the close of the week, however, the monsoon winds had not quite reached the head of the Bay, and the rains had not broken generally in Bengal, and thus the whole province, except North and small parts of East Bengal, remained practically rainless, though in North Bengal the falls began to get decidedly heavier than they had been.

The changes of meteorological conditions from day to day have been small and of little importance. On June 21st pressure was falling slowly and temperature was increasing, while rainfall was practically confined to the districts in and near the hills of North Bengal. One or two stations on this day reported very heavy rain, Cooch Behar having received 5 35 inches and Matabhanga 3·93 inches. On the 22nd pressure had risen by small amounts, while temperature was rising in all districts except Behar. Winds became rather less strongly westerly than they were, and generally winds varied from southerly to easterly. Rather heavy rain was again reported from the hills in North Bengal, though there was practically none elsewhere. The heaviest fall on this day was 5·11 inches at Matabhanga. On the 23rd and 24th pressure and temperature had generally fallen by small amounts, and on these two days rainfall became a little more general in North Bengal and over parts of East Bengal, and falls of about 3 inches were reported at Matabhanga, Mickligunge, Kurigram, Rungpore, and Jamalpore. On the 25th and 26th pressure was rising by small amounts, while temperature was falling rather rapidly, and on the 27th the rise of pressure was confined to Behar and it was falling elsewhere, while temperature had continued to fall pretty steadily. Winds on this date were also southerly in the south-western districts, south-easterly in the south-eastern districts, and generally easterly elsewhere; that is, of almost normal monsoon direction. The rainfall of the last three days of the week was again rather more general in North Bengal, but the falls were usually not very heavy. Rather numerous local showers also occurred on the 27th in South-West Bengal.

In the Bay, as stated previously, conditions became more favourable for the advance of the monsoon current from the centre of the Bay into the northern part and towards Bengal from the 25th instant, and wind directions and the distribution of pressure also in Bengal at the close of the week were decidedly favourable for the advance of the monsoon rains over Bengal generally.

Pressure.—The mean pressure for the week has been distinctly in defect of the normal, the defect generally averaging about two or three-hundredths of an inch. The defects have been fairly equally distributed in all districts except South Behar, where an average defect of five-hundredths of an inch is registered.

Temperature—Was excessive during the first half of the week, though it gradually fell in the second half. This excess was largest at the western stations and in the day temperatures, and thus for some days at the Behar stations maximum temperatures were about 15° above the normal. The excess was perhaps largest on the 22nd, 23rd and 24th, and thus on the morning of the 24th Dehree reported a maximum temperature of 110·9,° or 18·1° above the normal, and Chybassa 110·8,° or 17·1° above the normal.

The mean temperature of the province for the week has been about 4° above the normal, and this excess has been fairly equally distributed in all districts except North Bengal, where an excess of only 1·3° is registered, and in South Behar, where the excess has been no less than 6·4.° In Assam the excess has only equalled 1·6.°

Rainfall.—In North Bengal an average fall of 3·01 inches has been received, which is equal to about three-fourths the normal fall, but in all other divisions the falls have averaged less than an inch, and have hence been very largely below the normal. The fall in North Behar has only averaged a third of the normal, in South-West and East Bengal the average fall is one-seventh of the normal, in South Behar one-ninth, in Chutia Nagpur one twenty-fifth, and in Orissa only one-hundredth of the usual fall for the week. For practical purposes, therefore, rainfall has been almost absent over nearly six-sevenths of the province. Even in North Bengal, where the rainfall has on the whole been fairly large, the districts of Pubna, Maldah, and Dinagepur have received very little rain; while, on the other hand, the Julpigoree and Cooch Behar districts have received an average of between 8 and 9 inches, or a fall slightly in excess of the normal. The station of Sitamurhi in the Mozufferpur district of North Behar has been a district of unusual precipitation, and has received a fall largely in excess of the normal for the week, though other stations in the same district have been rainless.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 27th of June 1891 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1891.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; t, thunder; lr, lightning reflection.

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 29th June 1891.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 13th June 1891.

BIRTHS.

THE total births registered during the week ending with Saturday, the 13th June 1891, in twenty-seven principal towns of Bengal, amounted to 390, and correspond to an annual rate of 18·9 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 2·2 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	15·9	17·7	18·1	18·0	13·7	16·7	18·9

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

TOWNS.	WEEKS ENDING—				TOWNS.	WEEKS ENDING—

Dacca	13·0	15·6	11·7	14·3					
					Total ...	17·9	17·9	16·3	18·9

It will be seen that last week the highest birth-rate was returned from Burdwan (45·8) and the lowest from Ranaghat (6·0). No births were registered in the Purneah town.

DEATHS.

The total deaths registered during the week under review amounted to 492, and correspond to an annual rate of 23·9 per 1,000 of the population. The rate of the week is 1·9 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	23·0	20·7	21·2	22·2	21·8	22·0	23 9

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

TOWNS.	WEEKS ENDING—				TOWNS.	WEEKS ENDING—			
	23rd May 1891.	30th May 1891.	6th June 1891.	13th June 1891.		23rd May 1891.	30th May 1891.	6th June 1891.	13th June 1891.

Dacca	20·8	25·3	21·4	18·6					
					Total ...	21·5	22·0	22·9	23·9

According to the figures returned, the highest mortality occurred in the town of Bhagulpore (45·) and the lowest in Santipore (5·3).

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per *mille.*	*Fevers.*	Ratio per *mille.*	*Dysentery and diarrhœa.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Bhagulpore	... 32·0	Darjiling	... 29·6	Burdwan	... 10·7	Scrampore	... 19·6
Gya	... 10·9	Rampore Beauleah	... 26·3			Monghyr	... 14·5
Howrah	... 4·6					Hughli and Chinsurah	... 11·5
Dacca	... 4·5					Burdwan	... 10·7
Durbhanga	... 3·9					Poori	... 10·5
Patna City	... 3·6					Chupra	... 10·1

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 4·8 from cholera, against 4·7 in the preceding week; ·6 from small-pox, against ·7; 8·8 from fever, against 8·1; 2·5 from dysentery and diarrhœa, against the same ratio; ·7 from injury, against ·8; and 6·5 from other causes, against 6·1 in the preceding week.

The mortality of last week according to *Sex, Class* and *Age* was as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	22·9	Christians	... 14·9	Under 1 year	... 192·8
Females	24·9	Hindus	... 23·9	1 and under 5 years	... 40·4
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	92	Mahomedans	... 24·2	5 „ 10 „	... 15·8
				10 „ 15 „	... 9·1
				15 „ 20 „	... 19·7
				20 „ 30 „	... 12·7
				30 „ 40 „	... 18·2
				40 „ 50 „	... 18·9
				50 „ 60 „	... 19·3
				60 years and upwards	... 41·5

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

Comparative statement of the principal commodities carried over the Bengal Central Railway during the month of March 1891.

DECREASE.

Coal ... ... Tons. 2,828 — Due to sufficiency of stocks for railway and flotilla consumption.

INCREASES.

Oil-seeds ... ... Tons. 5,488
Jhikargachi and Nawapara contributed this increase.

Sugar ... ... Tons. 795
The increase was in despatches from Jhikargachi, and was due to an improvement in the Calcutta market.

HARRY STUART,
Examiner of Accounts.

CALCUTTA, *the* 23rd *June* 1891.

EASTERN BENGAL STATE RAILWAY.

Abstract of principal commodities carried over the Eastern Bengal State Railway during the month of March 1891, *as compared with the same month of the previous year.*

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of March 1891.

INCREASES.

	Tons.		Tons.
Rice ... ... From the Northern and Behar Section principally.	1,011	Jute, unscrewed ... ... Principally from Goalundo, Haldibari, Domar, Daroani, and Rungpur, due to a favourable market.	11,519
Jute, screwed ... ... Haldibari, Domar, and Rungpur contributed this increase.	4,075		

DECREASES.

	Tons.		Tons.
Coal ... ... Due to adequacy of stocks for Railway and Flotilla use.	3,572	Oil-seeds ... ... This decrease was in despatches from the Behar Section, and is said to have been influenced by the lateness of the season.	1,596

CALCUTTA, *the 24th June* 1891.

RESOLUTION ON THE INLAND EMIGRATION REPORT FOR THE YEAR 1890.

GENERAL DEPARTMENT—INLAND EMIGRATION.

Darjeeling, the 29th June 1891.

RESOLUTION.

READ—

The Report of the Superintendent of Emigration, Calcutta, on Inland Emigration for the year 1890.

Administrative.

During the year under report new rules have been added to those already existing under both Act I of 1882 and Act I (B.C.) of 1889, providing for proper notice of despatch of coolies being given beforehand to the Railway authorities, for special accommodation either in third class carriages or in suitable wagons, for provision of food and water on the journey and treatment of any cholera cases that may occur. It was also declared by rule that all coolies despatched direct from the up-country recruiting districts should be sent *viâ* the Hughli-Naihati route. The depôts used for free coolies in Calcutta have been declared liable to inspection by the Superintendent, and agents forwarding free coolies *viâ* Goalundo have been required to place them before the Medical Officer at that station for inspection before embarkation. With regard to this latter provision, His Honour the Lieutenant-Governor, who made a personal inspection of the emigration arrangements at Goalundo in February last, observed that no

arrangements had apparently been made up to that time for carrying out the new rule which was notified on the 23rd December 1890. He desired that the rule may be carried out at once and presumes that it is now in force.

Under the provisions of Act I of 1882, penalties were also prescribed during the year for breaches of the rules laid down under that Act.

Recruitment.

2. There has been no change during the year among the licensed contractors who have remained five in number. As in the previous year, one sub-contractor was licensed, but he did not prove successful, and his operations were soon abandoned. The number of licenses granted to contractors' recruiters fell from 82 to 52, but the number of coolies recruited by them rose nevertheless, according to the figures shown, from 1,835 to 5,069, giving a rise in the average per recruiter from 22 to 97. The areas to which each of the recruiters confined his operations are not stated, but the great preponderance of registrations in the two districts of the 24-Pergunnahs and Burdwan alone (viz. 4,176 out of a total of 5,069) causes a strong presumption that large numbers of coolies find their way to the contractors otherwise than through their licensed recruiters. The figure 97, therefore, as representing the average of each recruiter's work, is probably misleading.

3. A peculiar feature of the year has been the grant of four licenses, under section 62 of Act I of 1882, permitting local agents to engage on behalf of specified employers, but without the intervention of garden-sardars. This system of recruitment, which had not been tried before, is said to have worked satisfactorily and resulted in the registration of 596 emigrants. Both the application of this section of the Act and the fact of an increase in the number of garden-sardars working under local agents, although there was a decrease in the total number of sardars certificated, point to a greater indisposition on the part of the employers to let their garden-sardars work without local supervision.

4. Recruitment of female emigrants, either by female recruiters or by certificated garden-sardarnis, was, as in previous years, purely nominal.

5. Of the contractors' coolies, no less than 88 per cent. were registered in the 24-Pergunnahs district, while the garden-sardars' coolies were mostly drawn from the districts of Lohardagga, Hazaribagh and Manbhum.

Transport.

6. Emigrants recruited by contractors were as usual all forwarded to their destination *viâ* the Calcutta depôts and Goalundo. Of the sardari coolies 6,752, out of the 12,382 recruited, were despatched from Goalundo, showing an increase of 5,344 as against the number of sardari coolies despatched by that route in the previous year. Of these, 4,034 were despatched to Assam against 908 in 1889. The figures indicate a growing preference for the Goalundo route to the Assam valley over that *viâ* Dhubri. Of the total of 11,042 emigrants of both kinds sent from Goalundo, 7,629 went to Assam and 3,413 to Sylhet and Cachar.

7. The Calcutta depôts are well reported of by the Medical Inspector as regards both their conservancy and the treatment of the emigrants in them. In one depôt tank-water was, at the time the report was submitted, being still used for bathing purposes, but was about to give place to water from the municipal supply. It should be seen whether this reform has been carried out.

8. The admissions into hospital show an increase from 44 in the last year to 287, which is explained as the result of many trivial ailments being shown which had not been entered in previous years. The percentage of deaths calculated on hospital admissions, which was only 1·3 against 11·3 in the previous year, appears to show that the explanation is correct. The total number of deaths amounted to 4 only. Of the 287 admissions, 152 were due to fever, 44 to diarrhœa, 15 to dysentery, and one to cholera. The list of depôt casualties shows a decrease of desertions from 91 to 84 compared with the year 1889, and an increase of discharges from 117 to 399, of which latter number 275 were discharged at their own request.

9. With regard to the despatch of emigrants to Sylhet and Cachar, it is satisfactory to find that the employment of country-boats has now almost entirely given way to transport by steamer; only 138 emigrants were conveyed in seven country boats, while 3,275 were conveyed by steamer in 210 trips. The great breadth of the river at Goalundo makes it impossible to exercise any

supervision there over country boats, if any come down the Ganges past Goalundo and thence on to Sylhet or Cachar.

10. The improvement in the return of way-bills of sardari emigrants, especially those despatched to Sylhet and Cachar, and of way-bills of contractors' coolies embarked at Goalundo, is noticed with satisfaction; but a large number of the way-bills of coolies despatched *viâ* Dhubri are not returned from the garden of destination, and the Lieutenant-Governor desires that this matter may be carefully enquired into. The Superintendent should report to the Assam Government the names of the gardens from which way-bills are not returned.

11. The numbers of free emigration coolies are obtained by the Superintendent from the Embarkation Agent at Dhubri and the Deputy Commissioners of Cachar and Sylhet. The figures supplied for the year under report are as follows:—

Free emigrants.

Despatched from Dhubri for Assam	11,807
Arrived in Cachar	2,041
Do. in Sylhet	7,404
Total ...	21,252

as against 44,401 in the previous year.

The Lieutenant-Governor is not inclined to accept unreservedly the deduction drawn by the Superintendent that the system of free emigration is fast losing ground. The real grounds for the change in the relative proportions will probably be disclosed when the Assam Government publishes its report.

12. The question of leaving the duties of Embarkation Agent at Goalundo in the hands of the Sub divisional Officer of that station, who lives five miles distant and is frequently obliged to be absent on tour in the discharge of his other duties, is at present under the consideration of the Lieutenant-Governor.

13. The thanks of Government are due to Surgeon-Major D. W. D Comins for the efficient manner in which he performed the duties of Superintendent of Emigration throughout the greater part of the year, and also to Brigade-Surgeon R. C. Chandra for his services as Medical Inspector of Emigrants.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE SANITARY COMMISSIONER, BENGAL, FOR THE YEAR 1890.

MUNICIPAL DEPARTMENT—SANITATION.

Darjeeling, the 30th June 1891.

RESOLUTION.

READ—

The Report of the Sanitary Commissioner, Bengal, for the year 1890.

The Report has been drawn up by Dr. Gregg, who held charge of the office of Sanitary Commissioner throughout the year It was submitted on the 23rd May; but the tabular statements attached to it appear to have been completed on the 12th February, about a fortnight before the recent Census was taken. All calculations, therefore, having reference to statistics of population are based upon the obsolete figures of the Census of 1881, and must be read subject to the reservation that everywhere, except in the five districts noted in the margin, the population has increased in a ratio varying from 43·72 per cent. in Darjeeling to 0·54 per cent. in the 24-Pergunnahs, the average proportion of increase for Bengal as a whole, excluding Feudatory States, being 6·49.

DISTRICT.		Decrease per cent.
Rajshahi	...	1·92
Rangpur	...	1·34
Burdwan	...	0·06
Birbhum	...	0·06
Nadiya	...	18·74

Births.

2. Births were registered during the year in 142 municipalities with an aggregate population of 2,489,687 according to the Census of 1881. The total number of births recorded was 53,633, giving a birth-rate of 21·54 per thousand as compared with 22·76 per thousand in 1889. Comparing this birth-rate with the recorded death-rate of the year, the singular result is arrived at that, while the Census shows the population of Bengal to have increased during the last ten years by more than sixty per thousand, the municipal birth statistics prove it to be decreasing at the rate of nearly three per thousand. But although the recorded birth-rate is clearly too low, an exact measure of the degree of error is not easy to find. The statistics of births in England, though hardly suited to serve as a final test of the correct birth-rate in Bengal, may fix a probable minimum limit below which the rate cannot be expected to fall. The registration of births was commenced in England in 1837, and was rendered compulsory in 1875. In 1838, the first year for which a complete record exists, the birth-rate was only 30·3 per thousand. From that year it rose by irregular steps, interrupted by occasional falls, to a maximum of 36·3 in 1876; and since then it has fallen steadily, with one trifling exception, to 30·6 in 1888.* The mean for the period of fifty-one years is 33·89. Statistics show that in Europe the birth-rate varies more or less regularly with the marriage-rate, and depends mainly upon the proportion of the population living between the ages of 20 and 40. In Bengal the marriage rate is unknown, at any rate in the precise sense in which that term is used by European statisticians; but the proportion of married persons to the total population was shown in the Census Report of 1881 to be 49·15, while the corresponding figure for the United Kingdom and France taken together was only 34. Again, not only do more marriages take place in Bengal than in Europe, but people marry younger; so that, even if women cease to be fertile somewhat sooner, the reproductive period is probably several years longer than in Europe. A considerably higher birth-rate may therefore be looked for, and the Sanitary Commissioner is probably not far wrong when he estimates the normal birth-rate for these provinces at something over 40 per thousand.

* *Studies in Statistics*: by G. B. Longstaff. London, 1891.

3. Out of the 142 municipalities which profess to register births, only seven* reach this standard, and only 29 show a birth-rate equalling or exceeding the birth-rate of England and Wales in 1888. These results are accepted by the Sanitary Commissioner as approximately correct; 55 municipalities, returning birth-rates varying from 29·43 to 20·03, are held to have done moderately well in the matter of birth registration; while in 58

* Madhubani ...	...	53·89
Jamalpur ...	...	43·50
Pubna ...	...	42·90
Maheshpur ...	...	41·86
Sonamukhi ...	...	40·42
Pirozpur ...	...	40·28
Sitamarhi ...	...	40·00

municipalities, or 40 per cent. of the entire number concerned, the results are spoken of as very defective. In the following 19 municipalities the birth-rate is so absurdly low that it is clear not the smallest attention can have been paid to the work of registration:—

	Towns.	Ratio per 1,000 of population.
1.	Jungipur	1·57
2.	Loharduggа	2·98
3.	Chagdah	3·44
4.	Jhalakati	3·72
5.	Kandi	3·84
6.	Nalchiti	3·92
7.	Barisal	5·23
8.	Sudharam	5·46
9.	Taki	5·85
10.	Bazitpur	6·24
11.	Nobodip or Nuddea	6·38
12.	Gobardanga	7·47
13.	Baduria	7·62
14.	Satkhira	8·12
15.	Nassirabad	9·15
16.	Barasot	9·30
17.	South Suburban	9·44
18.	Muktagacha	9·54
19.	Kulna	9·90

Excluding physiological causes tending to affect the number of births, which, though referred to by the Sanitary Commissioner, may for practical purposes be disregarded, it is obvious that the abnormally low birth-rates shown in this statement must be due to two causes—the preponderance of the male over the female population reducing the actual number of births, and defective registration reducing the number reported. By way of illustrating the operation of the former factor, the Sanitary Commissioner observes that in most of the towns which have a larger male than female population the deaths exceed the births, while in most of those where females preponderate, the births exceed the deaths. The report, however, omits to supply the statistics requisite to test this statement, which, if correct, would tell rather in favour of the relative accuracy of the birth and death statistics. It is, however, in the highest degree improbable that the disproportion of the sexes can anywhere be pronounced enough to account for the very low birth-rates referred to above. It may further be observed that, with one exception, all of these towns are situated in Bengal Proper, and most of them are known to contain a large proportion of people of the respectable and educated classes, who might have been expected to desire to have the births of their children officially recorded, and who at any rate cannot plead ignorance of their obligations under the law, or of the requirements of sound municipal administration. The Sanitary Commissioner should visit in person or by deputy some of the towns in which registration is peculiarly defective, and should endeavour, by holding a house-to-house inspection, to ascertain in a certain number of test cases whether the births of children apparently under one year at the time of his visit have actually been registered. He should at the same time ascertain and report what measures are taken to secure accurate registration, stating in whose charge this branch of the municipal work is placed, and whether any of the Commissioners personally examine the registers of births and test it by their knowledge of the residents and their families. A statement of the number of prosecutions instituted in each municipality for neglecting to report or give information of births should also be given in future reports.

Births according to sex.

4. The male births numbered 28,333 and the female births 25,300, being 111·9 male births to every 100 female births. The proportion of male to female births in the previous year was 112·6. In discussing this disparity Dr. Gregg makes no mention of the obvious probability that the record of female births is even more faulty than that of male births. He refers to the opinion held by certain European authorities that the proportion of male to female births increases as the age of the husband exceeds that of the wife, and goes on to observe that "as the difference in the relative age of husbands and wives is greater in India than

in England, the proportion of male to female births should also be greater, although the actual proportion cannot yet be determined." In Europe the accepted ratio of male to female births is 106 of the former to 100 of the latter; but the excess of male births varies in different countries, and from time to time in the same country. Thus in England forty years ago the proportion of male to female births was 105·3 per cent., but now the number is only 103·9*; while in Sweden the excess of male births is 4 6 per cent., and in Russia nearly 9 per cent. Owing, however, to the greater mortality of male infants in the first year of life, to the fact that after the thirty-fifth year females die less rapidly than males, the difference in their favour increasing with age, and also to the emigration of men on a large scale, the proportion of females to males in England in 1881 was 105·5, the actual excess being 694,635. In Bengal, with a higher recorded ratio of male births and proportionately far less emigration, the figures of the last Census show in British territory an excess of females amounting to 229,380, a state of things which seems to point to the conclusion that the great excess of male births appearing in the returns is largely due to the omission to register the births of female infants. And in any case it may be doubted whether the statistics of birth registration have been collected on a large enough scale or for a sufficient length of time to serve as the basis for any valid deductions.

* Longstaff *Studies in Statistics*, page 249.

Deaths.

5. In 1890 the total number of deaths registered throughout the Lower Provinces in rural areas as well as in towns was 1,612,479 as compared with 1,597,478 in 1889, the death-rate per thousand calculated on the Census population of 1881 being 24·48 against 24·25. The mean death-rate of England and Wales for the fifty-one years 1838–1888 was 21·65, the maximum reached during that period being 25·1 in 1849, the cholera year. But in this regard no comparison can fairly be made between the life conditions of India and England, and the proper test of the Bengal death-rate must be sought in the recorded death-rates of other provinces, as shown in the following table:—

PROVINCES.	DEATH-RATE PER 1,000 OF POPULATON.				
	1886.	1887.	1888.	1889.	Mean of four years.
Bengal	21·99	23·46	21·94	24·25	23·16
Madras	19·7	22·6	21·4	23·5	21·6
Bombay	23·17	27·67	28·44	31·51	27·70
North-Western Provinces ...	33·27	35·86	30·08	31·11	32·58
Punjab	26·60	34·31	39 89	31·62	30·60
Central Provinces ...	33·24	32·70	28·70	43·79	34·61

N. B.—The above ratios are all calculated on the basis of the Census figures of 1881.

It is reasonable to suppose that the normal death-rate in Bengal must be somewhat higher than in the North-Western Provinces, where the climate is more healthy and the people show a finer physique; while the mean death-rate of the Central Provinces, where much attention is believed to have been given to the subject of registration, corresponds pretty closely to the rate of 33 or 34 per mille which is assumed as the probable death-rate of Bengal in the Census Report of 1881.† Applying the higher rate of 34 per thousand to the population of Bengal (excluding Calcutta, which is not under the Sanitary Commissioner, and the Chittagong Hill Tracts, where vital statistics are not registered) as recorded at the recent Census, the number of deaths in the past year would amount to 2,384,313, or 771,834 in excess of the number actually registered. The latter figure may be taken as an approximate measure of the extent to which the registration of deaths in Bengal understates the actual mortality.

† Volume I, page 65.

Death-rate in different districts.

6. An examination of the table given in the report, comparing the rates of mortality in rural and urban areas, shows that only one district, the Sonthal Pergunnahs, returned a death-rate below 15 per thousand, while Darjeeling returned 40·08, Jalpaiguri 33·50, and Noakhally 33·24, figures which probably represent a close approximation to the truth. In the following Municipalities the recorded death-

rate is below 15 per thousand, and the work of registration appears to be neglected :—

Three years ago, in a circular addressed to Commissioners of Divisions, the Lieutenant-Governor drew attention to the fact that in 51 municipalities out of 64 for which the figures were examined, the registration of deaths during 1887 showed a serious falling off when compared with the mean of the previous five years during which registration had been conducted by the police. Since then some improvement has taken place, but hardly so much as might reasonably have been looked for, and it is evident that much still remains to be done. The Sanitary Commissioner should now take steps, through the district authorities, to bring home to the Commissioners of the municipalities mentioned above the necessity of paying more attention to this branch of their duties, and should utilise every opportunity that may offer on his tours of inspection of testing the registration in municipalities where the death-rate is unreasonably low, and of ascertaining whether proper arrangements are made for reporting deaths and maintaining the prescribed registers. The instructions given on this point in the circular of 8th July 1890, printed in Appendix V, are too vague to be of any practical use. In administrative matters of this sort, and more especially in dealing with local authorities who have no special executive experience, it is above all things necessary to enter into detail, and specify precisely what should be done, and by whom, in order to bring about a particular result. The measures prescribed in Dr. Gregg's report of his inspection of the Dinajpur Municipality seem to be well adapted to secure effective registration, and if similar suggestions were made to all municipalities in Bengal, they would doubtless be largely adopted.

Infant mortality.

7. In the Resolution on the Sanitary Commissioner's Report for 1889, attention was drawn to the statistics of infant mortality in Bengal; it was pointed out that the registration in the mofussil of the deaths of infants, particularly of female infants, was extremely defective, and the Sanitary Commissioner was asked to examine the figures in future reports and to compare them with those of admitted accuracy in Europe. The mean death-rate in England of infants under one year of age for the ten years 1871—80 is given in the work already referred to as 177·3 per thousand, and that of children between the ages of one and five as 31·2. The corresponding figures for the past year in Bengal are 169·08 and 26·78. It has already been shown that the returns of general mortality are considerably below the truth, and it is reasonable to suppose that the statistics of infant mortality must be at least equally defective. This conclusion is further borne out by the fact that during 1889, the last year for which complete figures are available, the death-rate of infants in Calcutta was 313·4, and that of children between one and five 52·2 per thousand. After full allowance has been made for the unhealthy conditions of infant life in the Calcutta bazars, there can still be no room for doubt that the registration of infant mortality in the mofussil is very

imperfect. The Sanitary Commissioner indeed admits that this is the case, but he seems to think that the duties of his Department are limited to "impressing upon the local authorities and the people themselves the importance of the subject." The Lieutenant-Governor has not much faith in the value of these general exhortations. The Sanitary Department can do more than this, and must do it if sanitary work in Bengal is to be carried on effectively. The Sanitary Officers must make it their business to look into the details of registration whenever opportunity offers, and to see how and by whom they are neglected.

Its causes.

8. Among the causes of the high infant mortality which there is reason to believe must prevail in Bengal, Dr. Gregg refers to the insanitary conditions prevalent in large towns, to the tropical climate, the prevalence of malaria, and deficient or improper clothing and food, and lays special stress on "the fact that the infants of Bengal are the produce, in an enormous number of instances, of women who are themselves but undeveloped children, whose offspring are not remarkable for stamina or for a constitutional power of resistance to the causes of disease to which they are peculiarly liable." He seems, however, to make rather too much of the influence of town life upon mortality. According to the Census of 1881 only 5·26 per cent. of the population of Bengal was returned as living in towns, while the urban population in England and Wales is 66·6 per cent., in France 31·06, and in America 22·5 per cent. It seems probable, too, that in his comparison between infant mortality in England and India, he has omitted to take sufficient account of the comparative immunity of children brought up in warm climates from bronchial ailments, such as croup, bronchitis, diphtheria, &c., which cause so many deaths among children in Europe.

Cholera.

9. During the past year 145,885 deaths from cholera were registered, showing a death-rate of 2·21 per thousand on the population of 1881, and of 2·07 on the figures of the preliminary report of the recent Census. In 1889 the deaths from this cause numbered 171,103, and the death-rate was 2·59 per thousand. The diagrams and small maps given in the report illustrate clearly the seasonal incidence of cholera throughout Bengal and in the main divisions of the province, and its distribution in relation to the rainfall and the character of the soil. The four diagrams of the seasonal incidence of cholera in Bengal proper, Behar, Orissa, and Chota Nagpur should, however, have been drawn to the same vertical scale; and the map showing the distribution of cholera by registering stations is too large for convenient reference. The highest death-rates from cholera occurred in Faridpur (8·40), Chumparun (5·99), Bhagulpur (5·18), and Dacca (4·31), but nowhere did the rate of mortality rise as high as in 1889, when Puri returned a death-rate of 21·01 per thousand, while Balasore showed 13·74, Purneah 9·60, and Cuttack 8·29. No particulars are given of the outbreak in Faridpur or Dacca, and comparatively little is said about the increase of the disease in the districts of Bhagulpur and Chumparun. In the station of Bhagulpur the supply of filtered water is believed to have reduced the mortality from cholera, and it is stated that improvements are being carried out under the orders of the Board of Revenue in the town of Bettiah, where most of the cholera deaths registered in Chumparun seem to have occurred. It is curious to observe that the mortality from cholera during December (27,849) was the highest recorded in that month during the last seventeen years, with the single exception of 1876, when it reached 46,534 December is not usually a bad month for cholera, and the large number of deaths recorded is attributed by the Sanitary Commissioner to the unusual floods having "left the soil moist and unabsorbent longer than usual."

Small-pox.

10. The number of deaths from small-pox rose from 8,665 in 1889 to 12,619 in the year under review. Puri, Chumparum, Midnapur, and Patna show the highest rates of mortality, and in each of these cases the outbreak is attributed to the practice of inoculation. It is claimed for the Eastern Bengal Circle, where the small-pox mortality of the year was low, that, notwithstanding some local opposition, the people must have been well protected by vaccination; but the recent outbreak at Chittagong, which showed that in a large proportion of

cases vaccination had been imperfectly performed, throws grave doubt upon the correctness of this view.

Fever.

11. The deaths from fever during 1890 numbered 1,155,569 as compared with 1,101,521 in 1889, representing a death-rate of 17·54 per thousand on the population recorded in 1881, or of 16·45 on the preliminary returns of the recent Census, against 16·72 or 15·68 in the previous year. The fourteen districts noted in the margin showed the highest death-rate. In the deltaic districts of Noakhali, Jessore, Rajshahi, Dinajpur, Khulna, Pubna, Rungpur, and Bogra the chronic prevalence of fever is put down to the water-logged condition of the country and to the existence of stagnant pools and marshes in the low levels between the river channels. The unhealthiness of Julpaiguri is due to the malarial belt of country known as the Terai and the Duars; the fever in Darjeeling was really influenza; while in Gya and Shahabad the local officers attribute the prevalence of malaria to the influence of canal irrigation. In the case of Hazaribagh and Monghyr, both believed to be healthy districts in ordinary years, no explanation of the high fever mortality is offered. In the Resolution on the report of 1889, is was observed that the province of Orissa was remarkable for the comparative absence of fever, and that the district of Puri, in other respects the most unhealthy district of Bengal, showed the smallest fever mortality. Dr. Gregg now explains that in the hilly country in the north of the district, and the sandy tract which drains towards the sea and the Chilka lake, the natural drainage is rapid, and the mortality from fever small. The low death-rate recorded in these rural circles counterbalances the high mortality (21·10 per thousand) registered in Puri town, and reduces the general rate for the district.

Julpaiguri	31·39
Darjeeling	29·33
Noakhali	27·07
Jessore	26·29
Rajshahi	25·55
Dinajpur	25·10
Khulna	24·40
Pubna	23·59
Rungpur	22·63
Gya	21·55
Hazaribagh	20·70
Monghyr	20·24
Shahabad	20·20
Bogra	20·03

Sanitation in Municipalities.

12. The following statement shows the total expenditure incurred by Municipalities on sanitary purposes during the past year:—

Head of Expenditure.		Total expenditure.		Difference of 1890.	
		1890.	1889.	Increase.	Decrease.
		Rs.	Rs	Rs.	Rs.
On conservancy, including latrine	...	3,28,199	3,27,372	827	......
„ conservancy establishment ...	...	3,51,081	3,38,588	12,493	......
„ drainage ...	...	83,502	83,643	......	141
„ water-supply ...	...	1,43,379	1,28,162	15,217	......
„ disposal of dead ...	...	12,705	13,708	......	1,003
„ market and slaughter-houses	...	17,697	9,525	8,172	......
„ vaccination ...	...	17,061	22,026	......	4,965
„ treatment of the sick ...	...	2,27,054	2,21,728	5,326	......
„ other sanitary work ...	...	1,60,412	1,36,279	24,133	......
Total	...	13,41,090	12,81,031	60,059	......

The progress shown is, on the whole, satisfactory; but the large reduction in expenditure on vaccination indicates a tendency on the part of Municipal authorities to neglect one of the most important duties entrusted to them. Statistics show that the deaths from small-pox in the urban areas of Bengal, where vaccination is compulsory, rose to 1,268 in 1890, while the mortality from the same cause during 1889 was 653, the mean mortality for the five years 1885-89 being 601, and it is a reasonable inference that this sudden increase was to some extent due to the relaxation of necessary precautions to which the table of expenditure bears witness. Effective measures must now be taken to guard against the continuance of this state of things. No municipal budget should be sanctioned which provides for a decrease in expenditure on vaccination, and Commissioners of Divisions will be instructed to enforce the observance of this rule.

13. In paragraph 57 of the report a statement is given which apparently purports to show the proportion of expenditure on sanitary purposes devoted to original sanitary works and sanitary works of a recurring nature, and the ratio of the total expenditure on sanitary purposes to the total expenditure on municipal purposes. The headings of the fourth, fifth and sixth columns are, however, so obscurely worded that the Lieutenant-Governor has had some difficulty in making out what proportions they were intended to show, and the value of the sixth column as a test of sanitary progress is impaired by the fact that the statistics on which it is based include expenditure on the construction and repair of roads, which cannot properly be treated as expenditure on sanitary purposes. The same criticism applies to the summary of sanitary works carried out by Municipalities, District or Local Boards, and private individuals, which is given in Appendix III. An analysis of the statement describing the sources of water-supply given in paragraph 64 shows that of the 145 municipalities in existence during the year, sixty-nine derived their drinking-water mainly from rivers and fifty-two from tanks or wells. Only six municipalities—Burdwan, Bhagulpur, Dacca, Darjeeling, Cossipur-Chitpur and Kurseong—could be said to have a supply of really pure water.

Rural sanitation.

14. The Sanitary Commissioner states that little or no progress has as yet been made by District Boards in the direction of rural sanitation, because, as was observed in the Resolution on last year's report, they possess no funds for the purpose, and have no power to impose local taxation for sanitary purposes. It appears, however, from the summary of sanitary works contained in Appendix III of the Report, that during the past year District and Local Boards spent Rs. 48,762 on sinking wells, excavating and clearing tanks, and improving drainage channels. The above sum includes an advance of Rs. 4,200 granted in Midnapur under the Land Improvement Loans Act to private individuals for the excavation of tanks and the construction of bunds or high level reservoirs; but it does not include the expenditure incurred on the completion of the Rungpore drainage scheme. In addition to this, no less than Rs. 2,65,785 was laid out by private individuals on the excavation of tanks, the provision of improved water and similar sanitary improvements. Among these works of private benevolence, special mention should be made of the large tank with six masonry ghâts excavated by Rani Man Mohini Devi of Puttia, Rajshahi, at a cost of Rs. 30,000, and the generous offer of the same lady to lay out from Rs. 10,000 to Rs. 12,000 a year, for a period of four or five years, on constructing wells in the district; of the donation of Rs. 1,12,500 made by Raja Surja Kant Acharjya of Muktagacha in Mymensingh, towards water-works for the head quarters station; and of the contribution of Rs. 11,466 promised, and in part paid, by the Maharaja of Darbhanga for clearing the Sivaganga and improving the drainage of Deoghur. With reference to the last-mentioned project, the Deputy Commissioner of the Sonthal Pergunnahs states that the plans, "though made over a year ago, are still lying somewhere unapproved by the authorities, and the gift under its terms may be withdrawn." The Sanitary Commissioner should enquire into this statement and ascertain what has been done in the matter, and to what causes the delay complained of is due.

The Sanitary Board.

15. The Sanitary Board, consisting of Sir Henry Harrison, member of the Board of Revenue, as President, Colonel McNeile, Chief Engineer and Secretary to Government in the Irrigation Branch of the Public Works Department, and Dr. Gregg, the Sanitary Commissioner, held three formal meetings during the year. The most important subjects which came under their consideration were the drainage and water-supply of the town of Howrah, the drainage of the municipalities on the east bank of the Hooghly, and the drainage of the towns of Serampore and Puri. A complete scheme for the drainage of Puri, which has long been a source of serious danger to the health of the town, has been sanctioned by Government since the close of the year. A scheme was also drawn up for Serampore, and adopted by the Municipal Commissioners. Government has sanctioned the loan of Rs. 30,000 required to carry out the project, and it is understood that work will be commenced as soon as the necessary land has been acquired and made over. The question of the drainage of Howrah is still under consideration. Besides

these large projects, the Board considered and approved during the year several minor schemes for improving the drainage of North Dum-Dum, Maniktola, Cossipur-Chitpur, Balli, and Utterpara municipalities, but in none of those, except Utterpara, was any real progress made. Dr. Gregg complains of the "extraordinary apathy displayed by most municipalities in their own interests;" but it seems to the Lieutenant-Governor that this complaint cannot reasonably be made until the Sanitary Board has been longer in existence, and has had time to make its influence felt. In the Secretary of State's despatch of the 22nd August 1889, it is contemplated that the Provincial Sanitary Board should not only advise the Government and local authorities upon sanitary measures, but should also be the executive agency through which the Government would act in the Sanitary Department. The Lieutenant-Governor understands this to mean, not that the Board is expected actually to carry out particular sanitary projects, but that it will take the initiative in drawing up the outlines of the schemes to be prepared by the local authorities, and will supervise their execution by those authorities. Sir Charles Elliott holds that the Board will have performed its duties adequately if it takes up the most important municipalities in turn, and by degrees prepares, or causes to be prepared, schemes for their water-supply and drainage. Considering its constitution, it can hardly be expected to do more, and in any case the execution of its projects will lag far behind the conception. Rural areas cannot be dealt with on these lines, and the Lieutenant-Governor has too much apprehension of the difficulty of laying down rules for such various conditions as exist in the Province, and of enforcing any rules without an undue and impossible interference with the liberty of the people, to desire that the Sanitary Board should, as matters now stand, attempt to deal in any way with the population living outside of municipal areas.

16. The Sanitary Commissioner inspected 48 municipalities during the year, on ten of which he wrote inspection reports containing much that is sensible and practical. With a single exception, upon which separate orders will be passed, Dr. Gregg speaks in favourable terms of the good work done by the officers of his Department. The tabular statement given in paragraph 69 of the Report shows that a creditable amount of inspection was done by most of the Deputy Sanitary Commissioners and Deputy Superintendents of Vaccination. Four Deputy Superintendents, however, failed to reach the standard of inspection prescribed by the Government of India in reviewing the report of 1889.

The Lieutenant-Governor is glad to acknowledge the diligence which Dr. Gregg has displayed in the administration of his Department. The thanks of Government are also due to Dr. Waddell, Deputy Sanitary Commissioner of the Darjeeling Circle, for the good work done by him during the year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1890.

POLICE.

Calcutta, the 7th July 1891.

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1890.

Read also—

The Annual Reports of the Chief Presidency Magistrate and the Presidency Magistrate of the Northern Division on the Criminal Administration of their Courts for the year 1890.

The Reports for the year 1889 and the orders of Government thereon.

Reported cases.—The following table shows the number of cognizable and non-cognizable cases reported in the Town and Suburbs of Calcutta during 1890 and the preceding year:—

	Town.		Suburbs.		Total.	
	1889.	1890.	1889..	1890.	1889.	1890.
Cognizable	25,787	26,858	7,277	8,173	33,064	35,031
Non-cognizable	24,510	22,015	2,809	4,496	27,319	26,511
Total ...	50,297	48,87	10,086	12,669	60,383	61,542

The increase in cognizable cases in both the Town and Suburbs occurred mainly under the heads of Stage Carriage Act, Public and Local Nuisances, and Cruelty to Animals. The decrease in non-cognizable cases in the Town was chiefly in offences against the Conservancy Acts. The increase in non-cognizable cases in the suburbs was in the same class of offences.

2. *Arrests and convictions.*—The following table compares the number of persons arrested in cognizable cases and summoned in non-cognizable cases, and the number of persons convicted in the Town and Suburbs of Calcutta for the year 1890 and the preceding year:—

	Persons arrested or summoned.						Persons convicted.					
	Town.		Suburbs.		Total.		Town.		Suburbs.		Total.	
	1889.	1890.	1889.	1890.	1889.	1890.	1889.	1890.	1889.	1890.	1889.	1890.
In cognizable cases	34,282	36,301	7,987	8,698	42,269	44,999	31,881	33,738	7,558	8,172	39,439	41,910
In non-cognizable cases	11,891	11,585	2,602	3,558	14,493	15,143	7,943	6,874	1,621	2,566	9,564	9,440
Total ...	46,173	47,886	10,589	12,256	56,762	60,142	39,824	40,612	9,179	10,738	49,003	51,350

The percentage of convictions for cognizable offences remained the same in 1890 as in the previous year, namely 93, and for non-cognizable offences it fell from 66·21 to 62·33.

3. *Races and creeds.*—Out of a total population of 433,219 in the Town, 10,158 persons were convicted of offences under the Indian Penal Code. Of these 6,060 were Hindus, 3,625 Mahomedans, and 445 Christians. No Brahmos, Parsees or Sikhs, who number in all 843 persons, were convicted during the year. The percentages of the different races were as follow:—

Mahomedans	2·9
Hindus	2·1
Christians	1·6
Buddhists and Jains	1·04
Jews	1·01

Out of a total population of 251,439 in the Suburbs, 1,339 were convicted under the Indian Penal Code. The convictions of Hindus were 697, and of Mahomedans 621. Twenty Christians were convicted against nine in 1889. The percentages of the different races were as follow:—

Mahomedans	·6
Hindus	·5
Christians	·5

4. *False cases.*—There were only 43 cases declared false out of a total of 48,873 cases reported in the Town, and only 18 out of 12,669 reported in the Suburbs. In 1889 the numbers were 60 and 24 respectively in the Town and the Suburbs. The extreme paucity of and the decrease in the number of cases declared false have not been sufficiently explained. Out of 21 prosecutions instituted in the Town for false complaints, only 8 ended in conviction, in 3 of which the complainants were sentenced to terms of imprisonment varying from three to four months, and in 5 cases fines were inflicted. In 2 cases the complainants absconded and in 5 the defendants were discharged. The remaining 6 cases were struck off, as the parties failed to take out processes. In 10 other cases compensation was awarded under section 552 of the Code of Criminal Procedure to the aggrieved parties. No case was instituted by any court *suo motu*. In the Suburbs prosecutions were instituted in only 13 cases, one of which was committed to the Sessions, and resulted in a sentence of six months' imprisonment. In one case three complainants were fined, and in 4 cases the complainants were imprisoned for short terms ranging from 15 days to one month. In 7 cases the defendants were discharged.

5. *Property stolen and recovered.*—The value of property stolen in the Town and Suburbs was estimated at Rs. 1,53,957 against Rs. 1,51,267 in 1889, and that of property recovered Rs. 89,019 against Rs. 69,199 in 1889. The percentage of property recovered rose from 49·02 to 56·94 in the Town, and from 35·06 to 66·34 in the Suburbs.

6. *Ratio of cognizable crime to population.*—The ratio of proved cognizable crime, and of convictions in all cases, to population was as follows:—

	Area in square miles.	Population.	Percentage of crime prosecuted to conviction to population.	Persons convicted to population.
Town	7·8	433,219	5·4	9·4
Suburbs	23	251,439	3	4·3

7. *Cognizable crime in the Town.*—The following statement shows the number of cognizable cases returned as true within the Town during the past two years:—

Crime.	1889.	1890.
Abetment of offence not committed	1	......
Class I—Offences against the State	32	51
„ II—Serious offences against the person ...	186	175
„ III—Serious offences against person and property ...	189	143
„ IV—Minor offences against the person	53	59
„ V—Minor offences against person and property ...	2,300	2,144
„ VI—Other offences not specified above	6,891	7,906
Special and Local Laws—		
Miscellaneous offences in the street	10,059	9,806
Cruelty to animals	2,922	3,339
Offences under Port Acts	2,286	2,342
Other offences	807	867
Total ...	25,735	26,832

In classes III and V the decrease occurred mainly in cases of burglaries and thefts.

There was an increase in offences relating to Coin and Stamps. The number of cases reported was 15 against 5 in 1889. Thirteen cases were tried summarily by the Magistrate, 11 persons being convicted and 1 discharged; and 2 cases were committed to the Sessions, in which 5 persons were sentenced to terms of imprisonment varying from two to seven years.

There were only 3 cases of murder against 4 in 1889. In one of these cases the accused suspecting his wife of infidelity cut her throat. He was sentenced to be hanged, but on appeal this sentence was commuted to one of transportation for life. In another case an elderly woman was found murdered in her employer's house. Very great violence had been used, and a neck-chain had been stolen. Suspicion fell upon a neighbour who sometimes visited the house, as a gold chain, like that worn by the deceased, was found buried in his room, and there were wounds on his arm and fingers for which he could not account, and regarding which he made false statements. The case was pending at the close of the year, but at the February Sessions the accused was discharged. In the remaining case a prostitute was found lying strangled on her bed, and gold and silver ornaments worth about Rs. 164 had been carried off. It is reported that all efforts to trace the murderer have failed. There was one other

case in which a Hindu charged with murder in Mozufferpur was arrested by the Calcutta Police and was transferred to the mofussil.

Cases of culpable homicide rose from a five years' average of 1 to 4. In one of these cases a number of Cabuli traders belonging to the tribes of Khyrotis and Suleiman Kheyls came into conflict and fell to blows using sticks and stones freely. One of the men died in hospital from fracture of the skull. Men of both parties were committed for trial and 5 of them were convicted.

8. *Attempt at murder.*—There were 3 cases of attempts to murder against 4 for the average of the previous five years. In 2 of these cases the accused were sentenced to 3 and 5 years' rigorous imprisonment respectively. In the third case the accused was acquitted. The description of the facts given by the Commissioner of Police throws doubt on the propriety of the acquittal. It is said that the accused visited a prostitute at night, and seizing her by the throat while asleep nearly throttled her and robbed her of gold ornaments, value Rs. 313; that immediate alarm was raised, and he was pursued along the roof and was arrested in possession of the ornaments in the basement of the adjoining house, crouching down behind the entrance door; and that the Police Surgeon deposed to finding finger marks on the woman's throat.

Cases of grievous hurt rose from 17 in 1889 to 27, the average of the five preceding years being 27. Eight out of the 27 cases were private prosecutions in which the police were not employed; 45 persons appeared before the courts, of whom 13 were convicted, 3 were otherwise disposed of, 13 were awaiting trial at the close of the year, and 16 were discharged It is stated that these cases are generally settled out of court. No European seamen were charged with this offence. There were 40 cases of hurt by dangerous weapon against 33 in 1889.

There was only one case of kidnapping with theft, though the Commissioner of Police reports that during the year 551 children wearing ornaments went astray in the Town and Suburbs, and were restored to their parents with the ornaments intact.

There were five cases of rash and negligent acts causing death or grievous hurt against an equal number in 1889. The prosecution and conviction of a Hindu for causing the death of his immature child-wife has led to an important change in the criminal law.

There was only 1 case of robbery with hurt in 1890, and 1 case of highway robbery (against 6 in 1889). The number of other robberies fell from 10 in 1889 to 2.

True cases of burglary and lurking house-trespass fell from 179 to 154, and the number of convictions from 119 to 94. The percentage of property recovered, however, rose from 32·15 to 54·48. This shows an improvement in dealing with this offence. Cases of thefts also fell from 1,855 to 1,549, and the number of convictions from 981 to 901. It is stated that the decrease in the number of cases during the year occurred chiefly in petty house thefts in the second division of the Town. The percentage of cases detected was 53·06 against 48·94 in 1889, and that of property recovered was 56·43.

There were 318 cases of criminal breach of trust against 261 in 1889. One of these cases, in which the late cashier of the Chartered Bank of India, Australia, and China was acquitted, excited much attention. Fourteen cases of criminal breach of trust committed by drivers of carts were successfully prosecuted, but the offenders were all tried summarily by the Magistrates and punished for theft. The Commissioner of Police observes that no class of offence is planned or carried out with more deliberation, and that detection in these cases is difficult. He suggests that all cases where there is evidence of premeditation should be committed to the Sessions for trial. Out of 583 persons charged under the Gambling Act, 564 or 96 per cent. were convicted. In one case the keeper of a gaming-house was sentenced to imprisonment without the option of a fine. Under the Stage Carriage Act there were 2,629 cases and 2,469 convictions against 2,079 cases and 2,032 convictions in the preceding year. The increase in the number of prosecutions occurred mainly for cases of loitering for hire off stand and driving without neck-tickets. Offences under the Police Act (street offences) fell from 10,059 to 9,806 in 1890, and out of 12,297 persons placed before the Magistrate, 12,189 or 99·12 per cent. were convicted. There was an increase of 56 cases under the Ports Act as compared with the previous year. There was an increase of 280 in

the cases under Act I (B.C.) of 1869, prosecutions in which were generally instituted on action taken by the officers of the Society for the Prevention of Cruelty to Animals. Out of 4,820 persons arrested during the year, 4,717 or over 97 per cent. were convicted. Act XI of 1890 has recently been extended to Calcutta, and it is hoped that additional acts of cruelty made punishable in that Act will result in more effectual prevention of the inhuman torture of animals. His Honour regrets to observe that the cognizable riots and unlawful assemblies in the Town rose from 12 to 21.

9. *Cognizable crime in the Suburbs.*—The following is a comparative statement of cognizable cases returned as true in the Suburbs during the past two years:—

		1889.	1890.
Class I—Offences against the State	...	15	18
" II—Offences against the person ...	...	75	86
" III—Serious offences against person and property ...	...	151	122
" IV—Minor offences against the person	...	21	32
" V—Minor offences against property	...	680	547
" VI—Other offences not specified above	...	651	742
Special and local laws—			
Cruelty to animals ...	...	3,156	3,975
Miscellaneous offences in the street	...	2,484	2,071
Other offences ...	...	22	612
Total	...	7,255	8,155

There were 7 cases of offences relating to Coin. In three cases 3 persons were convicted by the Magistrate; two cases were committed to the Sessions, and the offenders were sentenced one to three years' and the other to five years' rigorous imprisonment. One case was pending at the close of the year, and in the remaining case the accused was not placed on trial for want of evidence.

There were three cases of murder against an equal number in the previous year. In two cases the offenders were transported for life. In the third case the charge against the accused was withdrawn in the Court of Sessions. There were two cases of culpable homicide against three in 1889. In one case the accused was sentenced to two years' rigorous imprisonment, and in the other to five years. There were only seven cases of grievous hurt against 16 in the preceding year. In five cases 8 persons were convicted, 3 of whom were policemen who were sentenced by the Sessions Court, 1 to three years and 2 to two years' rigorous imprisonment. Cases of hurt by dangerous weapons fell from 19 in 1889 to 8. Of these five were withdrawn in Court, and in the remaining three cases the accused were convicted. There were six cases of kidnapping against 11 in 1889. In four of these cases the offenders were convicted, one of whom was sentenced by the Sessions Court to seven years' transportation.

While there was a decrease in the number of burglaries in 1890, the proportion of cases detected and persons convicted was higher than in 1889 or in any of the four preceding years. The percentage of property recovered was 52·80 against 26·30 in 1889. The ratio of cases detected and persons convicted under the head of theft shows an improvement on the results of the previous year. The percentage of property recovered also compares favourably with that for the preceding year.

10. *Non-cognizable crime in the Town.*—The following table shows the cases under chief heads of non-cognizable crime for the Town reported as true:—

		1889.	1890.
Conservancy Act IV (B.C.) of 1876 ...	...	19,577	16,820
Criminal force; sections 352, 355 and 358, Indian Penal Code	...	2,119	2,106
Intimidation and assault; sections 504, 506, 510, Indian Penal Code	...	528	748
Hurt; section 323, Indian Penal Code	...	598	678
Rioting, unlawful assembly and affray; sections 149, 154, 156 and 160, Indian Penal Code	...	230	264

There was a decrease in the total number of cases from 24,510 to 22,015. The decrease occurred almost wholly in conservancy cases. There was an increase in cases of causing hurt and of rioting, unlawful assembly and affray. There were 16 cases of forgery against 4 in 1889. Convictions were obtained in four cases. In one of these the managing clerk of a local firm obtained large advances

from the Bank of Bengal and the Hongkong and Shanghai Bank, involving serious loss to both Banks by means of forged opium passes. As the forged documents bore the names of officials in the Board of Revenue, the prosecution was conducted by Government. In the case of the Hongkong Bank the accused having been sentenced to eight years' imprisonment, it was decided not to proceed with the other case. Cases of extortion fell from 15 to 10. In one case committed to the Sessions, two offenders were sentenced to seven and three years' rigorous imprisonment respectively. No member of the force was convicted during the year of this offence. Cases of rioting, hurt, criminal force, intimidation, and assault increased chiefly in the Northern Division of the Town. The Presidency Magistrate of that Division has not noticed the subject.

11. *Non-cognizable crime in the Suburbs.*—The following table shows the cases under the same heads as in the last paragraph of non-cognizable crime reported as true in the Suburbs:—

	18	1890.
Conservancy Act	1,114	2,529
Criminal force	827	914
Intimidation and assault	54	80
Hurt	388	347
Rioting, unlawful assembly, affray	Nil.	Nil.

There was a total increase of 1,687 in non-cognizable cases as compared with the preceding year, which occurred mainly in conservancy prosecutions. These more than doubled, but no reason is assigned. The Lieutenant-Governor notices with surprise that no cases of non-cognizable rioting, &c., are reported from the Suburbs for either 1889 or 1890.

12. *Suicides.*—The number of cases in the Town and Suburbs was 85 against 83 in 1889. Thirty-seven per cent. of the cases were caused by hanging and 31 per cent. by opium poisoning. Over 70 per cent. of the suicides occurred among the Hindus.

13. *Accidental deaths.*—There were 301 deaths in 1890 against 292 in 1889. Thirty-six were caused by falls from trees and buildings, 30 by carriages and horses. There were 4 deaths from snake-bite. Out of 121 drivers of public and private carriages prosecuted for rash and furious driving, 101 were convicted.

14. *Arms Act.*—The importation of firearms decreased from 2,655 pieces in 1889 to 2,449 in 1890, but there was an increase of 207 in the number of firearms purchased by Calcutta Merchants in this country during the year. The imports of percussion caps fell from 23,384,000 in 1889 to 19,013,000 in 1890, and this decrease is stated to be due to the fact that the surplus stock in hand at the commencement of the year was much more than it was at the commencement of 1889. Out of 2,449 firearms imported during 1890, 2,017 were imported by European firms. The number of firearms sold during 1890 was 2,852 against 2,720. These figures include guns of native manufacture imported into the Town of Calcutta from Monghyr. The number so imported was 980 against 957 in 1889. There were 5 prosecutions under the Act against 7 in the previous year. Six persons were convicted, all for petty offences.

15. *European Vagrancy Act.*—Thirty-five vagrants were admitted into the Workhouse under section 5 of the Act. Two persons were deported, 1 to London and the other to Madras, 16 were shipped away as seamen, 11 were provided with employment of various kinds, and 5 were released. Ten other persons of European extraction, who were not admitted into the Workhouse, entered into agreement under section 17 of the Act and were deported from India.

16. *Alms-house.*—Out of 66 seamen who found refuge in the Alms-house during the year, employment on ships was found for 51.

17. *Fire Brigade Act.*—Thirteen large fires occurred in the Town and River, 26 in the Suburbs, and 8 at Howrah, at all of which steam fire-engines rendered effective assistance. Thirteen other small fires were also reported to have occurred at which manual engines attended. The loss of property was estimated at Rs. 4,66,480 against Rs. 1,38,490 in 1889. The most serious fire in the Town occurred at Jorabagan, in which property worth Rs. 93,000 was destroyed, and that in the Suburbs occurred at the Bengal Hydraulic Jute Press at Chitpore. The loss in this case was said to be Rs. 2,70,000.

18. *Strength of the Police Force.*—The actual strength of the Police employed in the Town and Suburbs is shown below:—

	Town Police.	Suburban Police.	Detective Department.	Government Guard.	Fort Police.	Lock-up Guard.	Salt Pass Establishment.	River Police.	Additional Constables.	Total.
Superintendents	4	2	1	......	......	......	......	1	......	8
Inspectors	28	12	......	4	1	......	......	3	1	49
Sub-Inspectors	......	4	3	......	......	......	......	......	......	7
European sergeants and Constables.	48	......	......	4	......	......	......	......	......	52
Darogahs	9	2	......	......	......	......	......	......	......	11
Sergeants	33	16	7	9	1	1	4	3	2	76
Corporals	72	26	......	27	1	1	2	16	20	165
Special Constables	51	......	......	......	......	......	......	......	......	51
Constables	1,206	620	......	213	18	8	17	158	179	2,419
Mounted Police	22	......	......	......	......	......	......	......	......	22
Total ...	1,473	682	11	257	21	10	23	181	202	2,860

The ratio of this force was to population 1 to 239·39 inhabitants, and to area was 1 to ·010 square miles.

The percentage of casualties in the Force was 11·32 against 9·74 in the previous year; 14 members of the Force were punished judicially during the year against 15 in 1889. 72 men were dismissed against 56 in 1889, 3 men deserted, 144 resigned or were discharged, with or without pension, and 33 died, the rate of mortality being 11·5 per mille. Altogether 15 officers and 25 constables were reduced, 17 officers and 43 constables were suspended, 28 officers and 210 constables were fined. The number of vacancies of all kinds was 324 against 288 in 1889.

The Commissioner of Police suggests the necessity of improving the position of the native policemen immediately above the grade of constable, though he has not yet made any special recommendation on behalf of this portion of the force. This matter will come under the Lieutenant-Governor's consideration together with the recommendations of the Police Committee.

19. *Cost of the Police.*—The total cost of the Town and Suburban Police was Rs. 6,14,634, the budget grant for 1890-91 being Rs. 6,17,000. The sanctioned strength was reduced by 51 constables from the 1st April 1890.

20. *Hotels, liquor shops, &c.*—Four hundred and seventy-five certificates were granted for hotels, shops for the sale of exciseable articles, and native eating houses in the Town, and 197 in the Suburbs against 268 and 52 respectively in 1889. The fees realized amounted to Rs. 1,032 against Rs. 822 in the Town, and to Rs. 448 against 235 in the Suburbs. The increase in fees is chiefly accounted for by the fact that licenses for liquor shops which were granted in 1887 under the triennial system were renewed during 1890.

21. *Property found and restored.*—Property to the value of Rs. 4,787 was picked up and brought to the Police Office, and over 69 per cent. of the amount was restored to the owners.

22. *Old offenders.*—Two hundred and eighty-nine old offenders were convicted in the Town against 278 in 1889. Of these, 76 had been convicted more than three times against 80 in the previous year. In the Suburbs the corresponding figures were 94 and 14 against 83 and 16. Eighty-one notorious offenders were photographed on their release from jail and their names registered by the Detective Department.

23. *Judicial Work.*—The number of cases instituted in the Northern Division was 15,056, and in the Southern Division 13,809 against 14,053 and 13,415 respectively in 1889. The number of cases disposed of by the Honorary Magistrates was 18,516 against 21,149 in the previous year. Of 36,806 persons appearing before the Courts of the Presidency Magistrates of the Northern and Southern Divisions, 34,274 were convicted and 2,363 acquitted or discharged. The percentage of conviction in cognizable cases was 96·5 in the Court of the Northern Division Magistrate, 96·1 in the Court of the Chief Magistrate, 77·6 in the Bench Courts, and 52·1, 57, and 60·7 respectively in non-cognizable cases (excluding conservancy prosecutions). The total amount of fines imposed by Benches was Rs. 5,112 against Rs. 6,265 in the previous year. Of this amount Rs. 4,630 was realised, and out of this sum Rs. 479 was awarded as compensation. Eleven cases only were declared by Honorary Magistrates false,

frivolous, vexatious or groundlessly instituted, and compensation awarded in these cases amounted to Rs. 91 in all. Under the amended section 250 of the Criminal Procedure Code, which allows compensation to be given in warrant cases as well as in summons cases, it is expected that compensation will be awarded in many more cases.

Against the orders of the Chief Presidency Magistrate, 34 ordinary appeals were preferred with result that 1 conviction only was set aside; the High Court was moved in revision in 5 cases, but only once successfully. 51 ordinary appeals were made against the orders of the Northern Division Presidency Magistrate, all without success; 12 motions were made to the High Court with the result that 2 were successful. There were 12 ordinary appeals against the decisions of Honorary Magistrates, all of which were rejected except 1; there were 3 motions to the High Court, but all were without success. These results speak well for the soundness of the decisions given by the Magistrates.

24. *Adjournments.*—The total number of cases adjourned was 308 against 422 in 1889. Of the 308 cases adjourned, 119 were before the Northern Division Court and 147 before the Chief Magistrate and 42 before the Benches. The number of adjournments does not seem unreasonable. The Commissioner of Police observes that, if arrangements are insisted on for hearing cases which are ready for disposal as nearly as can be *de die in diem*, the business of the Courts will be disposed of more satisfactorily to all parties, and the Lieutenant-Governor hopes that the Chief Presidency Magistrate will insist upon this procedure which has already received the approval of Government.

25. *Benches.*—The Chief Presidency Magistrate observes that the Honorary Magistrates as a body continue to evince the interest they have always taken in the discharge of the work. The only unsatisfactory features that call for notice are—

(1) the absence of some of the Honorary Magistrates from the Court without notice and sometimes on insufficient notice; and

(2) the rising of the Courts presided over by Honorary Magistrates in a few instances without finishing the day's file before the hour prescribed by the rules for such rising.

The Lieutenant-Governor trusts that no such neglect of the important public interests committed to their care will be reported in any future year.

Out of 96 Honorary Magistrates, 13 attended 20 times or more. The Lieutenant-Governor notices with satisfaction the good services which these gentlemen have rendered to the administration of justice. Thirty-six Honorary Magistrates attended less than ten times during the year, besides 8 who never attended at all. Some of these were either absent from the Town for a portion of the year, or were appointed late in the year. Some of those who never attended at all were in Europe.

26. *Personnel of the Force.*—Mr. J. Lambert held the office of Commissioner, and Mr. A. B. Barnard that of Deputy Commissioner, throughout the year. The Lieutenant-Governor's acknowledgments are due to both these officers for their efficient administration of the Department during the year. The names of the subordinate officers favourably mentioned have been noted.

ORDER.—Ordered that copies of the Resolution be forwarded to the Commissioner of Police, Calcutta, for information and communication to the Presidency Magistrates, and to the Commissioner of the Presidency Division, for information.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

JOHN EDGAR,

Chief Secretary to the Govt. of Bengal.

REVIEW OF THE TRANSACTIONS OF THE FINE FUND OF THE EASTERN BENGAL AND NALHATI STATE RAILWAYS FOR 1890-91.

No. 1312R.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Railway.

Dated Calcutta, the 6th July 1891.

RESOLUTION.

READ—

Resolution by the Government of India, in the Department of Finance, No. 427, dated the 28th January 1880.

Endorsement by the Manager of the Eastern Bengal State Railway, No. 411, dated the 29th April 1891.

Endorsement by the Manager of the Nalhati State Railway, No. 2029, dated the 6th June 1891.

Read also—

Resolution by the Government of Bengal, Public Works Department, No. 1231R.A., dated the 4th June 1890.

OBSERVATIONS.—With their endorsements quoted above the Managers have submitted the reviews of the transactions of the Fine Fund of the railways under the control of the Government of Bengal for the official year 1890-91, and these show that both on the Eastern Bengal and Nalhati State Railways the amount of fines realised during the year is less than that realised during 1889-90.

2. The following is a summary of the receipts and expenditure of the fund :—

RAILWAYS.	RECEIPTS.				EXPENDITURE.			Balance at end of 1890-91.
	Balance on 1st April 1890.	Fines.	Interest.	Total.	Disbursements.	Refunds.	Total.	
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Eastern Bengal State	4,965 7 0	5,598 13 7	135 4 6	10,699 9 1	8,875 12 3	......	8,875 12 3	1,823 12 10
Nalhati State ...	14 5 3	26 14 9	0 12 11	42 0 11	6 0 0	......	6 0 0	36 0 11
Total ...	4,979 12 3	5,625 12 4	136 1 5	10,741 10 0	8,881 12 3	......	8,881 12 3	1,859 13 9

3. The principal disbursements under the head of expenditure have been as follows :—

Eastern Bengal State Railway.—Institute, Rs. 2,190; schools, Rs. 3,565-8; entertainments, Rs. 460; amusement club, Rs. 500; blankets for menial servants, Rs. 1,803-11; compassionate allowance, Rs. 286-9-3.

RESOLUTION.—The Lieutenant-Governor views with satisfaction the results of the working of the fund during the year under review, and His Honour is glad to find that, while there has been a decrease in the amount realised from fines, larger amounts have been contributed from the resources of the funds towards entertainments, schools, and the institute, in which the employés of the Railway are much interested.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Government of India, in the Public Works Department, and to the Managers of the Eastern Bengal and Nalhati State Railways, for information, and that the Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Joint-Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 4th July, 1891.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
BURDWAN DIVN.			
1	Burdwan July 4, '91	0·62	Weather—hot and oppressive. Agricultural operations backward owing to want of rain, except in Raneegunge. Jute, sugarcane, and *aman* paddy suffering. Prices of common rice :— Srs. Burdwan ... ... 17 } Culna ... ... 15 } per rupee. Cutwa ... ... 16½ } Raneegunge ... ... 17½ }
	Culna ...	Nil	
	Cutwa ...	0·80	
	Raneegunge ...	1·77	
2	Baukoora „ 4, '91	2·34	Weather—rainy. Ploughing and sowing of rice going on. Rainfall of the week has done much good to young plants which were withering in many places for want of moisture. Sugarcane doing well. Damage to standing crops by locusts one anna. Common rice selling at 18½ seers per rupee at Sudder and 17½ seers at Bishenpore.
3	Birbhum „ 4, '91	5·07	Rain has not been general. North of the district very rainless. Rice seedlings still doing well. No more locusts reported. Prices of rice remain at 16½ to 21 seers per rupee.
	Rampore Haut ...	0·25	
4	Midnapur „ 4, '91	1·22	Weather—rainy and sultry. The rain has done much good. Prices of common rice :— Srs. Sudder ... ... 18 } Contai ... ... 18 } per rupee. Tamluk ... ... 16 } Ghatal ... ... 17 }
5	Hooghly „ 4, '91	1·67	Weather—fairly cool with occasional showers. All crops doing well. Prices of common rice :— Srs. Sudder ... ... 14 } Serampore ... ... 15½ } per rupee. Jehanabad ... ... 17½ }
	Serampore ...	1·88	
	Jehanabad ...	0·72	
6	Howrah „ 4, '91	2·95	Weather—showery. Transplanting of paddy going on. Paddy and jute plants benefited by rain. Prospects improved. Price of common rice 14½ to 15 seers per rupee.
	Uluberia ...	1·73	
	Central Districts.		
PRESIDENCY DIVN.			
7	24-Perghs. July 7, '91	3·68	Weather—seasonable and unsettled with clouds and rain. Jute, sugarcane, and *aus* paddy doing well everywhere except Barrackpore, where *aus* paddy requires more rain. More rain is also required in the Sudder and Diamond Harbour subdivisions for *aman* paddy. Prices remain unchanged.
8	Nuddea „ 4, '91	3·2	Weather—very hot. 2·85 inches of rain fell at Krishnaghur on Monday (29th June). Rain during the week has done much good to *aus* crop, but more rain is wanted. Indigo and sugarcane doing well.
	Kushtea ...	0·69	
	Meherpur ...	4·52	
	Chuadanga ...	1·01	
	Ranaghat ...	0·30	
9	Khoolna „ 4, '91	1·63	Weather—showery. Some rain has fallen and prospects improved. More rain wanted. Land is being ploughed for *aman* crop.
	Bagirhat ...	3·42	
	Satkhira ...	2·88	
10	Jessore „ 4, '91	2·74	Weather—hot and cloudy with occasional showers. Rain has been beneficial to crops, but more wanted. Prospects favourable. In Magurah indigo cutting shall commence soon. Prices stationary.
	Jhenidah ...	1·79	
	Magurah ...	0·16	
	Narail ...	0·77	
	Bongong ...	1·15	
11	Murshedabad „ 6, '91	2·17	Weather—cloudy with occasional showers. Lands for *aman* are being prepared. Sugarcane doing well. Rain still wanted in parts.
RAJSHAHYE DIVN.			
12	Dinagepur „ 4, '91	5·83	Weather—hot and cloudy with showers of rain. Transplantation in progress. Prospects favourable. Price of rice 16 seers per rupee.
	Thakurgaon ...	12·68	
13	Rajshahye „ 4, '91	0·75	Weather—very hot; more rain is desirable. All crops are flourishing. There was a scarcity of rain; but all fears are dissipated after the fall of to-day (4th) which seems to be general.
	Nattore ...	2·29	
	Nowgong ...	2·61	
14	Rungpur „ 4, '91	2·96	Ordinary monsoon weather. Everything looks promising. *Aus* harvest has begun, and will give a fair average outturn. *Aman* is transplanted for the most part, and coming up well. Jute promises fairly, but the area sown is relatively small.
	Nilphamari ...	4·85	
	Gaibanda ...	1·06	
	Kurigram ...	2·12	
15	Bogra „ 4, '91	1·91	Weather—hot and damp. All crops are promising well. In a few places *aus* rice, *til*, and *kaon* are being cut. Common rice is selling at 17 seers a rupee.
	Sherpur ...	0·85	
	Nowkhilla ...	1·62	
16	Pubna „ 4, '91	0·51	Weather—cloudy and hot. Jute and paddy doing well. Price of common rice ranges from 13 seers 5 chittacks to 14½ seers per rupee. Foddor sufficient.
17	Darjeeling „ 4, '91	2·62	Weather—fair. Crops generally doing well. Transplantation of winter rice retarded in the Terai for want of rain.
18	Julpigoree „ 4, '91	8·18	Weather—very hot; cloudy at intervals. Jute and *bhadoi* paddy doing well. Transplanting of *haimanti* paddy going on. Common rice sells at 15 seers per rupee.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts.		
DACCA DIVN.	19	Dacca July 4, '91	2·11	Weather—hot and sometimes cloudy. *Aus* paddy and jute thriving. Jute damaged to some extent by continuous rain and prospects not favourable. Common rice is being sold at from 14 to 16 seers per rupee.
	20	Furreedpur „ 4, '91	0·44	Weather—hot. Harvesting of *til* completed. More rain wanted for standing crops. Price of rice stationary.
	21	Backergunge „ 4, '91 Perozepur ... Patuakhali ...	2·42 4·74 6·42	Weather—seasonable. Prospects of crops much improved by rain. Common rice selling at from 13 to 18 seers per rupee.
	22	Mymensingh „ 4, '91	2·07	Weather—cloudy and hot by turns. Prospects of *aus* paddy and jute not favourable. Transplantation of *aman* going on. Common rice sells at 13 seers a rupee.
CHITTAGONG DIVN.	23	Chittagong „ 7, '91	8·59	Weather—seasonable. Transplantation of *aman* going on. Prospects of crops good. Prices stationary.
	24	Noakholly „ 4, '91	4·54	Weather—seasonable; but more rain needed. Prospects of *aus* and *aman* on the whole fair. Price of rice 17½ seers per rupee.
	25	Tipperah „ 4, '91	0·68	Weather—seasonable. *Aus* being reaped. *Aman* and jute promising well. Prices stationary.
	26	Chittagong Hill Tracts. „ 2, '91	1·69	Weather—excessively hot throughout the week. Rain badly wanted. *Jum* paddy and cotton plants suffering from drought. Ploughing in low lands for late rice crop at a standstill owing to drought. Common rice being sold at 12 seers 5 chittacks per rupee.
BEHAR.				
PATNA DIVN.	27	Patna „ 4, '91 Barh ... Behar ... Dinapur ...	2·80 5·90 2·02 3·19	Weather—cloudy. Prospects of *bhadoi* and paddy sowings considerably improved by the recent rain. Prices stationary.
	28	Gya „ 4, '91	2·17	Weather—seasonable. Sowing of paddy and transplantation of *marua* commenced. Sugarcane doing well. Prices almost stationary.
	29	Shahabad „ 4, '91 Buxar ... Bhabuah ... Sasseram ...	2·65 0·60 1·14 2·57	Weather—tolerably cool; cloudy and showery. Sugarcane doing well. Now the rains have set in moderately and prospects of paddy and *bhadoi* crops good. Rain in Buxar still deficient. Prices unchanged.
	30	Durbhunga „ 4, '91 Madhubani ... Somastipur ...	3·58 1·25 0·77	Weather—cloudy and rainy. *Bhadoi* sowings still going on. Transplanting of *marua* and paddy commenced, but more rain is wanted. Indigo manufacture going on. Prices remain almost stationary.
	31	Mozufferpur „ 4, '91 Hajipur ... Sitamarhi ...	3·90 3·76 1·50	Rain has been general. Sowing of *bhadoi* and of paddy continues. Paddy is being transplanted in places. Indigo promises well, and may be estimated at 16 annas.
	32	Sarun „ 4, '90	1·53	Weather—very heavy rain in places; cloudy and overcast all the week. All crops doing well. Indigo manufacture will begin.
	33	Chumparun „ 4, '91 Bettiah ...	2·36 3·36	It is raining heavily to-day (4th). Transplantation of paddy progressing. *Bhadoi* sowings are germinating. Manufacture of indigo going on. Prices stationary.
BHAGULPORE DIVN.	34	Monghyr „ 4, '91 Beguserai ... Jamui ...	1·69 0·62 3·60	Weather has been of light monsoon character, and rain more local than usual at this time of year. *Bhadoi* sowings and resowings going on everywhere. About 8 annas of the crop have been sown in Jamui. Locusts have appeared in the district. A very large flight was noticed in the Jamui sub-division, and to-day (4th) a fairly large one visited head-quarters. Damage done by locusts during the week not yet ascertained. Prices stationary.
	35	Bhagulpur „ 4, '91	4·1	Weather—seasonable and cool Rain has done much good everywhere. Cultivation and sowing proceeding briskly. Prospects fair except for indigo, which the locusts have much injured.
	36	Purneah „ 4, '91 Kishengunge ... Arrareah ...	3·09 11·44 2·96	Good rain has fallen, and the weather is still cloudy and showery. *Bhadoi* crops so far promise very well, as also jute except in Kishengunge. *Aghani* transplanting continues. Indigo has yielded very good produce, and the plant injured by locusts has recovered better than was expected.
	37	Maldah „ 4, '91 Chanchal ... Shibgunge ...	5·66 5·15 3·52	The rains have set in with the usual monsoon weather. Prospects of all crops favourable since the setting in of the rains from the beginning of the week. Manufacture of indigo commenced with an expected outturn of 13 annas in the average. Price of rice has slightly risen.
	38	Sonthal Pergns. „ 4, '91	2·69	Weather—cloudy and sultry, but a little cooler than last week. The much-wanted rain has come, and three or four good showers have fallen. People are busy in ploughing and sowing *janera* and paddy lands. The heat and drought have killed about one anna of what was sown before, but the injury done is being repaired, and resowing and replanting are being made. About 6 annas of the usual area of *janera* and paddy lands are sown.

	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.					
Orissa Divn.	39	Cuttack	July 4, '91	1·51	Weather—cloudy and cooler. Sowing of paddy not yet completed. Rain has done much good, but more still wanted, especially in Kendrapara and Banki.
	40	Pooree	„ 2, '91	0·02	Weather—hot and cloudy. Sowing of winter rice going on. Rain much wanted. Miscellaneous crops doing well. Price of common rice stationary.
	41	Balasore	„ 4, '91	1·06	Weather—seasonable. Rainfall has been favourable for sowings and for young rice plants. Prospects generally good.
CHOTA NAGPORE					
South-West Frontier Agency.					
Chota Nagpore Divn.	42	Hazaribagh Giridih	July 4, '91 ...	2·18 0·51	Monsoon weather. The break of the monsoon, though late, has done great good. Great destruction of foliage and paddy seedlings by locusts. Prices stationary.
	43	Lohardugga Palamow (up to 29th June)	„ 4, '91	0·96 0·13	Weather—cloudy. Slight rain during the week. Ploughing continues. Sowing of *gora* paddy almost completed. Sugarcane doing well in Palamow. Prices almost stationary.
	44	Singbhoom	„ 4, '91	3·47	Weather—cloudy and rainy. Rain has come just in time to save the early sowings. Damage done by the previous want of rain is not great.
	45	Manbhoom Govindpur	„ 4, '91 ...	4·18 1·68	Rains have commenced. Crops materially benefited by the downpour. Damage done to young paddy by locusts in head-quarters subdivision reported to have been slight. General prospects may be regarded as fair. Price of rice from 17 to 20 seers per rupee.

Published for general information.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last.

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 4th of July 1891.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 7th July* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 4TH OF JULY 1891.

UP to the close of the previous week rainfall had been for a considerable period, almost entirely absent except in North Bengal and Assam and to a smaller extent over East Bengal. The unfavourable conditions in the Bay of Bengal for the advance of the monsoon current northwards over Bengal, which had existed since about the first week in June, had however disappeared from the 25th instant, and it was pointed out in last week's report that conditions had at the close of the week become decidedly favourable for the commencement of the rains in Bengal. The wave of moisture-laden winds had indeed probably advanced partly over the province on the morning of the 27th, for during that day and the following night rain in many instances accompanied by slightly stormy weather set in over Orissa and South-West and East Bengal, so that on the morning of the 28th fairly heavy rain was reported from these districts, nine stations reporting falls of two inches and upwards, while nearly twenty stations received from one to two inches. This advance of monsoon winds was accompanied on the morning of the 28th by a fall of pressure of about a twentieth of an inch, while temperature had fallen very rapidly over the southern districts where rain had fallen. Winds on this day remained rather strongly easterly over the whole province, and they appeared to carry the rain-bearing current further inland, for on the morning of the 29th, rain was reported generally over the whole province, and at some stations particularly heavy falls were received. Thus a fall of six and-a-half inches was registered at Jungipore in the Moorshedabad district, and falls of about five inches at Lalgola (Moorshedabad district), Harrishpore (Noakholly district), and Bagaha (Chumparun district); falls of two inches were also reported from about ten stations. On the 29th the pressure changes and the pressure distribution were a little irregular, but temperature continued to fall rather rapidly. Winds also became a little irregular, and westerly winds began to set in at the western stations. Moderate to heavy rain was again received in almost all districts, and on the morning of the 30th the following heavy falls were reported—Barrh (Patna district) 5·42 inches, Saugor Island 5·32 inches, and Krishnaghur 2·85 inches. Pressure on the 30th had risen over the whole province, but the variations of temperature were small, and winds remained practically unchanged. On the morning of July 1st the rainfall reported was by no means so general as it had been in Orissa, South-West and East Bengal and Chutia Nagpur, though it continued fairly general in Behar and North Bengal. In the Bay of Bengal also conditions had changed and indicated that the monsoon current was again being deflected towards Burma, and that it was long prevented from passing northwards over Bengal, for there was a distinct whirl or circulation of winds off the Arakan coast, and this appears to have determined a slight and partial break in the rains which lasted for about two or three days. The meteorological changes in Bengal on the 1st were that pressure was falling by about 0·03″, while temperature had risen by about 2° owing probably to the decrease in the rainfall. On the 2nd the slight break in the rains continued in the southern districts, and the whirl off the Arakan coast still existed, though it was scarcely so definite as it was on the 1st. Pressure continued to fall over the whole province of Bengal, while again temperature had risen by about 1° or 2°. On the morning of the 3rd the rain showers reported in the southern districts were still rather few in number, though fairly heavy and general rain was reported in Behar and North Bengal. On this day, however, the whirl off the Arakan coast had entirely disappeared, and conditions in the Bay once more became favourable for the advance of the monsoon winds generally over Bengal. Pressure on the 3rd continued to fall in the east and centre of the province, though in the western districts there was an increase, while temperature had generally risen. The monsoon current appears then to have again advanced over Bengal, for on the morning of the 4th rain had become general over South-West and East Bengal and over considerable parts of Chutia Nagpur, though in Orissa rainfall was more local, while Behar and North Bengal continued to receive moderate to heavy rain. The temperature changes on the 4th were irregular, but pressure in Bengal had risen moderately, but rather unequally, and there was on this day a distinct tendency for the production of a small barometric depression over the central districts as represented by such stations as Furreedpore and Berhampore, round which there was also a rather irregular though quite perceptible cyclonic circulation of winds. Thus at the close of the week the general conditions over the province were distinctly favourable for moderate to heavy rainfall, and for the inrush of a considerable volume of the moisture-laden monsoon winds.

The meteorological conditions for the week have, therefore been very important, as the monsoon rains have now set in. The date of their commencement may be said to have been June 27th over the southern half of the province and the 28th in Behar and Chutia Nagpur.

Pressure—Has been below the normal almost throughout the week, and the mean pressure has been rather largely in defect. The average deficiency is equal to no less than seven or eight-hundredths of an inch, and at some stations it almost equals a tenth of an inch. In Assam the mean pressure is also in defect of the normal by 0·082 inch.

Temperature—Has been nearly normal for the period, and the mean temperature of the province for the week is only a tenth of a degree lower than usual. In South-West Bengal the average temperature has been absolutely normal, in East and North Bengal it has been

a few tenths of a degree in excess, and in Behar a few tenths of a degree in defect. In Assam the mean temperature for the week has been 0·5° in excess.

Rainfall.—Rain has fallen on an average number of three or four days in each division of the province, and indeed the number of rainy days has been almost equal to the normal. The general rainfall for the week has, however, in five out of the seven divisions, been less than the normal, the two divisions in which slight excess falls have been received being South-West Bengal and South Behar. The defect in North Bengal has been very small, and equals only about 5 per cent. of the normal, in North Behar the defect is moderate, and equals about 20 per cent., but in Orissa and East Bengal the defects have been decidedly large, and they equal about 40 per cent. The average rainfall in North Bengal has equalled nearly four inches, and that in South-West Bengal, North and South Behar, and Chutia Nagpur has equalled about three inches. The falls in East Bengal have been little more than two inches, or an inch and-a-half less than the normal amount, while in Orissa the fall has been less than an inch and-a-half, or an inch in defect of the normal.

The falls in Assam have also been heavy, and at Sibsagar 7·83 inches is reported, at Dhubri 4·19 inches, and at Silchar 2·92 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 4th of July 1891:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Averages for week. Of lowest of each day.	Averages for week. Of mean for each day. The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·5° higher; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. Little,

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA,
The 6th July 1891.

MEMORANDUM.

Report on the Vital Statistics in twenty-seven of the principal towns of Bengal for the Quarter ending 31*st March* 1891.

Births.

The total births registered in twenty-seven of the principal towns of Bengal during the three months ending with March 1891 numbered 6,412, being less than in the preceding quarter by 872, but greater than the average of five previous correspondng periods (1886—90) by 718, and correspond to an annual rate of 23·88 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 2·68 higher than the mean rate of the corresponding quarter of the past five years, 1886—90, and is also higher than the rate of the corresponding period of any of the past five years with which comparison is instituted, *vide* the figures below—

	Quarter ending 31st March of—						
	1886.	1887.	1888.	1889.	1890.	Quarterly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	20·92	20·32	20·52	23·16	21·44	21·20	23·88

Of the total births, 3,387 were males and 3,025 females, or, in other words, they occurred in the relative proportion 111 of the former to 100 of the latter. Although, on the whole, there were more boys born than girls, yet in nine towns, viz., Hughli and Chinsurah, Utterpara, Ranaghat, Santipore, Jessore, Narainganj, Mozufferpore, Chupra and Poori, the female births exceeded the male births.

The births registered in each of the twenty-seven principal towns during the first quarter of 1891, 1890, and the average of the five years, 1886—90, correspond to the following rates per 1,000 of the population of those towns :—

Towns.	Ratio per mille. Quarter ending 31st March of— 1891.	1890.	Average of five years, 1886—90.	Towns.	Ratio per mille. Quarter ending 31st March of— 1891.	1890.	Average of five years, 1886—90.
Burdwan	28·72	20·28	21·36	Narainganj	37·56	31·84	34·04
Midnapore	18·44	17·28	16·20	Chittagong	15·00	14·80	18·60
Hughli and Chinsurah	26·60	21·41	28·40	Comillah	41·72	31·96	33·44
Serampore	34·56	31·68	29·56	Patna City	12·48	11·72	16·64
Utterpara	26·84	23·92	21·68	Gya	26·52	22·40	23·32
Howrah	26·84	21·12	21·96	Arrah	25·12	33·28	16·84
Bali	22·12	10·40	19·16	Mozufferpore	27·40	19·08	15·04
Krishnagar	16·56	18·76	20·52	Durbhanga	31·76	30·48	31·76
Ranaghat	13·80	26·24	8·72	Chupra	26·08	20·32	16·84
Santipore	23·04	10·16	13·44	Bhagulpore	18·80	23·04	23·20
Jessore	17·40	9·10	14·56	Monghyr	39·60	31·28	31·48
Rampore Beauleah	44·44	30·08	33·12	Purneah	21·56	14·88	16·24
Darjiling	23·36	30·20	15·36	Poori	20·96	17·08	16·93
Dacca	17·56	16·80	16·60				
				Total ...	23·88	27·44	21·44

It will be seen that the highest birth-rate during the quarter under notice was recorded in Rampore Beauleah, where it amounted to 44·44 per mille per annum, and the lowest in Patna City, where it was only 12·48. Only in Rampore Beauleah (44·44) and Comillah (41·72) did the statistics of birth registration exceed the supposed standard of 40 per mille per annum. In only four out of the twenty-seven principal towns of Bengal, viz., Monghyr (39·60), Narainganj (37·56), Serampore (34·56), and Durbhanga (31·76), did the birth-rate exceed 30 per 1,000 : in the other towns in the list birth registration must be pronounced to have been more or less defective, and manifestly so with regard to the registration in Patna City (12·48), Ranaghat (13·80), Chittagong (15·), Krishnagar (16·56), Jessore (17·40), Dacca (17·56), Midnapore (18·44), and Bhagulpore (18·80), where the statistics are so imperfectly recorded that the ratio was less than 20 per 1,000 of population.

Deaths.

The total number of deaths registered in the twenty-seven principal towns of Bengal during the quarter ending 31st March 1891 amounted to 7,242, being greater than in the preceding quarter and the average of five previous corresponding periods by 334 and 1,497, respectively, and correspond to an annual rate of 27· per 1,000 of the aggregate population of those towns. This rate is 5·60 higher than the mean rate of the corresponding period of the past five years, 1886—90, and is also higher than the recorded mortality of the

corresponding quarter of any of the past five years with which comparison is instituted, *vide* the figures below—

	Quarter ending 31st March of—						
	1886.	1887.	1888.	1889.	1890.	Quarterly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	22·20	21·64	20·80	20·28	22·40	21·40	27·00

Of the total deaths 3,931 (ratio 28·24 per mille per annum) occurred among the male and 3,311 (ratio 25·64) among the female population, or proportionally 110 males died for every 100 females, calculated on the proportion such mortality bears to the total male and female population.

The loss by deaths from the different classes of the community was greater among the Christians (28·72 per 1,000 per annum) than among either Hindus (27·60) or Mahomedans (25·64), while the Budhists (3·92) suffered the least

The deaths registered in each of the twenty-seven principal towns during the first quarter of 1891, 1890, and the average of the five years, 1886—90, correspond to the following rates per 1,000 of the population of those towns :—

Towns.	Ratio per mille. Quarter ending 31st March of— 1891.	1890.	Average of five years, 1886—90.	Towns.	Ratio per mille. Quarter ending 31st March of— 1891.	1890.	Average of five years, 1886—90.

Midnapore attained the highest death-rate during the quarter under report—57·68 per mille—and the lowest death-rate was recorded in Arrah, 12·12. The high death-rate in Midnapore was due to an excessive mortality from small pox, more than one-third of the total deaths having occurred from that disease. The total mortality of the twenty-seven principal towns during the first quarter of 1891 is higher than the total rates of the two past periods with which it is compared. Eliminating Midnapore, Serampore stands next with the death-rate 53·56, followed by Poori 49·84, Chittagong 46·24, Gya 43·96, Jessore 41·88, and Narainganj 40·44. The death rates in fifteen towns ranged between 39·24 and 19·16, and in the remaining five others they were below 18·08 and above 12·12. Registration seems to be still defective in Arrah 12·12, Santipore 13·84, Patna City 14·08, Chupra 16·48 and Bhagulpore 18·08, no improvement in this respect being perceptible in any of these places.

The following table shows the registered mortality of the quarter under review from the several registered death-causes compared with that of the preceding quarter, the figures of the corresponding quarter of 1890 and the average of the corresponding quarter of the previous five years, 1886—90 :—

	Ratio per 1,000 of population. Cholera.	Small-pox.	Fever.	Dysentery and diarrhœa.	Injury.	All other causes.
Quarter ending 31st March 1891	4·32	1·76	10·40	2·96	·40	7·08
Do. do. 31st December 1890	3·16	·33	11·76	3·40	·40	6·48
Do. do. 31st March 1890	2·64	·72	9·08	3·08	·48	6·32
Quarterly average of five years, 1886—90... ...	2·32	·20	8·84	3·12	·40	6·48

The above statement, compared with the figures of the past periods, shows a noticeable increase in the mortality of the first quarter of 1891 under the heads cholera and small-pox. Compared, however, with the fourth quarter of 1890 there is a diminution in the mortality of the first quarter of 1891 under the head fever, but in comparison with that of the corresponding quarter of 1890 and the average of five previous corresponding periods 1886—90, there is a noticeable increase in the mortality from this cause.

The total deaths from *cholera* numbered 1,164 (ratio 4·32 per mille per annum) against 848 (ratio 3·16) in the preceding quarter. The death-rate from cholera was highest in Naraingunj, where it was 14·32 per mille per annum, then in Ranaghat 13·80, Jessore 13·64, Midnapore 12·24, Krishnagar 10·48, Serampore 10·40, Hughli and Chinsurah 9·32, Burdwan 8·44, Howrah 8·40, Utterpara 7·96, Poori 7·72, Comillah 7·68, Gya 7·08, Rampore Beauleah 7·04, Santipore 3·88, Bali 3·76, Dacca 3·52, and Chittagong 2·52. Two towns, Darjiling and Chupra, were absolutely free from the disease.

Small-pox caused 478 deaths (ratio 1·76) against 89 (ratio ·32) in the quarter before. Chittagong and Midnapore returned by far the greatest number, the death-rates in these two towns being 25·48 and 21·08 per mille per annum, respectively, and next to them was Gya, 2·24. In Chittagong 141 deaths from small-pox were registered out of a total of 256, and in Midnapore 177 out of a total of 484 In eleven towns, viz., Hughli and Chinsurah, Utterpara, Bali, Krishnagar, Ranaghat, Santipore, Rampore Beauleah, Darjiling, Naraingunj, Comillah and Purneah the disease was entirely absent.

Fever carried off 2,793 persons (ratio 10·40), and the deaths from *dysentery and diarrhœa* numbered 794 (ratio 2·96) against 3,125 (ratio 11·76), and 907 (3·40), respectively, in the preceding quarter. All the towns returned deaths from both causes, but the greatest mortality-rates from fever were recorded in Gya 24·48, Darjiling 22·20, Jessore 22·12, and Rampore Beauleah 20·80. Serampore returned the highest death-rate from dysentery and diarrhœa 11·44, followed by Poori 9·68.

Injury caused 108 deaths (ratio ·40) against 112 (ratio ·40) in the preceding quarter, and the deaths from *all other causes* numbered 1,905 (ratio 7·08) against 1,827 (ratio 6·88) in the preceding quarter. Poori returned the highest death-rate from the unspecified diseases coming under the head "All other causes," viz., 14·20 per 1,000. Serampore stands next with 13·88, followed by Naraingunj 13·36, Midnapore 12·36, Comillah 11·24, Monghyr 10·96, and Utterpara 10·88.

With regard to *age*, infants (under one year) as usual perished in the largest number, 167·80 per 1,000 of population; next come old persons (60 years and upwards) with a death-rate of 76·68 per 1,000. The lowest death-rate occurred between the ages of 10 and 15 years (12·16).

Detailed information regarding the vital statistics of the twenty-seven principal towns of Bengal during the quarter under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 4th July 1891.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the Quarter ending 31st March 1891.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL;
The 4th July 1891.

W. H. GREGG, *Dip. Publ. Health, Camb.,*
Sanitary Commissioner for Bengal.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 20th June 1891.

Births.

The total births registered during the week ending with Saturday, the 20th June 1891, in twenty-seven principal towns of Bengal, amounted to 350, and correspond to an annual rate of 17· per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is ·2 higher than the average rate of the corresponding week of the past five years, and is lower than the rate of the corresponding week of any of the past five years except 1886 and 1890; *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	15·9	17·8	17·1	19·2	14·0	16·8	17·0

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 30th May 1891.	6th June 1891.	13th June 1891.	20th June 1891.	Towns.	Weeks ending— 30th May 1891.	6th June 1891.	13th June 1891.	20th June 1891.

Dacca	15·6	11·7	14·3	10·2					
					Total ...	17·9	16·3	18·0	17·0

It will be seen that last week the highest birth-rate was returned from Arrah (35·9) and the lowest from Chittagong (2·3). No births were registered in the Ranaghat and Purneah towns.

Deaths.

The total deaths registered during the week under review amounted to 477, and correspond to an annual rate of 23·1 per 1,000 of the population. The rate of the week is ·3 higher than the average rate of the corresponding week of the past five years, and is lower than the rate of the corresponding week of any of the past five years except 1887 and 1889; *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	24·6	16·7	23·6	22·5	26·7	22·8	23 1

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 30th May 1891.	6th June 1891.	13th June 1891.	20th June 1891.	Towns.	Weeks ending— 30th May 1891.	6th June 1891.	13th June 1891.	20th June 1891.

Dacca	25·2	21·4	18·8	23·1					
					Total ...	22·0	22·9	23·0	23·1

According to the figures returned, the highest mortality occurred in the town of Gya (50·6) and the lowest in Darjiling (7·4). No deaths were registered during week under review in Santipore town.

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns:—

Cholera.	Ratio per *mille.*	*Fevers.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Bhagulpore ...	... 14·5	Rampore Beauleah	... 28·6	Poori ...	... 16·8
Gya ...	... 9·6	Gya ...	... 22·5	Gya ...	... 15·7
Howrah ...	... 8·0			Midnapore ...	... 13·9
Patna City ...	... 7·8			Monghyr ...	... 10·8
Dacca ...	... 5·2				

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 4·4 from cholera, against 4·8 in the preceding week; ·4 from small-pox, against ·6; 8·7 from fever, against 8·8; 1·9 from dysentery and diarrhœa, against 2·5; ·5 from injury, against ·7; and 7·2 from other causes, against 6·5 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	22·9	Christians ...	37·4	Under 1 year	... 188·7
Females	23·4	Hindus ...	23·1	1 and under 5 years	... 47·0
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	98	Mahomedans ...	23·2	5 „ 10 „	... 18·3
				10 „ 15 „	... 8·0
				15 „ 20 „	... 13·4

THE TRIBES AND CASTES OF BENGAL.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 9th July 1891.

RESOLUTION.

READ again—

The Resolution in the Financial Department, dated 30th April 1885, on the subject of the appointment of Mr. H. H. Risley, C.S., to conduct an enquiry into the Castes and Occupations of the people of Bengal.

Read—

Letter dated 12th December 1890, from Mr. H. H. Risley, C.S., submitting the outlines of a scheme for the continuation of Ethnographic Researches in Bengal, and for their extension to other parts of India.

Letter dated 28th February 1891, from Mr. H. H. Risley, C.S., intimating the approaching completion of the printing of his work.

Endorsement No. 441, dated 12th June 1891, from the Home Department of the Government of India, forwarding copy of a despatch from the Secretary of State regarding the distribution of two volumes of Mr. Risley's books.

In the Resolution of the 30th April 1885, cited in the preamble, it was stated (1) that the Government of India, at the instance of the Census Commissioner in 1882, had suggested that steps should be taken towards the collection of more precise information regarding the Castes and Occupations of the people of India; (2) that Mr. H. H. Risley, C.S., had been selected, to be deputed for two years, to prosecute the Ethnographic researches contemplated; (3) that the Lieutenant-Governor, apart from the scientific results, anticipated substantial administrative benefits from these enquiries; (4) that a series of questions would be published and circulated; and (5) that every District Officer

would be requested to nominate one or more of his subordinates, who might be qualified and willing to assist, in addition to their ordinary work, in collecting information for their respective districts or sub-divisions. Subsequently his deputation on special duty was extended to the 31st March 1888, with the approval of the Secretary of State for India.

2. The two volumes now under review contain the Ethnographic Glossary of all the castes, tribes, sub-castes and sections of which a substantial number of representatives is found in Bengal, with an introductory essay on Caste in relation to Marriage. To assist Mr. Risley in carrying out this work, there was already a considerable literature available in the shape of old reports, journals and transactions of learned societies; in addition to this, the unpublished notes of the late Dr. James Wise on the tribes, castes, and occupations of Eastern Bengal, covering some 400 pages of print, with a quantity of manuscript material, were placed at Mr. Risley's disposal; he had also the new information specially collected from the 188 correspondents named in Appendix IV to Volume II of the Glossary.

3. The Ethnographic Glossary is a mine of valuable information; but it is no detraction to the industry or the ability of its compiler to say that a complete knowledge of the caste system of India will not be obtained from its study alone. The greatest and purest castes of India, the Brahmins and Rajputs, are (with the one exception of the Maithila Brahmins of Behar) exotics in Bengal, and it is only in Upper India, the country of their origin, that a full understanding of their main permanent sub-divisions, and of the mutual relations of those sub-divisions, can be obtained; nevertheless much learned information is here contained respecting those clans or individuals of those castes who have emigrated into Bengal, and whose descendants have established local sub-castes with local customs of their own. But it is with regard to the numerous lower castes which have sprung up in Bengal, and to the representatives of the aboriginal races who have more or less come under Hinduising influences, that the information in these volumes is fullest and most abundant. Regarding such tribes and castes it certainly contains the most complete account that has hitherto been put on official record.

4. Of the value of the Ethnographic Glossary (as a dictionary of the castes and their occupations) to the Administration there can be no doubt. The more Government officers know about the religious and social customs of the people of their districts, the better able they will be to deal with either the possible social problems of the future, or with the practical questions arising in their ordinary work, such as the relations of different castes to the land, their privileges in respect of rent, their relations to trade, their status in civil society, their internal organization, their rules as to marriage and divorce, and as to the giving and receiving of famine-relief. Much influence for good over the people can be obtained by both Executive and Judicial officers by acquiring, and having a reputation for possessing, an intimate knowledge of the circumstances and surroundings of their actual life. It has long been the policy of Government to recognise that the acquisition of such knowledge is to be commended and encouraged, and His Honour trusts that the settlement operations in progress will conduce in a similar way to the enlargement of our acquaintance with the economic conditions of the people and the facts of rural life. All administrative and executive officers should make constant reference to this portion of Mr. Risley's work for their own immediate advantage, and with a view to its correction, where necessary, and amplification.

5. In his introductory essay to the Ethnographic Glossary, Mr. Risley has touched on a number of questions of the highest interest in connection with the castes and customs of the people, and on all that he has touched he has thrown the light of his literary skill, his scholarship, wide reading and Indian experience. The subject which has principally attracted his attention is the origin of the rules of exogamy, which he attributes to a sort of natural selection, that is, to the discovery that close interbreeding leads to physical weakness. In this conclusion he will find few to disagree with him; but he is perhaps inclined to think of the introduction of these rules as a matter of too remote antiquity: at any rate the rule of endogamy preceded that of exogamy. It was first the custom of the tribe or caste to marry wholly within its own limits; then, finding the results disastrous, each tribe sub-divided itself into

sections which were not allowed to intermarry, and in course of time these subdivisions became more and more intricate. Thus the Brahmins divided themselves into their ten great classes—the five Northern (Gaur) and the five Southern (Dravér), while the Rajputs split up into the "36 Royal Races." These again divided themselves into "Gotras" or sects named after a Rishi or a Muni, who was supposed to be the spiritual father of the ancestor of the Gotra, and within these sects intermarriage was prohibited. The lower castes, actuated by the passion for ceremonial purity (a solvent principle which explains many of the difficulties with which Mr. Risley deals), sub-divided themselves similarly into Gotras, which they named sometimes after localities (commonly called Gaon-Gotras) sometimes after ancestral nick-names and after the names of animals, which also Mr. Risley conceives to have been not totems in the strict sense, but nick-names of the ancestors or eponymi of the Gotras. These and other questions on which Mr. Risley has offered valuable observations, such as the origin of totemism, the effect of marriage customs on female infanticide, widow and infant marriage, the law and influence of hypergamy, find an appropriate place in this essay. His treatment of these subjects will doubtless attract the attention they deserve, but it would be out of place for Government to enter into any criticism of them.

6. It was at one time intended that the volumes of castes and occupations should be circulated to District Officers in connection with the operations of the Census of February 1891, with a view to diminishing the number of "unknown" entries which appeared in the caste tables of 1881. It has, however, been decided to let the people speak for themselves, and that confusion and complications will best be avoided by not furnishing the Ethnographic Glossary to the officers at present engaged in the compilation of the Census statistics before the abstraction and tabulation of the figures are completed in district offices. It will, however, be used in the final compilation to be made by the Superintendent of Census Operations at Calcutta, and the latter's classification will be returned for criticism to the District Officers. The eventual result will, it is hoped, show a marked improvement over any previous enumeration and sub-division of the castes in Bengal.

7. The Lieutenant-Governor believes that Bengal is the only province in which any sustained attempt has been made to carry out the wishes of the Government of India with respect to the investigation of castes and occupations originating from the Census of 1881. This work will, at any rate, help to meet the charge sometimes made that little or nothing is done to encourage and foster scientific enquiry in the Lower Provinces. Though His Honour cannot venture to hope that anything like the final word has yet been said on the numerous and important lines opened out for discussion in Mr. Risley's volumes, he hails with sincere satisfaction their publication after six years' preparation as constituting a most valuable contribution to the stock of knowledge, and as affording a substantial frame-work on which further enquiries can be instituted and their results incorporated. He believes firmly in the value of ventilating such questions, and in the accumulation and arrangement of information. The two volumes of the Ethnographic Glossary will now be circulated to all Commissioners, District and Sub-divisional Officers, and other persons interested, and their criticism will be invited with a view to supplement the deficiencies incidental to such an undertaking. On receipt of sufficient corrections and fresh materials, a revised edition of the Glossary will be published. It is Sir Charles Elliott's wish that all officers will communicate freely with Mr. Risley, in accordance with the invitation conveyed in the Preface of the work under consideration.

8. Soon after the commencement of his investigations, Mr. Risley proposed to supplement his enquiries into the tribes and castes of Bengal by an examination, on the methods approved by European anthropologists, of the physical characteristics of certain selected castes and tribes. As all castes are endogamous, *i.e.* intermarry only within their own limits, they preserve the purity of their blood in a degree which cannot exist in other nations where cross-marriages are common. If, therefore, there is truth in the theory that certain physical characteristics and proportions are persistent and hereditary, and differ in different races, Indian castes offer a field for testing this theory

which cannot be equalled elsewhere. Accordingly he set himself to prepare statistics of the weight and height, the facial angle, and the specific dimensions of the head, nose, cheekbones, orbits, forehead and zygomatic arches of a hundred individuals in each of 87 castes. Fifteen of these castes belong to Bengal, five to the Chittagong Hills, eight to the Darjeeling Hills, seventeen to Chota Nagpore, ten to Behar, twenty-three to the North-Western Provinces, and nine to the Punjab. The figures comprising these tests (ten in number) for each of the 8,700 persons measured, occupied two volumes of "Anthropometric data" and are prefaced by tables showing the average figure for each of the 87 castes under each of the ten tests. Mr. Risley has not as yet indicated what conclusions can, in his opinion, be deduced from this laborious compilation, and it would be premature for the Government to express any opinion on the subject. The Lieutenant-Governor fully appreciates the fact that India offers a splendid field for the prosecution of ethnological researches, and that Bengal, with its enormous area and vast population, affords opportunities for investigation of special importance. He will therefore always gladly welcome and do all in his power, consistently with economy, to encourage anthropometric enquiries. With these few remarks he will leave this portion of Mr. Risley's work to the criticism of the learned Societies and anthropologists to whom, in compliance with the list received from the Secretary of State for India, it will now be distributed.

9. The scheme which Mr. Risley has submitted in outline for the continuation of ethnographical researches in the Lower Provinces, and for their extension to other parts of India, will now be laid before the Government of India. Its main features are—the appointment of an unpaid Director of Ethnological enquiries in each of the larger provinces, the circulation of ethnographic questions, the selection of subjects for enquiry, the preparation of monographs on castes, tribes, social groups, and different branches of custom and folklore, and their distribution to learned Societies in Europe. It may be admitted that systematic working in the direction indicated could not fail to elicit a considerable amount of valuable information, and the scheme is happily founded on an economical basis. But for its full and successful development, it would require more specialists than are likely to be found in India, and there is the ever-present objection to adding more work to the duties of District Officers already overtaxed. At the same time there would be much advantage in placing such work in the hands of one officer—of Mr. Risley himself, for instance, in Bengal—with whom voluntary contributors on the subjects indicated could freely communicate with the assurance that their views and information would receive adequate recognition.

10. It remains only for the Lieutenant-Governor to acknowledge the excellent results of Mr. Risley's labours during a period of years, on deputation, on leave, and concurrently with his ordinary duties. These volumes bear testimony to his ability, literary power, and industry, as well as to his rarer gift of philosophical and historical insight. His work in the field of Anthropology has already established his reputation with University authorities in England and learned Societies in Europe, and has gained for him the signal distinction of Honorary Member of the French Academy. In congratulating Mr. Risley on his achievements, now to be published, His Honour desires to express the hope that he will be able to find time, in the intervals of the duties of his office, to prosecute further the researches which he has done so much to advance. Sir Charles Elliott will also take this opportunity of thanking the European scholars and men of science who have helped Mr. Risley with advice and criticism,—more particularly Professor Flower, C.B., F.R.S., Director of the Natural History Branch of the British Museum; Professor Paul Topinard, of the School of Anthropology, and Secretary of the Anthropological Society of Paris, to whom the volumes of Anthropometric data are dedicated: Professor Max Müller; Dr. Tiele of Leyden; Dr. Friedrich Müller of Vienna; Herr Kart Panka of Vienna; Sir John Lubbock, Bart., M.P.; Mr. Andrew Lang; Mr. J. F. K. Hewitt (late of the Bengal Civil Service); and Professor Kollmann. The Lieutenant-Governor's acknowledgments are also due to Mr. Risley's fellow-workers in India, namely, Dr. D. D. Cunningham, F.R.S., Mr. W. B. Oldham, C.S., Mr. D. Ibbetson, C.S., Mr. J. C. Nesfield; Mr. A. H. Giles, the Revd. L. Skrefsrud, the Revd. D. Campbell, Mr. W. H. P. Driver, Baboo Protab Chandra Ghosha,

Baboo Sarat Chandra Das, C.I.E., Mr. James Taylor, Lala Sheo Nandan Lal Roy, Baboo Bepin Behari Mookerjee, Baboo Harish Chandra Rai, Baboo Adya Nath Banerjee, Baboo Tara Pada Mookerjee, Baboo Kumud Behari Samanta, Chandi Singh, and Alauddin.

ORDER.—Ordered that copies of Mr. Risley's Ethnographical Glossary (two volumes) be circulated to all Commissioners, Judges, District and Sub-divisional Officers, to the Director of Public Instruction and to the Superintendent of Census Operations, for information and guidance, with reference to the above Resolution.

Ordered also that a copy of the above Resolution be communicated to Mr. H. H. Risley, C.S.

Ordered also that a copy of the above Resolution be forwarded to each of the gentlemen mentioned in paragraph 10.

Ordered also that a copy of the above Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Govt. of Bengal.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT IV (B.C.) OF 1883 IN CALCUTTA DURING THE YEAR 1890-91.

No. 33J., dated Calcutta, the 1st July 1891.

From—HARRY LEE, ESQ., C.S., Chairman of the Corporation of Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit the following report under section 30 of Act IV (B.C) of 1883 of the jute screw and warehouses in Calcutta for the year ended 31st March 1891.

2. At the close of last year there were 97 sanctioned warehouses on the register, and 7 new warehouses were established during the year. These make up the total number to 104. Of these, the license of No. 67, Sobha Bazar Street, was cancelled during the year, as the premises were converted into a dwelling-house. A complete list of the remaining 103, arranged according to the Acts under which they were originally licensed, is appended to this report.

3. Thirteen applications were received during the year as shown below—

No.	Locality.	Nature of application.	REMARKS.
1	19, Hurro Chunder Mullick's Street.	For licensing existing godowns for storing jute.	Sanctioned.
2	12, ditto ditto ...	Ditto ditto ...	Under consideration.
3	17 and 18, ditto ditto ...	Ditto ditto ..	Ditto.
4	7 and 7-1, ditto ditto ...	Ditto ditto ...	Ditto.
5	97, Sobha Bazar Street ...	Ditto ditto ...	Sanctioned.
6	72, ditto ...	Ditto ditto ...	Ditto
7	93 and 94, ditto ...	Additional godown ...	Ditto
8	87, Durmahatta Street ...	Ditto	Ditto
9	108, ditto ...	For licensing existing godowns for storing jute.	Under consideration.
10	17 and 18, Manick Bose's Ghât Street.	Ditto ditto ...	Ditto.
11	6, Baniatola Lane ...	Ditto ditto ...	Withdrawn.
12	15, Kassy Mitter's Ghât Street.	New construction	Sanctioned on condition for storing baled jute only.
13	29, Canal West Road ...	Ditto	Under consideration.

4. Of the four applications for license which were mentioned in the last year's report as under consideration, three have been sanctioned and one refused. The license for No. 58, Gourebere Lane, has been taken out this year under sanction granted last year.

5. During the jute season so large a quantity of jute was imported into the town that the licensed godowns proved insufficient, and some importers stored their jute in unlicensed huts. These were in the first instance prosecuted and fined, and then, on their application, temporary licenses were granted for three months. Rupees 650 was realized in this way.

6. The total amount realized during the year was—

	Rs.
License fees	27,613
Temporary license fees	650
Miscellaneous receipts	12
Fines	148
Total ...	28,423

or Rs. 879-8 in excess of last year.

7. There were 23 prosecutions during the year. In 18 cases the defendants were convicted and fined, three cases were dismissed, and in two cases the defendants were warned and discharged and ordered to pay costs.

8. No case of fire in any jute godown occurred during the year under report.

9. The annexed statement shows the receipts and disbursements.

Abstract Account of Receipts and Disbursements of the Jute Warehouse Fund for the year 1890-91.

DISTRICT ROAD FUND.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

No. 1900R.C.

Dated Calcutta, the 11th July 1891.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. $\frac{L.F.}{368}$, dated 27th June 1891, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st March 1891.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the fourth quarter of the year 1890-91 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette.*

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to the Commissioners of the Rajshahye, Bhagulpore, Chittagong, and Chota Nagpore Divisions; to the Superintending Engineers of the Eastern and Western Circles; and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal.

F. J. JOHNSTONE,

Joint-Secy. to the Govt. of Bengal.

C. R. KIERNANDER,

Offg. Accountant-General, Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 11*th July,* 1891.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
	Burdwan Divn.		
1	Burdwan July 11, '91 Culna ... Cutwa ... Raneegunge ...	7·35 5·87 3·63 2·85	Weather—seasonable. Jute, sugarcane, and *aus* paddy doing well. Rain has done much good. Transplantation of *aman* paddy going on. Prices of common rice:— Srs. Sudder ... ... 17½, Culna ... ... 15, Cutwa ... ... 16½, Raneegunge ... ... 16 } per rupee.
2	Baukoora ,, 11, '91	4·86	Weather—hot and cloudy. The rainfall of the week has facilitated transplanting of paddy. More rain wanted for ploughing and transplantation. Sugarcane doing well. Another flight of locusts passed over the district on the 6th. Prices of common rice:— Srs. Sudder ... ... 18½, Bishenpur ... ... 17½ } per rupee.
3	Birbhum ,, 11, '91 Rampore Haut ...	2·11 4·53	Weather—cloudy. Rain still rather partial. The north of the district has now had a week of good rain, but more rain is very much needed. Flights of locusts passed along the course of the Adjai on the 6th, 7th and 8th instant. They settled for a few hours in a few places and there did some little damage to rice seedlings. Prices of common rice stationary at 16 to 20 seers per rupee.
4	Midnapur ,, 11, '91	0·33	Weather—rainy, especially in Ghatal, Tumluk, and Contai. Cultivation doing well. Locusts have done damage in parts of Sudder subdivision; seen in large numbers at Ghatal. Prices of common rice:— Srs. Sudder ... ... 18, Contai ... ... 17, Tumluk ... ... 16, Ghatal ... ... 17 } per rupee.
5	Hooghly ,, 11, '91 Jehanabad ...	3·02 7·91	Weather—cool and occasionally cloudy. Transplantation of *aman* has commenced. *Aus* and jute doing well. Prices of common rice:— Srs. Sudder ... ... 14, Serampore ... ... 15, Jehanabad ... ... 16 } per rupee.
6	Howrah ,, 11, '91 Uluberia ...	1·71 1·67	Weather—showery. Paddy and jute crops going on favourably. Transplanting in progress. Price of coarse rice 14½ to 15 seers per rupee.
	Central Districts.		
	Presidency Divn.		
7	24-Perghs. July 14, '91	1·37	Weather—cloudy and hot by turns with showers of rain. *Aus* paddy and jute thriving. Sugarcane doing well. Rain urgently required in the Sudder and Diamond Harbour subdivisions for *aman* paddy. Transplantation of *aman* commenced in low lands. Common rice sells at from 14½ to 16 seers per rupee.
8	Nuddea ,, 11, '91 Kushtea ... Meherpur ... Chuadanga ... Ranaghat ...	5·12 3·13 4·7 3·64 4·23	Weather—seasonable; 2·77 inches of rain fell at Krishnaghur on Sunday last (5th). Rain has done much good to *aus* paddy. Jute and sugarcane doing well. Indigo manufacture commenced. Meherpur subdivisional officer reports, "Locusts passed on Monday last, eating indigo and a few leaves, but not touching the paddy. Comparatively few only alighted, and those too went on after a light refreshment, but little damage was done. They were red in colour and apparently of the 'acridum peregrinum' species."
9	Khoolna ,, 11, '91 Bagirhat ... Satkhira ...	3·97 4·83 3·35	Weather—rainy. Prospects of all crops (*aus*, jute, sugarcane, and *aman*) much improved by the rain which has fallen.
10	Jessore ,, 11, '91 Jhenidah ... Magurah ... Narail ... Bongong ...	3·82 2·53 4·47 5·13 4·42	Weather—seasonable. Recent rain very beneficial to standing crops. Prospects favourable. Indigo manufacture commenced.
11	Murshedabad ...	......	Report not received.
	Rajshahye Divn.		
12	Dinagepur ,, 11, '91 Thakurgaon ...	8·19 14·27	Weather—hot and cloudy. Transplantation in progress. Prospects favourable. Locusts passed through the head-quarters; extent of damage not reported. Price of rice unchanged.
13	Rajshahye ,, 11, '91 Nattore ... Nowgong ...	1·81 3·10 6·17	Weather—seasonable. *Aus* and *aman* both coming on well. Locusts have visited the district in numbers, but the harm they have hitherto done is slight.
14	Rungpur ,, 11, '91 Nilphamari ... Gaibanda ... Kurigram ...	12·86 13·94 12·58 12·87	Heavy and nearly continual rain has fallen throughout the week. *Aus* harvest progresses; outturn will be slightly below the average. Much damage has been done in lands lying along the banks of rivers by flood. *Aman* rice has suffered in places from the same cause. Jute has been sown to a comparatively limited extent this year, and the crop will be under average.
15	Bogra ,, 11, '91 Sherpur ... Nowkhilla ...	4·05 1·80 2·45	Weather—very hot and damp. All crops are thriving. Land is being prepared for the transplantation of *aman* rice, which has begun in a few places. More rain would do good. Common rice is selling at 17 seers a rupee. Locusts passed across the district, near the middle, on the 8th instant, from south to north, and did slight damage.
16	Pubna ,, 11, '91	3·10	Weather—hot. More rain wanted for *aus* paddy and jute. *Aman* paddy doing well. Rivers rising. Price of rice and jute stationary. Fodder sufficient.
17	Darjeeling ,, 11, '91	5·53	Weather—rainy. Jute, *bhadoi*, and Indian-corn doing well. *Haimanti* paddy is being transplanted in some parts of the district.
18	Julpigoree ,, 11, '91	5·12	Weather—rainy. Transplanting of *haimanti* paddy going on. State of *bhadoi* and jute still good. A flight of locusts passed over the civil station between 9 and 11 a.m. on the 10th. Prices remain unchanged.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*			
	Eastern Districts.		
	DACCA DIVN.		
19	Dacca July 11, '91	7·11	Weather—seasonable. *Aus* paddy and jute thriving; prospect of the former appears to be good and that of the latter fair. Cheapest rice sold at 14 to 16 seers per rupee.
20	Furreedpur „ 11, '91	4·45	Weather—seasonable. State of *aus*, *aman*, jute, and sugarcane fair. Rivers rising fast. Price of rice stationary.
21	Backergunge „ 11, '91	8·78	Weather—seasonable. Prospects of crops good. Common rice selling at from 13 to 18 seers per rupee.
	Perozepur ...	5·34	
	Putuakhali ...	4·32	
22	Mymensingh „ 11, '91	5·88	Weather—rainy. *Aus* crop is being harvested. Transplantation of *aman* going on. Outlook of jute crop not favourable in most parts of the district. Common rice sells at 13 seers a rupee.
	CHITTAGONG DIVN.		
23	Chittagong „ 11, '91	23·14	Heavy rain during the greater part of the week. Sowing and ploughing of *aus* retarded in consequence of heavy rain. It has suffered first from drought and now from floods. Damage cannot yet be estimated. Prices have risen slightly.
24	Noakholly „ 11, '91	5·53	Weather—rainy every day but 7th. The rain has improved prospects, and prices have fallen. *Aus* nearly ripe. *Aman* being transplanted.
25	Tipperah „ 11, '91	4·28	Weather—seasonable; wet, cloudy and cool. *Aus* being harvested; jute being cut. *Aman* and jute doing well. Prices stationary.
26	Chittagong Hill Tracts. ...	......	Report not received.
BEHAR.			
	PATNA DIVN.		
27	Patna „ 11, '91	2·05	Weather—hot and cloudy. *Bhadoi* and paddy transplantation in progress. Locusts are reported to have appeared and done some damage to the standing crops in all subdivisions (including Sudder) except Barh. Prices generally stationary.
	Barh ...	5·27	
	Behar ...	10·72	
	Dinapur ...	1·64	
28	Gya „ 11, '91	2·73	Weather—hot. Sowing of paddy and transplanting of *marua* going on. Sugarcane doing well. Slight damage from locusts reported from Nawada subdivision. Prices almost stationary.
29	Shahabad „ 11, '91	1·22	Weather—hot with strong west winds which changed on 10th to east. In Arrah sufficient rain has fallen for *bhadoi* sowings. In Sasseram, Buxar, and Bhabuah very little rain has fallen and more is very urgently needed. Locusts have twice visited Arrah and done some damage during the week. Prices stationary.
	Buxar ...	0·3	
	Bhabuah ...	1·16	
30	Durbhanga „ 11, '91	2·03	Weather—cloudy and occasionally close. Transplantation of paddy and *marua* progressing, but more rain wanted. *Bhadoi* sowings have germinated well, but much injury appears to have been done by locusts which appeared during the week; extent of damage not yet ascertained. Prices remain stationary.
	Madhubani ...	3·08	
	Somastipur ...	7·26	
31	Mozufferpur „ 11, '91	3·55	Heavy rain in the first part of the week. West wind for two days; easterly winds latterly. *Bhadoi* sowings and transplanting of paddy continue. Flights of locusts reported from all parts, but little damage has been done by them.
	Hajipur ...	3·47	
	Sitamarhi ...	4·32	
32	Sarun „ 11, '90	0·52	Weather—hot and sultry. Rain in places, but very little. Rain wanted for all crops. Locusts are doing damage locally in many places. Indigo manufacture in full swing everywhere.
33	Chumparun „ 11, '91	2·71	Weather—cloudy and overcast throughout the week; rainy at times. Transplantation of paddy and manufacture of indigo are progressing. *Bhadoi* germination coming on well. Prices stationary.
	Bettiah ...	3·57	
	BHAGULPORE DIVN.		
34	Monghyr „ 11, '91	1·47	A break in the rains since 6th instant and westerly winds and very oppressive weather prevailed; to-day (11th) wind has turned to the east. 14 annas of *bhadoi* reported to have been sown in Begusserai and 12 annas in Jamui. Locusts still in many parts of the district, but the damage is generally less than was anticipated.
	Beguserai ...	2·70	
	Jamui ...	4·78	
35	Bhagulpur „ 11, '91	4·26	Weather—good rain early in week; latterly fine and hot. Rain has improved prospects generally. *Aghani* paddy is being transplanted. Damage is still being caused by locusts. Price of common rice 15 seers 2 chittacks per rupee.
36	Purneah „ 11, '91	2·31	Rain light at head-quarters; there are now intervals of hot sunshine. For the head-quarters subdivision at least 14 annas of the usual area have been sown with *bhadoi*. That crop and jute have been doing well, but the locusts have spread north to both Arrareah and Kishengunge and have damaged jute as well as *makai* and *marua* to some extent.
	Kishengunge ...	4·75	
	Arrareah ...	5·61	
37	Maldah „ 11, '91	2·64	Weather—cloudy and rainy with breaks at times. Prospects of all standing crops good, but some slight damage to *bhadoi* in Nawabgunge, and to mulberry, indigo and *makai* in Sudder and Rattua thannahs, has been done by locusts. Common rice selling at from 14 to 19 seers a rupee.
	Chanchal ...	5·21	
	Shibgunge ...	4·73	
38	Sonthal Pergns. „ 11, '91	2·61	Weather—cloudy and sultry. Prospects fair. Rain of last week has greatly benefited paddy seedlings and young *janera*. People are very busy preparing ground for transplantation; another shower just now will greatly help this. Several small flights of locusts in Dumka, Deoghur, Pakour, and Rajmehal subdivisions; they have done some injury to young paddy and *janera*, but indigo is reported to have been damaged to a considerable extent. In Godda there have been several flights of locusts since the 19th, and much damage has been done to the early *janera* and paddy seedlings.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	39	Cuttack, July 11, '91	2·42	Weather—cloudy and cool. *Beali* and *sarad* rice doing well, but in some parts sowing not yet completed. More rain still wanted.
	40	Pooree „ 9, '91 Khoorda ... Banpur ...	0·24 0·69 0·17	Weather—cloudy with drizzling showers of rain. More rain wanted for winter rice. Miscellaneous crops doing well. Price of common rice stationary.
	41	Balasore „ 11, '91	0·61	Weather—cloudy, but almost rainless. Sowings of *beali* rice 16 annas in Bhadrak, 14 annas in Sudder. Rain much wanted in Sudder subdivision. Locusts have made their appearance in the centre of the district.
CHOTA NAGPORE				
South-West Frontier Agency.				
Chota Nagpore Divn.	42	Hazaribagh July 11, '91 Giridih ...	4·37 4·14	Weather—wet and seasonable. Cultivation and sowing in progress satisfactorily. Damage done by locusts only temporary. Prices stationary.
	43	Lohardugga „ 11, '91 Palamow (up to 6th July)	2·08 5·22	Weather—cloudy and hot. Ploughing continues. More rain wanted in head-quarters subdivision. Prices steady.
	44	Singhbhoom „ 11, '91	1·48	Weather—seasonable. Crops doing well. Locusts are still in the district, but are doing no appreciable harm.
	45	Manbhoom „ 11, '91 Govindpur ...	2·07 4·23	Weather—very rainy and cool. Ploughing operations in full swing. Some damage reported to have been done to crops by locusts in vicinity of Purulia, Topchanchi, and Tundi. Price of common rice from 15 to 20 seers per rupee.

Published for general information.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; lr, lightning reflection.

C. Little,

For Meteorological Reporter to the Govt. of India.

Meteorological Office, Govt. of India;

Calcutta, the 13th July 1891.

Meteorological Report of the Province of

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1891.

During the first half of June ordinary hot weather conditions usually prevail over the greater part of the province, the chief features being clear skies with moderate humidity and high temperature. But the moist current from the Bay of Bengal beginning in Burma some time in May and passing northwards is deflected by the Assam hills, so that in the north-east corner of Bengal, and in the northern part of East Bengal, heavy rain continues to fall from the beginning of June. The dry hot weather remains unchanged generally till the commencement of the rainy season, which usually sets in about the second week in the month, and may commence either as a wave of moisture-laden winds advancing over the province, or in many years the rains are brought up by the formation of disturbed weather in the Bay, when somewhat suddenly the sky becomes cloudy, and hot moist weather is general in the lower districts, till the disturbance, crossing the coast, moves in a north-westerly direction, giving heavy rain along its course. After its passage the rainfall area gradually extends, and rain becomes general in all districts. Thus frequently the change from the hot weather to the rains is clearly defined by the commencement of depression in the north of the Bay, but in other years the passage of the hot season into the rainy season is not sudden, but more of a gradual nature, so that it is sometimes difficult to assign any exact date for the commencement of the rains.

The meteorology of June has been most unusual, and the monsoon rains which generally commence on an average date of about the 12th to the 15th, did not this year set in till about the 27th or 28th, and were thus about a fortnight later than usual. On the other hand, there had been very unusual rain in May, as mentioned in the report for that month, and this continued partly into June, so that the lateness of the monsoon and the consequent deficiency of rainfall has been partly counterbalanced by the effects of the unusual meteorological conditions of May.

At the close of May a feeble and diffused cyclonic storm which had formed in the Bay, had advanced in a northerly direction towards the head of the Bay, and it had completely broken up on passing inland. The small storm brought up with it a distinct advance of monsoon winds, and thus at the commencement of June the monsoon winds were blowing strongly over practically the whole Bay, and were even penetrating to a considerable extent inland, and thus at this period conditions in Bengal were more or less of monsoon character. For the first week of June the conditions in Bengal remained somewhat disturbed, pressure varying rather rapidly, while there was also evidence of an advance of westerly winds taking place over the west of the province, gradually driving back the moist easterly winds or monsoon winds which had previously been blowing, and thus a certain amount of interaction was taking place between the two opposing wind systems, and as a consequence of these actions for the first week of June moderate to heavy rain was received in all the divisions of Bengal except Orissa, where the falls were very small.

The second week of June, however, witnessed the gradual and almost complete withdrawal of the rain-bearing current or monsoon winds, and the practical re-establishment of hot weather conditions in Bengal and Behar, and by its close there was practically no general rainfall in the province at all, and the only rain reported was in and near the hills of North Bengal. During this withdrawal of the moist winds from Bengal, the meteorological conditions in the Bay also underwent a distinct change. Wind directions at the west coast stations and in Burma became very strongly westerly, while in Arakan and at Akyab they became more or less easterly. This apparently pointed to the fact that there was circulation of winds or a kind of whirl commencing off the Arakan coast which was sweeping the monsoon winds over Burma, and hence preventing them from reaching the head of the Bay. This change took place shortly after the close of the first week of June, and the rainfall of Bengal in the second week of June at once became largely in defect of the amounts usually received in this week, the defects ranging from about 15 per cent. in North Behar and 20 per cent. in East Bengal to about 60 per cent. in Orissa and Chutia Nagpur.

In the third week of June ordinary hot weather conditions obtained; there was an almost complete absence of rain except over parts of East and North Bengal, cloud proportion was comparatively small, pressure was rather above the normal, while temperature was abnormally high, and the excessive temperature was also accompanied by a very high humidity over the greater part of the province. In the Bay the conditions throughout the week remained practically unchanged. The strength of the monsoon winds blowing in the south and centre of the Bay was very considerable, particularly towards the close of the week. The winds, however, blowing along the greater part of the Madras coast and also at the stations in Burma were in all cases unusually strongly westerly and at many stations due west, showing that the monsoon current was passing towards Burma instead of towards the head of the Bay. In addition to this, at Akyab, almost throughout the week, wind was more or less easterly. This, taken in connection with the wind directions on the Pegu coast, pointed to the continued existence of the slight whirl or cyclonic circulation of winds over the sea area off the Arakan and West Pegu coasts, which would naturally sweep the monsoon current travelling up the east coast of [the Bay towards Burma and to the east of Assam. Almost precisely similar conditions to these existed in June 1888, when also the setting in of the

rains was unduly delayed until almost the close of the month. In that year the rains only set in over Bengal when the small whirl off the Burma coast disappeared on about June 27th or 28th.

In the fourth week of the month the conditions in Bengal remained practically unaltered, and weather was of ordinary hot weather character up till the 26th. There was an almost complete absence of rain in all districts except over parts of East and North Bengal; cloud proportion also remained lower than usual, pressure was rather above the normal, and temperature continued abnormally high, excess amounts of from 15° to 17° above the normal in the case of the day temperatures being registered, while humidity also was decidedly high over by far the greater part of the province. In the Bay also the abnormal conditions described in the previous paragraph remained practically unchanged up till the 25th, when the wind circulation off the Arakan coast disappeared, and winds became southerly in Burma and Arakan, and hence it became possible for the monsoon current to again advance northwards up the Bay to Bengal, instead of being steadily deflected towards the east of the Bay and over Burma.

The monsoon current indeed commenced to give rain from the 27th in Bengal, accompanied at many stations by slightly stormy weather, and on the morning of the 28th fairly heavy general rain was reported from Orissa, South-West and East Bengal. On this day the current advanced further inland, and on the 29th rain was reported generally over the whole province, and at some stations particularly heavy falls were received, and again on the 30th moderate to heavy rain was reported in almost all districts.

In this year, therefore, conditions were very anomalous from about the 7th up to the 25th June in the Bay, for though a fairly strong monsoon was blowing over the south of the Bay, it was unable to advance up the Bay towards Bengal, but passed mainly over Lower Burma and Upper Burma. That province has therefore been receiving copious rain, while Bengal has received a rainfall which is roughly forty per cent. in defect of the normal.

It is usual in the monthly report for June to compare the strength of the monsoon current with the average strength of former years, but this year owing to the delay in the establishment of the monsoon current at the head of the Bay, the comparison is of less value than usual. The only way of comparing the strength of the monsoon current in different years is by means of the wind velocity, and the accompanying table contains the wind velocities in June at the coast stations from Diamond Island round to Gopalpore, as well as of a few stations near the coast line, and in the table these velocities are compared with the normal values for June. At practically all the coast stations from Diamond Island round to the north-west angle of the Bay wind velocities have been below their normal values, but at False Point and Gopalpore there has been an excess in the wind strength. The figures are not very conclusive, but they tend to show that the winds blowing over South Bengal have been much lighter this year than usual:—

Stations.	Actual average wind velocity in June 1891.	Normal wind velocity in June.	Variation of actual for June 1891 from normal.
	Miles per day.	Miles per day.	
Diamond Island	171	207	— 36
Akyab	84	97	— 13
Chittagong	142	152	— 10
Dacca	197	152	+ 45
Jessore	107	117	— 10
Calcutta	137	141	— 4
Saugor Island	428	423	+ 5
Cuttack	85	97	— 12
False Point	348	309	+ 39
Gopalpore	428	314	+114

Pressure.—The mean pressure for the first week of June was in excess of the normal, but the variations were considerable in different districts and at neighbouring stations. Excess pressures of from five to eight hundredths of an inch were reported in most districts, except Orissa, but in that district the defect was only 0·02″. In the second week pressure fell for six days in succession, and the mean pressure was below the normal by from 0·05″ to 0·08″, the defects being smallest in the west of the province and largest in Assam. In the third week pressure had become again in excess of the normal, the average excess equalling about 0·03″, but generally the excess pressure was largest at the western and south-western stations and smallest in the hills and along the foot of the hills to the north of the province. In the fourth week the mean pressure was distinctly in defect of the normal, the amount generally averaging 0·02″ or 0·03″, and in this week the defects were fairly equally distributed except in South Behar, where the variation averaged 0·05″. These variations, it will be seen, to a great extent neutralize each other, and consequently the mean pressure for the month has varied very slightly from the normal, the variations being generally not more than one or two hundredths of an inch, and at the majority of stations pressure has been in very slight defect, though at a few stations in Orissa and Chutia Nagpur slight excess

pressure has been registered. In Assam pressure has been in defect by an average amount of 0·014."

Temperature.—In the first week of June, owing to the unusual rainfall the mean temperature for the week was in defect of the normal by nearly 2°. In the second week temperature continued rather largely in defect at first, but towards its close it was rising rather rapidly, and the mean temperature of the province was still 1 1° below the normal. In the third and fourth weeks very high temperatures were reported, and in the case of the maximum temperature at several stations an excess of 17° was registered for several days, while excess amounts of about 10° were rather common, and the mean temperature of the third week was 3° in excess and of the fourth week 4° in excess in Bengal. In Assam, however, temperature was below the normal in the third week and 1·6° above it in the fourth. These variations have therefore again to a great extent neutralized each other, and the mean temperature of the province of Bengal for the month has been only about 1° in excess of the normal, but the excess has been mainly confined to Orissa, South-West Bengal, and South Behar. In Assam, on the other hand, a slight defect of 0·5° has been registered.

Rainfall.—The total rainfall for the month has averaged thirteen inches in East Bengal, nine inches in North Bengal, eight inches in North Behar, about six inches in South-West Bengal and South Behar, nearly four inches in Chutia Nagpur and two and-a-half inches in Orissa. Compared with the normal amounts for the period, these fails respresent a defect of six per cent in North Behar, of seventeen per cent. in South Behar, of twenty-nine per cent. in East Bengal, of thirty-nine per cent in South-West Bengal, of forty-seven per cent. in North Bengal, of fifty-three per cent. in Chutia Nagpur, and of seventy-two per cent. in Orissa. Expressed in inches of rain, the defect in each district has been as follows :—North Bengal eight, Orissa six, East Bengal five, Chutia Nagpur and South-West Bengal four, and Behar one inch. The number of rainy days in the month has also been very much smaller than usual, and in Chutia Nagpur and Orissa in particular the number of days on which rain fell was only about half the number usual at this season.

The following table gives a condensed view of the rainfall of the various divisions of Bengal in June, and in each of the previous months of the present year, as compared with the normal values for the same periods. The figures given represent the actual falls expressed as percentages of the normal falls, and it will there be seen that while the rainfall of June was extremely deficient, that of May was exceptionally large, and in the previous four months January and April were months of deficient falls, while February and March were months of excessive precipitation. So heavy, indeed, have the falls been in February, March and May, that the general average fall for the first six months of the year is in all cases, except Orissa and North Bengal, in distinct excess of the normal:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	Actual rainfall of first six months of 1891 expressed as a percentage of the normal fall for the period.
Orissa	11	167	424	86	134	28	87
South-West Bengal ...	53	193	308	50	170	61	113
East Bengal	2	311	98	130	151	71	106
North Bengal	78	377	239	77	140	53	93
North Behar	171	233	590	19	172	94	128
South Behar	253	159	734	30	165	83	135
Chutia Nagpur	163	91	506	30	148	47	104

The falls for June have thus not only been very deficient generally over the whole province, but in exceptional districts rainfall has been almost absent. This is specially the case in the south of Orissa, where the Pooree and Cuttack districts have received falls which are only from ten to less than twenty per cent. of the normal falls, and the actual rainfalls only average about one inch. Extremely deficient falls are also reported from the districts of Lohardugga, Julpiguri, Chittagong, Burdwan, Balasore, Beerbhoom, Dinagepur, Rungpur, Purneah, and Singbhoom.

On the other hand, in the midst of these defects a few districts have been areas of unusually heavy precipitation, and thus falls considerably in excess of the normal values are reported from the districts of Mozufferpur, Sarun, and Patna, while falls are in slight excess in Dacca, Mymensingh, and Gya.

The following table gives full data for the comparison of the actual and normal rainfall of the month of June in all districts in the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance being made for the area which each represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal district rainfall as determined from the rainfall records of the past 18 years; the second column the district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in the district ; the third column expresses the

ratio of the actual district rainfall of the past month to the normal as a percentage, while the fourth gives the percentage variation or the difference of column three from 100 :—

Percentage Table for June 1891.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 11th of July 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th May 1891. Mean for district.	Since 16th May 1891. Normal mean.	Since 16th May 1891. Variation.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—......indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 14*th July* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 11TH OF JULY 1891.

On the last day of the previous week it was reported that a very feeble area of low pressure had commenced to form in the middle of the province near Berhampore and Furreedpore, and that the winds generally showed a distinct tendency to cyclonic circulation round this centre. Thus conditions had become decidedly favourable for moderate to heavy rainfall over the whole province. On the 5th of July, or the first day of the present week, pressure had fallen rapidly over the whole province, the fall in North Bengal and Behar equalling a tenth of an inch, while in the southern districts it was not more than three or four-hundredths of an inch. The lowest pressures on this day were reported from Rampore Beauleah, Bhagulpore, and Dinagepore, and thus the feeble low-pressure area had advanced in a northerly direction in the twenty-four hours from the 4th to the 5th. Winds continued to show a feeble cyclonic circulation with a centre near Bhagulpore. General rainfall, in many cases of large amounts, was reported over the whole province on the morning of the 5th, the rainfall being lightest and most local in Orissa; falls in excess of four inches were on this day registered at Jehanabad, Burdwan, Kotalpore, Harishpore, Dacca, Naraingunge, Kishoregunge, Gajol, and Balumat, while falls in excess of two and three inches were very numerous. On the 6th a rather large fall of pressure had taken place at Dhubri and Rungpore, while elsewhere the falls were smaller, and in some cases pressure was rising. The area of low pressure was not so well defined on this day, but it appears to have advanced over the west of Assam, and the lowest pressure was reported at Dhubri. The feeble cyclonic circulation of winds had quite disappeared and south-westerly and westerly winds had set in at almost all stations, except in Assam, where winds were north-eastorly. Again, on the morning of the 6th moderate to heavy rain was reported from almost every station in the province, the falls at some of the eastern and northern stations being exceptionally large; thus Satkanya (Chittagong district) reported 9·25 inches, Rangamati 6 inches, Culna 5·20 inches, and Raigunge 5·08 inches, and there were very numerous falls in excess of two and three inches. On the 7th the depression in North-East Bengal began to fill up, the rise at Dhubri and Rungpore exceeding a tenth of an inch, and the distribution of pressure became much more normal than it had been for some days, but winds, however, continued westerly and south-westerly over practically the whole province. On the 7th again general rainfall was reported in Orissa, East and North Bengal, Assam and parts of Behar, but the falls elsewhere were more local. Dhubri on this day reported 6·32 inches of rain, Bhowanigunge received 7·23 inches, Satkanya 8·44 inches, Rungpore 5·33 inches, Debigunge 5·40 inches, Ulipore 4·98 inches, and Bagdogra 4·78 inches. On the 8th the variations of pressure were small, and pressure continued generally rather largely in defect of the normal, while winds were also unchanged. Rain was received in almost the same districts as on the 7th, but the falls commenced to fall off in heaviness in all districts except East and North Bengal, where Dinhatta and Cooch Behar received between six and seven inches, Bagdogra more than five, and Satkanya a fall of no less than 14·63 inches. On the 9th the only change of importance was that pressure had fallen at the eastern stations, rather intensifying the defect over this area, and rainfall on this day became rather local, and in many cases much lighter, in all districts except North Bengal and Assam, and no exceptionally heavy falls were registered on this day. On the 10th conditions began to change more rapidly, and pressure fell in some cases in the centre and west of the province by almost a tenth of an inch. Winds therefore began to change also, and easterly winds commenced to set in at the eastern stations. On the 11th pressure had risen over the whole of Bengal, except at Saugor Island and the Orissa stations, and the lowest pressure in the province was reported at Saugor Island. A distinct cyclonic circulation of winds also set up round the north-west angle of the Bay, pointing to the existence of a slight depression over this area, and the depression, though in itself of little importance, was the centre of the wind circulation of the whole province, and winds, which on the 10th had been westerly and south-westerly over almost the whole province, became suddenly easterly and south-easterly. The amount of rainfall reported on the 10th and 11th, however, was generally small except in the districts in and near the hills of North Bengal.

In the Bay for almost the whole week the monsoon winds have been blowing decidedly strongly, the force amounting almost to a gale of wind on some days. It would, however, still appear that the wind directions continue to be rather more westerly than usual, and almost throughout the week heavy rain has been falling at the Burma stations.

Pressure—Has been unusually low almost throughout the week, and the mean pressure has been generally more than a tenth of an inch in defect. From the existence of the depression in the north of the province during a part of the week, that area has shewn pressure even more largely in defect of the normal than the remainder of the province, and thus the defect is from 0·16″ to 0·18″ at such stations as Dinagepore, Rungpore, Julpigoree, Sibsagar, and Dhubri; while, on the other hand, the defects in Orissa have been small, and at False Point and Cuttack they are less than a twentieth of an inch.

Temperature—Owing to the heavy rainfall in the early part of the week, temperature became decidedly low, and the mean temperature for the week has been in distinct defect of the normal in Orissa and South-West, East and North Bengal, though it has been in slight excess in North Behar and Chutia Nagpur. In South Behar the excess has been rather larger, and equals 2·5°. For the whole province the mean temperature for the week has been absolutely normal. In Assam a defect of 0·6° has been registered.

Rainfall—For the week has been in excess of the normal in all districts except Orissa, where the fall has been not very much larger than a third the usual amount. The excess

falls have been comparatively small in Chutia Nagpur, South Behar, South-West Bengal, and North Behar, where they are less than one inch; but in East and North Bengal the falls have been about four inches in excess, or considerably more than twice the normal. Falls averaging seven inches have been received during the week in East and North Bengal, about three inches have fallen in South-West Bengal, North Behar, and Chutia Nagpur, and two and-a-half inches in South Behar. In Orissa, on the other hand, the falls have equalled only about one inch.

Exceptionally heavy falls have been received in the following districts:—Burdwan, Nuddea, Jessore, Khoolna, Chittagong, Chittagong Hill Tracts, Dinagepore, Rungpore, Julpigoree, and Cooch Behar; while very defective falls have been received in Pooree, Balasore, Midnapore, and Singbhoom.

In Assam, Dhubri during the week has received 13·45 inches, Sibsagar 6·81 inches, and Silchar 4·50 inches of rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 11th of July 1891:—

Meteorological Divisions.	Temperature.						Rainfall.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 27th June 1891

BIRTHS.

THE total births registered during the week ending with Saturday, the 27th June 1891, in twenty-seven principal towns of Bengal, amounted to 384, and correspond to an annual rate of 18·6 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 2·4 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	17·4	13·5	17·5	16·1	16·8	16·2	18·6

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending—				Towns.	Weeks ending—			
	6th June 1891.	13th June 1891.	20th June 1891.	27th June 1891.		6th June 1891.	13th June 1891.	20th June 1891.	27th June 1891.

Dacca	11·7	14·3	16·2	13·0	Total ...	16·3	18·0	17·0	18·6

It will be seen that last week the highest birth-rate was returned from Monghyr (35·3) and the lowest from Purneah (3·4). No births were registered in the Jessore town.

DEATHS.

The total deaths registered during the week under review amounted to 648, and correspond to an annual rate of 31·4 per 1,000 of the population. The rate of the week is 7·6 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	21·9	20·1	23·2	28·4	25·4	23·8	31·4

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending—				Towns.	Weeks ending—			
	6th June 1891.	13th June 1891.	20th June 1891.	27th June 1891.		6th June 1891.	13th June 1891.	20th June 1891.	27th June 1891.

Bali	10·5	7·0	10·5	21·1	Mozufferpore	20·7	28·0	25·5	21·9
Krishnagar	3·8	7·6	9·5	17·0	Durbhanga	22·0	31·5	18·9	35·4
Ranaghat	12·0	12·0	18·0	12·0	Chupra	20·2	20·1	18·1	45·8
Santipore	8·8	5·2	...	1·7	Bhagulpore	38·1	45·0	25·9	40·4
Jessore	6·1	6·1	30·6	18·4	Monghyr	20·8	27·1	24·4	34·4
Rampore Beauleah	2·6	36·8	28·9	36·8	Purneah	34·6	6 9	13·9	6·0
Darjiling	44·5	44·5	7·4	96·3	Poori	33·6	14·7	27·3	33·6
Dacca	21·4	18·8	22·1	14·3	Total ...	22·9	23·9	23·1	31·4

According to the figures returned, the highest mortality occurred in the town of Darjiling (96·3) and the lowest in Santipore (1·7).

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per *mille.*	*Fevers.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Bhagulpore ...	... 24·4	Darjiling ...	... 74·1	Gya ...	... 20·5
Chupra ...	... 18·1	Rampore Beauleah	... 31·5	Burdwan ...	... 19·8
Gya ...	... 17·8	Gya ...	... 31·4	Hughli and Chinsurah	... 14·7
Patna City ...	... 12·6	Hughli and Chinsurah	.. 27·9	Chupra ...	... 13·1
Howrah ...	... 3·4	Comillah ...	... 27·0		

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 6·9 from cholera, against 4·4 in the preceding week; ·7 from small-pox, against ·4; 12·5 from fever, against 8·7; 3·2 from dysentery and diarrhœa, against 1·9; ·5 from injury, against the same ratio; and 7·6 from other causes, against 7·2 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	31·5	Christians ...	37·4	Under 1 year	... 231·3

CONTENTS.

RESULTS OF EXAMINATION OF CANDIDATES FOR APPOINTMENT AS DEPUTY MAGISTRATE-COLLECTORS AND SUB-DEPUTY COLLECTORS.

RESOLUTION.

APPOINTMENT.

Calcutta, the 20th July 1891.

READ—

The Resolution of 24th April 1889, laying down the principles of recruitment for the Subordinate Executive Service.

The Notification of the 16th September 1890, laying down the rules for the examinations to be held in 1891 of candidates for appointments as Deputy Collectors and Sub-Deputy Collectors.

The Notification of the 4th March 1891, fixing the dates of the examinations.

The reports of the Examiners.

The Notification of the 21st April 1891, appointing Messrs. Craven and Lucas, who had qualified in the examination, to be probationary Deputy Magistrate-Collectors

The Notification of the 1st May 1891, selecting certain candidates to be probationers of the Executive Branch of the Provincial Service.

The Notification of the 2nd June 1891, selecting one of the candidates for appointment as Sub-Deputy Collector.

When the notification of the 16th September 1890 was issued, it was contemplated that only eight Deputy Magistrate-Collectors would be required during the year 1891, and it was proposed to select them as follows:—Four solely by competition, two from the candidates who appeared at the examination and obtained not less than one-third marks, and two by promotion from the grades of Special Deputy Collectors and Sub-Deputy Collectors.

2. The examination was held on the 23rd, 24th and 26th March at the Senate House of the Calcutta University. Fifty-six candidates appeared and were examined in papers set by the following gentlemen :—

Essay ...	... Mr. W. T. Webb, M.A., Professor, Presidency College.
Sanskrit ...	... Babu Nilmoney Mookerjee, M.A., Professor, Presidency College.

Latin ... ... English Language and Literature. Mental and Moral Science ...	Mr. H. M. Percival, M.A., Professor, Presidency College.
Persian	Shams-ul-ulama Moulvi Ahmed, Professor, Presidency College.
Mathematics	Mr. J. H. Gilliland, B.A., Professor, Presidency College.
Physics and Chemistry ...	Mr. A. Macdonnell, M.A., Professor, Sibpore Engineering College.
Law	Mr. H. H. Risley, B.A., C.S. „ C. M. W. Brett, Barrister-at-law; C.S.

On the result of this examination the following candidates were appointed on the 1st May last to be probationers of the Executive branch of the Provincial Service on a salary of Rs. 50 per mensem, and were posted to the head-quarters of the districts mentioned opposite to their names :—

1. Babu Rajani Prasad Neogi, M.A., Mymensingh.
2. „ Jnanendra Nath Chaudhuri, M.A., B.L., Jessore.
3. „ Rakhal Mohan Banerjea, M.A., Manbhum.
4. „ Jogendra Kumar Sinha, M A., Rajshahye.
5. Moulvi Mahomed Shamsuzzoha, B.A., Patna.
6. Babu Nayananjan Bhattacharji, M.A., Burdwan and afterwards Bankura.

3. Further experience has shown that the estimate made in September last was far below the mark. Owing to the large number of officers of the Imperial Service who have been drafted from this Province to Burmah and Assam, there are deficiencies in the *cadre* number of that Service especially during the leave season from March to October, and the Government of India have pointed out that when the number of members of the Imperial Service available for what are known as sub-divisional charges falls for the time being below the *cadre* number, the Local Government has power to second the officers on deputation by appointing Deputy Magistrate-Collectors in their places, up to the number required.

Besides the officers drafted to Burmah and Assam, several officers of the Imperial Service have lately been employed upon settlement duty in this Province, whom it is necessary to second in like manner.

Further, there have been more casualties in the ranks of the Provincial Service than were anticipated in September last.

4. Consequently the Lieutenant-Governor has found that the number of officers required for the Provincial Service to fill up the permanent and temporary vacancies this year is at least 26 instead of 8, as was anticipated ten months ago. In order to meet this deficiency, the Lieutenant-Governor appointed early in the year 17 gentlemen to be probationary Deputy Magistrate-Collectors on Rs. 200 per mensem, of whom eight were candidates who had been selected at the examination last year, and nine were Special Deputy Collectors or Sub-Deputy Collectors promoted. In addition to these, Mr. T. J. L. Lucas, B.A., and Mr. J. A. Craven, who were among the candidates selected on the result of the examination held in March last, were directly appointed to be probationary Deputy Magistrate-Collectors on Rs. 200 per mensem with the view to their eventually taking the places of two of the European officers in the Sonthal Pergunnahs who are expected to retire within this year under the 55 years' rule.

5. In spite of these appointments, there are still deficiencies in the *cadre* number of the Provincial Service, and the Lieutenant-Governor has decided upon appointing Mr. H. A. Lane, M.A., an educational officer of approved character, to be a probationary Deputy Magistrate-Collector on Rs. 200 per mensem with a view to his eventually filling up another vacancy in the Sonthal Pergunnahs in the place of an officer who will retire next year. Mr. Lane will retain his lien on his appointment in the Education Department whilst in the probationary grade. The six gentlemen named in paragraph 2, who were appointed as probationers on 1st May last, will also be at once appointed to be probationary Deputy Magistrate-Collectors on Rs. 200 per mensem. They will for the present continue at the stations where they are now posted, and will each be vested with the powers of a Magistrate of the third class. As the reports concerning these six probationers received from the districts in which they have been stationed during the short time they have been on probation have been very favourable, the Lieutenant-Governor has appointed them without waiting for any further period of training. They are liable to reversion at the end of the leave season, though this is unlikely if they continue to give satisfaction. At the same time, Sir Charles Elliott thinks that

in future officers selected on the result of examination should pass a longer period of probation than has been found possible this year, and in order to meet the requirements of the coming year, he has decided to appoint as probationers of the Executive branch of the Provincial Service on a salary of Rs. 50 per mensem the following gentlemen, numbered 1 to 12, who at the recent examination stood next in order of merit after the first four, and those numbered 13 to 16 from among the remainder who obtained upwards of one-third marks and appear to be otherwise qualified, viz.—

1. Babu Jogendra Kumar Ghose, M.A.
2. " Rakhal Das Chatterjea, M.A.
3. " Soshi Bhushan Mukherjea, B.A.
4. " Sarat Chunder Sen Gupta, B.A.
5. " Suresh Chunder Sinha, M.A.
6. " Srigopal Bhattacherjea, M.A.
7. " Charu Chunder Chatterjea, M.A., B.L.
8. Babu Syam Lal Gupta, M.A.
9. " Fakir Chunder Chatterjea, B.A.
10. " Bhabataran Chattopadhya, B.A.
11. " Ashutosh Banerjea, B.A.
12. " Suresh Chunder Ball, M.A.
13. Moulvi Ashfuq Hossein, M.A.
14. Babu Satish Chunder Sen, B.A., B.L.
15. Moulvi Abul Mahmood, B.A.
16. Khondkar Fazlal Huq, B.A.

Separate orders will be passed posting these gentlemen to districts.

6. The examination for Sub-Deputy Collectorships took place at the same time as that for the Provincial Service, and 34 candidates, restricted to the following classes, as notified in paragraph 9 of the notification of the 16th September 1890, appeared—

(a) those whose names had been registered as candidates for appointment as Sub-Deputy Collectors;

(b) those registered candidates for appointment as Deputy Collectors who wished to compete in the examination for Sub-Deputy Collectorships;

(c) candidates selected from the list of applicants for registration for appointment as Sub-Deputy Collectors.

7. The result of this examination was not satisfactory. The marks obtained by almost all the candidates were low in the aggregate, and a scrutiny of the details showed no marked proficiency in any single subject. After a careful consideration of the papers set at this examination and the marks obtained, the Lieutenant-Governor came to the conclusion that the only candidate who showed such proficiency as would justify his selection for appointment as a Sub-Deputy Collector was Babu Kunja Behari Gossami, B.L.; he was therefore appointed on the 2nd June last. The Lieutenant-Governor regrets his inability to appoint any of the others. As several of the candidates for Deputy Magistrate-Collectorships who had obtained upwards of one-third marks, but who have not been selected to be probationers for the Provincial Service, showed considerable proficiency, the Lieutenant-Governor has decided to select three of them to be appointed at once temporary Sub-Deputy Collectors, and eight to be probationers in training for Sub-Deputy Collectorships on Rs. 30 per mensem.

8. The three gentlemen who have accepted the offer of appointment as temporary Sub-Deputy Collectors are—

1. Babu Annada Churn Gupta, B.A.
2. Babu Lalit Charn Das Gupta, B.A.
3. Babu Ashutosh Chatterjea, M.A.

In addition to these in order to fill up two other vacancies, His Honour promotes two canungoes, the first of whom passed the Native Civil Service Examination in class II in 1874, to be temporary Sub-Deputy Collectors:—

1. Babu Rajani Kanta Mukerjea, now employed at Kandi, Murshidabad.
2. Mr. T. F. Carter, now employed at Bankipur.

The eight gentlemen selected to be probationers for Sub-Deputy Collectorships, who have accepted the offer of these posts, are—

1. Babu Kedar Nath Banerjea.
2. " Jotindra Mohan Sinha, B.A.
3. " Akshoy Kumar Sen, B.A.
4. " Suresa Chunder Sarkar, M.A.
5. Babu Brajendra Nath Roy, B.A.
6. " Grish Chunder Dutt, B.A.
7. " Narendra Kumar Choudhury, B.L.
8. Babu Nisikanta Chattopadhya, B.A.

Orders posting these gentlemen as temporary Sub-Deputy Collectors and probationers will be issued separately.

ORDER.—Ordered that the above Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

JOHN EDGAR,

Chief Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 18th July, 1891.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		*Western Districts.*		
BURDWAN DIVN.	1	Burdwan July 18, '91	2·04	Weather—seasonable. Crops doing well. Transplanting has already begun. More rain wanted in Raneegunge. Prices of common rice:— Srs. Ch. Sudder ... ... 18 0; Cutwa ... ... 15 11; Raneegunge ... ... 16 0 } per rupee.
		Raneegunge ...	1·98	
		Cutwa ...	2·91	
	2	Baukoora „ 18, '91	1·04	Weather—cloudy with occasional light showers. Transplantation of *aus* and *aman* in places going on. More rain wanted. Sugarcane doing well. Another flight of locusts, more numerous than the previous ones, passed over the Sudder station from south-west to north-east. Injury to crop, if any, is slight. Common rice selling at 17½ seers per rupee at Sudder as well as Bishenpore.
	3	Birbhum „ 18, '91	4·79	The rainfall in the Sudder has been good, and the fall for the season has been fair, *i.e.*, some 15 inches to date instead of a normal of about 18 inches. In the Rampore Hât subdivision the rainfall has been very deficient, only about 7 inches for the season. Rain is very urgently wanted there. Price of common rice still steady at 16 to 20 seers per rupee.
		Rampore Haut ...	0·29	
	4	Midnapur „ 18, '91	4·15	Weather—rainy and sultry. Early rice doing well, but rain still badly wanted everywhere. Pirces of common rice:— Srs. Sudder ... ... 18; Contai ... ... 18; Tamluk ... ... 16; Ghatal ... ... 12 } per rupee.
	5	Hooghly „ 18, '91	Figures not given	Weather—cool and occasionally cloudy. Transplantation of paddy going on. More rain wanted in places. *Aus* and jute doing well. Prices of common rice:— Srs. Sudder ... ... 14; Serampore ... ... 14; Jehanabad ... ... 17 } per rupee.
		Serampore ...	0·50	
		Jehanabad ...	0·47	
	6	Howrah „ 18, '91	0·55	Weather—showery and hot. Paddy and jute crops doing well. Transplanting of paddy plants in progress. Price of common rice 14¼ seers per rupee.
		Uluberia ...	1·24	
		Central Districts.		
PRESIDENCY DIVN.	7	24-Perghs. July 21, '91	0·90	Weather—cloudy and hot with intermittent showers. Jute, sugarcane and *aus* paddy doing well. Transplantation of *aman* paddy forward in the south but backward in the north. Rain much wanted in the Sudder subdivision and throughout the district, except in the Diamond Harbour subdivision, for *aman* paddy. Price of common rice from 13¾ to 16 seers per rupee.
	8	Nuddea „ 18, '91	3·18	Weather—seasonable. Prospects of *aus* good. Harvesting has commenced. Jute and sugarcane doing well.
		Kushtea ...	0·81	
		Meherpur ...	1·86	
		Chuadanga ...	1·94	
		Ranaghat ...	0·89

	17	Darjeeling „ 18, '91	5·74	Weather—rainy. *Bhadoi* getting ripe. Transplantation of *haimanti* paddy continues. Crops damaged to a certain extent by locusts in some parts of the district.
	18	Julpigoree „ 18, '91	1·42	Weather—very hot. More rain wanted. Prospects of *bhadoi* rice and jute not favourable. Some damage has been caused by locusts in some portions of the district. Transplanting of *haimanti* paddy going on. Common rice selling at 13 seers per rupee.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*			
	Eastern Districts.		
	DACCA DIVN.		
19	Dacca July 18, '91	0·63	Weather—seasonable. ***Aman*** rice thriving. Harvesting of *aus* rice continues. Prospect of jute fair and that of other crops good. Cheapest rice sold at from 14 to 16 seers per rupee.
20	Furreedpur „ 18, '91	6·46	Weather—seasonable. Prospect of *aus*, *aman* and sugarcane fair. Rice selling at 15, 16, and 17 seers per rupee respectively at Goalundo, Sudder, and Madaripore.
21	Backergunge „ 18, '91	1·52	Weather—seasonable. Prospects of crops fair. Common rice selling at from 13 to 18 seers a rupee.
	Perozepur ...	3·16	
	Patuakhali ...	4·95	
	Bhola .	3·29	
22	Mymensingh „ 18, '91	1·12	Weather—very hot and sultry. Prospects of jute and *aus* not favourable. Common rice sells at 13 seers a rupee.
	CHITTAGONG DIVN.		
23	Chittagong „ 18, '91	4·27	Weather—seasonable. Standing crops damaged to a certain extent by late heavy rain and flood. Ploughing for *aman* and transplantation of *aus* continue. Prices have risen slightly.
24	Noakholly „ 18, '91	2·34	Weather—seasonable. Crop prospects fair. ***Aus*** reaping commenced. *Aman* being transplanted. Prices stationary.
25	Tipperah „ 18, '91	0·45	Weather—seasonable. ***Aus*** rice and jute are being harvested. ***Aman*** rice doing well. Prices stationary.
26	Chittagong Hill Tracts. „ 16, '91	2·77	Weather—cloudy with occasional showers. ***Jum*** paddy and cotton plants on hill tops doing well, but the same crops on river banks and low lands damaged by late flood. Lands are being ploughed for late rice. Common rice is being sold at 11 seers 6 chittacks per rupee.
BEHAR.			
	PATNA DIVN.		
27	Patna „ 18, '91	2·16	Weather—hot and cloudy. Transplantation of paddy going on. Prospects of *bhadoi* crops fair. Harvesting of *cheena* commenced. Prices of food-grains almost stationary.
28	Gya „ 18 '91	2·18	Weather—hot and cloudy. Sowing of paddy going on. Transplantation of *marua* in progress. Sugarcane doing well. Prices almost stationary.
29	Shahabad „ 18, '91	0·81	Weather—cloudy with occasional showers at head-quarters. *Arrah :—Bhadoi* being weeded and paddy sown. *Sasseram and Bhabuah :—Bhadoi* and paddy being sown. *Buxar :*—Except where canal water is obtainable, cultivation reported to have ceased. On the 16th, however, there was slight rain, ⅗ inch. The weather has the appearance of having set for rain, and should there now be general rain, there need be no anxiety. In consequence of the late monsoon, prices now show a tendency to rise.
	Buxar ...	0·08	
	Bhabuah ...	3·60	
	Sasseram ...	0·53	
30	Durbhunga „ 18, '91	2·84	Weather—cloudy. Transplanting of paddy in progress, but more rain wanted. Prospects of *bhadoi* crops fair. No material damage seems to have been done by locusts. Prices remain almost stationary.
	Somastipur .	0·04	
31	Mozufferpur „ 18 '91	1·59	Good rain everywhere, very heavy in the north. *Bhadoi* sowings not quite completed. Paddy and *marua* being transplanted. Prospects good. Locusts passed over every part of the district and did a little damage.
	Sitamarhi ...	5·30	
32	Sarun „ 18, '90	2·51	Heavy rain everywhere during last two days, weather being sultry previously. Rain has been very beneficial. Prospects of all crops, especially sugarcane, are excellent.
33	Chumparun „ 18, '91	2·90	Weather—cloudy and rainy since the 15th. Paddy transplantation continues. *Bhadoi* being weeded. Prices of food-grains stationary.
	BHAGULPORE DIVN.		
34	Monghyr „ 18 '91	0·88	Weather—hot and occasionally cloudy with showers of rain. Sowing of *bhadoi* crops nearly completed. More rain wanted to commence transplantation of winter rice.
35	Bhagulpur „ 18, '91	3·19	Weather—variable. Winter rice is being sown. Transplantation of *bhadoi* rice and *marua* almost finished. *Bhadoi* crops on the ground doing well, but more rain wanted. Locusts have to a great extent passed away. Price of common rice 15 seers 2 chittacks per rupee.
36	Purneah „ 18, '91	0·88	Weather—hot with occasional local and light showers. Rain now wanted both for *bhadoi* crops and for transplanting of *aghani* rice. In Arrareah subdivision damage by locusts to jute, *marua* and *makai* estimated at 4 annas. Jute crop in Kishengunge not good. Indigo prospects still very favourable.
	Kishengunge ...	0·47	
	Arrareah ...	0·12	
37	Maldah „ 18, '91	1·32	Weather—hot and cloudy at the beginning of the week; latterly bright with heavy showers. Harvesting of *bhadoi* rice going on in some places. Winter rice and jute plants thriving. A large flight of locusts visited the head-quarters on two occasions. A similar flight has been reported from almost all the thanas. Great damage has been done to indigo, *makai* and mulberry leaves. Damage done to other standing crops slight. Price of common rice stationary.
	Chanchal ...	1·56	
	Shibgunge ..	0·94	
38	Sonthal Perghs. „ 18, '91	1·89	Weather—cloudy with occasional light showers. Prospects have improved since last report. *Janera* sowings may be considered complete; about the usual area has been sown, and the crop is doing fairly well. Paddy seedlings are also doing well, though about an anna died from drought and injured by locusts. Transplantation of paddy has commenced on the low lands, but more rain is wanted for this purpose for the up lands. Small swarms of locusts are reported to be hovering in parts of the Dumka and Godda subdivisions.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	39	Cuttack July 18, '91	1·88	Sky overcast. Weeding of rice in progress. Rainfall still inadequate.
	40	Pooree „ 16, '91 Khoorda ... Banpur ...	0·31 0·73 0·41	Weather—cloudy with drizzling showers of rain. *Sarad* crop is still alive. Rain wanted badly. Miscellaneous crops doing well. Price of common rice from 21 to 27 seers per rupee.
	41	Balasore „ 18, '91	1·84	Weather—cloudy and close. Rainfall is still very deficient in the Sudder subdivision. *Beali* rice doing well in Bhadrak.
CHOTA NAGPORE				
South-West Frontier Agency.				
Chota Nagpore Divn.	42	Hazaribagh July 18, '91	1·59	Weather—cloudy and light rain. More rain badly wanted for the newly-sown crops.
	43	Lohardugga „ 18, '91 Palamow (up to 13th July)	1·30 2·03	Weather—cloudy and hot. More rain wanted in the head-quarters subdivision for transplanting low land paddy. Prices steady.
	44	Singbhoom ...	...	Report not received.
	45	Manbhoom „ 18, '91 Govindpur ...	6·12 0·52	Rain heavy in head-quarters, scanty in Govindpur. The rain will do much good. Transplanting operations have commenced and are being carried on vigorously. Price of common rice 15 to 20 seers per rupee.

Published for general information.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ⏜, dew.

In the weekly report from 21st to 27th June 1891 read "85·4" for "5·4" as the mean temperature of the 27th June 1891.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last [illegible] humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are [illegible] means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past [illegible] station in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 18th of July 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	District observations. Of week. Mean for district.	Of week. Normal mean.	Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th May 1891. Mean for district.	Since 16th May 1891. Normal mean.	Since 16th May 1891. Variation.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 21*st July* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 18TH OF JULY 1891.

At the close of the previous week a very slight area of low pressure had developed near Saugor Island, and this was accompanied by a distinct though feeble cyclonic circulation of winds, while over the remainder of the province a fairly strong easterly and south-easterly wind current was reported. On the 12th a very rapid increase of pressure had taken place, the increase equalling 0·16" to 0·18" and being smallest in Orissa. The area of minimum pressure therefore retreated southward from Saugor Island to Pooree and Gopalpore, round which there was again a feeble cyclonic circulation while easterly winds were blowing over the whole of Bengal. Fairly general rain was reported on this day in Orissa and the southern parts of Chutia Nagpur, but over the remainder of the province local showers only were received. The pressure changes on the 13th were very small, and the general distribution remained unaltered, while the winds also had undergone little change; but on this day rainfall became rather more general in South-West Bengal, though the falls in East and North Bengal, in Behar, and in Chutia Nagpur remained very light and local. On the 14th a rapid fall of pressure set in which was largest in the north of the province and smallest in Orissa, so that the area of low pressure over Orissa disappeared, and the lowest pressures were reported from the normal position in the west of Behar. With this changed pressure distribution winds became more southerly over the southern part of the province, though they still remained strongly easterly at the northern stations. On this day fairly general though light rain was received in Orissa and South-West Bengal and rather less general rain in East and North Bengal, but Behar and Chutia Nagpur continued almost rainless. On the 15th pressure had again fallen rapidly over the whole province, the fall being largest at the south-eastern stations, and pressure became largely in defect, particularly at the eastern and northern stations. With this new distribution of pressure westerly winds commenced to blow over Orissa, Chutia Nagpur, and the west of Behar, partially driving back the moist easterly current which was previously blowing, and on this date the rainfall reported in Orissa, South-West Bengal, and Chutia Nagpur was light and local, but in East and North Bengal and North Behar heavier and more frequent falls were received. On the 16th pressure continued to fall in South-East and East Bengal, though it was rising elsewhere, and on this day there was a feeble but distinct low-pressure area formed, represented by such stations as Dacca, Mymensingh, Bogra, and Berhampore. The westerly and south-westerly winds on the 16th had extended over South Bengal, but to the north of the feeble depression winds were south-easterly and easterly. Conditions were hence much more favourable for rainfall, and on the 16th general and rather heavy rain was registered in South-West, East, and North Bengal, North Behar, Chutia Nagpur, and parts of South Behar, though Orissa was almost rainless. On the 17th there was a rather rapid increase of pressure, the rise being largest over the area previously occupied by the feeble depression, which hence practically filled up. Conditions, however, were still favourable for rainfall, and on the 17th general and fairly heavy rain was reported from all districts except Orissa. On the 18th, or the last day of the week, the changes of pressure were small, and the previous distribution remained practically unaltered, and the general pressure distribution was fairly normal; winds were more or less westerly in Orissa and Chutia Nagpur, but in other districts they were usually south-easterly and easterly. Again fairly general rain was reported on the 18th in South-West and North Bengal, in Behar, and in Chutia Nagpur, while the falls were less general in East Bengal, and, as before, Orissa was to a great extent rainless.

Conditions, therefore, have generally been of light monsoon character throughout the week, and fairly good rain has fallen on about three or four days out of the seven over the whole province. In most districts the falls have been moderate in amount, the only exception being in Orissa, where on the whole falls have been decidedly light and only about half the normal amounts.

Pressure—Has varied considerably during the week, though the variations have to a considerable extent neutralized each other. For the whole week, therefore, the mean pressure has not been very far removed from the normal, and the variations usually do not exceed one or two-hundredths of an inch. At the majority of stations pressure has been in defect of the normal, but at almost a fifth of the stations very slight excess pressures have been registered.

Temperature.—The variations of temperature during the week have not been very large, and they have mainly followed the variations in the amount of rainfall. In Orissa, in South-West and East Bengal, in South Behar and in Chutia Nagpur, the mean temperature for the week has been very slightly in excess of the normal, but the largest excess only equals three-tenths of a degree. In North Bengal and North Behar temperature has been in defect, the deficiency in North Bengal being very slight, though in North Behar it equals 1·1°. For the whole province of Bengal the mean temperature for the week has been almost absolutely normal. In Assam for the week a defect of 0·5° has been registered.

Rainfall.—The daily rainfall has already been referred to in detail under the general description of the weather. Fairly general rain was received in Orissa on the first three or four days of the week, but during this period the rainfall in the other divisions was lighter and

more local. In South-West Bengal rainfall was most general on the 13th and 14th and from the 16th to the 18th. In East Bengal rainfall principally occurred between the 14th and 17th, and in North Bengal from the 14th to the 18th. In Behar the falls have been rather less frequent, and they have generally occurred from the 16th to the 18th, and in Chutia Nagpur many falls occurred on the 12th and from the 15th to the 18th. Speaking generally, falls have occurred on about three or on three to four days in the week in all the divisions of the province. Heavy falls have also occurred at some stations, and amounts in excess of five inches in a single day have been received at Murarai in the Beerbhoom district (5·13 inches), Fenny (6·20 inches), Cox's Bazar (5·62 inches), Cooch Behar (5·16 inches), Matabhanga (5·07 inches), Debigunge (7·13 inches), Alipore Dooar (7·70 inches), Pupri (6 inches), Jhalda (5·30 inches), and Chakradharpore in the Singbhoom district (9·46 inches). Falls in a single day in excess of three and four inches have been very numerous.

The average rainfall at the various stations in Chutia Nagpur and North Bengal has been between three and three and-a-half-inches, and in South-West and East Bengal and in Behar between about two and two and-a-half inches, while in Orissa the average fall has been rather less than one and-a-half inches. These figures represent a moderate excess above the normal rainfall in Chutia Nagpur, and an almost normal fall in North Bengal and Behar; in South-West Bengal the fall is slightly in defect, and in East Bengal more largely in defect, the deficiency equalling about a fourth of the normal fall. In Orissa the defect has again been very large, as it was in the previous week, and here the fall has been less than half the usual amount for the week.

In the case of the districts in these larger divisions, all those in Orissa, and also the 24-Pergunnahs, Howrah, Hooghly, Bankoora, Chittagong Hill Tracts, Darjeeling, Purneah, Comilla, and Dacca districts have shown rather large defects throughout the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 18th of July 1891:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of week above or below normal mean of week.	Of week. Average.	Normal average.	Variation.	Rainy days. Average number in week.	Normal average number in week.	Variation.	Since 1st of month. Average.	Normal average.	Since 15th May 1891. Average.	Normal average.

METEOROLOGICAL OFFICE, INDIA,
The 20th July 1891.

MEMORANDUM.

Report on the Monthly Statistics of Deaths registered in forty-five districts of Bengal for the month of April 1891.

THE total number of deaths registered in forty-five districts of Bengal during the month of April 1891 amounted to 161,980, against 138,260 in April 1890, and an average of 133,312 in the corresponding months of the previous five years (1886—90). These figures yield a death-rate of 29·52, 25·08, and 24·24 per 1,000, respectively, of the aggregate population of those districts, which is 65,859,534. The death-rate of April 1891 is 5·28 higher than the mean rate of the corresponding months of the past five years 1886—90, and is also higher than the rate of the corresponding period of any of the past five years with which comparison is instituted, *vide* the figures below:—

	April 1886.	April 1887.	April 1888.	April 1889.	April 1890.	Monthly average of five years 1886—90.	April 1891.
Number of deaths	114,795	125,355	130,850	157,301	138,260	133,312	161,980
Ratio per mille per annum	20·86	22·80	23·76	28·56	25·08	24·24	29·52

The death-rate during April 1891, as will be seen from the following table, is less than that during the preceding month, but greater than that during the first two months of the year:—

Months.			*Number of deaths.*	*Ratio per mille.*
January 1891	...	...	143,492	26·04
February „	...	...	137,553	24·96
March „	...	...	168,185	30·60
April „	...	...	161,980	29·52

Of the total deaths, 86,954 (31·92 per 1,000 per annum) occurred among the male population and 75,026 (ratio 27·12 per 1,000 per annum) among the female. As usual the registered results were, on the whole, greater among the male than among the female population, or relatively 118 males died to every 100 females, calculated on the proportion such mortality bears to the total male and female population.

The following table shows the highest proportions of deaths registered during the month of April 1891, arranged in order of sequence and compared with the mortality of the corresponding month of 1890:—

Districts.	Ratio per *mille* during— April 1891.	April 1890.	*Districts.*	Ratio per *mille* during— April 1891.	April 1890.
Julpaiguri	108·84	41·52	Noakhali	30·48	32·64
Purneah	96·72	29·76	Backerganj	30·00	27·72
Rungpore	81·00	28·56	Pubna	29·64	27·72
Darjiling	55·20	49·56	Rajshahye	29·52	32·04
Dinajpur	49·92	25·56	Burdwan	29·28	24·24
Nuddea	46·44	18·72	Faridpore	29·04	25·80
Bogra	36·96	26·52	Serampore	28·92	27·24
Bhagulpore	35·04	45·36	Midnapore	27·96	22·68
Maldah	34·56	31·08	Jessore	27·24	29·88
Manbhum	34·56	23·76	Hughli	26·88	28·44
Bankura	33·60	26·88	Hazaribagh	25·08	30·24
Murshedabad	30·72	23·28			

The maximum death-rate was recorded in Julpaiguri, 108·84 per mille per annum, and the minimum in Chumparun 12·24. Next to Julpaiguri come Purneah (96·72) and Rungpore (81·) with high death-rates. The high death-rates in these three districts are attributable to an excessive prevalence of cholera. In Julpaiguri 3,201 deaths from cholera were registered out of a total of 5,285, in Purneah 10,730 out of a total of 14,911, and in Rungpore 9,609 out of a total of 14,164. Judging by the results shown in the statement appended to this memorandum, the registration of deaths would appear to be very defective in the districts—Chumparun (12·24), Mozufferpore (13·80), Sarun (16·08), Gya (17·16), Singbhum (17·64), Durbhanga (18·00), Patna (18·12), and Tipperah (18·96), where the statistics were so imperfectly recorded that the ratio was less than 20 per 1,000 of population.

The total mortality during the month under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding month of 1890 and the average of the previous five years 1886—90:—

				Ratio per *mille* during— April 1891.	April 1890.	Monthly average of five years 1886—90.
Cholera	...	...	...	8·04	3·00	3·84
Small-pox	...	...	...	·24	·36	·12
Fever	...	...	...	16·80	17·64	16·08
Dysentery and diarrhœa		...	...	·48	·60	·72
Injury	...	...	...	·24	·24	·24
Other causes	...	...	...	3·24	3·00	3·00

It will be seen that the death-rate of April 1891 under the head Cholera is considerably higher than in the two past periods with which it is compared, but as compared with April 1890 there is a slight diminution in the mortality of April 1891 under the head Fever.

Cholera caused 44,769 deaths (ratio 8·04 per mille per annum) against 26,773 (ratio 4·80) in the month previous. The disease was prevalent in all the districts, and was mostly felt in Purneah, Julpaiguri, and Rungpore where the mortality rates were 69·60, 65·88 and 54·96 per mille per annum respectively. The next highest rate occurred in Nuddea 24·60, then in Dinajpur 18·36, Bogra 14·16, Faridpore 10·92, Maldah 8·76, Bhagulpore 8·64, Murshedabad 8·16, Dacca 6·84, Pubna 6·48, Mymensing 5·76, Burdwan 5·16, Birbhum, Rajshahye and Darjiling 3·96 each, Backerganj 3·84, Jessore 3·60, Tipperah and Shahabad 3·48 each, Hughli 3·12 Midnapore 2·76, Manbhum 2·64, 24-Pergunnahs 2·52, Bankura and Serampore 2·16 each, and Khulna 2·04.

The deaths from *small-pox* numbered 1,926 (ratio ·24 per mille per annum) against 2,507 (ratio ·36) in the preceding month. The greatest sufferers were Midnapore 2·76, Cuttack 2·28, and Chittagong 1·20. Seven districts, viz., Birbhum, Rajshahye, Pubna, Darjiling, Bhagulpore, Maldah and Manbhum, enjoyed perfect immunity from the pest.

Fever proved fatal in 92,474 instances (ratio 16·80 per 1,000 of population per annum) and *dysentery and diarrhœa* in 3,078 (ratio ·48) against 110,802 (ratio 20·16) and 3,989 (ratio ·72), respectively, in the month before. Every district returned deaths from both ailments. The highest fever death-rate occurred in Julpaiguri 41·28 per mille per annum, and the lowest in Poori 5·04. Darjiling stands next to Julpaiguri with the highest fever death-rate of 39·60, followed by Dinajpur 29·28, Noakhali 26·28, Purneah and Manbhum 26·04 each, Maldah 24·12, Rungpore 23·40, Rajshahye 22·92, Bhagulpore 22·20, Pubna 21·96, Jessore 21·36 and Birbhum 20·16. Darjiling returned the highest death-rate from dysentery and diarrhœa 3·84, and the lowest ·02 occurred in Khulna. Next to Darjiling Howrah suffered most from dysentery and diarrhœa with a death-rate of 3·60 per mille, followed by Balasore 3·36 and Serampore 3·

Injury caused 1,930 deaths (ratio ·24 per mille per annum) against 1,384 (ratio ·24) in the previous month, and the deaths from all other causes not specified amounted to 17,803 (ratio 3·24 per mille per annum) against 22,720 (ratio 4·08) in preceding month. Poori returned the highest death-rate from the unspecified diseases coming under the head "Other causes," viz., 13·32 per mille per annum.

The death-rates among the five principal *classes* of the community, which comprise the population of the Bengal Province, viz., Mahomedans, Hindus, Other classes, Buddhists, and Christians, arranged in order from highest to lowest, compared with the mortality-rate among these classes in the corresponding month of 1890, are given in the following statement:—

	Ratio per *mille* during—	
	April 1891.	April 1890.
Mahomedans	32·04	25·20
Hindus	28·44	25·32
Other classes	23·40	20·16
Buddhists	20·88	15·96
Christians	16·32	11·40

With regard to *Age*, infants (under one year), as usual, perished in the largest numbers, 179·40 per 1,000 of population per annum; next came old persons (60 years and upwards) with a death-rate of 63·48 per 1,000. The lowest death-rate occurred between the ages of 10 and under 15 years, 15·84 per 1,000.

Detailed information regarding the mortuary statistics of the forty-five districts of Bengal during the month under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 20th July 1891.

Statement showing the Results of the Registration of Deaths in the Districts in Bengal for the month of April 1891.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,

The 20th July 1891.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

Sanitary Commissioner for Bengal.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 4th July 1891.

BIRTHS.

THE total births registered during the week ending with Saturday, the 4th July 1891, in twenty-seven principal towns of Bengal, amounted to 320, and correspond to an annual rate of 15·5 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 2·6 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	16·1	21·3	18·9	18·0	16·1	18·1	15·5

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

TOWNS.	WEEKS ENDING— 13th June 1891.	20th June 1891.	27th June 1891.	4th July 1891.	TOWNS.	WEEKS ENDING— 13th June 1891.	20th June 1891.	27th June 1891.	4th July 1891.

Dacca	14·3	16·2	13·0	6·5	Total ...	18·9	17·0	18·0	15·5

It will be seen that last week the highest birth-rate was returned from Monghyr (29·8) and the lowest from Purneah (3·4).

DEATHS.

The total deaths registered during the week under review amounted to 516, and correspond to an annual rate of 25· per 1,000 of the population. The rate of the week is 1·8 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1887, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	23·2	25·2	18·9	28·9	19·9	23·2	25 0

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING— 13th June 1891.	20th June 1891.	27th June 1891.	4th July 1891.	TOWNS.	WEEKS ENDING— 13th June 1891.	20th June 1891.	27th June 1891.	4th July 1891.

Dacca	18·8	22·1	14·8	18·2	Total ...	23·9	23;1	31·4	25·0

According to the figures returned, the highest mortality occurred in the town of Arrah (87·3) and the lowest in Santipore (3·5). No deaths were registered during the week in the Jessore town.

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns:—

Cholera.	Ratio per *mille.*	*Small-pox.*	Ratio per *mille.*	*Fevers.*	Ratio per *mille.*	*Dysentery and diarrhœa.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Arrah ...	52·6	Gya ...	2·7	Arrah ...	20·3	Serampore ...	13·7	Midnapore ...	15·5
Bhagulpore	22·9							Monghyr ...	11·7
Gya ...	16·4							Poori ...	10·5
Mozufferpore	7·3								
Durbhanga	7·1								
Chupra ...	7·0								
Patna City...	6·5								
Dacca ...	5·8								

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 7·6 from cholera, against 6·9 in the preceding week; ·5 from small-pox, against ·7; 8·1 from fever, against 12·5; 2·2 from dysentery and diarrhœa, against 3·2; ·4 from injury, against ·5; and 6·2 from other causes, against 7·6 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	26·5	Christians ...	14·9	Under 1 year ...	181·7
Females	23·5	Hindus ...	26·3	1 and under 5 years ...	53·7
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	112	Mahomedans ...	22·3	5 " 10 " ...	18·3
				10 " 15 " ...	16·6
				15 " 20 " ...	17·2
				20 " 30 " ...	12·9
				30 " 40 " ...	13·2
				40 " 50 " ...	12·3
				50 " 60 " ...	21·3
				60 years and upwards ...	55·6

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 21*st July* 1891.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 4th July 1891.

REPORT ON THE LEGAL AFFAIRS OF THE GOVERNMENT OF BENGAL FOR THE YEAR 1890-91.

No. 2928J.

RESOLUTION.

JUDICIAL.

Dated Yacht "Rhotas," the 23rd July 1891.

READ—

The Report on the Legal Affairs of the Government of Bengal for the year 1890-91.

Read also—

The Reports for the two preceding years, and the orders of Government thereon.

Out of 4 appeal cases pending before the Privy Council at the close of the year 1889-90, only one was decided, the decision being against the Durbhunga Municipality as the respondent. One case was remanded to the first court for trial. No fresh appeal was instituted before the Privy Council during 1890-91.

2. The following statement shows the result of Government litigation in all the Civil Courts during the year 1890-91 as compared with the two previous years:—

	Original cases.			APPEALS. Before High Court.			APPEALS. Before Lower Courts.			Total.		
	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.
Decided in favour of Government	280	254	243	23	50	23	26	44	45	329	348	311
Decided against Government	136	51	65	...	1	3	19	6	7	155	58	75
Compromised, remanded or withdrawn	55	39	57	...	5	1	2	4	1	57	48	59
Percentage in favour of Government (omitting fractions)	60	83	79	100	98	88	58	88	87	69	86	81

3. Taking the litigation in the High Court only, the percentage of cases decided in favour of Government decreased from 98 to 88. No explanation is given for this decrease. Of the three cases shown as decided against Government, two were for *chur* lands lying on the shores of the Bay of Bengal in the district of Backergunge. The question involved in the third case was concerning the currency of the settlement with a certain estate in Cuttack. In the Lower Appellate Courts the percentage of cases decided in favour of Government was 87 as against 88 in the previous year. There was only one important case decided against Government, in which the question at issue was the liability of the Eastern Bengal State Railway for silver coins and notes alleged to have been stolen in transit. The matter is now before the High Court on second appeal. The result of Government litigation in the Courts of First Instance was not favourable, there being a falling off in the proportion of cases decided in favour of Government from 83 to 79. Of the 65 cases decided against Government, 32 were land acquisition cases, in which the Collector's awards were slightly varied by the Judges on reference. Apart from these cases, the percentage in favour of Government would be 77 against 82 in 1889-90 and 65 in 1888-89.

4. The subjoined table shows the result of the litigation in which the Court of Wards was concerned in 1890-91 as compared with the two previous years:—

	Original cases.			Appeals.						Total.		
				Before High Court.			Before Lower Courts.					
	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.	1888-89.	1889-90.	1890-91.
In favour of Court of Wards	745	514	628	11	14	15	62	56	68	818	584	711
Against Court of Wards	82	40	75	4	...	6	24	13	16	110	68	97
Compromised, remanded or withdrawn	33	42	21	...	2	3	10	10	6	43	54	30
Percentage in favour of Court of Wards (omitting fractions.)	90	91	89	73	100	71	72	81	81	88	90	88

The increase in the litigation is more apparent than real. It is explained that, as there was a considerable arrear at the close of 1889-90, the courts decided a greater number of cases in 1890-91 than in the preceding year. Of the six cases in the High Court decided adversely to the Court of Wards, only one calls for notice, viz., that in which the childless widow of a Midnapur zemindar, before making the adoption of the minor, had borrowed a sum of Rs. 20,000 at 18 per cent. compound interest, with half-yearly rests. A demand of Rs. 58,652 was subsequently made against the estate, but as the widow denied that she had any knowledge of the terms of the loan, the demand was resisted by the Court of Wards. The Subordinate Judge who heard the case gave a decision for the plaintiffs, which was, on appeal, confirmed by the High Court, though as the Legal Remembrancer points out, in another case of the same nature the Court had refused to allow, as against the minor's estate, higher interest than 12 per cent., the judgment being upheld by the Privy Council (I. L. R. XVIII Cal., 315). In 14 out of the 16 unsuccessful appeals in the Lower Appellate Courts, and in 70 out of the 75 original suits shown as decided against the Court of Wards, no reference was made to the Legal Remembrancer. It is explained that these were chiefly rent suits or settlement appeals, or suits for recovery of arrears of rent or dâk cess or bond debts. Out of the 628 original suits shown as decided in favour of the Court of Wards, upwards of 400 appear to have been instituted by the Managers on their own responsibility.

5. The following table shows the amount of Government decrees recovered during 1890-91 as compared with the two previous years:—

	1888-89.	1889-90.	1890-91.
	Rs.	Rs.	Rs.
Amount under realization	67,540	55,247	61,231
Realized during the year	30,281	11,659	14,790
Percentage of recovery	$44\frac{5}{6}$	$21\frac{1}{9}$	$24\frac{3}{20}$

The realizations during the year show a slight improvement as compared with the previous year, but are still far from satisfactory. Nearly Rs. 5,000 were remitted during the year. The largest outstanding balances are due from Bankoora (Rs. 5,999), Tipperah (Rs. 4,607), Chittagong (Rs. 2,562) and Balasore (Rs. 6,935).

6. The following figures show the amount of Wards' decrees recovered during the year as compared with the two previous years:—

	1888-89.	1889-90.	1890-91.
	Rs.	Rs.	Rs.
Amount under realization ...	13,94,090	11,74,880	11,92,016
Realized during the year ...	2,68,027	2,15,720	1,54,504
Percentage of recovery ...	19¼	18⅓	13

The percentage of recovery shows a serious falling off from 18⅓ to 13 which will be brought to the notice of the Board of Revenue through the Revenue Department. There was a large outstanding balance at the close of the last official year on account of the Nurhan Estate in the Durbhunga district. It is said that the Manager has not submitted his annual statement, although he has been repeatedly asked for it. The Revenue Department will be requested to take such notice of his conduct as may be deemed proper. The marginally noted estates show the balances specified against each. Out of the amount due from the Burdwan Raj Estate upwards of Rs. 40,000 are barred by limitation, and will have to be written off. In a great many cases the debtors are said to have no property.

	Rs.
Burdwan Raj Estate	2,75,382
Tikari Estate	1,81,660
Dighaputia Estate (eldest ward)	51,982
Ditto do. (three younger wards)	99,113
Deokumar and Dhurm Kumar's Estate...	60,615
Dhankura Estate	55,163
Dukhin Shahbazpore Estate	48,810
Baroda Prasad Roy Chowdhury's Estate	39,990
Srinuggur Estate	35,421
Sukhraj Roy's Estate	24,641
Shahabunder Estate	16,982
Khettrohat Estate	16,177
Basudebpore Estate	14,200

ORDER.—Ordered that a copy of this Resolution be forwarded to the Superintendent and Remembrancer of Legal Affairs for information.

By order of the Lieutenant-Governor of Bengal,

JOHN EDGAR,

Chief Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 25th July, 1891.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.					
		Western Districts.			
BURDWAN DIVN.	1	Burdwan	July 25, '91	1·32	Weather—seasonable. Transplantation of *aman* paddy going on. *Aus* and sugarcane doing well. More rain wanted at Assensole. Prices of common rice :— Srs. Burdwan ... ... 15 } Culna ... ... 15 } Cutwa ... ... 15⅓ } per rupee. Raneegunge ... ... 15½ }
		Culna	...	0·28	
		Cutwa	...	1·17	
		Raneegunge	...	0·29	
	2	Bankoora	„ 25, '91	1·53	Weather—cloudy with occasional light showers. Ploughing of fields and transplantation of *aman* going on. Sugarcane and other standing crops thriving. Common rice selling at 17½ seers per rupee at Bankoora.
		Bishenpur	...	1·74	
	3	Birbhum	„ 25, '91	1·07	Rain still too local and too slight. But the season has improved, and prospects are by no means bad, though transplanting, which is now going on, is backward because the rains set in late. Locusts passed on 16th and 18th, but did no harm at all. Prices of rice still range from 16 to 20 seers per rupee.
		Rampore Haut	...	2·41	
	4	Midnapur	„ 25, '91	4·26	Some rain nearly every day. Prospects improving. Paddy is being transplanted. Slight damage done by locusts in Sudder and Ghatal subdivisions. Indigo is being cut. Prices of common rice :— Srs. Sudder ... ... 17 } Contai ... ... 17 } Tamluk ... ... 16 } per rupee. Ghatal ... ... 16 }
	5	Hooghly	„ 25, '91	1·00	Weather—unsettled with heavy clouds and occasional storms of wind followed by rain. State and prospects of crops good. More rain required for high land cultivation. Prices of common rice :— Srs. Sudder ... ... 14 } Serampore ... ... 14 } per rupee. Jehanabad ... ... 17 }
		Serampore	...	2·06	
		Jehanabad	...	1·52	
	6	Howrah	„ 25, '91	2·76	Weather—showery. Paddy, jute and sugarcane crops doing well. Transplanting of *aman* well advanced. Price of common rice 14½ seers per rupee.
		Uluberia	...	2·95	
		Central Districts.			
PRESIDENCY DIVN.	7	24-Perghs.	July 28, '91	3·11	Weather—seasonable and cloudy with occasional showers. Prospects of *aus* and jute good. Sugarcane doing well. Transplantation of *aman* going on, but more rain still wanted. Prices stationary.
	8	Nuddea	„ 25, '91	1·08	Weather—cloudy and rainy. Prospects of *aus* good, but in some places it is suffering from want of rain. Other crops are doing well.
		Kushtea	...	1·33	
		Meherpur	...	0·41	
		Chuadanga	...	0·85	
		Ranaghat	...	1·02	
	9	Khoolna	„ 25, '91	1·06	Weather—cloudy with light showers. *Aus*, jute and sugarcane not much affected yet, but sowing and transplanting of *aman* are being retarded for want of sufficient rain. *Aman* seedlings are drying up in some parts of the district for want of rain and flood-water.
		Bagirhat	...	1·11	
		Satkhira	...	1·48	
	10	Jessore	„ 25, '91	1·81	Weather—boisterous and showery. *Aman* paddy promising. Jute slightly injured by insects in Magura. More rain wanted in Jhenidah and Bongong subdivisions. Indigo manufacture progressing.
		Jhenidah	...	1·37	
		Magura	...	0·85	
		Narail	...	0·81	
		Bongong	...	1·30	
	11	Murshedabad	„ 27 '91	1·28	Weather—cloudy and stormy with frequent showers of rain. Harvesting of *bhadoi* commenced in some places. Prospects favourable. Recent rain has done much good to standing *aman* crop. More rain wanted in parts of Kandi subdivision.
RAJSHAHYE DIVN.	12	Dinagepur	„ 25. '91	1·37	Weather—hot and cloudy with occasional showers. Transplantation of *haimanti* seedlings still going on. State of standing crops fair. Price of rice stationary.
		Thakurgaon	...	1·10	
	13	Rajshahye	„ 25, '91	0·67	Weather—cloudy, but not enough rain. *Aus* is being harvested. *Aman* is still being transplanted. The latter would be the better for more rain, which is expected.
		Nattore	...	3·76	
		Nowgong	...	0·31	
	14	Rungpur	„ 25, '91	1·02	Weather—cool with prospect of rain. Harvesting of *aus* and jute continues. More rain required for transplanting winter rice. Prospects fair. Prices stationary.
		Nilphamari	...	0·24	
		Kurigram	...	1·17	
		Gaibanda	...	0·60	
	15	Bogra	„ 25, '91	0·28	Weather—generally sunny; occasionally cloudy. High winds during the last three days, and it is hoped that rain may follow, which is much needed. *Aman* rice is being transplanted in some places, but this work and the growth of *aus* rice are impeded by the want of rain, which thus far, however, has only retarded the crops, without other damage. Some of the *aus* is being reaped, and most of the *til* and *kaun* has been harvested. Price of common rice has risen from 17 to 16 seers a rupee. Slight damage has been done to sugarcane by locusts in the north (thana Shibgunge).
		Sherpur	...	0·68	
		Nowkhilla	...	0·84	
	16	Pubna	„ 25, '91	0·83	More rain still wanted. *Aus* paddy and jute suffering for want of rain. Rivers subsiding at Serajgunge and rising at Sudder. Price of rice the same. Fodder sufficient.
	17	Darjeeling	„ 25, '91	5·88	Weather—fair. *Bhadoi* getting ripe. Transplantation of *haimanti* paddy stopped for want of rain in the Terai. Locusts have appeared in large numbers in the district and have come up as far as Darjeeling. They have done a little harm to jute and *makai*, but have not damaged the tea bushes.
	18	Julpigoree	„ 25, '91	5·34	Weather—hot; cloudy at intervals. Prospects of jute and *bhadoi* not good. Transplantation of *haimanti* paddy going on. Common rice sells at 13 seers per rupee.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*					
		Eastern Districts.			
DACCA DIVN.	19	Dacca	July 25, '91	1·02	Weather—seasonable. Harvesting of *aus* paddy going on. *Aman* paddy and jute thriving. Prospects of crops on the whole good. Cheapest rice sold at from 14 to 16 seers per rupee.
	20	Furreedpur	„ 25, '91	0·92	Weather—seasonable. *Aus* is being harvested. State of *aman* and sugarcane fair. Rice selling at 16, 16 and 17 seers per rupee at Sudder, Goalundo, and Madaripore respectively.
	21	Backergunge	„ 25, '91	0 83	Weather—seasonable. Rainfall general though not heavy. Prospects of crops fair. Common rice selling at from 12 to 17 seers per rupee.
	22	Mymensingh	„ 25, '91	1·87	Weather—a little cooler. Jute being reaped with not more than 9 annas out-turn. Outturn of *aus* about 8 annas. More rain wanted for transplantation of *aman* paddy. Common rice sells at 13 seers per rupee.
CHITTAGONG DIVN.	23	Chittagong	„ 28, '91	7·02	Weather—rainy. Transplantation of *aus* and sowing of *aman* continue. Prospects of *aman* fair. Some damage done to *aus* by late rain. Prices have risen slightly.
	24	Noakholly	„ 25, '91	4·65	Rain nearly every day. Crop prospects generally good. *Aus* being harvested. *Aman* transplantation going on. Price of rice stationary at 18 seers per rupee.
	25	Tipperah	„ 25, '91	2·59	Weather—seasonable. *Aus* and jute being harvested. Lands being ploughed for *aman*. Standing crops doing well. More rain wanted. Prices stationary.
	26	Chittagong Hill Tracts.	„ 23, '91	1·95	Weather—cloudy with occasional falls of rain throughout the week. *Jum* paddy and cotton progressing. Lands are being ploughed for late rice. Common rice being sold at 11 seers 6 chittacks per rupee.
BEHAR.					
PATNA DIVN.	27	Patna	„ 25, '91	2·16	Weather—cloudy and hot. Prospects of *bhadoi* crops and paddy fair, but more rain wanted in places. Sowing reported to be finished in Barh and Dinapur subdivisions. Prices almost stationary.
		Barh	...	4·50	
		Behar	...	2·79	
		Dinapur	...	1·80	
	28	Gya	„ 25, '91	0 63	Weather—hot and cloudy. Prospects of *bhadoi* favourable. Rice seedlings suffering slightly for want of more rain. Prices almost stationary.
	29	Shahabad	„ 25, '91	0·32	Weather—easterly winds; passing clouds with rare short showers. Rain is much wanted all over the district, most of all in Buxar, but in Sasseram and Bhabuah also crops are reported to be withering for want of rain. Cultivation has stopped except where canals reach lands and in Sudder subdivision. Weather for the last two days looks more favourable for rain. Prices slightly higher.
		Bhabuah	...	Nil	
		Buxar	...	0·96	
		Sasseram	...	Nil	
	30	Durbhanga	„ 25, '91	0·34	Weather—cloudy and occasionally very close. *Bhadoi* crops being weeded. Rain much wanted in the Sudder and Madhubani subdivisions for transplanting paddy and *marua*. Indigo manufacture in progress. Prices remain unchanged.
		Madhubani	...	1·84	
		Somastipur	...	3·76	
	31	Mozufferpur	„ 25, '91	0·26	Strong east winds. A few showers. Sowings completed. Transplanting of paddy going on, though in parts of Hajipur it has been retarded for want of sufficient rain. Prospects favourable.
		Hajipur	...	1·25	
		Sitamarhi	...	0·24	
	32	Sarun	„ 25, '90	1·69	Weather—seasonable. Heavy rain with intervals of fine weather. State and prospects of crops excellent. Ideal weather for indigo, the manufacture of which is progressing most favourably.
	33	Chumparun	„ 25, '91	0·37	Weather—occasionally cloudy with east winds blowing hard. *Bhadoi* doing well. Paddy transplantation continues. More rain wanted. Locusts were seen on the 18th in the Bettiah subdivision, and on the 22nd in a village in the Sudder; they did a little damage to *bhadoi* crops and proceeded towards Nepal.
		Bettiah	...	0 17	
BHAGULPORE DIVN.	34	Monghyr	„ 25, '91	2·85	Very light monsoon weather prevails. Strong east winds have now set in. *Bhadoi* sowings finished. Prospects good. Flights of locusts have visited various parts of the district again, but the damage has not been very serious anywhere to standing crops. Transplantation of rice has commenced in the Jamui subdivision, but it is not general. Generally speaking, transplantation is delayed for want of sufficient rain. Prices stationary.
		Beguserai	...	4·04	
		Jamui	..	2·17	
	35	Bhagulpur	„ 25, '91	5·14	Weather—hot and dry till heavy rain fell on the night of the 24th. More rain was wanted everywhere, and it is not known if the rain on the 24th was general or not. Prospects are still fair, but if there is not general rain in a week or two, they will become critical. Price of common rice 15 seers 2 chittacks.
	36	Purneah	„ 25, '91	1·42	Weather—showery and hot at intervals. *Bhadoi* beginning to wither on high lands, and *aghani* in similar parts cannot be sown for want of rain. Locusts have closed some of the indigo factories.
		Kishengunge	...	0·73	
		Arrareah	...	0·91	
	37	Maldah	„ 25, '91	1·47	Weather—seasonable. Prospects of crops good, but in thanas Ratua and Nawabgunge and outpost Manikchak some damage to crops has been caused by locusts. Price of common rice stationary.
		Chanchal	...	1·35	
		Shibgunge	...	1·79	
	38	Sonthal Perghs.	„ 25, '91	1·10	Weather—cloudy with occasional passing light showers. State and prospects of crops continue fair. Weather is good for *janera*, but not so for paddy. Much more rain wanted for preparation of ground and transplantation of paddy on uplands; at least 3 or 4 inches of rain required for planting out the ordinary area; at present only about four annas planted out. Sugarcane and *janera* looking well. A small flight of locusts passed over Dumka on the 19th instant, but did no damage to crops. Indigo reported to have been previously injured by locusts to the extent of about 8 annas.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
ORISSA DIVN.	39	Cuttack July 25, '91	3·70	Weather—cloudy and rainy. This week's rainfall has improved the state of the standing crops to some extent. More rain still wanted for *behura* or second ploughing.
	40	Pooree „ 23, '91 Khoorda ... Banpur ...	0·45 3·23 4·52	Weather—cloudy with showers of rain. Winter crop on low lands growing well, but in some places attacked with root disease called "muli" for want of rain. More rain wanted for puddling. Miscellaneous crops doing well. Prices of common rice stationary.
	41	Balasore „ 25, '91	6·23	Weather—seasonable. Rain of the last two days will materially benefit the crops in the Sudder subdivision. Prospects in Bhadrak generally good.
CHOTA NAGPORE				
South-West Frontier Agency.				
CHOTA NAGPORE DIVN.	42	Hazaribagh July 25, '91 Giridih ...	2·09 0·94	Weather—seasonable. Sowing progressing. More rain wanted. Prices stationary.
	43	Lohardugga „ 25, '91 Palamow (up to 20th July)	1·99 2·51	Weather—seasonable. A little rain almost throughout the week. More is wanted in the head-quarter subdivison for transplanting low land paddy. Prices steady.
	44	Singbhoom July 25, '91	1·82	Weather—seasonable. Paddy is being transplanted. Crops doing well. Locusts are still about, but are doing only slight damage.
	45	Manbhoom „ 25, '91 Govindpur ...	1·80 3·75	Weather—seasonable. Prospects of crops satisfactory. Price of common rice from 14 to 18 seers per rupee.

Published for general information.

CALCUTTA; REVENUE DEPT.,
The 28th July, 1891.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fall.

for the week ending Saturday, the 25th of July 1891.

Explanation.—......indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 28*th July* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 25TH OF JULY 1891.

AT the close of the previous week ordinary monsoon weather prevailed in all districts, and light to moderate rain was general in all divisions except Orissa, where it was rather local. On the 19th, or the first day of the present week, pressure had fallen by moderate amounts over the whole province, the fall being largest in parts of South-West Bengal and in Orissa, and a feeble low-pressure area was formed over the north-west angle of the Bay with the lowest pressure at Saugor Island. Winds also showed a distinct tendency to circulate cyclonically round a centre near Saugor Island. Light rainfall only was reported on this day, and was confined almost entirely to Orissa, South-West Bengal, and Chutia Nagpur, the remainder of the province being almost rainless. On the 20th pressure had again fallen by small amounts, the fall being largest in South-West Bengal and Behar, and the area of lowest pressure had advanced to Balasore, while winds again showed a feeble cyclonic circulation round a centre between Balasore and Midnapore. Again the rainfall, which was only light to moderate in amount, was practically confined to the area affected by the slight depression, that is, to Orissa, South-West Bengal, and Chutia Nagpur, the remainder of the province being almost rainless. On the 21st pressure had risen moderately over the whole province, the increase being largest over the area previously occupied by the feeble depression in South-West Bengal, which with its attendant feeble cyclonic circulation of winds had practically disappeared on this day. Again on the 21st light showers only were reported in parts of South-West, East and North Bengal, and in Chutia Nagpur, while the remainder of the province was practically rainless. On the 22nd pressure had fallen at Calcutta, Saugor Island, and a few other stations, while over the province generally pressure was rising, and thus pressure was in defect of the normal over parts of South-West Bengal and Orissa by 0·03″ to 0·05,″ while over the greater part of the province it was in excess. The low-pressure area near the north-west angle of the Bay had therefore on this day again reproduced itself, and winds as before commenced to show a tendency to cyclonic circulation round this area, though the wind force was light. On the 22nd moderate rain was reported in Assam and at some of the stations in North Bengal, while light and local rain had fallen in South Bengal, but elsewhere it was almost rainless. On the 23rd pressure had risen by moderate amounts in all districts except part of the south-west of the province. Pressure therefore remained below the normal in South-West Bengal, particularly over the area represented by Balasore, Midnapore, Saugor Island, and False Point, and the low pressure over this area was a little more marked than on the previous day. The cyclonic wind circulation in connection with the low-pressure area continued, but winds were still light. Rainfall on this day was a little irregular, and it was general in Assam and in South-West, East and North Bengal, while a few scattered showers only fell in Orissa and Behar; Chutia Nagpur being almost rainless. On the 24th pressure had fallen by about one or two-hundredths of an inch, and the feeble low-pressure area in South-West Bengal and over the north-west angle of the Bay became, if anything, a little more marked than it had been. The feeble cyclonic circulation of winds continued, the centre of the circulation on the 24th being between Calcutta, Midnapore, and Saugor Island; but winds were still only light to moderate in force. General rain was reported from all districts except parts of Orissa and Behar, and conditions on the 24th appeared to be more favourable generally for rainfall. On the morning of the 25th very rapid meteorological changes had occurred. The feeble depression over South-West Bengal and part of the north-west angle of the Bay, accompanied by the distinct cyclonic circulation of winds which had existed for the whole of the week except on the 21st, developed suddenly and rather rapidly, and on the 25th a very definite and rather influential barometric depression had been produced, the centre of which was over the Sunderbuns to the east of Saugor Island. The fall of pressure at Saugor Island and Calcutta equalled about 0·13,″ and the very low pressure of 29·35″ was reported from Saugor Island, which was no less than 0·172″ below the normal. The cyclonic circulation of winds had become very complete, and the wind directions over the greater part of the province were included in this circulation, while wind velocities ran up very rapidly, and strong winds were reported on the morning of the 25th at many stations, while over the northern part of the Bay on this day very squally weather and very strong winds obtained. In consequence of the existence of this storm and of the bad weather in the Bay, the "Cautionary" storm signals were hoisted at the signal stations in the river and in the port of Calcutta. Rainfall on the 25th was reported generally over the whole province, and at some stations, particularly in Orissa, where most stations registered falls in excess of two and three inches, decidedly heavy falls were received. Conditions therefore were very decidedly disturbed at the end of the week, and with the inland advance of the small storm in a north-westerly direction, such as usually happens at this season of the year, conditions would become favourable for general and rather heavy rain over the province. For the week under review, however, the general conditions have only been of light monsoon character except perhaps in Orissa, where heavy rain fell at the end of the week.

Pressure—Has been low almost throughout the week over the south-western districts of the province, and at such stations as Saugor Island, Balasore, Midnapore, and False Point, the mean pressure has been in defect of the normal by about 0·06″ to 0·07.″

From this centre of comparatively low pressure, the defects gradually decrease in amount towards the north and east of the province, and at the northern stations the mean pressure has been almost normal, while at some in North Bengal even a slight excess has been registered. For the whole province of Bengal the defect has equalled about 0·02″ or 0·03.″ In Assam a mean defect of 0·013″ has been registered.

Temperature.—Owing to the comparative lightness of the rainfall, the mean temperature of the province of Bengal has been nearly a degree in excess of the normal. The largest excess temperatures have been registered in Chutia Nagpur and South Behar, where they equal from one and-a-half to two degrees; while, on the other hand, in Orissa temperature has been almost normal. In Assam a defect of 0·3″ has been registered.

Rainfall—Has been received on from three to four days in the week in Orissa, Chutia Nagpur, and South-West and East Bengal, and on about two days over the remainder of the province. On the whole, rainfall has been distinctly less frequent than it should have been in normal years by perhaps about one-fourth of the usual number of days. The falls have also in all districts except Orissa been lighter than usual, and the only district which has received a fall in excess of the normal amount has been Orissa. In this district the average rainfall for the week has equalled 4·05 inches, which is about 26 per cent. in excess of the normal. It will, however, be remembered that up to this time the defects in Orissa have been extremely large, and from the 15th of May up to the date of this report the rainfall in Orissa has been about 9 inches in defect of the normal, or the actual fall has been little more than three-fifths the usual amount. The average divisional falls in South-West, East and North Bengal, in South Behar, and in Chutia Nagpur, have been from one to about one and-a-half inches, representing defects of from one to two inches; so that the falls generally have been considerably less than half the normal amounts. The defect in North Behar, however, is still larger than this, for the average fall is only 0·45 inch, or about one-sixth of the usual amount. The rainfall of the week has been therefore on the whole very largely below the normal amount, though, on the other hand, the number of rainy days has been in moderate defect only; so that the defect is mainly due to the unusual lightness of the showers rather than to the absence of showers.

Taking up the case of the smaller districts, the following districts have received largely defective rainfalls:—Beerbhoom and West Burdwan, Moorshedabad, Chittagong, Chittagong Hill Tracts, Backergunge, Furreedpore, Dacca, Mymensingh, Bogra, Pubna, Dinagepore, Purneah, Mozufferpore, Durbhanga, Sarun, Chumparun, Shahabad, and Patna; while North Bhagulpore, as represented by such stations as Soopool, Protapgunge, and Muddapore, has been almost rainless.

In Assam during the week Silchar has received 3·03 inches, Sibsagar 1·82 inches, and Dhubri only 0·26 inch of rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 25th of July 1891:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Averages for week. Of lowest of each day.	Averages for week. Of mean for each day. The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ⌓, dew.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA,
The 27th July 1891.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 11th July 1891.

BIRTHS.

THE total births registered during the week ending with Saturday, the 11th July 1891, in twenty-seven principal towns of Bengal, amounted to 350, and correspond to an annual rate of 17· per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 1·3 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886–90.	1891.
Ratio of births per 1,000 of the population per annum	17·5	18·3	19·7	18·0	18·0	18·3	17·0

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 20th June 1891.	27th June 1891.	4th July 1891.	11th July 1891.	Towns.	Weeks ending— 20th June 1891.	27th June 1891.	4th July 1891.	11th July 1891.

Howrah	18·0	11·5	14·3	18·3	Arrah	35·9	27·5	15·6	14·4
Bali	10·5	14·0	17·5	14·0	Mozufferpore	32·8	28·0	20·7	15·8
Krishnagar	13·2	11·4	18·9	9·5	Durbhanga	15·7	23 8	23·0	22·0
Ranaghat	...	6·0	12·0	6·0	Chupra	14·1	22·1	15 1	10·1
Santipore	5·3	17·5	14·0	12·3	Bhagulpore	22·1	11·5	13·2	22·9
Jessore	6·1	...	6·1	12·2	Monghyr	23 5	35·3	20 8	28·9
Rampore Beauleah	18·4	15·8	15·8	7·9	Purneah	...	3·4	3·4	10·4
Darjiling	14·8	29·6	7·4	29·6	Poori	21·0	24·1	21·0	29·4
Dacca	16·2	13·0	6·5	8·4	Total ...	17·0	18·6	15·5	17·0

It will be seen that last week the highest birth-rate was returned from Darjiling (29·6) and the lowest from Ranaghat (6·).

DEATHS.

The total deaths registered during the week under review amounted to 556, and correspond to an annual rate of 27· per 1,000 of the population. The rate of the week is 3·5 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1889, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886–90.	1891.
Ratio of deaths per 1,000 of the population per annum	23·2	23·7	20·9	28·3	21·2	23·5	27 0

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 20th June 1891.	27th June 1891.	4th July 1891.	11th July 1891.	Towns.	Weeks ending— 20th June 1891.	27th June 1891.	4th July 1891.	11th July 1891.

Jessore	30·6	18·4	...	6·1	Monghyr	24·4	34·4	28·9	33·4
Rampore Beauleah	28·9	36·8	15·8	34·2	Purneah	13·9	6·9	6·9	13·9
Darjiling	7·4	96·3	44·5	140·8	Poori	27·3	33·6	14·7	35·7
Dacca	23·1	14·3	18·2	17·5	Total ...	28·1	31·4	25·0	27·0

According to the figures returned, the highest mortality occurred in the town of Darjiling (140·8) and the lowest in Jessore (6·1). No deaths were registered during the week in the Ranaghat and Santipore towns.

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per mille.	*Fevers.*	Ratio per mille.	*Dysentery and diarrhœa.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Bhagulpore	... 22·9	Darjiling ...	44·5	Darjiling ...	66·7	Poori ...	16·8
Chupra	... 19·1	Gya ...	23 2			Monghyr ...	15·3
Gya	... 15·7	Rampore Beauleah	21·0			Gya ...	10·2
Arrah	... 15·5					Durbhanga ...	10·2
Patna City	... 8 8						
Mozufferpore	... 4·9						
Durbhanga	... 4·7						
Howrah	... 3·4						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 6·9 from cholera, against 7·6 in the preceding week; ·6 from small-pox, against ·5; 9·7 from fever, against 8·1; 2·6 from dysentery and diarrhœa, against 2·2; ·4 from injury, against the same ratio; and 6·7 from other causes, against 6·2 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	26·5	Christians ...	7·5	Under 1 year	... 215·1
Females	27·5	Hindus ...	29·6	1 and under 5 years	... 58·6
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	96	Muhomedans ...	20·7	5 " 10 "	... 19·1
				10 " 15 "	... 14·4
				15 " 20 "	... 21 0
				20 " 30 "	... 15·1

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of April 1891.

INCREASES.

	Tons.		Tons.
Jute, unscrewed	5,413	Oil-seeds	4,938
The increase was general among jute-despatching stations on the several sections.		Good crops and a favourable market.	
		Railway plant, &c.	14,490
		For repairs and renewals.	

DECREASES.

	Tons.
Coal	16,796
Ordinary fluctuations.	

G. M. DRURY,
Traffic Superintendent.

CALCUTTA, *the 23rd July* 1891.

NALHATI STATE RAILWAY.

Statement showing Increases and Decreases in tonnage of Staples carried over the Nalhati State Railway during the month of June 1891, *as compared with the same month of the previous year.*

Total ...	1,431	378	1,851	338	1,809	2,189	754	374

INCREASE.

	Tons.
Coal	260
Due to greater import for laying in stock.	
Grains—	
(2) Rice	229
Import due to greater demand at Moorshedabad for crops being damaged by flood last year.	
(4) Others	82
Chiefly due to import of Bajra seed for local demand.	
Jute—	
(1) Raw	18
Due to fair demand at Calcutta.	
Oil-seeds—	
(2) Mustard and rape	143
Due to greater demand in the local market.	

DECREASE.

	Tons.
Metals—	
(2) Iron	24
Due to no despatches of East Indian Railway old rails by public to Azimgunj this year.	
Oil-seeds—	
(1) Linseed	42
Due to steamer service between Jiagunj and Calcutta.	
Provisions—	
(3) Others	28
Due to failure of mango fruit this year.	
Railway plant and rolling-stock	84
Due to less renewals carried on during this year.	
Salt	35
Carried by boat.	
Sugar—	
(1) Drained	62
Due to dull market, less imported.	
(2) Undrained	45
Due to dull market, less imported.	
Tobacco	11
Due to dull market, less imported.	

R. G. MOOKERJEE,

CONTENTS.

THE following report is published for general information.

H. H. RISLEY,

Offg. Secretary to the Government of Bengal.

REPORT ON THE WORKING OF THE FIRE BRIGADE IN THE TOWN AND SUBURBS OF CALCUTTA AND IN HOWRAH DURING THE YEAR 1890-91.

No. 4879, dated Calcutta, the 24th July 1891.

From—J. LAMBERT, ESQ., C.I.E., Commissioner of Police, Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, under section 30 of Act IV (B.C.) of 1883, the following report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah during the year 1890-91.

2. The Brigade was in attendance at 33 fires during the year, 8 in the Town, 18 in the Suburbs and 7 in Howrah, as compared with 36 fires in the preceding year, and the value of property destroyed was Rs. 73,434 against Rs. 4,59,800. The fires were less serious than in the previous year; and in the Town, the only fire which calls for special notice broke out on Strand Road on the 7th June 1890, when portion of a large two-storied brick-built godown containing tar, turpentine, &c., to the value of Rs. 40,000 was destroyed.

In the Suburbs the only fire of any consequence occurred in the compound of the Military Clothing Agency in Alipore, in which property of the value of Rs. 5,000 was burnt. In another small fire, which occurred in the Belliaghatta section on the 20th April 1890, three children were badly burnt, and succumbed to their injuries.

The fires in Howrah were confined to thatched and tiled huts, and call for no special remarks.

3. A memorandum of the fires, and also a statement of the receipts and expenditure of the Brigade, are enclosed. It will be seen that the sum of Rs. 657 has been expended in excess of the budget grant. This expenditure was incurred in the purchase of two new hose carts for Rs. 400, at Rs. 200 each, and in painting and making alterations to the hose cart according to new design of Messrs. Merryweather and Sons at a cost of Rs. 250-12, the balance, Rs. 6-4, is included in the item of Rs. 188, charged for the purchase, locally, of 100 feet of sample hose, which has been found to work better than rubber-lined hose.

4. During the year under review seven persons were prosecuted in the Suburbs of Calcutta under the Indian Explosives Act, IV of 1884, for the manufacture, possession, and sale of fireworks, and they were all convicted. There were no prosecutions in the Town of Calcutta.

5. No licenses for the sale of fireworks was withdrawn during the year.

Memorandum of fires in the Town and Suburbs of Calcutta and in Howrah from 1st April 1890 *to* 31*st March* 1891.

Number.	Date.	Locality with section letter.	Duration of fire.	Approximate value of property destroyed.	Remarks showing nature of damage done, &c.
			Town.	Rs.	
1	3rd May 1890 ..	Mondul Street, Section E, Town ...	2 hours and 10 minutes ...	50	A large quantity of waste paper in a brick godown in the compound of a two-storied house.

J. LAMBERT, *Commissioner of Police.*

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 1st August, 1891.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
	BURDWAN DIVN.		
1	Burdwan August 1, '91	2·83	Weather—hot and seasonable. Transplantation of *aman* paddy going on *Aus*, jute, and sugarcane doing well. Prices of common rice:— Srs. Burdwan ... ... 16 } Culna ... ... 15 } per rupee. Cutwa ... ... 15½ } Raneegunge ... . 15½ }
	Culna ...	3·97	
	Cutwa ...	4·67	
	Raneegunge ...	3·96	
2	Bankoora „ 1. '91	1·52	Weather - cloudy with occasional light showers. Sowing and transplantation of *aman* rice proceeding fairly in low lands, but retarded in up lands. More rain wanted. Common rice selling at 17½ seers per rupee at Bishenpur and 16¼ seers at Sudder.
	Bishenpur ...	2·74	
3	Birbhum „ 1. '91	3·52	Weather—now very favourable with very good rain. Prospects are now very bright and good. Transplanting actively going on, and though it is rather backward, the young rice is looking very healthy. Price of rice remains at from 16 to 20 seers per rupee.
	Rampore Haut ..	4·14	
4	Midnapur „ 1, '91	1·42	Weather—rainy generally. Transplanting of *aman* paddy proceeding briskly. Indigo is being cut. Sugarcane doing well. Prices of common rice:— Srs. Sudder ... ... 17 } Contai ... ... 17 } per rupee. Tamluk ... ... 16 } Ghatal ... ... 16 }
5	Hooghly „ 1. '91	4·79	Weather—variable and seasonable. Rain has done much good. Transplantation in progress. Prospects good. Prices of common rice:— Srs. Sudder ... ... 14 } Serampore ... ... 14 } per rupee. Jehanabad ... ... 17 }
	Serampore ...	2·33	
	Jehanabad ...	1·04	
6	Howrah „ 1. '91	1·18	Weather—showery. Paddy, jute, and sugarcane doing well. Transplanting of *aman* seedlings still going on. Price of common rice 14 to 14½ seers per rupee.
	Uluberia ...	2·04	
	Central Districts.		
	PRESIDENCY DIVN.		
7	24-Perghs. August 4, '91	2·00	Weather—cloudy with occasional falls of rain throughout the week. State and prospects of crops continue fair. Sugarcane looking well. Rain wanted all over the district for transplantation of *aman* paddy. Prices remain unchanged.
8	Nuddea „ 1, '91	3·47	Weather—seasonable. The rain during the week has done much good to the *aus* crop. Transplantation of *aman* going on. Prospects of other crops good.
	Kushtea ...	2·53	
	Meherpur ...	3·48	
	Chuadanga ...	3·58	
	Ranaghat ...	3·35	
9	Khoolna „ 1. '91	3·41	Weather—cloudy with heavy showers in the beginning of the week; bright and hot during the last two days. Good rain has fallen in many parts of the district, and cultivation is progressing. The river-water in the southern parts of the district continues, however, to be salt yet, and where this is so transplantation is backward. Prospects of jute, *aus*, and sugarcane continue fair.
	Bagirhat ...	8·21	
	Satkhira ...	5·1	
10	Jessore „ 1, 91	4·25	Weather - cloudy and showery. Prospects of *aman* crop favourable. Indigo manufacture and *aus* paddy harvest progressing.
	Jhenidah ..	2·25	
	Magura ...	2·61	
	Narail ...	6·43	
	Bongong ..	2·90	
11	Murshedabad „ 3, '91	5·21	Weather—hot and cloudy Harvesting of *Bhadoi* going on. Recent rain has done good to *aman* crop. Jute and sugarcane doing well. More rain wanted.
	RAJSHAHYE DIVN.		
12	Dinagepur „ 1. '91	2·23	Weather—very hot. *Haimanti* transplanting continues. Standing crops reported to be doing well. Price of rice 15 seers per rupee at Sudder and 16 seers at Thakurgaon.
	Thakurgaon ...	0·20	
13	Rajshahye „ 1, '91	9·73	Weather—very hot, but seasonable. The late rain has much benefited the crops. In some places a 16-anna *aus* crop is expected, 13 annas being the average.
	Nowgong ...	2·52	
14	Rungpur „ 1, '91	3·13	Weather—very close and hot with clouds. Prospects continue fair. *Aus* rice and jute being harvested. Rain has enabled *aman* rice to be transplanted.
	Nilphamari ...	2·89	
	Kurigram ...	3·80	
	Gaibanda ...	2·75	
15	Bogra „ 1, '91	2·70	Weather—sultry and occasionally cloudy. *Aman* rice is being transplanted, and about 6 annas of the land have been transplanted with it. State of jute and *aman* good. The growth of sugarcane is also good except that about 2 annas of it are reported to have been damaged by locusts. Locusts, however, did not appear this week. Reaping of *aus* in progress. Common rice is being sold at 16 seers per rupee.
	Sherpur ...	2·04	
	Nowkhilla ...	2·38	
16	Pubna „ 1, '91	1·16	Weather—hot and close. *Aus* is being harvested. It suffered for want of rain at the time of maturity. Jute is also being cut; the outturn is estimated at 9 annas, total area being 12 annas and outturn per acre 12 annas. The crop suffered at the time of sowing for excessive rain and later on for insufficient rainfall. *Aman* was sown to the extent of three annas more than the normal area, but the crop is deteriorating for insufficient rainfall and absence of flood. Price of rice (ordinary) varying from 13 seers 5¼ chittacks to 16 seers per rupee. Price of jute from Rs. 2-12 to Rs. 4-4 per maund. Fodder sufficient.
17	Darjeeling „ 1, '91	8·44	Weather—fair. *Bhadoi* is being cut in most places. *Haimanti* paddy is being transplanted.
18	Julpigoree „ 1, '91	0·70	Weather—extremely hot. Prospects of crops not good. Rain much wanted Price of rice rising.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts.		
DACCA DIVN.	19	Dacca August 1, '91	2·32	Weather—first part of the week cool and latter part excessively hot. Jute is being cut in low lands. *Aus* is also being harvested. *Aman* doing fairly well. Prospects of crops on the whole good. Cheapest rice sold at from 14 to 16 seers per rupee. Fodder available.
	20	Furreedpur „ 1, '91	2·76	Weather—seasonable. Prospects of crops good. More rain wanted. Rice selling at from 16 to 17 seers per rupee.
	21	Backergunge „ 1, '91	7·71	Weather—seasonable Prospects of crops fair. Common rice selling at from 12 to 17 seers per rupee.
		Bhola .	4·84	
		Perozepur ...	7·06	
		Patuakhali ...	7·20	
	22	Mymensingh „ 1, '91	1·40	Weather—extremely hot. About two-thirds of the *aman* seedlings have been transplanted. Harvesting of jute has commenced. Common rice sells at 13½ seers per rupee.
CHITTAGONG DIVN.	23	Chittagong „ 4, '91	2·32	Weather—seasonable. Transplantation of *aus* and sowing of *aman* continue. Prospects fair. Prices steady.
	24	Noakholly „ 1, '91	6·94	Weather—seasonable; very hot when there is no rain. Crop prospects continue generally good. Prices show a tendency to fall.
	25	Tipperah „ 1, '91	2·58	Weather—seasonable; very hot towards close of week. Prospects favourable. *Aus* promises a bumper crop. Cutting of jute proceeding briskly. Prices stationary.
	26	Chittagong Hill Tracts. July 30, '91	4·28	Weather—rainy with occasional sunshine throughout the week. Early *jum* paddy in flower. Lands are being ploughed for late rice. Common rice is being sold at 11 seers 6 chittacks per rupee.
BEHAR.				
PATNA DIVN.	27	Patna August 1, '91	1·88	Weather—hot and cloudy. Passing clouds with slight occasional showers. Prospects of *bhadoi* and paddy fair. More rain wanted. Transplantation of paddy in progress, though somewhat delayed in places for want of sufficient rain. Prices slightly rising.
		Barh ...	2·40	
		Behar ...	1·12	
		Dinapur ...	1·81	
	28	Gya „ 1, '91	0·20	Weather—hot, sultry and cloudy. Rain wanted for *bhadoi* and paddy crops. Prices of food-grains stationary.
		Nawada ...	3·59	
		Jahanabad ...	2·41	
		Aurungabad ...	0·10	
	29	Shahabad „ 1, '91	1·35	Weather—hot. East winds up to 30th July, light west winds since 31st. In Sudder crops doing well, but more rain wanted for transplanting paddy. In Sasseram the slight rain received has revived the withering *bhadoi* crops. In Buxar and Bhabuah rain very badly wanted. Prices rising. If good rain falls within the next ten days, a medium outturn of crops is possible.
		Bhabuah ...	Nil	
		Buxar ...	0·47	
		Sasseram ...	0·70	
	30	Durbhanga „ 1, '91	1·68	Weather—hot and close. Prospects of *bhadoi* good. Transplantation of paddy and *marua* going on, but more rain wanted. Indigo manufacture in progress. Prices remain almost stationary.
		Madhubani ...	2·23	
		Somastipur ...	3·10	
	31	Mozufferpur „		Report not received.
	32	Sarun „ 1, '91	1·50	Weather—hot. Moderate rain. Prospects of crops good. Heavy rain would be beneficial.
	33	Chumparun „ 1, '91	2·68	Weather—hot and cloudy with occasional showers. Paddy transplantation approaching completion. More rain wanted in places. *Bhadoi* crops doing well. Prices of food-grains stationary.
		Bettiah ...	1·43	
BHAGULPORE DIVN.	34	Monghyr „ 1, '91	6·20	Good rain during part of the week; westerly winds and weather now very hot. *Bhadoi* crops promise well. Prices falling in Beguserai.
		Beguserai ...	2·78	
		Jamui ..	2·49	
	35	Bhagulpur „ 1, '91	2·08	Rain fell in the south of the district on some days. There was little rain in the north. Latterly the weather has been hot. Prospects have improved in the south, but more rain is still wanted. In the north there has been only a little rain, and transplantation of paddy suffers. Prospects of *bhadoi* crops and *marua* are somewhat better, but these also require more rain. Price of common rice 15 seers 2 chittacks per rupee.
	36	Purneah „ 1, '91	2·57	Weather—rather more frequent hot sun and heavy showers. *Bhadoi* crops doing well. Rain badly wanted for transplantation of winter rice. Jute crop in Kishengunge will be short.
		Kishengunge ...	0·84	
		Arrareah ...	1·77	
	37	Maldah „ 1, '91	4·26	Weather—rainy at the beginning of the week; latterly hot and cloudy. Harvesting of *bhadoi* going on. Transplantation of winter rice in progress. Jute is being cut. Prospects good. Cutting and manufacturing of indigo going on. State of other standing crops good. No change in price of common rice.
		Chanchal ...	1·16	
		Shibgunge ...	7·20	
	38	Sonthal Perghs. „ 1, '91	4·17	General rain. Rice is being transplanted. Indian-corn promises well.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
ORISSA DIVN.	39	Cuttack August 1, '91	1·70	Weather—cloudy. *Beali* doing well. Weeding in progress. Transplanting of *sarad* interfered with in parts from deficient rainfall.
	40	Pooree July 30, '91 Khoorda ... Banpur ...	1·97 2·41 Nil	Weather—cloudy with occasional rain. *Sarad* crop on low lands growing well, but plants on high lands in Khoorda withering for want of rain. Some damage done to *sarad* crop by root-disease called "mooli." Price of common rice stationary.
	41	Balasore August, [illegible] '91	1·46	Weather—seasonable in the south, less so in the north of the district. Almost 14 annas of the winter rice crop have been sown in the Sudder subdivision and a somewhat larger proportion in Bhadrak. Rain wanted in the Sudder.
CHOTA NAGPORE				
South-West Frontier Agency.				
CHOTA NAGPORE DIVN.	42	Hazaribagh August 1, '91 Giridih ..	2·35 4·71	Weather—seasonable. Good rain general except in west. Prospects of crops very promising. Transplantation in progress. Prices stationary.
	43	Lohardugga „ 1, '91 Palamow (up to 27th July)	3·07 2·72	Weather—seasonable. Transplantation of low land paddy commenced. More rain wanted. Sugarcane doing well in Palamow.
	44	Singbhoom August 1, '91	1·81	Weather—seasonable. Paddy, *makai*, and other crops doing well. No want of rain.
	45	Manbhoom „ 1, '91 Govindpur ...	2·41 4·54	Weather—very favourable. Crops doing well. Transplanting still going on. Price of common rice from 16 to 20 seers per rupee.

Published for general information.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 1st of August 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	District observations. Of week. Mean for district.	Of week. Normal mean.	Rainfall. Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 4th August* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 1ST OF AUGUST 1891.

DURING a considerable part of the previous week a very feeble whirl had existed over South-West Bengal and the neighbouring parts of the Bay, but which till Saturday, the 25th, had not intensified in any way. On that day, however, a very rapid fall of pressure had taken place at Saugor Island and Calcutta, and a very distinct but small cyclonic storm was formed with its centre over the Sunderbuns to the east of Saugor Island. Wind velocities rapidly increased in connection with the storm, and a gale of wind commenced to blow at the head of the Bay. Immediately after its formation the small storm began to advance in a north-westerly direction, and on the morning of the 26th the storm was in the west of Chutia Nagpur; but as there are no meteorological observatories over that area, the precise position of its centre is doubtful. On the morning of the 26th, as the storm centre was well inland, the "cautionary" storm signal which had been hoisted in the Hooghly on the 25th was hauled down, but on the 26th and partly on the 27th a gale of wind continued to blow at the head of the Bay. On the 27th the centre of the storm was near Jubbulpore and Sutna, on the 28th it was near Jhansi, on the 29th it was to the west of Ajmere, and on the 30th the centre was apparently near Bikanir, but the storm was decidedly more feeble and was evidently filling up. During the whole of its existence the storm was accompanied by a strong cyclonic circulation of winds, and in its rear a heavy wave of moisture-laden monsoon winds spread over the whole of Northern India, and brought general rainfall to practically the whole of the Punjab and other parts of Northern India which had been up to that time almost rainless during the present monsoon.

During the passage of the small storm through the south-western districts of Bengal very heavy rain was received, and with the wave of monsoon winds which followed it, conditions remained favourable for rainfall up till the 30th, and from the 26th to the 30th rainfall was fairly general and of moderate amount in all districts The alterations of meteorological conditions from day to day in Bengal during this period do not call for any detailed remark. From the 29th, however, the conditions in the Bay began to alter. A decidedly rapid fall of pressure took place at the central stations in the east of the Bay, the fall being largest (0·103″) at Diamond Island; wind also became strongly westerly in Burma and east-south-easterly at Akyab, pointing to the possible commencement of a feeble cyclonic circulation of winds, but the winds were very light. On the 30th a further rapid fall of pressure took place at the eastern stations, and winds again showed a feeble tendency to cyclonic circulation over the east of the Bay, though winds were still light, and up to this date probably no storm had formed. On the 31st pressure continued to fall generally, winds again showed rather cyclonic directions, but the circulation was decidedly incomplete, though strong winds commenced to blow at Diamond Island and the Burma stations generally. The land observations on this day indicated that a distinct barometric depression had formed over the east of the Bay, but they did not show any very definite centre to this depression. It is probable, however, that a distinct cyclonic storm had formed to the north-west of Diamond Island on the 31st, but the land observations certainly did not show that it was of any great strength. On the 1st of August pressure continued to fall at Akyab and in the north of the Bay, and there was a rapid rise in Burma. The cyclonic circulation of winds became more complete, and strong winds continued to blow in Burma. A distinct cyclonic storm therefore appeared to exist on this day to the west of Akyab in perhaps about latitude 19° to 20° N. and longitude 90° to 91° E.

The storm had apparently therefore moved in a north-north-westerly direction in the twenty-four hours from the 31st to the 1st. Storm signals were accordingly hoisted on the 1st in the Hooghly and at Chittagong, indicating the existence of the storm in the north of the Bay and its probable advance in a north-westerly direction. The storm afterwards on the 2nd advanced in a north-westerly direction to the Sunderbuns, but there it changed its path and afterwards from the 2nd to the 3rd advanced due west past Saugor Island into Orissa. The history of this storm, however, subsequent to the 1st belongs to the meteorology of the following week.

From the 30th, during the formation of the storm in the Bay, winds in the west and centre of Bengal began to show indraught towards the sea area, and became therefore northerly and north-westerly. Rainfall at once commenced to decrease in amount and area, a large part of the province became practically rainless, and elsewhere rain was usually light and local. For the 31st and 1st August, therefore, little or no rain was reported in the province.

Pressure.—On the 26th pressure fell generally and rather rapidly with the advance of the cyclonic storm over the province, but for the next two or three days a brisk rise was experienced, and on the 29th pressure became above the normal generally by about a tenth of an inch. From the 30th a fall set in which continued up till the close of the week, when pressure had become below the normal by amounts which ranged from 0·03″ at the western stations to 0·1″ at the extreme eastern stations. These variations have more or less neutralized each other, and the mean pressure for the week at the majority of stations has not been very far removed from the normal. In most cases slight excess pressures of about 0·01″ or 0·02″ have been registered, not only throughout the province of Bengal, but also in Assam.

Temperature.—The variations of temperature during the week have to a great extent followed the variations in the heaviness of the rainfall, but on the whole they have been of very slight practical importance. For the whole province the mean temperature for the week has only varied from the normal by a defect of less than a tenth of a degree; but while South Behar has shown an excess of rather more than a degree, South-West Bengal and Chutia Nagpur have shown defects of rather more than half a degree. In the other divisions the temperatures have been almost normal. In Assam an excess temperature of 0·8° has been registered.

Rainfall.—As stated previously, rainfall was fairly general for the first four or five days and to a considerable extent absent on the last two days of the week. During the passage of the small cyclonic storm through the south-west of the province falls of two and-a-half inches and upwards in a single day were reported from Bhuddruck, Contai, Khatra, Gungajalghati, and Morarai. The heavy falls then extended, and on the 27th the following were some of the amounts recorded :—Cox's Bazar 7·32 inches, Darjeeling 4·18 inches, and Kalimpong 5·50 inches, while falls in excess of two and three inches were numerous. On the 28th again heavy rainfall was recorded, Satkanya receiving 5·20 inches, Chittagong 5·02 inches, Lalgola 4·05 inches, and Beauleah 3·95 inches, and again falls in excess of two inches were numerous. On the 29th the falls began to fall off in amount except at Sherpore (Mymensingh), where 11·02 inches fell, though on the 30th again falls in excess of three inches were recorded at Chas, Raghunathpur, Jamtara, Banka, Gogri, Monghyr, Beauleah (5·29 inches), Durgapore, Kandi, Serampore, Baraset, and Barrackpore Falls on the 31st and 1st August were generally light. For the whole week an average fall of four and-a-third inches has been received in East Bengal and of about two and-a-half to three and-a-half inches in all other divisions except Orissa, where an average fall of only one and-a-half inches is reported. Compared with the normal, the fall in South-West Bengal has been in slight excess, and in East and North Bengal and Behar in slight defect. In Chutia Nagpur the defect is large, and equals about a fourth of the usual fall, and in Orissa the defect is even larger and equals nearly one-half of the normal amount. The number of rainy days in the week has also been about equal to the normal except in Orissa and Chutia Nagpur, where they equal about three-fourths the usual number.

In the smaller districts the following have received falls largely in defect of the normal :— All districts in Orissa, Midnapore, Chittagong Hill Tracts, Dacca, Comilla, Pubna, Julpigoree, Mymensingh, Shahabad, Gya, and Chybassa. Rather large excess falls, on the other hand, have been received in Moorshedabad, Chittagong, Backergunge, Rajshahye, Durbhunga, and Sonthal Pergunnahs.

In Assam during the week Silchar has received 3·83 inches, Sibsagar 1·08 inches, and Dhubri 0 84 inch of rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 1st of August 1891 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1891.

The total fall from 1st January to 1st August 1891	25·36
The average fall of the corresponding period for 24 years, S.-G.'s Office ...	35·42

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; lr, lightning reflection; t, thunder; <, lightning.

METEOROLOGICAL OFFICE, INDIA,
The 3rd August 1891.

MEMORANDUM.

Report on the Monthly Statistics of Deaths registered in forty-five districts of Bengal for the month of May 1891.

The total deaths registered in forty-five districts of Bengal during the month of May 1891 numbered 125,975, being less than those in the preceding month by 36,005, but greater than those of the corresponding month of the preceding year and the average of the corresponding months of the previous five years (1886—90) by 1,518 and 6,873, respectively, representing an annual death-rate of 22·92 per 1,000 of the aggregate population of those districts, which is 65,859,534. The death-rate of May 1891 is ·36 higher than the mean rate of the corresponding months of the past five years 1886—90, and is also higher than the rate of the corresponding period of any of the past five years except 1887, *vide* the figures below:—

	May 1886.	May 1887.	May 1888.	May 1889.	May 1890.	Monthly average of five years 1886—90.	May 1891.
Number of deaths	100,248	140,045	115,865	114,896	124,457	119,102	125,975
Ratio per mille per annum	18 24	25·44	21·00	20·88	22·56	22·56	22·92

The mortality-rate during May 1891, as will be seen from the following table, is less than that during the past months of the year:—

Months.			*Number of deaths.*	*Ratio per mille.*
January 1891	...	...	143,492	26·04
February „	...	...	137,553	24·96
March „	...	...	168,185	30·60
April „	...	...	161,980	29·52
May „	...	...	125,975	22 92

The following table shows the death-rates among the different sexes and the five principal classes of the community which comprise the population of the Bengal Province. As usual, on the whole the registered results were greater among the male than among the female population. 118 males died for every 100 females, calculated on the proportion such mortality bears to the total male and female population. Proportionally to population Mahomedans died in greater numbers than either the Hindus, Christians, or other classes, and the Buddhists suffered the least:—

	Sexes.			Classes.				
	Males.	Females.	Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population.	Christians.	Hindus.	Mahomedans.	Buddhists.	Other classes.
Number of deaths	67,844	58,131	...	178	80,743	42,003	122	2,929
Ratio per mille per annum ..	24·84	21·00	118	21·96	22·56	23·64	18·36	21·00

The subjoined table shows the highest proportions of deaths registered during the month of May 1891, arranged in order of sequence and compared with the mortality of the corresponding month of 1890:—

Districts.	Ratio per *mille* during— May 1891.	Ratio per *mille* during— May 1890.	*Districts.*	Ratio per *mille* during— May 1891.	Ratio per *mille* during— May 1890.
Jalpaiguri	78·00	33·24	Bhagulpore	30 72	34·20
Purneah	65·52	23·28	Backergunj	25 80	23·28
Rungpore	48·72	19 20	Noakhali	25·56	32·64
Darjiling	47·28	59·76	Nuddea	25·32	14·16
Dinajpur	30·93	22·32	Hazaribagh	25·20	31·20

Jalpaiguri attained the highest death-rate during the month under notice (78·1 per mille per annum) and the lowest death-rate was recorded in Chumparun (12·36). The high death-rate in Jalpaiguri was due to an excessive mortality from cholera, more than half of the total deaths having occurred from that disease. Eliminating Jalpaiguri, Purneah stands next on the list with a high death-rate (65·52), followed by Rungpore (48·72) and Darjeeling (47·28). It will be seen from the statement appended to this memorandum that the death-rates in six districts ranged between 30·96 and 25·20, in twelve they were between 24·84 and 20·28, and in the remaining twenty-three below 20 per mille per annum. Registration of deaths cannot be said to be accurate in those districts which return death-rates below 20 per mille per annum.

The total mortality during the month under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding month of 1890 and the average of the previous five years 1886—90 :—

	Ratio per *mille* during—		
	May 1891.	May 1890.	Monthly average of five years 1886–90.
Cholera	4·80	2·88	3·36
Small-pox	·24	·24	·12
Fever	14·04	15·84	14·16
Dysentery and diarrhœa	·48	·48	·60
Injury	·36	·36	·36
Other causes	2·64	2·52	2·52

The most noticeable points in connection with the above table are that the death-rate of May 1891 under the head Cholera is higher than in the two past periods with which it is compared, but as compared with May 1890 there is a decrease in the mortality of May 1891 under the head Fever.

The mortality from *Cholera* amounted to 26,810 (ratio 4·80 per mille per annum), against 44,769 (ratio 8 04) in the month before. All the districts suffered, but Purneah the most with a death-rate of 43·20 per mille per annum, then Jalpaiguri (41·40), Rungpore (25·68), Bhagulpore (10·68), Nuddea (7 80), Mymensing (5 40), Durbhunga (5 28), Dinajpur and Maldah (5·04) each, Shahabad (4·68), Sarun (4·20), Pubna (4 08), Darjiling (3·84), Backerganj (3·48), Monghyr (3·24), Rajshahye (3·), Bogra 2·76), and Dacca, Faridpur, and Sonthal Pergunnahs (2·04) each.

The total deaths from *small-pox* numbered 1,967 (ratio ·24 per mille per annum), against 1,926 (ratio ·24) in the previous month. Midnapore sufferered the most with a death-rate of 3·12 per 1,000 of population per annum, next Cuttack (1·68), then Lohardugga (1·20). Six districts were absolutely free from this disease.

Fever caused 77,357 deaths (ratio 14·04 per 1,000 per annum) against 92,474 (ratio 16·80) in the preceding month, and *dysentery and diarrhœa* proved fatal in 2,727 instances (ratio ·48 per mille per annum) against 3,078 (ratio ·48) in the previous month. All the districts returned deaths from both heads; but the greatest mortality-rates from fever were recorded in Jalpaiguri (34·80), Darjeeling (30·96), Dinajpur (24·24), Noakhali (22·20), Purneah (21·60), and Rungpore (20·64). Darjeeling returned the highest death-rate from dysentery and diarrhœa (7·68), followed by Howrah (3·) and Balasore (2·52).

Injury caused 2,570 deaths (ratio ·36 per mille per annum), against 1,930 (ratio ·24) in the previous month, and the mortality from *all other causes* not specified amounted to 14,544 (ratio 2·64 per mille per annum), against 17,803 (ratio 3·24). Poori returned the highest death-rate from the unspecified diseases coming under the head "All other causes," viz., 11·40 per mille per annum.

With regard to *Age*, infants (under one year) as usual perished in the largest numbers, 141·84 per 1,000 of population per annum; next came old persons (60 years and upwards) with a death-rate of 47·88 per 1,000. The lowest death-rate occurred between the ages of 10 and under 15 years, viz. 12·36 per 1,000 per annum.

Detailed information regarding the mortuary statistics of the forty-five districts of Bengal during the month under review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.,*
Sanitary Commissioner for Bengal.

The 1st August 1891.

Statement showing the Results of the Registration of Deaths in the Districts in Bengal for the month of May 1891.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,

The 1st August 1891.

W. H. GREGG, *Dip. Publ. Health, Camb.,*

Sanitary Commissioner for Bengal.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 18th July 1891.

Births.

The total births registered during the week ending with Saturday, the 18th July 1891, in twenty-seven principal towns of Bengal, amounted to 398, and correspond to an annual rate of 19·3 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is ·3 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years except 1886 and 1889, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	21·2	16·8	19·2	22·3	18·9	19·6	19·3

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 27th June 1891.	4th July 1891.	11th July 1891.	18th July 1891.

Total ...	18·6	15·5	17·0	19·3

It will be seen that last week the highest birth-rate was returned from Comillah (42·4) and the lowest from Ranaghat (6·).

Deaths.

The total deaths registered during the week under review amounted to 545, and correspond to an annual rate of 26·4 per 1,000 of the population. The rate of the week is 1·8 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1887 and 1889, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	24·6	26·9	19·9	29·8	21·8	24·6	26·4

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 27th June 1891.	4th July 1891.	11th July 1891.	18th July 1891.
Burdwan	48·8	10·7	33·0	21·4

Poori	33·6	14·7	35·7	35·7
Total ...	31·4	25·0	27·0	26·4

According to the figures returned, the highest mortality occurred in the town of Darjiling (66·7) and the lowest in Santipore (1·7). No deaths were registered during the week in the Ranaghat and Jessore towns.

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per mille.	*Small-pox.*	Ratio per mille.	*Fevers.*	Ratio per mille.	*Dysentery and diarrhœa.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Gya	... 19·1	Mozufferpore	4·9	Darjiling	37·0	Darjiling ...	22·2	Poori ...	18·9
Mozufferpore	... 18·2					Mozufferpore	9·7	Gya ...	17·0
Bhagulpore	... 12·9							Durbhanga	16·5
Chupra	... 10·1							Chupra ...	16·1
Arrah	... 8·4							Mozufferpore	10·9
Patna City	... 7·8							Monghyr ...	10·8
Durbhanga	... 5·5								
Monghyr	... 3·6								
Howrah	... 3·4								

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 6· from cholera, against 6·9 in the preceding week; ·4 from small-pox, against ·6; 9· from fever, against 9·7; 2·9 from dysentery and diarrhœa, against 2·6; ·4 from injury, against the same ratio; and 7·7 from other causes, against 6·7 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	27·6	Christians ...	14·9	Under 1 year	... 229·2
Females	25·2	Hindus ...	29·2	1 and under 5 years	... 48·1
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	109	Mahomedans ...	19·7	5 „ 10 „	.. 27·0
				10 „ 15 „	... 15·5

ANNUAL RETURNS ON CHARITABLE DISPENSARIES IN BENGAL FOR THE YEAR 1890.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 7th August 1891.

RESOLUTION No. 1681.

READ—

The Annual Returns on the Charitable Dispensaries in Bengal for the year 1890.

Read also—

The Triennial Report on the Charitable Dispensaries in Bengal for the years 1887 to 1889, and the Resolution recorded upon it.

The statistics of the past year show an increase in the number of dispensaries as well as of patients treated in them. The total number of dispensaries at the close of the year was 265 against 255 in 1889, the increase being chiefly in class II—institutions managed by local bodies. Several institutions which are actually managed by local bodies are still included in class IIIB as institutions supported by subscriptions or endowments, but receiving aid from Government or local funds. Dr. Hilson drew attention to these in paragraph 12 of the last triennial report on dispensaries, and suggested that they should be transferred to local bodies. Specific proposals under this head were called for in the Resolution of 6th October 1890, reviewing the report, but the subject appears to have been lost sight of.

The total number of indoor and outdoor patients treated rose from 28,981 and 1,179,843 in 1889 to 29,660 and 1,239,850 respectively in 1890. In spite of this increase in the total number of indoor patients, the daily average fell from 1,292·305 to 1,287·626. The average daily attendance of out-patients rose from 8,440·453 to 8,841·17. The following dispensaries show a satisfactory increase in the number of indoor patients:—Gya, 595; Midnapore, 95; Chuprah, 86; Pooree, 74; Deoghur, 65; Comilla, 46; while a falling off is observed at Cuttack of 192, North Suburban Hospital 133, Purulia 92, and Motiharee 82.

Taking indoor and outdoor patients together, and comparing the Bengal statistics for 1890 with the returns of the North-Western Provinces and Assam for 1889, the last year for which figures are available, it appears that in Bengal only 17·9 per thousand of the population resorted to the dispensaries for treatment, while the proportion treated in the North-Western Provinces was 58·2 and in Assam 47·9. In his notes upon statement II, showing the number of indoor and outdoor patients, the Inspector-General of Civil Hospitals presents this fact in a somewhat different form, and suggests that the smaller attendance at dispensaries may be due to the inaccessibility of many dispensaries during the rains, to the number of private practitioners at work among the people, to the operation of rule 37 of the Dispensary Manual, which authorises the Medical Officer to exercise his discretion in refusing to supply medicines free of charge in ordinary cases where the applicant is not poor, and to the smaller amount of practical surgery. Of these various causes it seems probable that the number of private practitioners and the preference of the people in all but surgical cases for the methods of the kabiraj and the hakim are really those which contribute most largely to the result; but the question is obscure and difficult, and no confident opinion can be expressed until the surgical standard of Bengal dispensaries has been raised, and more inducement has been offered to the people to come in for treatment. Dr. Hilson is mistaken in saying that in 1889 the number of indoor patients treated in Bengal exceeded the number for the North-Western Provinces. The actual figures for that year were in Bengal 28,981, and in the North-Western Provinces 51,705.

2. There was a considerable increase in the number of patients treated for malarial fever, and the Inspector-General of Civil Hospitals infers from this that the year was more unhealthy than usual, an inference which is borne out by the increased mortality from fever and other diseases shown in the Annual Report of the Sanitary Commissioner. The proportion of persons suffering from fever to the total number treated in the year 1889 is incorrectly shown in the notes on statement No. III as 10·97, the correct figure being 19·2. The Lieutenant-Governor notices with satisfaction a considerable increase in the attendance of patients suffering from eye-diseases. On the other hand, the number of small-pox patients treated in the dispensaries was extraordinarily small. It appears from the Sanitary Commissioner's report that there were 12,619 deaths from small-pox in the province, but the attendance in hospitals and dispensaries for this disease was only 103; and the Lieutenant-Governor having recently visited Chittagong during an outbreak of small-pox observed that very few cases were brought for treatment to the special small-pox hospital attached to the dispensary at that station. In most cases a separate ward for the treatment of infectious diseases is provided, but it must be admitted that the aspect of these wards is not inviting.

3. The total number of major operations increased from 5,174 to 6,344. Adding to this number 235 major operation cases remaining under treatment at the close of the previous year, 5,244 cases were cured and 588 cases were relieved, while only 116 cases terminated fatally. The number of cataract cases shows a remarkable increase, from 896 to 1,686, the percentage of recovery in these cases being 80·6 as compared with 68·89 in 1889. The Inspector-General draws attention to the excellent work done at Gya by Surgeon-Major R. D. Murray, who during nine months of the year performed 838 operations, of which 571 were for cataract. In consequence of Dr. Murray's activity in practical surgery the number of indoor patients rose from 718 to 1,313, and of outdoor patients from 9,642 to 11,312, showing that the people are ready enough to take advantage of European surgical treatment when it is brought within their reach. Dr. ffrench-Mullen has also treated a large number of cataract cases at Rampore

Boalia. Notwithstanding this increase in the number of major operations, the statistics under this head for Bengal still compare unfavourably with the results obtained in the North-Western Provinces, where 17,152 major operations were performed in 1889, the last year for which returns have been issued.

4. The following table compares the different classes of patients treated during the year:—

1					2					3							
TOTAL TREATED DURING THE YEAR.					CLASS.					DAILY ATTENDANCE.							
					a	b	c	d	e	Average number.				Ratio per cent. of—			
Year.	Men.	Women.	Children.	Total.	Europeans.	Eurasians.	Mussulmans.	Hindus.	Other classes.	Men.	Women.	Children.	Total.	Men.	Women.	Children.	Total.
1889	712,002	189,980	306,842	1,208,824	697	3,135	373,006	808,959	23,027	5,759·172	1,589·243	2,384·313	9,732·758	59·17	16·33	24·5	100
1890	758,276	194,247	316,987	1,269,510	870	3,103	394,497	847,120	23,920	6,033·805	1,594·52	2,500·471	10,128·796	59·57	15·74	24·69	100

The proportion of females and children treated is very small—a fact attributed by the Inspector-General of Civil Hospitals to the insufficient arrangements at most of the dispensaries for separate treatment of the male and female patients. He will be requested, after making due enquiry to report what arrangements for the separate accommodation he would recommend. The Lieutenant-Governor conceives that more seclusion is required for female patients and for female relations attending on the sick, but proposals for the provision of such conveniences must be drawn up with strict reference to economy.

5. The total income of the dispensaries in Bengal increased from Rs. 4,73,332-15-1 to Rs. 5,07,583-2-11, and the total expenditure, including investments, from Rs. 4,37,095-3-9 to Rs. 4,74,853-15-6. The Lieutenant-Governor notices with satisfaction that the amount of subscriptions paid by native gentlemen has increased from Rs. 1,19,623 in 1889 to the creditable total of Rs. 1,45,981 in 1890. The percentage of income contributed by Government was remarkably small, being only 5·31, while in the North-Western Provinces and Assam in the year 1889 it was 51·95 and 31·96 respectively. The contribution of municipalities was 33·68 per cent. of total income as compared with 8·55 and 4·70, the figures for the North-Western Provinces and Assam respectively for 1889. The average cost of the daily diet of each patient during 1890 was 1 anna and 7·3 pies, and in 1889 it was 1 anna 7 pies, against 8 pies in the North-Western Provinces and 2 annas 4 pies in Assam. The corresponding figure for jails is only 1 anna, but the difference is sufficiently accounted for by the greater care necessary in the dieting of invalids.

ORDER.—Ordered that a copy of the Resolution, together with a copy of the report, be submitted to the Government of India, Home Department, for information.

Ordered also that a copy of the Resolution be forwarded to the Inspector-General of Civil Hospitals, and to all Commissioners of Divisions for information, and that the Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON EMIGRATION FROM THE PORT OF CALCUTTA TO THE BRITISH AND FOREIGN COLONIES FOR THE YEAR 1890.

GENERAL DEPARTMENT—COLONIAL EMIGRATION.

Calcutta, the 7th August 1891.

RESOLUTION.

READ—

The Annual Report on Emigration from the Port of Calcutta to the British and Foreign Colonies for the year 1890.

Administrative measures.

The only administrative change of any importance was the introduction by the Government of India of a new set of rules governing the provision of artificial ventilators on board of emigrant vessels. The effect of the new rules is to insist on an artificial ventilator which will be capable of supplying the between-decks with 500 cubic feet of air per adult per hour, and also of being worked either by steam or by hand. The insufficiency of the artificial ventilators with which some of the ships had been previously fitted had been strongly exemplified by the voyage of the *Elbe* in the year 1889 to the Dutch colony of Surinam. The vessel was fitted with a Thiers' ventilator, an apparatus dependent for its working on conditions of weather and sea, which had been found on previous voyages to have worked unsatisfactorily. The voyage on this occasion was a peculiarly stormy one, and it was necessary to keep the coolies under hatches for a considerable time, the result being much sickness and a mortality of 6·07 per cent. The Government of India have now notified, in addition to the rules above referred to, that the use of Thiers' ventilators will be proscribed after the month of October 1893. The increasing use of powerful steamers, especially those of the British India and the Anchor Line Companies, has since in several cases allowed of vessels being altogether exempted from the provisions as to artificial ventilators when travelling *vià* the Suez Canal or to Mauritius. The ordinary cowl-head and shaft ventilation has in such cases been decided to be fully sufficient.

2. The following table, gathered from various parts of the Protector's Report, shows in a succinct form the number of emigrants (1) demanded by the various colonies, (2) actually collected and registered by the sub-agents working under the orders of the Agents for those colonies, (3) despatched to and received in the Calcutta depôts, (4) embarked for the colonies :—

	Requisitioned.		Registered.		Arrived in depôt.		Embarked.	
	1889.	1890.	1889.	1890.	1889.	1890.	1889.	1890.
Demerara	3,170	5,000	5,470	8,956	4.238	6,622	3,426	4,673
Trinidad	2,658	3,500	4,515	5,122	3,697	4,266	2,897	3,435
St. Lucia	...	510	...	245	...	189	...	...
Jamaica	...	1,000	...	992	...	626	...	...
Mauritius	1,417	560	2,762	1,899	2,430	1,604	2,000	1,119
Natal	750	900	1,573	2,442	1,258	1,684	693	1,432
Fiji	750	1,100	899	1,600	883	1,441	675	1,155
Surinam	1,200	1,256	1,594	1,822	1,522	1,632	1,256	1,256
Total ...	9,945	13,826	16,813	23,078	14,028	18,064	10,947	13,061

With the exception of Mauritius, every colony called for a greater number of emigrants than in the previous year, and the two West Indian colonies Santa Lucia and Jamaica, which had not taken any coolies since 1884-85, again sent in requisitions; the total number requisitioned shows an increase of 3,881 and the number actually embarked an increase of 2,114. The number shown in the above table as embarked includes all souls, of whom 12,154 were statute adults, thus falling short of the requisition by 1,672. The explanation of the deficit is that the report is for the calendar year, while the emigration season, *i.e.*, the period during which vessels may be despatched from Calcutta, extends for the West Indian colonies up to the 31st January, while that for Fiji begins on the 1st December and ends on the 15th July, and that for

Natal and Mauritius extends throughout the year. It will be seen that the numbers which arrived in the Calcutta depôts far exceeded the colonial requisitions, and it is reported that the deficit above mentioned was almost entirely made up in the first three months of the present year. The actual despatches as compared with previous years are shown by the following figures:—

1888.		1889.		1890.	
Statute adults.	Total souls.	Statute adults.	Total souls.	Statute adults.	Total souls.
6,544½	7,121	10,041½	10,947	12,154	13,061

Speaking generally, the increased numbers asked for were due to the improving prospects of the sugar industry. From the Indian point of view, the steady increase of emigration is extremely satisfactory, coupled as it has been in the year now reported on by a complete absence of any serious complaints as to the life and treatment of the coolies in the colonies.

Recruiting, registration, &c.

3. The history given by the Protector of the emigrants previous to their despatch from this country presents few noteworthy points. The most striking feature is the marked transfer of the seat of recruitment from Bengal to the North-Western Provinces and Oudh. The following statement gives the figures for the two last years:—

	1889.	1890.
From Bengal and Behar	7,818	6,646
From North-Western Provinces and Oudh ...	8,995	16,432
Total recruited ...	16,813	23,078

In the previous year (1889) the district of the 24-Pergunnahs headed the list with 3,394 registrations. Next came Shahabad with 2,630, and then Benares with 2,085. In the year under review Benares heads the list easily with 3,043; then come Ghazipur and the Oudh district of Fyzabad with 2,204 and 2,055 respectively; and after them the 24-Pergunnahs and Shahabad with 2,027 and 1,813.

Registrations, however, do not give a true indication of the sources from which the emigrants are drawn, as large numbers have previously left their homes before they register as emigrants to the colonies. The statement given by the Protector showing the native districts of the recruits brings the district of Azamgarh to the front with 2,823 emigrants, followed by Basti, Ghazipur and Balia, and by Shahabad in the fifth place only.

There is practically no clashing of interests between recruiters for colonial purposes and those who collect for Assam and Cachar, the requirements of the two classes of countries having so far been entirely distinct. Assam prefers the Bengali and aboriginal races; the colonies recruit a large majority from the ranks of Beharis and up-country men. With regard to the 24-Pergunnahs, it has always to be explained in reviewing the year's history of recruitment that the figures are entirely misleading. Out of the 2,027 emigrants registered in this district, only 10 were natives of the district. The Protector again raises the complaint that many of these 2,027 were brought down to Calcutta professedly under the free system of inland emigration, and that on arrival they were drafted to colonial depôts. The facts are beyond all doubt, but as long as the free emigration system continues it must be so, and the Lieutenant-Governor does not see any serious objection to the practise, so long as the Protector is certified that they are willing and suitable emigrants to the colonies.

Emigrants unaccounted for after registration and rejections.

4. The total failure of the Agents to account through their sub-agents for the very large number of emigrants registered at the sub-depôts who never reach the Calcutta depôts, and also the increasing proportion of rejections at those depôts, are two important matters. It is represented that the Agents are not able to visit the up-country sub-depôts in any systematic manner during the busy recruiting season, and that the sub-agents are in many cases exceedingly

ignorant and too often unscrupulous; but at the same time the hardship and loss incurred by drawing people from their own villages to registering stations and then either losing sight of them altogether, or having to return them from Calcutta by a journey of several days' duration, are so obvious that it would seem well worth while to make some serious attempt to face the matter. The Lieutenant-Governor believes that a good deal might be done by the Agents visiting their sub-depôts up-country, even if they have to make considerable efforts in order to spare time from their other duties, and also by a very careful selection of sub-agents. If emigration continues to prosper and recruiting to expand, as it has done during the last year, there should be little difficulty in attracting a superior class of men to do the work. If nothing can be done in the direction above indicated, there remains the course proposed by the Protector to require a register of all coolies accommodated at each sub-depôt to be kept up in proper form under the supervision of the Magistrate of the district. The Protector is desired to give the matter his further consideration, and to report fully on the necessity of the latter course. In explanation of the above remarks the figures may here be noted. Out of the 23,078 emigrants registered, no less than 4,753 never reached the Calcutta depôts and were totally unaccounted for; while out of the 19,336 who were accommodated in the depôts, as many as 1,830 or a percentage of 9·46 were rejected as unfit to be sent to the colonies. The above figure, 19,336, includes 1,272 persons transferred from other depôts, remaining from the previous year and born in depôts.

Depôt management.

5. The Lieutenant-Governor has read with pleasure the report of the Medical Inspector, Surgeon-Major J. F. P. McConnell, on the health and good management of the depôts. There was a slight increase in the percentage of hospital admissions from 6·12 in 1889 to 6·13 in 1890, but on the other hand the percentage of deaths decreased from 0 72 to 0·68. These figures are satisfactory when it is considered that during a great part of the season the depôts were largely occupied. There were 26 cases and 18 deaths from cholera, as against 13 and 9 in the preceding year, the increase being due to the greater prevalence of the disease in and around Calcutta. Measles as usual gave considerable trouble both in depôt and on ship-board. The question of increasing the number of days during which emigrants must be detained in depôt previous to embarkation was again before Government, but it was decided not to alter the present minimum of seven days or the Protector's discretion to let emigrants sail, if necessary, without undergoing even that period.

Return emigrants.

6. Seven sailing ships and five steamers returned from the colonies bringing 4,739 homeward-bound emigrants, of whom 112, or 2·36 per cent., died on the voyage. The aggregate savings of these people amounted to no less than Rs. 6,96,176, or nearly Rs. 147 per head. It is observed that by far the lowest average per head is saved in the colonies of Fiji and Mauritius. No explanation of this is given, nor is it apparent in the case of Fiji. In the case of Mauritius it appears to be connected with the low rate of wages given, viz. Rs 5 to Rs. 7 per month to a male adult and Rs. 3 to Rs. 4 to a female, in addition to daily rations, as against the other colonies, where the rate is about one shilling a day to an adult male and 8 or 9 pence to a female. Natal shows the largest average savings, namely Rs. 263-3-5 per head, and is followed by Trinidad with Rs. 236-11-6 per head.

The average duration of the voyage of return ships from the West Indies was 137 days, as against 92 days on the outward voyage from India. The question of extra provisioning for homeward-bound ships in addition to the scale provided by the emigration rules for ships bound to the West Indies is under the consideration of the Supreme Government, both as regards sailing ships and steamers.

Administration of estates.

7. The estates of deceased emigrants are divided into three classes—(1) those who die in depôt and on the outward voyage, (2) those who die in the colonies, (3) those who die on the voyage home or in depôt immediately on arrival in Calcutta and before being sent to their homes up-country.

If the heirs cannot be traced, the estates of classes (1) and (3) lapse to the Indian Government; those of class (2) to the Colonial Governments. The pro-

gress of administration of classes (1) and (3) has been very fair during the year under report. Ninety-one such estates were under administration, amounting to Rs. 14,230, of which Rs. 11,435 were disposed of, leaving Rs. 2,795 still under enquiry. In the case of 20 estates, amounting to Rs. 261, the heirs could not be traced, and this amount therefore lapsed to the Indian Government.

The administration of class (2) was not so satisfactory. Out of 431 estates, aggregating Rs. 59,160, no less than Rs. 43,269 remained undisposed of at the close of the year. Great delay is caused by the necessity of having to correspond with the colonies, and the delay is finally aggravated in the case of several colonies by a refusal to pay to heirs, where traced, except on succession certificates. The Lieutenant-Governor recognizes the desirability of proper enquiries before the assets of an estate are handed over, but in his opinion the Protector is capable of making such enquiries, and it is unnecessary to insist on the production of the decision of a court, in the obtaining of which there is sure to be a considerable amount of delay. It appears from the report that the Colonial Governments undertook a few years ago to arrange for more prompt payments, but that the arrangements fell through. The Protector is desired to consult the Agents and report fully on the subject of the delays generally and the succession certificate question in particular.

Finance.

8. Owing to the impetus which recruitment received there has been a marked improvement in the financial position of the Colonial Emigration Fund, and the Protector reports that there was at the close of the year a balance of Rs. 8,384-6-3, from which relief can, if necessary, be given to the Madras portion of the Fund. The Lieutenant-Governor will consider this question and pass orders thereon.

9. From the above summary it will be seen that the year 1890 was in every way a successful one for colonial emigration; and in recognizing the fact the Lieutenant-Governor desires to express his thanks to those officers to whom in no small degree the result was due, namely to the Protector of Emigrants, Surgeon-Major D. W. D. Comins; to the Medical Inspectors, and to the Emigration Agents for the respective Colonial Governments. Dr. Comins is at present, at the request of some of the colonies, visiting the West Indies with a view to becoming personally acquainted with the condition and treatment of the emigrants in their adopted homes. He has already visited St. Lucia, Trinidad, and Demerara, and will, it is hoped, extend his visit to the remaining British colonies, and by permission of the Governments of France and the Netherlands to the French colonies and to Surinam.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 8th August, 1891.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		***Western Districts.***		
BURDWAN DIVN.	1	Burdwan August 8, '91 Culna ... Cutwa ... Raneegunge ...	3·03 2·27 1·13 1·42	Weather—rainy. Transplantation of *aman* going on. *Aus* and sugarcane doing well. Prices of common rice:— Srs. Burdwan ... ... 16 } Culna ... ... 14 } per rupee. Cutwa ... ... 15¼ } Raneegunge ... . 15¼ }
	2	Bankoora „ 8, '91	4·47	Weather—rainy. The rainfall of the week has greatly facilitated transplantation, but more is wanted. Common rice is selling at 17½ seers per rupee at Bishenpore and 18¾ seers at Bankoora.
	3	Birbhum „ 8, '91 Rampore Haut .	3·16 2·31	Weather—seasonable. Good rain everywhere. Prospects of crops very good. But prices have somewhat risen, ranging now from 16 to 18 seers per rupee.
	4	Midnapur „ 8, '91	4·50	General rain. *Aman* rice is being transplanted. Indigo manufacture nearly finished. Sugarcane doing well. Prices of common rice:— Srs. Sudder ... ... 16 } Contai ... ... 17 } per rupee. Tamluk ... ... 16 } Ghatal ... ... 16 }
	5	Hooghly „ 8, '91 Serampore . Jehanabad ..	1·70 4·05 3·48	Weather—showery and unsettled. *Aus*, jute, and sugarcane doing well. Transplantation of *aman* still in progress, weather being most favourable. Prices of common rice:— Srs. Sudder ... ... 14 } Serampore ... ... 14 } per rupee. Jehanabad ... ... 17 }
	6	Howrah „ 8, '91 Uluberia ...	2·63 2·22	Weather—rainy. Paddy, jute, and sugarcane doing well, and prospects good. Transplanting of *aman* still going on. Price of common rice 14 to 14½ seers per rupee.
		Central Districts.		
	7	24-Pergns. August 11, '91	2·61	Weather—seasonable; hot towards close of week. Prospects of jute, *aus* and sugarcane continue fair. Transplantation of *aman* going on, but more rain wanted. Prices slightly rising.
PRESIDENCY DIVN.	8	Nuddea „ 8, '91 Kushtea ... Meherpur ... Chuadanga ... Ranaghat ...	0·73 0·13 0·72 0·95 3·02	Weather—cloudy and rainy. Rain wanted on high lands for paddy. Harvesting of paddy on low lands going on. Other crops are doing well.
	9	Khoolna „ 8, '91 Bagirhat ... Satkhira . .	1·12 0·41 0·90	Weather—cloudy with light showers. The rainfall this week has been very scanty, though there are signs of good rain since yesterday (7th). More rain urgently needed for transplantation of *aman*. Prospects of *aus* and jute fair. Prices are rising, specially at Satkhira.
	10	Jessore „ 8, '91 Jhenidah . Magura ... Narail .. Bongong ...	2·07 0·47 0·85 2·68 1·30	Weather—raining almost incessantly throughout the week. Prospects good. Jute rather stunted in growth. Rivers rising too slowly. *Aman* paddy wants more water, but is promising.
	11	Murshedabad „ 10, '91	1·49	Weather—hot. Harvesting of *bhadoi* still going on. Sugarcane doing well. *Aman* thriving. Prospects favourable.
RAJSHAHYE DIVN.	12	Dinagepur „ 8, '91 Thakurgaon ...	0·07 0·76	Weather—very hot and close. Transplantation of *haimanti* rice still continues. Rain much wanted for transplantation on high lands. Prospects of standing crops fair. Price of rice stationary.
	13	Rajshahye „ 8, '91 Nowgong ...	0·69 Nil	Weather—not rainy. All crops on the ground doing well; the wet weather will do much good.
	14	Rungpur „ 8, '91 Nilphamari ... Kurigram ... Gaibanda ...	0·01 0·23 0·04 Nil	Weather—hot. Prospects continue fair. Harvesting of *aus* and jute going on. Rain wanted for transplantation of *aman*.
	15	Bogra „ 8, '91 Sherpur .. Nowkhilla ...	0·19 0·39 0·66	Weather—generally fine till 6th; latterly cloudy with prospect of rain. Reaping of *til* and *kaon* finished, with outturn of 16 annas. A large quantity of jute and *aus* rice has been cut; outturn of the former is estimated at 14 annas, and the latter is an early and generally good crop. The recent dry weather has rather benefited it. A considerable amount of *aman* rice has been transplanted, but for this crop rain is now much needed. The Collector has lately seen the crop over a large area on both sides of Bogra where no harm had been done, but it is reported to be suffering in some places, though not seriously. Sugarcane doing well. Common rice, as before, selling at 16 seers a rupee.
	16	Pubna „ 8, '91	0·71	Weather—cloudy with slight rain. *Aus* paddy is being harvested in some places. State of the crops same as before. More rain urgently wanted. Rivers are rising.
	17	Darjeeling „ 8, '91	2·85	Weather—fair. *Bhadoi* crops doing well. Rain wanted for transplantation of *haimanti* paddy. Occasional flights of locusts in some parts of the district, but no appreciable damage to crops done by them.
	18	Julpigoree „ 8, '91	0·45	Weather—very hot. Prospect of jute and *bhadoi* paddy not good. Transplantation of *haimanti* paddy not going on for want of rain. Common rice selling at 13 seers per rupee.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts.		
DACCA DIVN.	19	Dacca August 8, '91	Figures not given	Weather—seasonably hot. Cutting of jute and *aus* going on in low lands. *Aman* still thriving. Prospects of crops on the whole fairly good. Fodder is available. Cheapest rice sold at from 14 to 16 seers per rupee.
	20	Furreedpur „ 8, '91	0·66	Weather—seasonable. Harvesting of *aus* continues. More rain wanted for *aman.* Jute steeping has commenced. Price of rice stationary.
	21	Backergunge „ 8, '91	1·57	Weather—seasonable. Prospect of crops fair. Price of common rice varies from 13 to 17 seers per rupee.
	22	Mymensingh „ 8, '91	0·92	Weather—very hot. More rain needed for *aman* paddy. Common rice sells at 13½ seers per rupee.
CHITTAGONG DIVN.	23	Chittagong „ 8, '91	1·87	Weather—seasonable with occasional rain. Transplantation of *aus* and ploughing for *aman* still continue. Prices steady.
	24	Noakholly „ 8, '91	1·59	Weather—showery at Sudder for the most part of the week; a little rain at Fenny Transplantation of *aman* and harvesting of *aus* rice continue. Crop prospects fair, but more rain wanted, particularly in Fenny, where the price of rice has risen.
	25	Tipperah „ 8, '91	0·53	Weather—seasonable, cloudy and damp. Jute is being rapidly harvested. *Aus* paddy is also being reaped, and land ploughed for *aman.* Prospects of standing crops good. More rain wanted in Brahmanbaria. Prices stationary.
	26	Chittagong Hill Tracts. August 6, '91	2·26	Weather - rainy with occasional sunshine throughout the week. Early *jum* paddy in flower. Cotton progressing. Lands are being ploughed for late rice of the plain. Common rice is being sold at 11 seers 6 chittacks rupee.
BEHAR.				
PATNA DIVN.	27	Patna „ 8, '91	0·56	Weather—hot and cloudy. Prospects of *bhadoi* and paddy fair. More rain wanted in places. To-day (8th) is showery. Transplantation of paddy progressing. Prices stationary.
		Barh ...	1·00	
		Behar ...	1·76	
		Dinapur ...	0 62	
		Hilsa ...	2 50	
	28	Gya „ 8, '91	3·52	Weather—hot, cloudy and rainy. The rain has been very beneficial to both *bhadoi* and paddy crops. Transplantation has commenced. More rain is wanted. Prices of food grains stationary.
		Nawada ...	2·13	
		Jehanabad ...	0·75	
		Aurungabad ...	0·78	
	29	Shahabad „ 8, '91	1 00	Weather—hot and cloudy with some sunshine. East winds prevailing. Prospects of crops improved, particularly in Bhabuah and Sasseram. In Sasseram 3·25 inches of rain have fallen on 7th since the despatch of the subdivisional report. More rain still required, specially at Buxar. In Buxar and part of Arrah the ground is still too hard for transplantation of paddy, except where it is reached by canal water. Prices have slightly risen in Arrah and Sasseram.
		Buxar ...	0·99	
		Bhabuah ...	4·15	
		Sasseram ...	1·65	
	30	Durbhanga „ 8, '91	0·44	Weather—cloudy with east wind. *Bhadoi* prospects continue fair. More rain urgently required for late rice. Indigo manufacture in progress. Prices have slightly risen.
		Somastipur ...	3·95	
		Madhubani	0·21	
	31	Mozufferpur „ 8, '91	0·63	Weather—hot; occasionally cloudy; a few showers. Crops on the ground are still in good condition, but rain is much wanted. Transplanting of paddy retarded for want of rain. Rivers unusually low.
		Sitamarhi ...	0 55	
		Hajipur ...	1 50	
	32	Sarun „ 8, '91	1·06	Weather—cloudy and hot. Good rain falling to-day (8th). *Bhadoi* crops generally good, but want rain urgently. Rain also wanted for paddy transplantation. If to-day's rain is general, it will be very beneficial. In the west of the Sewan subdivision, *bhadoi* crops and paddy seedlings have been withering for want of rain.
	33	Champarun „ 8, '91	0·42	Weather—cloudy with occasional slight showers. Paddy transplantation stopped in some places for want of rain. Prospects of *bhadoi* good. Price of common rice varying from 13 to 14½ seers per rupee.
		Bettiah ...	0 05	
BHAGULPORE DIVN.	34	Monghyr „ 8, '91	3·45	Weather—hot at beginning of week; now of ordinary monsoon character. *Bhadoi* crop doing very well. Transplantation of paddy going on in some parts, but retarded owing to insufficient rainfall. Four annas of paddy reported to have been sown in the Sudder subdivision. Indigo doing well. Prices stationary.
		Begoserai ...	1·11	
		Jamui ..	1·57	
	35	Bhagulpur „ 8, '91	2·23	Weather—seasonable for the most part. In the south prospects are fair, but more rain is wanted. In Soopool prospects are unfavourable as there has been no sufficient rain yet. Price of common rice 15 seers 1 chittack per rupee.
	36	Purneah „ 8, '91	0 02	Weather—hot. Only very light showers. *Bhadoi* in parts suffering from want of rain; not more than a 9-anna crop expected in Arrareah. *Aghani* cannot be transplanted. Jute crop will be a short one throughout the district.
		Kishengunge ...	0·19	
		Arrareah ...	0 46	
	37	Maldah „ 8, '91	0·83	Weather—hot and cloudy. 0·71 inch of rain at head-quarters on the 8th. High east wind prevails. Harvesting of *bhadoi* and transplantation of winter rice pushing on. Jute is still being cut. Cutting and manufacturing of indigo over in some places. Price of common rice stationary.
		Chanchal ...	0·54	
		Shibgunge ...	0·40	
	38	Sonthal Perghs. „ 8, 91	2·42	Weather—generally cloudy. *Janera* is doing well. Transplantation of paddy on low land nearly over, but more rain wanted, especially in Rajmehal and Godda, for upland. About 10 to 12 annas of paddy planted out. On the whole, prospects of crops good.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	39	Cuttack August 8, '91	7·85	Weather—cloudy and rainy. *Beali* and sugarcane doing well. *Sarad* also doing well, except in a few places where rain is still wanted.
	40	Pooree „ 6, '91	5·76	Weather—seasonable. Puddling of *sarad* crop on low lands going on. Miscellaneous crops doing well. Price of common rice stationary.
	41	Balasore „ 8, '91	3·69	Weather—seasonable. Puddling and transplantation of rice in progress. More rain wanted in north of district.
CHOTA NAGPORE				
South-West Frontier Agency.				
Chota Nagpore Divn.	42	Hazaribagh August 8, '91 Giridih ...	5·79 1·32	Weather—seasonable. Transplantation of rice progressing well: and all crops are promising, except in west where rain wanted. Prices high but stationary.
	43	Lohardugga „ 8, '91 Palamow (up to 3rd Aug.)	4·63 4·21	Weather—seasonable. Plenty of rain during the week has done much good to the crops. Transplantation of low land paddy is carried on vigorously. *Bhadoi* crops doing well.
	44	Singbhoom August 8, '91	5·53	Weather—seasonable. Satisfactory reports on the state of the crops received from all sides. Price of common rice 12 seers per rupee at Chaibassa and 16 seers at Dhalbhoom.
	45	Manbhoom „ 8, '91 Govindpur ...	3·61 3·96	Weather—seasonable. Transplanting still going on. Sufficient rain has fallen except in the south and south-east corners of the district. Cattle disease is said to be raging in the Tundi Pergunnah. Prices of common rice from 12 to 20 seers per rupee.

Published for general information.

CALCUTTA; REVENUE DEPT.,
The 11*th August*, 1891.

C. E. BUCKLAND,
Offg. Secy. to the Govt. of Bengal.

* Mean of 6 days.

Explanation.—Summary.— The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 8th of August 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th May 1891. Mean for district.	Since 16th May 1891. Normal mean.	Since 16th May 1891. Variation.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 11th August* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 8TH OF AUGUST 1891.

ON the 31st of July a cyclonic storm of considerable intensity had formed in the Bay of Bengal to the north-west of Diamond Island, and it then commenced to move in a north-westerly or north-north-westerly direction. On the 1st of August the storm was to the west of Akyab in perhaps latitude 19° to 20° N,. and longitude 90° to 91° E. It was giving very heavy weather in the Bay, and strong winds were reported to the east and south of the storm, and hence storm-warning signals were hoisted in the Hooghly and at Chittagong from the morning of the 1st. On the morning of the 2nd, or the first day of the week under review, the storm centre was nearly over the Sunderbuns between Chittagong and Saugor Island, and it had therefore again advanced in a north-westerly direction. It here suddenly changed the direction of its advance, and during the second moved along the face of the Sunderbuns in a due westerly direction, and it passed close to Saugor Island between 8 P.M. of the 2nd and 2 A.M. of the 3rd, passing apparently a little to the south of it, and during the passage the very low pressure of less than 29·3 inches was recorded. At 8 A.M. of the 3rd the centre had crossed the coast and was to the west of Balasore, where pressure equalled only 29 293 inches. The storm as it passed over the land was not a very severe one, giving only an ordinary gale of wind, but from reports received from vessels involved in the storm, it appears to have been a decidedly fierce one at sea. On the morning of the 3rd, as the storm centre was well inland, the storm signals which had previously been hoisted were lowered. On the 4th the storm centre was probably in the west of Chutia Nagpur, though, as there are no meteorological observatories over this area, its exact position is difficult to determine; but it is clear that the westerly movement of the 2nd to the 3rd had again been changed into a north-westerly movement, or to the movement it originally had on the 31st to the 2nd. On the morning of the 5th the centre of the small storm was near Sutna, so that it had again advanced in a north-westerly direction, but on this day it appears to have rapidly filled up, and on the morning of the 6th it had practically ceased to exist

In the passage of the small storm across the head of the Bay, and in its north-westerly advance through the extreme south-western districts of Bengal, rather heavy rain was brought up, first by the storm itself and afterwards by the strong advance of monsoon winds which followed in its rear. The heavy rain was, however, mainly confined to the western and southern divisions of the province, for East and North Bengal during this period received only light and local rain.

From the 5th, however, conditions again began to change at the head of the Bay, and pressure became comparatively low at Saugor Island and Balasore, and showed a distinct tendency to form a feeble depression over this area, while round a centre to the west of Saugor Island winds showed a decided tendency to set up a cyclonic circulation. On the 6th a distinct but exceedingly feeble depression existed, partly over the north-west angle of the Bay and partly over South-West Bengal, and the cyclonic circulation became a little more clearly defined. On the 7th conditions were almost the same except that the centre of the circulation of winds was to the south of Saugor Island, and that heavy rain had commenced to fall at that station. The small whirl or depression then commenced to advance in a north-westerly direction, and on the morning of the 8th it was in the south of Chutia Nagpur. During its existence at the head of the Bay it was throughout a very feeble depression.

During the second half of the week, therefore, conditions have again been favourable for rainfall in the southern and western divisions of the province, and hence Orissa and Chutia Nagpur have received falls in excess of the normal; in South-West Bengal and South Behar the falls have been almost normal, but over the remainder of the province rainfall has been in decided defect.

Pressure.—The variations of pressure during the week have been to a great extent dependent, first, on the movement of the cyclonic storm which passed along the head of the Bay through the south-western districts, and secondly, on the development of the feeble whirl near Saugor Island. Thus on the 2nd pressure was falling moderately in South-West Bengal and Orissa, while elsewhere there was a moderate increase. On the 3rd a very rapid fall occurred in the neighbourhood of the depression and over Chutia Nagpur and Behar, the fall at Balasore being 0·146″, and the pressure at that station being 0·23″ below the normal, while in the east and north of the province pressure was rising. On the 4th pressure had risen over the whole province, particularly in the rear of the depression, and at Balasore an increase of 0·219″ was reported. From the 5th pressure began to fall, the decrease continuing on the 6th in the southern and south-western districts in connection with the formation of the small whirl, while in North Bengal and Behar pressure was rising. On the 7th pressure changes were small and of little importance, and on the 8th pressure rose generally except at a few of the south-western stations in the neighbourhood of the depression. For the whole week, therefore, the mean pressure over the province has been considerably in defect of the normal, the defect ranging from about 0·03″ to 0·04″ at the northern stations to almost a tenth of an inch at Saugor Island, Balasore, Midnapore, and False Point.

Temperature.—The variations of temperature have as usual followed the variations in the amounts of rainfall. The mean temperature for the week has been decidedly (1·9°) in defect of the normal in Orissa and about normal in South-West Bengal and Chutia Nagpur, but in the other divisions there has been a general excess of about 2°. For the whole province the variation has been an excess of 1·1°. In Assam the mean temperature has been above the normal by 1·6°.

Rainfall.—In Orissa particularly heavy rain fell during the westward movement of the cyclonic storm, and on the 2nd Dharmsala, in the Cuttack district, reported 5·15 inches, Saugor Island 3·50 inches, Jagatsingpore 2·72 inches, and Sorah 2 inches; while on the 3rd the following heavy falls were received:—Garwah 8·06 inches, Kendrapara 6·21 inches, Jajpore 6·09 inches, False Point 5·39 inches, Bhuddruck 5·30 inches, Salipore 4·92 inches, Chandbali 4·90 inches, Mankur 4·70 inches, and Akhayapada 4·40 inches, while there were very numerous falls of two and three inches. For the remainder of the week the rainfall was generally lighter.

In Orissa the average fall for the week has been 5·50 inches, or more than twice the normal fall; in Chutia Nagpur the fall has averaged 3·64 inches, or about ten per cent. in excess of the normal; and in South-West Bengal and South Behar the falls have averaged about two-and-a-half inches, or falls about twenty per cent. in defect. In the other divisions the amounts of rainfall have been small; in East Bengal the fall has only equalled 1·45 inches, or about one-third of the normal, in North Bengal only an average amount of 0·78 inch has been recorded, or about a fourth of the normal, and in North Behar only 0·47 inch is recorded, or a sixth of the normal fall.

In the case of the smaller districts in South-West Bengal the falls have been decidedly deficient in Moorshedabad, Nuddea, Jessore, and Khoolna; in East Bengal in Chittagong, Backergunge, Noakholly, Furreedpore, Dacca, Comilla, and Mymensingh; in all the districts of North Bengal and North Behar, and in South Behar in Patna and Sonthal Pergunnahs.

In Assam during the week Sibsagar has received 4·13 inches, Silchar 2·71 inches, and Dhubri 0·37 inch of rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 8th of August 1891:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1891.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

METEOROLOGICAL OFFICE, BENGAL,
The 11th August 1891.

A. PEDLER.
Meteorological Reporter to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of July 1891.

	Inches.	Date.	Hour.
The mean pressure of the month	29·495		
The average pressure of July from 24 years' registers ...	29·537		
The highest pressure in the month	29·722	28th	10
The lowest pressure in the month	29·346	2nd	16
The range of pressure	0·376		
	Hours.		
The total number of hours of bright sunshine during the month	103·8		
The maximum possible number of hours of sunshine ...	413·1		
	°		
The mean temperature of the month	83·3		
The average temperature of July from 24 years' registers ...	83·5		
The highest temperature in the month	94·2	2nd.	
The lowest temperature in the month	76·2	30th	
The range of temperature during the month	18·0		
The mean daily range of temperature	9·2		
The greatest range of temperature in one day	14·1	3rd.	
	Per cent.		
The mean humidity of the month	86		
The average humidity of July from 24 years' registers ...	85		
	Inches.		
The mean vapour tension of the month	0·977		
The average vapour tension of July from 9 years' registers ...	1·002		
The mean cloud proportion of the month	7·73		
The average cloud proportion of July from 14 years' registers ...	8·00		
The total rainfall of the month	8·28		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	8·19		
The average fall of July from 48 years' registers ...	12·84		
The greatest fall in 24 hours	1·87	4th.	
	Days.		
The number of rainy days in the month	24		
The average number of rainy days in July from 24 years' registers	25		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	139·5		
The mean difference of sun and air temperatures	51·5		
The greatest sun temperature	158·3	3rd.	
The greatest excess of sun over air temperature	66·5	17th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·9		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·0		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·2	3rd.	
	Miles.		
The mean movement of the wind per day	140·4		
The greatest movement of the wind in one day	239·0	6th.	
The greatest movement of the wind in one hour	20·0	25th,	10 to 11 A.M. and 11 to noon.

The number of hours with winds from each of the 8 points—

N. 8, N.E. 17, E. 94, S.E. 147, S. 152, S.W. 231, W. 55, N.W. 27, Calm 13.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° higher; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. Little,

For Meteorological Reporter to the Govt. of India.

Meteorological Office, India;
Calcutta, the 10th August 1891.

Results of the Meteorological Observations taken at the Alipore Observatory from 2nd to 8th August 1891.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	38·00

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder.

C. Little,

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA,
The 10*th August* 1891.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 25th July 1891.

Births.

The total births registered during the week ending with Saturday, the 25th July 1891, in twenty-seven principal towns of Bengal, amounted to 419, and correspond to an annual rate of 20·3 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 1·3 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1886 and 1889, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886–90.	1891.
Ratio of births per 1,000 of the population per annum	20·5	15·8	19·6	21·0	18·0	19·0	20·3

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending—				Towns.	Weeks ending—			
	4th July 1891.	11th July 1891.	18th July 1891.	25th July 1891.		4th July 1891.	11th July 1891.	18th July 1891.	25th July 1891.
Burdwan	25·9	22·9	19·8	16·8	Narainganj	20·7	20·7	16·6	29·0
Midnapore	16·5	15·5	15·5	23·2	Chittagong	16·4	7·0	16·4	9·4
Hughli and Chinsurah	14·8	23·0	31·2	27·9	Comillah	19·3	7·7	42·4	27·0

Utterpara	18·9	28·3	9·4	9·4	Gya	19·1	22·5	27·3	26·0
Howrah	14·3	18·3	17·2	14·9	Arrah	15·6	14·4	16·6	7·2
Bali	17·5	14·0	10·5	21·1	Mozufferpore	20·7	15·8	29·2	32·8
Krishnagar	18·9	9·5	7·6	13·2	Durbhanga	22·0	22·0	23·6	29·9
Ranaghat	12·0	6·0	6·0	12·0	Chupra	15·1	10·1	36·2	10·1
Santipore	14·0	12·3	19·3	17·5	Bhagulpore	12·2	22·9	14·5	33·5
Jessore	6·1	12·2	6·1	12·2	Monghyr	29·6	28·9	34·4	32·5
Rampore Beauleah	15·8	7·9	15·8	15·8	Purneah	3·4	10·4	10·4	10·4
Darjiling	7·4	29·6	22·2	44·5	Poori	21·0	20·4	25·2	25·2
Dacca	6·5	8·4	10·4	14·0	Total ...	15·5	17·0	19·3	20·3

It will be seen that last week the highest birth-rate was returned from Darjiling (44·5) and the lowest from Arrah (7·2).

Deaths.

The total deaths registered during the week under review amounted to 571, and correspond to an annual rate of 27·7 per 1,000 of the population. The rate of the week is 2·8 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1886 and 1887, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886–90.	1891.
Ratio of deaths per 1,000 of the population per annum	28·6	28·3	19·0	25·9	22·9	24·9	27·7

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending—				Towns.	Weeks ending—			
	4th July 1891.	11th July 1891.	18th July 1891.	25th July 1891.		4th July 1891.	11th July 1891.	18th July 1891.	25th July 1891.
Burdwan	10·7	33·6	21·4	9·2	Narainganj	8·3	20·0	8·3	16·6

Bali	14·0	21·1	10·5	7·0	Mozufferpore	20·7	23·1	52·8	32·8
Krishnagar	5·7	13·2	1·9	20·8	Durbhanga	26·7	26·0	44·1	29·9
Ranaghat	6·0	...	...	6·0	Chupra	26·2	31·2	37·2	30·2
Santipore	3·5	...	1·7	7·0	Bhagulpore	43·4	41·9	32·0	48·8
Jessore	...	6·1	...	42·8	Monghyr	28·9	33·4	31·4	57·9
Rampore Beauleah	15·8	34·2	15·8	23·6	Purneah	6·9	13·9	17·3	20·8
Darjiling	44·5	140·8	66·7	74·1	Poori	14·7	35·7	35·7	21·0
Dacca	15·2	17·5	15·0	22·7	Total ...	25·0	27·0	26·4	27·7

According to the figures returned, the highest mortality occurred in the town of Darjiling (74·1) and the lowest in Ranaghat (6·).

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Dysentery and diarrhœa.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Mozufferpore ...	28·1	Jessore ...	42·8	Darjiling ...	37·0	Monghyr ...	21·7
Bhagulpore ...	20·6	Darjiling ...	37·0			Hughli and Chinsurah ...	14·8
Gya ...	15·7	Rampore Beauleah	23·6			Poori ...	14·7
Arrah ...	13·1					Gya ...	14·3
Dacca ...	9·7					Chupra ...	13·1
Monghyr ...	9·0					Bhagulpore ...	11·4
Serampore ...	7·9					Durbhanga ...	11·0
Chupra ...	6·0						
Patna City ...	4·9						
Howrah ...	4·6						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 6·9 from cholera, against 6· in the preceding week; ·3 from small-pox, against ·4; 9·5 from fever, against 9·; 2·5 from dysentery and diarrhœa, against 2·9; ·5 from injury, against ·4; and 8· from other causes, against 7·7 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	29·8	Hindus ...	30·4	Under 1 year ...	202·9
Females	25·4	Mahomedans ...	21·6	1 and under 5 years ...	64·2
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	117			5 " 10 " ...	27·9
				10 " 15 " ...	16·1
				15 " 20 " ...	16·5
				20 " 30 " ...	13·9
				30 " 40 " ...	12·0
				40 " 50 " ...	17·7
				50 " 60 " ...	18·9
				60 years and upwards ...	60·3

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.,*
Sanitary Commissioner for Bengal.

RESOLUTION ON THE STATISTICAL RETURNS OF VACCINATION IN BENGAL FOR 1890-91 WITH BRIEF NOTES BY THE SANITARY COMMISSIONER.

MUNICIPAL DEPARTMENT—SANITATION.

Calcutta, the 13th August 1891.

RESOLUTION No. 1823.

READ—

The statistical returns of vaccination in Bengal for 1890-91 with brief notes by the Sanitary Commissioner.

Read also—

The statistical returns for 1889-90, which were incorporated with the triennial report on vaccination for 1887—90, and the Resolution recorded on it.

The statistical returns of vaccination for 1890-91 have been submitted with brief notes by Dr. W. H. Gregg, Sanitary Commissioner for Bengal, who was in charge of the department throughout the year. Under recent orders these returns should have reached Government on the 15th June, but they were not received until the 20th July. The delay is said to have been due to the difficulty of obtaining the necessary statistics from several municipalities. It is hoped that in future years arrangements will be made for the more punctual submission of municipal returns. The vaccination work carried on in municipalities is on a comparatively small scale, and the statements setting forth its results ought to be ready within a fortnight from the close of the official year.

2. The following table shows the strength of the working establishment in 1890-91 and the previous year :—

YEAR.	Superintendents.	Deputy Superintendents.	Inspectors.	Head vaccinators or supervisors.	VACCINATORS.		APPRENTICES.		REMARKS.
					Paid.	Licensed.	Paid.	Licensed.	
1890-91	8*	14	119	15	145	1,631	14	594	* Including the Health Officer of the town of Calcutta, who is in charge of the vaccination work of the town.
1889-90	8*	14	110	21	179	1,480	31	588	

The increase in the number of licensed vaccinators was caused by the extension of the licensed system in the Eastern Bengal, Behar, and Orissa circles. Four additional Inspectors were appointed in the Ranchee Circle, and the Assistant Surgeon in charge of vaccination and sanitation in the suburbs of Calcutta was replaced by a special Inspector.

3. The following table shows the total number of vaccinations performed in 1890-91 as compared with those for 1889-90 :—

		1890-91.	1889-90.
Calcutta	... ...	17,498	26,280
Metropolitan	Circle	388,857	417,822
Darjeeling	ditto	492,675	445,711
Ranchee	ditto	147,203	149,682
Eastern Bengal	ditto	321,706	391,816
Orissa	ditto	138,715	101,588
Behar	ditto	239,407	170,389
Total vaccination circles	...	1,746,061	1,703,288
Municipalities and dispensaries, &c.	...	87,917	102,182
Grand Total	...	1,833,978	1,805,470

4. There has been an increase of 28,508 cases in the Darjeeling, Orissa and Behar circles of vaccination, and a decrease in the Metropolitan, Ranchee and Eastern Bengal circles, as well as in municipalities and in the town of Calcutta. The Metropolitan and Eastern Bengal circles and the municipalities show a very marked falling off, the numbers being 28,965, 70,110 and 14,265 respectively. The decrease of 8,782 or 33·4 per cent. in the town of Calcutta is attributed to the large number of operations (26,280) during the small-pox epidemic of the previous year having left fewer subjects to be operated on during the year under report. In the Eastern Bengal Circle, where the ratio of decrease reaches 18·0 per cent., and corresponds closely to the reduction shown in the number of operations, the Deputy Superintendent explains that in Chittagong the number of operations fell off by 103,507—a decrease which he ascribes to the fact that the licensed vaccinators had to work in the areas which had been gone over by them in the previous year. However this may be, it is a significant fact that during the last three years vaccination in the Chittagong district shows a progressive falling off, as indicated in the following statement :—

1888-89	... ...	287,818
1889-90	... ...	151,855
1890-91	... ...	47,526,

and that the close of the last year in the series was marked by a serious outbreak of small-pox in the town of Chittagong, in the course of which it became apparent that the people regarded vaccination with considerable distrust. Inquiry into the recent management of vaccination in the town showed that out of 547 persons vaccinated during the year 1887-88 within Municipal limits under the immediate supervision of the Civil Surgeon, as many as 331 or 60·5 per cent. had been attacked by small-pox. In 1888-89 the proportion of attacked among those who had been vaccinated was 39·1; in the next year 31·5, and it was only in 1890-91, when the outbreak had drawn attention to the subject, that the proportion fell to 6·5 per cent. When vaccination carried on

in a limited area, with exceptional facilities for constant supervision, is found to yield such defective results, it becomes difficult to believe in the accuracy of the returns of successful operations in areas where no thorough check can be applied. It is clear that in many parts of Bengal the people have a strong prejudice against the lymph that is used for vaccination, and until this prejudice has been removed by fuller experience of the benefits of vaccination, no real and continuous progress can be looked for. Distrust of the lymph seems to be the main cause which hinders the expansion of the operations of the Department, and the efforts of the Sanitary Commissioner should now be directed to the production of lymph of a sound and uniform character. This branch of the subject has hitherto not been very fully treated in the annual report. In future reports the Lieutenant-Governor would wish the Sanitary Commissioner to show more clearly what is done to secure good lymph, not only on a first distribution to the vaccinator, but as used by him eventually; what checks there are on his return of operations and of success; what reports and complaints regarding bad lymph are received, and what amount of truth is in them.

5. The percentage of successful cases, excluding cases the results of which are unknown, is returned as 99·25 for primary and 39·62 for secondary operations. The statistics of secondary operations give a successful percentage in Eastern Bengal of 83·33 and in Orissa of 94·11. Experience tends to show that it is extremely improbable that so large a ratio of success should be attained in cases of this class, and such returns cannot be accepted as trustworthy. Each licensed vaccinator performed on an average 694 operations against 733 in 1889-90, and each Government vaccinator 1,267 against 893 in the previous year, the average for the three years 1887—90 being 1,475 for Government vaccinators and 671 for licensed vaccinators. For municipal vaccinators the average fell from 405 in 1889-90 to 346 in the year under report. The proportion of males among persons vaccinated was 51·60, and of females 48·40.

6. In every circle the returns of supervision done by the Superintendents of Vaccination show an appreciable increase in the number of cases inspected. The percentage of such cases to the total number of vaccinations ranges from 29·81 in the Orissa Circle to 3·38 in the Darjeeling Circle, and ·60 in the town of Calcutta. On the other hand, five out of the fourteen Deputy Superintendents did a smaller amount of inspection than in the preceding year. The work of inspection, however, cannot be judged only by quantity, and the Sanitary Commissioner ought to satisfy himself by personal examination that these returns of villages visited and cases inspected really represent a careful examination of the work done by the licensed or salaried vaccinators, and not merely a hurried compliance with an arbitrary departmental standard of supervision.

7. Some interesting results may be arrived at by comparing the registered deaths from small-pox as shown for each district in Bengal in Statement V (*b*) with the diagram given on page 11, to illustrate the proportion of the population protected by vaccination during the last seven years. If the returns of successful vaccinations and the mortuary statistics were both accurate, it might be expected, as a general rule, that districts with the highest proportion of persons protected by vaccination would have the lowest death-rates from small-pox, and conversely that districts, where only a small proportion of the population is protected, would show a comparatively high small-pox mortality. Notwithstanding the admitted imperfection of both sets of figures, a distinct tendency towards some such correspondence between increased protection and reduced death-rate may be traced on the diagram referred to. The following districts returning a high vaccination rate show, with the single exception of Chittagong, a low death-rate from small-pox, thus—

	Protected per 1,000 for 1884—91.	Death-rate per 1,000 for 1890-91.
Darjeeling	680	·01
Chittagong	460	·32
Backergunge	325	·03
Singbhoom	280	·18
Tipperah	278	·02
Maldah	268	·02

while the following districts, with a low ratio of protected population, have a comparatively high death-rate from small-pox :—

	Protected per 1,000 for 1884—91.	Death-rate per 1,000 for 1890-91.
Mozufferpore	97	·20
Durbhunga	10	·10
Sarun	60	·27
Chumparun	79	·87
Gya	89	·40
Puri	127	·84
Midnapore	160	·98

It should be added that in Chittagong, the one district where the statistics appear to conflict with the tendency noticed above, recent inquiries have shown that the work of vaccination was very indifferently done during the last three years, and that the protection afforded was little better than nominal. On the whole, therefore, there seem to be statistical grounds for the conclusion that some real progress is being made, and that vaccination in Bengal, in spite of bad lymph and careless operators, does afford substantial protection from small-pox. In order to make the protection more effective and to extend its range, it seems to the Lieutenant-Governor that considerable changes must be introduced into the internal organization of the Department. Closer local supervision, and more intimate relations with the district executive, seem to be needed in order to induce the people to take more freely to vaccination; and Sir Charles Elliott doubts whether this object can be attained under a system which has all the defects of centralisation, and few, if any, of its advantages.

8. The total cost of vaccination was Rs. 1,82,400-4-3 against Rs. 1,72,696-5-9 in 1889-90, showing an increase of Rs. 9,703-14-6. The average cost of each successful case has also increased from one anna six pie in 1889-90 to one anna and seven pie in 1890-91. It was as usual highest in Calcutta, where each operation cost Re. 1-3-4, and lowest in Eastern Bengal, where the cost was only ten pie.

9. Dr. Gregg again speaks very unfavourably of the working of the animal vaccination depôt in Calcutta. The lymph supplied in tubes has frequently failed even when used immediately on receipt from the depôt, and its failure is ascribed by Dr. Gregg to carelessness in extraction and storage. This is the third time that the working of the depôt has been reported as unsatisfactory, and the Superintendent of the Metropolitan circle, who was in charge of it, has since been transferred to another appointment. The establishment of an animal vaccination depôt at Darjeeling has been under consideration for some time past, but considerable difficulty was found in obtaining a proper site. A suitable piece of land has at last been selected at the north base of Senchal. Steps are being taken to provide the necessary buildings, and it is hoped that the depôt will be got into working order during the current year.

10. In discussing the attitude of the people towards vaccination, the Sanitary Commissioner writes as if they had only now discovered that the operation is not compulsory in rural areas. He says that many members of the higher and wealthier Hindu castes habitually evade vaccination, and that everywhere there is difficulty in realising the vaccinator's fees. As a remedy for the former difficulty, Dr. Gregg proposes to extend the compulsory clauses of the Vaccination Act to rural areas; while he suggests that the latter might be got over by making a vaccinator's fees recoverable through the village panchayat like the chowkidari tax. Neither suggestion seems to the Lieutenant-Governor to be practicable nor desirable. The whole question of the organisation of the Vaccination Department is now under consideration, and Sir Charles Elliott would rather remodel it on a district or divisional basis, so as to extend the duties of the Civil Surgeon, than resort to compulsory provisions without adequate machinery to enforce them.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 15*th August*, 1891.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
		Western Districts.		
BURDWAN DIVN.	1	Burdwan August 15, '91	8·33	Weather—cloudy with intermittent heavy rain. Transplantation of *aman* going on. State of *aus* and sugarcane good. Price of common rice at Burdwan 16 seers per rupee.
	2	Baukoora „ 15, '91	6·54	Break in the rains at date of report. There has been heavy rain during the week. Transplantation of *aman* nearly finished. Sugarcane doing well. Common rice selling at 18¾ seers per rupee at Sudder and 17¼ seers at Bishenpur.
		Bishenpur ...	7·99	
	3	Birbhum „ 15, '91	5·05	Strong wind with plenty of rain. Crop prospects are now very good. Price of rice ranges from 16 to 19 seers per rupee.
	4	Midnapur „ 15, '91	13·50	Heavy and continuous rain. Cultivation of *aman* rice continues, but in low-lying lands the seedlings are flooded and will suffer if the rain continues. Sugarcane doing well. Prices of common rice :— Srs. Sudder ... ... 16 } per rupee. Contai ... ... 14 } Tamluk ... ... 16 }
	5	Hooghly „ 15, '91	4·21	Weather—cloudy with frequent heavy rain. All crops doing very well, the weather being most favourable. Prices of common rice :— Srs. Sudder ... ... 14 } per rupee. Serampore ... ... 14 } Jehanabad ... ... 17 }
		Serampore ...	6·19	
		Jehanabad ...	5·77	
	6	Howrah „ 15, '91	5·94	Weather—very wet. Prospects of paddy, jute, and sugarcane excellent. Transplanting of *aman* still going on. Price of coarse rice 14 to 14½ seers per rupee.
		Uluberia ...	6·75	
		Central Districts.		
PRESIDENCY DIVN.	7	24-Perghs. August 18, '91	7·94	Weather—seasonable: hot and rainy. Good rain everywhere. Satisfactory reports on the state of the crops received from all sides. The rainfall of the week has greatly facilitated transplantation, but the young plants on low lands in some places in the Diamond Harbour subdivision have been submerged owing to excessive rain. Prices stationary.
	8	Nuddea „ 15, '91	3·02	Weather—seasonable. Rain has done good to paddy. Harvesting of *aus* and jute going on. Prospects of other crops good.
		Kushtea ...	2·25	
		Meherpur ...	3·68	
		Chuadanga ...	6·5	
		Ranaghat ...	4·42	
	9	Khoolna „ 15, '91	3·82	Weather—rainy ; clear and warm to-day (15th). Prospects of jute, sugarcane, and *aus* good. Good rain has fallen during the week, and prospects of *aman* have been improved. Transplantation nearly complete in the northern parts of the district. No change in prices since last report.
		Bagirhat ...	4·88	
		Satkhira ...	5·18	
	10	Jessore „ 15, '91	5·08	Continual drizzling throughout the week. Rivers are still confined to their beds. Flood-water is now needed for *aman* paddy. *Aus* paddy harvest and indigo manufacture continue.
		Jhenidah ...	2·06	
		Magura ...	1·13	
		Narail ...	1·64	
		Bongong ...	4·90	
	11	Murshedabad „ 17, '91	1·95	Weather - seasonable. Transplantation of *aman* going on. *Bhadoi* is being harvested; a full crop is expected at Kandi. Jute and sugarcane thriving.
RAJSHAHYE DIVN.	12	Dinagepur „ 15, '91	1·03	Weather—cloudy with high east winds. Transplantation of *haimanti* paddy still continues ; about 9 annas completed. More rain wanted for high lands. Outturn of jute and *bhadoi* expected to be 10 annas. Prospects of standing crops fair. Price of rice unchanged.
		Thakurgaon ...	1·46	
	13	Rajshahye „ 17, '91	0·91	Weather - hot and cloudy with occasional rain. Harvesting of jute and *aus* paddy going on. Prospects of standing crops favourable.
		Nattore	4·06	
		Nowgong ...	2·63	
	14	Rungpur „ 15, '91	0·96	Weather—seasonable. Transplantation of *aman* continues. More rain wanted. Prospects of other crops fair.
		Nilphamari ...	0·83	
		Kurigram ...	0·60	
		Gaibanda ...	3·45	
	15	Bogra „ 15, '91	1·14	Weather—very unsettled. Harvesting of *aus* rice nearly finished with good outturn. Jute is being cut. *Aman* rice is being transplanted. More rain wanted. Sugarcane doing well. Common rice, as before, selling at 16 seers a rupee.
		Sherpur ...	1·00	
		Nowkhilla ...	1·13	
	16	Pubna „ 15, '91	2·34	Weather - cloudy with strong easterly wind. *Aus* paddy and jute are being cut ; outturn of jute estimated at 12 annas per acre. Prospects of *aman*, which were gloomy, have improved by recent rain. Price of rice stationary. Fodder sufficient. Rivers rising fast.
	17	Darjeeling „ 15, '91	8·33	Weather—rainy, but very hot in the Terai. Prospects of crops in the hills are good. Some damage has been done by locusts to Indian-corn and *chhota marua* in Kurseong jurisdiction. In the Terai, *bhadoi* crops doing well. More rain wanted for transplantation of winter paddy. Locusts have disappeared from this part of the district.
	18	Julpigoree „ 15, '91	1·38	Weather—hot ; cloudy with little showers. Prospect of jute and *bhadoi* tolerable. Rain much wanted for transplantation of *haimanti* paddy. Price of rice stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—concluded.			
	Eastern Districts.		
DACCA DIVN.			
19	Dacca August 15, '91	4·12	Weather—seasonable. Jute and *aus* paddy are being cut. Prospects of *aman* not favourable in high lands for want of sufficient rain and subsiding of floods too soon. Fodder is available. Cheapest rice sold at from 16 to 18 seers per rupee.
20	Furreedpur „ 15, '91	4·26	Water rising. Prospect of rice fair. Jute not promising.
21	Backergunge „ 15, '91 Patuakhali ...	3·32 11·11	Weather—seasonable. Prospects of crops fair. Common rice selling at from 13 to 17 seers per rupee.
22	Mymensingh „ 15, '91	1·19	Weather—cloudy and rainy. Outturns of *aus* and jute crop estimated at 8 and 10 annas respectively. Common rice sells at 13¼ seers a rupee.
CHITTAGONG DIVN.			
23	Chittagong „ 15, '91	6·57	Weather—seasonable with occasional rain. *Aus* crop has been transplanted. Ploughing for *aman* crop still continues. Prices steady.
24	Noakholly „ 15, '91	7·08	Weather—stormy most of the week. Crop prospects good. Price of rice almost stationary.
25	Tipperah „ 15, '91	8·59	Weather—seasonable. About 12 annas of jute and 14 annas of *aus* paddy have been reaped. Prospect of crops good. Prices stationary
26	Chittagong Hill Tracts. ...	...	Report not received.
BEHAR.			
PATNA DIVN.			
27	Patna „ 15, '91 Barh ... Behar ...	3·06 3·45 2·71	Weather—cloudy and showery. Prospects of *bhadoi* crops fair. Transplantation of paddy is being delayed for want of sufficient rain. It is progressing in low lands. Recent rain will do good to standing crops. More rain still wanted. Prices generally stationary.
28	Gya „ 15, '91	4·22	Weather—hot and cloudy. Transplantation of paddy going on. Prospects of *bhadoi* crops favourable. Prices of food-grains almost stationary.
29	Shahabad „ 15, '91 Buxar ... Bhabuah ... Sasseram ...	2·11 2·74 7·00 6·32	Weather—bright with occasional clouds. Prospects of crops much improved. *Bhadoi* promising. Transplantation of paddy in progress. More rain still wanted. Prices almost stationary except in Sasseram, where they have fallen.
30	Durbhunga „ 15, '91 Somastipur ... Madhubani ...	11·70 4·21 3·53	Weather—cloudy and rainy in the middle of the week. Rain has done immense good everywhere, and for the present all anxiety is allayed. Transplantation of late rice is going on briskly, and if good rain fall in September and October, a 12 to 14 annas crop may yet be reaped. *Bhadoi* will be a bumper crop in most places.
31	Mozufferpur „ 15, '91 Hajipur ... Sitamarhi ...	3·64 1·95 2·72	Good rain throughout the district. Prospects of *bhadoi* crops have seldom been better. Rain that has fallen has facilitated transplanting of paddy, of which about three-quarters have been done. With more rain prospects of paddy crop will be excellent.
32	Sarun „ 15, '91	4·40	Monsoon weather. Rain general all over the district, and transplantation of paddy going on now. *Bhadoi* crops promise well.
33	Chumparun „ 15, '91 Bettiah ...	5·66 2·93	Weather—cloudy and rainy. Rainfall of the week has greatly facilitated transplantation of paddy, but more rain is wanted. Prospects of *bhadoi* crops very good. Prices of food-grains stationary.
BHAGULPORE DIVN.			
34	Monghyr „ 15, '91 Beguserai ... Jamui ..	5·25 4·70 2·84	Good rain during the week. *Bhadoi* promises to be excellent, and a 16 annas crop expected in Jamui. *Sama* and *kaoni* are being reaped in parts of Begus-rai. Transplantation of paddy going on; about 12 annas finished in Jamui and 8 annas in Sudder. Prospects good.
35	Bhagulpur „ 15, '91	3·93	Ordinary monsoon weather. Prospects have somewhat improved in the north, where more rain is still wanted. In other places they are good. Outturn of *marua* and *makai* estimated at 12, and of indigo at 14 annas. Price of common rice 15 seers 2 chittacks per rupee.
36	Purneah „ 15, '91 Kishengunge ... Arrareah ...	2·22 2·69 1·88	Weather—hot with occasional rain and high east wind. *Bhadoi* suffering in parts from want of rain. It is being harvested in some places. Expected outturn in Sudder subdivision from 8 to 10 annas, in Kishengunge subdivision from 10 to 12 annas, and in Arrareah subdivision 9 annas. Transplantation of *aghani* has commenced in some places, but more rain is wanted everywhere.
37	Maldah „ 15, '91 Chanchal ... Shibgunge ...	1·52 1·32 3·46	Weather—hot and rainy. High east wind prevails. Harvesting of *bhadoi* and transplantation of winter rice continue. Jute is being cut; outturn expected to be about 13 annas. Common rice selling at from 14 to 20 seers a rupee.
38	Sonthal Perghs. „ 15, 91	7·90	Heavy rain in some parts, showers in others. Winds favourable. Indian-corn ripening; expected outturn about 12 annas, but less in Rajmehal. Paddy transplantation still continues; about 4 annas of higher land remain to be transplanted.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
ORISSA DIVN.	39	Cuttack August 15, '91	4·27	Weather—seasonable. *Beali* in ear in some places and doing well. Transplantation of *sarad* now progressing. There has been copious rain throughout the district, and crops promise well.
	40	Pooree „ 13, '91	1·23	Weather—seasonable. Puddling and transplantation of the winter crop (*sarad* rice) on low lands are going on. Miscellaneous crops of the season are doing well. Prices of common rice varying from 18 seers 6 chittacks to 24 seers per rupee.
	41	Balasore „ 15, '91	10·17	Weather—very stormy. *Beali* or early rice expected to yield 16 annas crop unless damaged by floods of the last few days.
CHOTA NAGPORE				
South-West Frontier Agency.				
CHOTA NAGPORE DIVN.	42	Hazaribagh August 15, '91 Giridih ...	3·99 2·32	Weather—very wet: good rain universal. Transplantation progressing. *Bhadoi* rice promising.
	43	Lohardugga „ 15, '91 Palamow (up to 10th Aug.)	1·14 8·31	Weather—seasonable. Transplantation of low land paddy continues. *Bhadoi* crops doing well. Prices steady.
	44	Singbhoom August 15, '91	5·46	Weather—seasonable. Everything very satisfactory. Agricultural operations going on well. State of crops good. Price of common rice 13 seers per rupee at Chaibassa, against 12 seers in last week.
	45	Manbhoom „ 15, '91 Govindpur ...	3·20 3·91	Weather—seasonable. Prospects good. Transplanting is being carried on vigorously. Price of rice stationary.

Published for general information.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1891.

The principal features in the meteorology of July have been—

1. Pressure has on the whole been in decided defect from the normal for a considerable portion of the month.

2. Temperature has been almost normal in all divisions of Bengal except South Behar, where a very distinct excess temperature has been registered.

3. The strength of the monsoon current blowing during the month, as judged by the wind velocities at the stations on and near the coast, has been decidedly above the normal of former years, and the direction of the winds appears for a considerable part of July to have been more strongly westerly than is usual, and the rain-bearing current has hence been deflected more towards Burma than is usual.

4. The number of barometric depressions or cyclonic storms forming in the Bay during July has been small. Only one depression of any importance formed at the head of the Bay on the 24th of the month and passed inland, and there was one cyclonic storm which was formed in the east of the Bay at the end of the month, but which did not reach land until August.

5. The average humidity has been practically normal during the month, while the average cloud proportion has, if anything, been rather larger than usual.

6. The average amount of rainfall in North Bengal was distinctly in excess of the normal. The falls in East Bengal, South-West Bengal, and Chutia Nagpur, were practically normal; and those in North and South Behar from 15 to 18 per cent. in defect of the normal, while in Orissa the falls were very decidedly deficient, and were only three-fourths of the usual amount.

Meteorology of the month.—Up till almost the close of June the meteorological conditions in Bengal and in the Bay were very abnormal, for the monsoon rains had not set in till the 27th to the 29th of June, or at least two weeks later than usual; but after that general rain had fallen in Bengal during the last two or three days of the month. The monsoon current, however, blowing over Bengal was feeble, and on the 1st of July conditions had again changed, and the monsoon current became strongly deflected towards Burma. The feeble cyclonic circulation of winds off the Arakan coast, which had existed so long in June, was again noticed on this day, and thus the monsoon current did not pass up to head of the Bay, and for the first three days of July rainfall was light and local in Orissa and in South-West and East Bengal. The slight whirl off the Arakan coast disappeared on the 3rd, and the monsoon current then advanced up the Bay over Bengal, and general rain was again received over the province from the 4th instant. From this date up to the 10th, the changes in the meteorological conditions do not call for any detailed remark. A strong monsoon current was blowing over Bengal from the Bay, but the direction of the current was rather more westerly than usual. Moderate to heavy rain was being received, particularly during the period from the 4th to the 8th or 9th, though rainfall became generally more local and rather lighter from the 9th to the 11th or 12th, while in East Bengal, Behar, and Chutia Nagpur the slight break continued up to the 15th.

On the 11th pressure became relatively low in the north-west angle of the Bay, and round this low pressure area a distinct cyclonic circulation of winds was set up, and the winds over the whole of Bengal formed part of this circulation. Hence winds which on the 10th had been westerly and south-westerly over the whole province, suddenly became easterly and south-easterly, but the amount of rain brought up by the change of conditions was small and the falls were very local. The depression over the north-west angle of the Bay continued to exist up till the 14th, when a rapid fall of pressure took place in the north of the province, which transferred the area of lowest pressure to Behar, when winds became more southerly generally over the province. On the 15th and 16th a rapid fall of pressure took place in the south-east of Bengal, and a distinct low pressure area was formed, represented by such stations as Dacca, Mymensing, Bogra, and Berhampur, and with this distribution of pressure westerly winds commenced to drive back the easterly winds which had previously been blowing, and with the interaction between the two wind systems thus set up, rather heavy rain commenced from this date. The low pressure area just referred to filled up on the 17th, and from the 18th the pressure distribution became more normal, though conditions were still favourable for general and rather heavy rainfall.

At this time ordinary monsoon weather prevailed in all districts, and light to moderate rain was general in all divisions except Orissa, where it was rather local. On the 19th and 20th pressure had fallen by moderate amounts, the fall being largest in parts of South-West Bengal and in Orissa, and a feeble low-pressure area was again formed over the north-west angle of the Bay with the lowest pressure at Saugor Island. Winds also showed a distinct tendency to circulate cyclonically round a centre near Saugor Island. Light rainfall only was reported on these days and was confined almost entirely to Orissa, South-West Bengal, and Chutia Nagpur. On the 21st pressure had risen moderately over the whole province, the increase being largest over the area previously occupied by the feeble depression in South-West Bengal, which, with its attendant feeble cyclonic circulation of winds, had practically disappeared on this day. Again on the 21st light showers only were reported in

parts of South-West, East and North Bengal, and in Chutia Nagpur, while the remainder of the province was practically rainless. On the 22nd pressure had fallen at Calcutta, Saugor Island, and a few other stations, while over the province generally pressure was rising, and the low-pressure area near the north-west angle of the Bay therefore on this day again reproduced itself, and winds as before commenced to show a tendency to cyclonic circulation round this area, though the wind force was light. On the 22nd moderate rain was reported in Assam and at some of the stations in North Bengal, while light and local rain had fallen in South Bengal, but elsewhere it was almost rainless. On the 23rd and 24th the feeble low-pressure area in South-West Bengal and over the north-west angle of the Bay became, if anything, a little more marked than it had been.. The feeble cyclonic circulation of winds continued, the centre of the circulation on the 24th being between Calcutta, Midnapore, and Saugor Island; but winds were still only light to moderate in force. General rain was reported from all districts except parts of Orissa and Behar, and conditions on the 24th appeared to be more favourable generally for rainfall. On the morning of the 25th very rapid meteorological changes were reported. The feeble depression over South-West Bengal and part of the north-west angle of the Bay developed suddenly and rather rapidly, and on the 25th a very definite and rather influential barometric depression had been produced, the centre of which was over the Sunderbuns to the east of Saugor Island. The fall of pressure at Saugor Island and Calcutta equalled about 0·13," and the very low pressure of 29·35" was reported from Saugor Island, which was no less than 0 172" below the normal. The cyclonic circulation of winds had become very complete, and the wind directions over the greater part of the province were included in this circulation, while wind velocities ran up very rapidly, and strong winds were reported on the morning of the 25th at many stations, while over the northern part of the Bay on this day very squally weather existed, and a gale of wind was blowing.

Immediately after this development, the small storm began to advance in a north-westerly direction, and on the morning of the 26th the storm was in the west of Chutia Nagpur; but as there are no meteorological observatories over that area, the precise position of its centre is doubtful On the 27th the centre of the storm was near Jubbulpur and Sutna, on the 28th it was near Jhansi, on the 29th it was to the west of Ajmere, and on the 30th the centre was apparently near Bikanir, but the storm was decidedly more feeble and was evidently filling up. During the whole of its ex stence the storm was accompanied by a strong cyclonic circulation of winds, and in its rear a heavy wave of moisture-laden monsoon winds spread over the whole of Northern India, and brought general rainfall to practically the whole of the Punjab and other parts of Northern India which had been up to that time almost rainless during the present monsoon season.

During the passage of the small storm through the south-western districts of Bengal, very heavy rain was received, and with the wave of monsoon winds which followed it, conditions remained favourable for rainfall up till the 30th, and from the 26th to the 30th rainfall was fairly general and of moderate amount in all districts. The alterations of meteorological conditions from day to day in Bengal during this period do not call for any detailed remark. From the 29th, however, the conditions in the Bay began to alter. A decidedly rapid fall of pressure took place at the central stations in the east of the Bay, the fall being largest (0·103") at Diamond Island; wind also became strongly westerly in Burma and east-south-easterly at Akyab, pointing to the possible commencement of a feeble cyclonic circulation of winds, but the winds were very light. On the 30th a further rapid fall of pressure took place at the eastern stations, and winds again showed a feeble tendency to cyclonic circulation over the east of the Bay, though winds were still light, and up to this date probably no storm had formed. On the 31st pressure continued to fall generally, winds again showed rather cyclonic directions, but the circulation was decidedly incomplete, though strong winds commenced to blow at Diamond Island and the Burma stations generally. The land observations on this day indicated that a distinct barometric depression had formed over the east of the Bay, but they did not show any very definite centre to this depression. It is probable, however, that a distinct cyclonic storm had formed to the north-west of Diamond Island on the 31st, but the land observations certainly did not show that it was of any great strength. This storm afterwards intensified considerably and moved first in a north-westerly, then in a westerly, and finally again in a north-westerly direction, and in its progress it skirted the Sunderbans and passed inland between Saugor Island and Balasore on the 3rd of August.

From the 30th, during the formation of the storm in the Bay, winds in the west and centre of Bengal began to show indraught towards the sea area, and became therefore northerly and north-westerly. Rainfall at once commenced to decrease in amount and area, a large part of the province became practically rainless, and elsewhere rain was usually light and local. For the 30th and 31st of July, therefore, little or no rain was reported in the province.

Strength of the monsoon.—As has been previously mentioned, the wind directions which have been recorded generally during the month have indicated that the monsoon current has contained an unusually strong westerly element in it, and hence the current has been deflected rather strongly towards Burma. Notwithstanding this, the strength of the monsoon current blowing from the Bay over Bengal this year appears to have been greater than usual. The strength of the current from year to year can at present only be judged by the wind velocities

at the coast stations. In the table below are given the means of the actual daily wind velocities for July 1890 and 1891, and also a comparison of the velocities recorded in the present year with the normal values for the same period for seven representative stations on and near the coast line from Akyab to Gopalpur. It will be seen that at all the stations except Chittagong the wind velocity during July has been decidedly in excess of the normal value. This fact would therefore point to the conclusion that the strength of the monsoon has been greater than usual. It is, however, to be remarked that in this method of measurement only one element of the strength of the monsoon current is taken into consideration, for it is clear that an equally important factor in the current will be its vertical depth, and this there is at present no means of measuring. Thus though the strength of the winds near the earth's surface may have been greater this year than usual, it is probable that the depth or thickness of the monsoon current has been smaller than usual :—

Pressure.—Was at the commencement of the month decidedly below the normal for the period, and at some stations the defects even equalled a tenth of an inch. This defect continued during the second week of the month, the general mean pressure being more than a tenth of an inch in defect, and in the north of the province, defects of 0·16" and 0·18" were recorded at such stations as Dinagepore, Rungpore, Julpigoree, Sibsagar, and Dhubri. From about the 12th instant, however, a rapid increase of pressure set in, but this was again followed on the 14th and 15th by a fall, and for the week ending the 18th the mean pressure of the province was almost normal. In the fourth week a slight defect of about 0·02" to 0·03" became established, and in the last few days of the month pressure variations were large as on the 26th pressure fell rapidly with the advance of the small cyclonic storm over the province and in its rear pressure rose equally rapidly, while again at the close of the month pressure had commenced to fall with the formation of the second storm off the Pegu coast.

For the whole month the mean pressure of the province has been generally from 0·03" to 0·05" below the normal, and the defects are also fairly equally distributed. In Assam the mean defect was 0·053", the defect being largest at Silchar, where it equalled 0·063".

Temperature.—The variations of temperature during the month were of comparatively little importance, and as usual to a considerable extent followed the variations in the amounts of rainfall. The mean temperature for the month in Assam, East and South-West Bengal and Orissa was almost absolutely normal, the variation not exceeding a tenth of a degree. In North Bengal and North Behar temperature was a fifth of a degree below the normal, and in Chutia Nagpur 0·3° above it. The only division in which the variation has been large is South Behar, where an excess temperature of 1° has been registered. For the whole province the mean temperature for the month does not vary from the normal by as much as a tenth of a degree.

Rainfall.—The distribution of the rainfall throughout the month has been already referred to, and therefore the amounts compared with the normal have only to be stated. North Bengal has received an average fall of 16·45 inches, or nearly two and-a-half inches in excess of the normal, while all other divisions have received falls more or less in defect. In East Bengal the average fall has equalled 16·52 inches, or less than a tenth of an inch in defect, so that the fall has been almost absolutely normal. In Chutia Nagpur an average fall of 12·74 inches has been recorded, or considerably less than half an inch in defect, which equals only about 3 per cent. of the normal. In South-West Bengal an average fall of 11·22 inches has been registered, or about three-fourths of an inch in defect, or the deficiency has equalled about 6 per cent. of the normal. The falls in Behar have averaged from 10 to 10½ inches, which have shown a defect of roughly 2 inches, and thus the falls are from 15 per cent. in defect in South Behar to 18 per cent. in North Behar. The district receiving the smallest amount of rain has been Orissa, which has only received 9·29 inches, which is more than 3 inches in defect of the ordinary fall, and hence in this division the defect has equalled about 26 per cent. The variation in the number of rainy days has also to a great extent followed the variation in the amount of rainfall. Thus in North Bengal it has rained on more days than usual, and in all other districts the number of rainy days has been smaller than usual. As a general rule, rain has been received on from 17 to 18 days during the month in East Bengal, on about 16 days in

South-West and North Bengal, and Chutia Nagpur, on about thirteen days in Behar, and on twelve days in Orissa. In the case of Orissa, South Behar, and Chutia Nagpur, rain has fallen on from two or three days less than is usual in normal years.

The comparison of the actual rainfall of the seven meteorological divisions of the province with the normal is most accurately shown in the form of a percentage. The figures representing the rainfall for the month calculated in this way are included in the table below under the heading of July. This table gives a condensed summary of the rainfall statistics of the present year up to date for each division, the first seven columns giving the actual rainfall in each month expressed as a percentage of the normal, while the eighth column shows the actual rainfall for the first seven months expressed as a percentage of the normal for the same period. It will be seen that in July the rainfall has been fairly abundant in all divisions except Orissa and Behar. In Orissa, however, the deficiency in July followed a very much larger deficiency in June, and hence is probably more important than if it had occurred alone. In Behar the moderate deficiency of July has also followed a slight deficiency in June in North Behar, and a considerable deficiency in the same month in South Behar. The deficient rainfall in July therefore in South Behar is more important than in North Behar. Taking the rainfall of the year into consideration, it will be seen that all the divisions, except Orissa, have received falls equal to or above the normal, but that Orissa has received a defective fall of 18 per cent. :—

Metrorological Divisions.	January.	February.	March.	April.	May.	June.	July.	Actual rainfall of first seven months of 1891 expressed as a percentage of the normal fall for the period.
Orissa	11	167	424	36	131	28	74	82
South-West Bengal ...	53	193	308	50	170	61	94	105
East Bengal ...	2	311	98	130	151	71	100	104
North Bengal ...	78	377	239	77	140	63	117	100
North Behar ...	171	233	590	19	172	94	83	107
South Behar ...	253	159	734	30	165	88	85	109
Chutia Nagpur ...	163	91	506	30	148	47	97	100

The variations of the amount of rainfall over the province have as usual been very large, and thus in the extreme south-eastern districts falls of from 50 to 60 inches have been recorded, while in the west of Behar and part of Orissa and Chutia Nagpur falls of less than 5 inches have been received. The extreme variations are the heavy falls of 55·64 inches at Bundarbun (Chittagong Hill Tracts), 54·83 inches at Satkanya, 52·59 inches at Kutubdia, and 50·55 inches at Cox's Bazar,—all in the Chittagong district,—to the very small falls of 2·32 inches at Sasseram, 2·47 inches at Buxar, 2·85 inches at Daudnagar (Gya district), 3·50 inches at Pooree, and 1·25 inches at Satpara (Pooree district). There are as usual two areas of heavy rainfall, one in the south-east of the province and one in the hills in the north-east of Bengal, and from these rainfall diminishes towards the western and south-western districts. The area of heavy rainfall in the north-east of the province is, however, this year not so well marked as usual, owing to the unusually strong westerly direction of the monsoon current, by which a large part of the heavy rainfall has been carried to Lower Burma, Arakan, and the south-eastern parts of Bengal.

Compared with the normal, all the extreme western and south-western districts of the province are in considerable or moderate defect, and an area running along the hills and the hills themselves in North Bengal show very largely defective falls. Areas of considerable defect are also shown in the Midnapore, 24-Pergunnahs, and Howrah districts, in Moorshedabad and Sonthal Pergunnahs, in Bogra and Pubna, and over parts of the Tipperah and Dacca districts. Elsewhere the greater part of the eastern half of the province shows a slight excess rainfall, and in the south-eastern parts, as represented by the Chittagong and Chittagong Hill Tracts, at some stations falls of from 10 to 15 inches in excess of the normal have been registered.

The following table gives full data for the comparison of the actual and normal rainfall of the month of July in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past fifteen years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage, and the fourth column gives the same informa-

tion in a slightly different form, expressing as a percentage how much the district rainfall varied in excess or in defect from the normal rainfall :—

Percentage Table for July 1891.

Division.	District.	Normal district rainfall for July.	Actual district rainfall for July 1891.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (—).

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	41·69

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; ●, continued rain.

C. Little,

For Meteorological Reporter to the Govt. of India.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ... The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the *rainfall* in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 15th of August 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing stations.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th May 1891. Mean for district.	Normal mean.	Variation.	Of week. Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 18*th August* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 15TH OF AUGUST 1891.

At the close of the previous week a feeble barometric depression had formed partly over the north-west angle of the Bay, and partly over South-West Bengal, the centre of the depression and of its attendant cyclonic circulation of winds being on the 7th a little to the south of Saugor Island. The small whirl on the 7th commenced to move in a north-westerly direction, and on the morning of the 8th, or the last day of the previous week, it was in the south of Chutia Nagpur. The depression continued its north-westerly advance, and on the 9th its centre was between Allahabad and Lucknow, on the 10th it was near Delhi, and on the 11th it had again advanced north-westward and had passed into the low-pressure area over the Indus valley. For the first half of the week therefore in Bengal conditions were favourable for rainfall. In the passage of the small storm through the south-western districts of the province very heavy rain fell, and with the advance of the storm in a north-westerly direction a heavy wave of moisture-laden monsoon winds swept over the province and over Northern India generally.

Conditions in Bengal, therefore, were of ordinary monsoon character up till the 11th, but on this date a strong westerly wind current swept over the western half of the province, while winds were still more or less easterly over the eastern half. Pressure also became relatively low over Central and South-East Bengal, and during the 11th a small storm was formed over this area, the centre of which on the 12th was close to Jessore or between that station and Calcutta. On the morning of the 13th the centre of the small storm had scarcely moved, and it was still between Calcutta, Jessore and Krishnagore, and was attended by a very complete cyclonic circulation of winds. The storm was also giving on this day particularly heavy rain, and Midnapore and Durbhunga, among other stations, each reported about 9 inches of rain. During the 13th the storm moved in an almost due westerly direction, and its centre on the 14th was to the west of Ranchee, while on the 15th, or the last day of the present week, the storm centre was between Allahabad and Lucknow, and it had thus moved in a north-westerly direction from the 14th to the 15th.

It will therefore be seen that during the second half of the week also conditions in Bengal were very favourable for rainfall, particularly in the south-eastern, southern, central, and western districts through which the storm passed, but that the conditions were not so favourable for rainfall over Northern Bengal and over Assam. Heavy rain considerably above the average for the period has therefore been received in Orissa, Chutia Nagpur, South-West Bengal and Behar, and to a smaller extent in East Bengal; but the rainfall in North Bengal, though considerable in quantity has been below the normal amount.

In the Bay generally during the week the monsoon current has been strong, and on one or two days the wind force has almost risen to a gale at Saugor Island.

Pressure.—On the 9th pressure rose very rapidly in the rear of the storm, an increase exceeding 0·15" being reported from some of the stations in South West Bengal. Over Bengal generally pressure also rose more slowly as the storm was advancing into the North-West Provinces. On the 10th pressure continued to rise in the western districts, though a fall had set in over the east of the province, which fall continued on the 11th, the fall being largest at the eastern and south-eastern stations. The fall continued again on the 12th, and it was very rapid in Central and South Bengal, where at Jessore, Krishnagore, and Furreedpore it equalled 0·13", and a well-defined barometric depression was formed at the centre of which the defect from the normal equalled about a quarter of an inch. On the 13th pressure continued to fall in Central and South-West Bengal and Orissa, while elsewhere it was rising, the increase exceeding a tenth of an inch in East and West Bengal. On the 14th with the westerly advance of the depression, pressure rose very rapidly in Bengal generally, the rise at Jessore being 0·189", and on the 15th the rise of pressure continued, the rise at the central and southern stations exceeding a tenth of an inch. It will thus be seen that the changes of pressure during the week have been unusually large and rapid, but that the changes have more or less neutralized each other.

The mean pressure for the week has been below the normal in all districts except Orissa, where a slight excess of about 0·02" has been registered. The general defect over the province has equalled about 0·03" to 0·04", but at the stations affected by the second small storm the defect equals 0·05" and 0·06". In Assam there has been a general defect of 0·026".

Temperature.—Owing to the heaviness of the rainfall the mean temperature for the week for the province has been 1·6° below the normal. The defects have been largest in Orissa, Chutia Nagpur, and South Behar, where they equal from 2° to 3°; while, on the other hand, in North Bengal, where the rainfall has been light, temperature has been normal. In Assam the mean temperature for the week has been 0·7° in excess of the normal.

Rainfall.—The falls during the week have been exceptionally heavy; thus on the 9th amounts of three inches and upwards were received at Chooadanga, Cox's Bazar, Satkanya, Kutubdia, Perozepore, Harrishpore, Naraingunge, Dewangunge (6·16 inches), and Nowadah. On the 10th falls of three inches and upwards were recorded at Cox's Bazar, Sherepore,

Panchbibi, Bhowanigunge, Banka, and Colgong. On the 11th falls exceeding three inches were received at Cox's Bazar, Chandpore, Mohua, Sewan, Dehree, and Bhubooah, while on the 12th these heavy falls became more numerous. On this day falls in excess of four inches were recorded at Balasore, Saugor Island, Bussirhat, Burdwan, and Mohua, while falls of from two to four inches were received at thirty other stations. On the 13th Durbhunga reported 9·09 inches, Midnapore 8 inches, Raipore 5·95 inches, Baharagura 5·30 inches, Barrabhoom 5·30 inches, and Sheikpura 5·10 inches, while falls of from two to five inches were reported from thirty-seven stations. On the 14th only about ten stations received falls exceeding two inches, and on the 15th only one station (Kurseong) received more than two inches. At some stations for the week, therefore, the falls have been particularly heavy; Cox's Bazar has thus received in the seven days 17·98 inches, Midnapore 13·50 inches, Durbhunga 11·70 inches, and several stations more than ten inches; while no less than 38 stations in the province have received more than seven inches in the week, or an average of more than one inch of rain a day.

The average rainfall in South-West Bengal has equalled nearly five and-a-half inches, or about twice the normal; the falls in Orissa, in South Behar, and Chutia Nagpur have averaged about four and-a-half inches, or about 70 per cent. in excess of the normal. In East Bengal the fall has also been about four and-a-half inches, or about 20 per cent. in excess, and in North Behar the fall has averaged four inches, or about 60 per cent. in excess. The only district receiving a defective fall has been North Bengal, which has only averaged two inches, or about two-thirds of the usual amount. In the case of North Bengal, however, though the rainfall has been very considerably in defect, the number of rainy days has been almost equal to the normal, while in all the other divisions the number of rainy days in the week has been largely in excess of the usual number.

In North Bengal the districts which have received the most largely defective rainfall are Maldah, Rungpore, and Julpigoree, but the other districts have received more normal falls. In the other divisions, though the falls have been usually rather largely in excess of the normal, the Moorshedabad and Chittagong Hill Tracts districts have received rather defective falls.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 15th of August 1891:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1891.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

For Meteorological Reporter to the Govt. of India.

Meteorological Office, India,
The 17*th August* 1891.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 1st August 1891.

BIRTHS.

THE total births registered during the week ending with Saturday, the 1st August 1891, in twenty-seven principal towns of Bengal, amounted to 378, and correspond to an annual rate of 18·3 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 1·3 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years except 1890, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	21·3	23·5	19·2	19·0	15·2	19·6	18·3

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING— 11th July 1891.	18th July 1891.	25th July 1891.	1st August 1891.	TOWNS.	WEEKS ENDING— 11th July 1891.	18th July 1891.	25th July 1891.	1st August 1891.

Dacca	8·4	10·4	14·9	8·4					
					Total ...	17·0	19·3	20·3	18·3

It will be seen that last week the highest birth-rate was returned from Darjiling (37·) and the lowest from Jessore (6·1). No births were registered during the week in the Ranaghat town.

DEATHS.

The total deaths registered during the week under review amounted to 568, and correspond to an annual rate of 27·5 per 1,000 of the population. The rate of the week is ·1 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years except 1888 and 1890, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	27·9	30·9	22·4	28·8	19·0	27·6	27·5

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING— 11th July 1891.	18th July 1891.	25th July 1891.	1st August 1891.	TOWNS.	WEEKS ENDING— 11th July 1891.	18th July 1891.	25th July 1891.	1st August 1891.

Jessore	6·1	...	42·8	...	Monghyr	33·4	34·4	57·9	38·0
Rampore Beauleah	34·2	15·8	23·6	34·2	Purneah	13·9	17·3	20·8	8·5
Darjiling	140·8	66·7	74·1	89·0	Poori	35·7	35·7	21·0	23·1
Dacca	17·5	15·6	22·7	19·5					
					Total ...	27·0	26·4	27·7	27·5

According to the figures returned, the highest mortality occurred in the town of Darjiling (88·9) and the lowest in Purneah (3·5). No deaths were registered in the Jessore town.

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Dysentery and diarrhœa.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Arrah	... 33·5	Darjiling	... 37·0	Darjiling	... 37·0	Gya	... 28·0
Mozufferpore	... 31·6	Rampore Beauleah	28·9	Serampore	... 13·7	Chupra	... 16·1
Gya	... 16·4	Gya	... 23·2			Poori	... 10·5
Bhagulpore	... 10·7						
Monghyr	... 9·9						
Durbhanga	... 5·5						
Patna City	... 4·2						
Howrah	... 3·4						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 6·4 from cholera, against 6·9 in the preceding week; ·1 from small-pox, against ·3; 9·2 from fever, against 9·5; 3·3 from dysentery and diarrhœa, against 2·5; ·3 from injury, against ·5; and 8·2 from other causes, against 8· in the preceding week.

The mortality of last week according to *Sex, Class* and *Age* was as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	26·5	Christians ...	7·5	Under 1 year	... 207·0
Females	28·6	Hindus ...	29·8	1 and under 5 years	... 64·7
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	92	Mahomedans ...	22·3	5 " 10 "	... 19·1
		Other classes ...	76·8	10 " 15 "	... 12·3
				15 " 20 "	... 14·0
				20 " 30 "	... 13·4
				30 " 40 "	... 14·1
				40 " 50 "	... 14·0
				50 " 60 "	... 31·1
				60 years and upwards	... 61·8

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.,*
Sanitary Commissioner for Bengal.

The 17*th August* 1891.

CONTENTS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Wednesday, the 5th August, 1891.

Present:

The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The HON'BLE SIR ALFRED CROFT, K.C.I.E.
The HON'BLE DR. MAHENDRA LAL SIRCAR, C.I.E.
The HON'BLE SHAHZADA MAHOMMED FURROKH SHAH.
The HON'BLE DR. RASH BEHARI GHOSE.
The HON'BLE A. H. WALLIS.
The HON'BLE MAHARAJAH SIR HARENDRA KISHORE SING BAHADUR, K.C.I.E.

HACKNEY-CARRIAGES AND PALANQUINS ACTS, 1866 AND 1878, AMENDMENT BILL.

The HON'BLE THE PRESIDENT said:—"We have met at an extraordinary meeting of the Council in order to effect the passing of the Hackney-carriage Bill. The object of calling an extraordinary meeting of the Council to-day

has been that, if we can pass the Bill to-day and obtain the sanction of the Government of India to it, there will be plenty of time before the commencement of the Act to enable all persons concerned in the hackney-carriage trade to make their arrangements to meet the provisions of the amended Act before the date when it comes into force, namely, the 1st October. It seemed to me that, if the passing of this Bill was put off till the end of August, and if there should be any delay in correspondence with the Government of India, the time might have run so close that the proprietors of hackney-carriages and other persons interested in the provisions of this Bill might easily have complained that sufficient opportunity had not been given them to consider and make arrangements to meet the changes which have been introduced. Since the Select Committee sat and made several amendments in the Bill, the Municipal Commissioners have held a meeting and have proposed some further slight amendments. Many of these seem to me to be desirable and certainly worthy of our consideration. Bearing in mind that it was originally at the request of the Commissioners that this amendment of the law has been undertaken, I think we should not be acting with sufficient respect and courtesy to the Commissioners if we declined to take full notice of the amendments which they have proposed, even though they had been submitted at so late a date; and I think that no injury will be done and the danger of precipitate legislation will be avoided if we take these amendments into consideration upon the present occasion. I therefore desire to announce that the standing rules of the Council will be suspended in order to take the amendments into consideration, and I declare the Council rules suspended."

The HON'BLE MR. WALLIS presented the Report of the Select Committee on the Bill to consolidate and amend the law relating to Hackney-carriages and Palanquins in Calcutta.

He said:—"It will be remembered that this Bill was originally placed in charge of the Hon'ble Mr. Cotton, but on his departure for England the Hon'ble the President was pleased to transfer its conduct to my hands. My hon'ble colleague, in moving for leave to introduce this Bill, dwelt at some length on the history of legislation in Calcutta relating to hackney-carriages, and explained on what grounds it had become necessary to alter the existing law. The chief reasons put forward were the very unsatisfactory working of the Hackney-carriage Department, the extreme inefficiency of the *ticca* gharries in the city, and the disreputable state in which they are permitted to ply for hire. The Municipal Commissioners had given special attention to the subject, and in October of last year appointed a Committee to enquire into the working of the Department, and to suggest such alterations and amendments in the Act which, in their opinion, would be likely to lead to a more satisfactory state of affairs.

"The report submitted recommended that legislation should be resorted to, and that greater powers should be given to the Commissioners in order to enable them to carry out the necessary improvements in the hackney-carriage service. The draft Bill, together with the opinions expressed by the several Associations and officials, have been very carefully considered by the Select Committee, and the changes and alterations made have been embodied in the Committee's Report which has been in the hands of hon'ble members for some time past. It will not be necessary, Sir, for me to take up much of your time, as the Hon'ble Mr. Cotton in his introductory speech explained to a very great extent the proposed changes in the law; but there are a few points to which I must allude, and others to which, perhaps, it would be as well to refer again. One of the most material changes proposed by the Select Committee is in section 60 of the Bill, which provides for the employment and final distribution of the fees and fines levied under the Act. The Committee regret that they were unable to agree with the proposal made by the Hon'ble Mr. Cotton to omit from the Bill the provision that all penalties and fees should be disposed of in such manner as the Government of Bengal shall direct. The effect of such omission would be that only the fees could be credited to the Corporation, that is to say, all fees payable on registration of carriages, the fees payable on drivers' licenses, as well as any fees which shall be levied under the Act on account of transfer of registration or on copies furnished, but all penalties and fines

imposed in a Magistrate's Court would be credited to Government. Such a course would not justify the division of the fees between the municipalities concerned, and as it is intended that the municipalities are to have both administrative and financial responsibilities, this section provides that all fees and fines shall first be credited to a fund to be called the 'Hackney-carriage Fund,' which is to be employed in carrying out the purposes of the Act, and in the event of one or more municipalities being included in Calcutta by virtue of a notification published under section 4, then such fund shall yearly be divided between the Calcutta and such other municipality or municipalities as the Local Government may determine.

"In this connection, in section 15, clause (*4*), the Select Committee by an oversight omitted to alter the words 'shall be forfeited to Government' to 'shall be credited to the Hackney-carriage Fund,' and I now ask that the alteration may be permitted.

"The section in the draft Bill which was numbered 60 did not appear to the Committee to be sufficiently comprehensive. In re-casting this section, which is now No. 61, the Committee have extended its scope, by which the Local Government may, whenever the Act shall be extended to any other town or place, appoint persons, either by name or official designation, to carry out the duties imposed, and exercise the powers conferred by the Act on the Commissioners and the Chairman of the Commissioners. In clause (*2*) of this section provision has been made for the modification of certain other sections when the Act is extended beyond the local limits of Calcutta, which will enable the Local Government, by notification in the Calcutta Gazette, to provide that the language commonly used in such extended districts shall be substituted for those provided in the Act. This is a very necessary provision, as it is most desirable that the plate affixed to a conveyance specifying the fare according to distance and time which may be legally demanded and taken from the hirer shall be in the language most in use in each district.

"Under the existing law the Registering Officer is appointed by the Government, and every act, matter or thing done by that officer (under or by virtue of the Act) is subject to the order, disposition and control of the Commissioner of Police. In the Bill which is now under the consideration of this Council, it has been provided that this officer shall be appointed by the Commissioners, and that the working of the Act shall be entirely under the control of the Corporation of Calcutta. Full powers have been given enabling the Commissioners (subject to the approval of Government) to frame bye-laws and rules which may be legally enforced. This will place the Commissioners in a position to deal summarily with all questions which may arise in connection with the working of the Act, and will, no doubt, lead to the much needed reforms.

"Section 5, as originally drafted, placed the Registering Officer under the control of the Commissioners. This the Committee considered inadvisable, and have therefore altered the section so as to place him under the immediate control of the Chairman of the Corporation. This for obvious reasons must be preferable; for if the Act is to lead to the better administration of the Hackney-carriage Department, the Chairman's orders should be final. It is also desirable that the status of this officer should be very materially improved, and the Committee have therefore, under clause (*3*) of the same section, made his appointment and removal subject to section 41 of the Calcutta Municipal Consolidation Act of 1888.

"In section 23, the word 'knowingly' has been omitted, as it has been found difficult in practice to prove to the satisfaction of the presiding Magistrate that the owner knowingly permitted an unlicensed person to act as driver. The fact of a person acting as driver being unlicensed should suffice for the conviction of the owner. In like manner the Commissioners have omitted in section 27, clause (*2*), the words 'wilfully' and 'fraudulently;' for a driver who neglects to deliver up, uses or wears an expired ticket, should be convicted without the necessity of proving that he did so wilfully or fraudulently. It will have been noticed that the tendency of the Bill is to reduce the penalties, especially in the case of drivers. Under the existing Act it was found that the alternative penalty in default of payment of fine was in some instances excessive; these have been reduced in the present Bill, but with regard to section 17 the Committee were of opinion that the fine of Rs. 10 for the offence of plying

for hire without having a proper plate affixed is wholly inadequate, and would not act as a deterrent. The fine has therefore been raised to Rs. 50, the amount provided under the existing Act.

"In the first schedule of the Bill the Committee deemed it advisable to somewhat enhance the daily fare for a carriage of the second class to Rs. 3-8, and to allow the old rule to stand as regards the fare of Rs. 2 for five hours. Under the existing Act the fare for this class, if taken at 12 annas for the first hour and 6 annas for every other hour or part of an hour beyond the first hour, the sum payable for eight hours amounted to Rs. 3-6, but for a whole day of nine hours to only Rs. 3. This was certainly an anomally, and by the adoption of the present proposal the fare for eight hours would be the same, Rs. 3-6, and for nine hours Rs. 3-8.

"Should the Bill, as amended, be accepted by the Council and passed into law, the Municipal Commissioners will have its entire working in their hands. They will be empowered to frame bye-laws and rules which can be legally enforced, and there is no doubt that full advantage will be taken of these powers in order to ensure a better description of carriages and horses being used, and a more reliable class of men being employed as drivers. The claims of owners and drivers have been carefully considered. The fares have been slightly increased, and the doubt which existed as to the sum which could be legally demanded after the first five hours removed, while the penalties in several instances have been considerably reduced. The whole Bill has been framed with the object that Calcutta should be better served in this direction, that due protection be given to both owners and hirers, and the result, it is hoped, will be a very material improvement in the hackney-carriage service."

The HON'BLE MR. WALLIS also moved that the Report of the Select Committee be taken into consideration in order to the settlement of the clauses of the Bill, and that the clauses of the Bill be considered for settlement in the form recommended by the Select Committee.

The Motions were put and agreed to.

The HON'BLE MR. WALLIS also moved that in clause (*4*) of section 15, the words 'shall be forfeited to the Government' be omitted, and the words 'shall be credited to the Hackney-carriage Fund' be substituted for them.

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT said:—"I have to move in clause (*2*) of the same section an amendment which has been proposed by the Commissioners at their recent meeting. They desire to appoint one or two or more Inspecting Officers whose business it shall be to watch over the carrying out of the Act, and to investigate the extent to which any infringement of its provisions takes place. The provision before us gives power only to a Police Officer to seize and remove to a police-station any carriage which has not been duly registered. The Commissioners urge that if they have paid officers whose business it is to go about and see that no carriage is plying for hire which has not been duly registered and does not carry its plate, those officers should have power at once to arrest the driver and to carry the carriage to the nearest police-station, instead of waiting till they can find a police constable whom they can induce to arrest the driver, while in the meantime the driver might drive off as fast as he can. I understand this point was considered in Select Committee, and was not adopted, and it is therefore with considerable hesitation that I ask the Council to consider it. But I do so because I am under the impression that there has probably been a misunderstanding, that they thought this power would probably be given to irresponsible officers drawing inconsiderable salaries. But this is not the case, as the proposal is to appoint officers of standing and position to this work. A parallel case is to be found in the working of the Act for the Prevention of Cruelty to Animals. Under the law no person but a police officer can arrest a person committing an offence under that Act. We have a most useful and philanthropic society which has its agents scattered over the whole town, and constantly taking notice of acts of cruelty and enforcing the law against persons who commit offences under that Act; and in order that they might act with better effect, these

emissaries of the society have been vested with the powers of police constables to enable them to make arrests. It is admitted that the power thus conferred has not done any harm, but, on the contrary, has distinctly worked good. The objection, I understand, has been raised that if a driver sees a person looking like a private person coming to arrest him, he might conceive that he is not invested with any authority, and a disturbance might arise consequent on the driver exercising the right which he might believe himself to possess, viz., the right of private defence. I have therefore thought it best to move the amendment proposed by the Municipal Commissioners in the following form, namely, to insert after 'Police officer' in clause (2) of section 15, the following words:—'or any person duly authorized in that behalf by the Commissioners, and wearing a distinctive badge to indicate his official capacity.' I trust that this amendment will commend itself to the Council. I trust they will think that by this provision any danger likely to arise in consequence of what may be thought to be unlawful interference will be avoided."

The HON'BLE SIR ALFRED CROFT said:—"I am glad that Your Honour has moved this amendment because it falls in with a suggestion that I intended to make with regard to the appointment of Inspectors of hackney-carriages. Bye-laws may be framed with any degree of detail and stringency, but unless officers are appointed with the express object of seeing their provisions carried out, they will prove inoperative. I believe that many of the complaints as to the state of hackney-carriages are due to the fact that the carriages are repaired and painted and patched up for the day of registration; they pass in review so as to make a fair show before the Registering Officer, but the repairs are so badly done that they soon fall to pieces, and so remain till the next registration-day when they are patched up again. It is stated that the Registering Officer has to pass in review some fifty carriages in a morning, and therefore his inspection cannot but be very superficial. A second inspection and registration at the end of six months has been suggested, but even that is not sufficient. What seems to me to be wanted is to appoint a whole-time officer—in fact more than one whole-time officer, at any rate one for the north and one for the south of the town—to go about the hackney-carriage stables; to inspect the carriages and examine their springs and general state; to look at the horses and ponies; to examine the harness and see that it is strong and serviceable; to see that the drivers are capable men and decently dressed; and to warn them against an offence frequently committed, especially in Chowringhee, namely, that of racing their carriages against each other at full gallop, to the imminent danger of passers by and of other carriages. Unless the Municipality should prefer to appoint independent Inspectors, the officers whose appointment this amendment contemplates might well be entrusted with such duties. The Inspectors should be subordinate to the Chairman of the Corporation, and should report directly to him. On these grounds I have much pleasure in supporting this amendment."

The HON'BLE DR. RASH BEHARI GHOSE said:—"As a member of the Select Committee, I am bound to say that if the case had been properly represented to us, we should certainly have felt considerable hesitation in rejecting the suggestion made by the Municipal Commissioners. Now, however, that we are assured that only officers of a superior grade will be deputed to perform the duties prescribed in section 15, and that these officers will have to wear a distinctive badge, the reasons which impelled the members of the Select Committee to reject the amendment no longer hold good, and I am quite prepared to support it."

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT moved that in section 21, clause (2)(b), line one, the words 'and father's name' be inserted after 'name.' He said:—"This was suggested by the Commissioners in order to avoid the possibility of substituting one person of the same name for the person to whom the license to act as driver has been granted. I do not suppose there will be any objection to this amendment."

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT said:—"The next amendment which I have to move was not proposed by the Commissioners, but has occurred to myself in examining the project of law before us. It is in section 34 which runs as follows:—'The driver of every hackney-carriage shall carry in or upon such carriage a reasonable quantity of luggage for every person hiring such carriage without any additional charge.' It seems to me that the words 'reasonable quantity' is hardly such a term of precision which should be put into a legislative enactment, and that it might unnecessarily tend to disputes and disagreements between the driver and the hirer. It may be urged that this section has only been copied from the former Act; that it has been in force ever since Act V of 1866 was passed; and that no difficulty has been found to arise. But I wish to point out that one of the main, if not quite the main, object why we are now legislating is the object of humanity, to relieve the animals which draw hackney-carriages from that strain to their physical endurance to which we now find them subject. We have provided with great care that a carriage may carry only a certain number of persons; that the Registering Officer should see that the carriage must be of sufficient strength and the horses of sufficient size to draw four persons of average weight. But if we allow any amount of luggage to be put on the roof in addition to having four persons inside, we may possibly be putting such a strain on the poor animals as they might not be able to bear. Therefore, I propose, in substitution of the vague expression 'reasonable quantity of luggage' to insert the words 'a quantity of luggage not exceeding two maunds.' If we fix the quantity at two maunds, we shall know how much the carriage may be expected to carry and the animals to draw. I trust a restriction of this kind will commend itself to you as a move in the direction of a humane regard for the condition of the animals which has induced the Council to consider the Bill now before us."

The HON'BLE SHAHZADA MAHOMMED FURROKH SHAH seconded the motion.

The HON'BLE DR. MAHENDRA LAL SIRCAR said:—"I wish to put before the Council the case of only one person hiring a carriage and he alone travelling in it. In such a case the conveyance would be lightened to the extent of the weight of three persons, and, in my humble opinion, it would be unfair to limit the weight of luggage to two maunds. I would, therefore, suggest that in lieu of the three other persons which the carriage is licensed to convey, the driver should be bound, if required, to carry three additional maunds of luggage, one maund in lieu of each such person It will be a hardship if a person hires a carriage to convey him to a railway station if he is not allowed to carry with him on the carriage the full amount of luggage he has, provided it does not exceed five maunds, but where four persons travel in the carriage he agrees with the Hon'ble the President that the limit of two maunds of luggage is reasonable."

The HON'BLE SIR ALFRED CROFT believed there was some provision of the kind in the London Hackney-carriage Act.

The HON'BLE THE PRESIDENT said:—"The London rule, I think, is that for every outside parcel 2*d*. extra is paid. It seems to me that the suggestion made by the Hon'ble Dr. Mahendra Lal Sircar is a reasonable one, and I accept it, and therefore now move the substitution of the words—'a quantity of luggage not exceeding two maunds, together with one additional maund for every person below four carried in the carriage.'"

The Motion was put and agreed to.

The HON'BLE DR. MAHENDRA LAL SIRCAR moved that in section 39, clause (*2*), line 6, the word 'or' be omitted, and the words 'and in default of payment' be substituted.

He said:—"As the section now stands the Magistrate might either sentence the offender to a fine or to imprisonment. I think the imprisonment should only be imposed in default of payment of the fine. It would be very hard if a

person may be sentenced to imprisonment for non-payment of the fare due by him to a hackney-carriage driver."

The HON'BLE SIR ALFRED CROFT in seconding the motion said :—" It seems to me difficult to imagine a case of evasion of payment of fare which is so bad as to demand a sentence of imprisonment, and that the imposition of a fine of Rs. 50 would meet the exigencies of the case."

The HON'BLE DR. RASH BEHARI GHOSE said :—" I am sorry I cannot support this amendment. If I remember rightly, the question was discussed in the Select Committee, when we thought there might be special cases in which a Magistrate would be justified in awarding imprisonment, not necessarily for one month which is the maximum, but for such period as the Magistrate might think the man deserves. A man who evades payment of the fare, or, in other words, attempts to cheat the driver, is certainly not deserving of much pity. And I think we may trust the Magistrate who would have to deal with the case to exercise his discretion in a proper manner. If we leave out the imprisonment altogether, in a very bad case of evasion, the offender will get off very lightly. I therefore think this provision ought to stand as it is in the Bill."

The HON'BLE MR. WALLIS said:—" I think the section as it is now worded should be allowed to stand as has been mentioned by the hon'ble member who spoke last; this question was considered in Select Committee. The very words proposed by the hon'ble mover of the amendment were recommended by the Central Mahommedan Association, but their recommendation was duly considered, and it was decided that a person who actually evades payment of fare commits an offence which rightly subjects him (at the discretion of the Magistrate) to the penalty of imprisonment."

The HON'BLE SHAHZADA MAHOMMED FURROKH SHAH said :—" If I remember rightly, a man who evades payment of a railway fare is only subject to the penalty of fine."

The HON'BLE THE PRESIDENT said :—" I find, on referring to the Railways Act, that a person who travels without a ticket, or attempts to cheat by not paying the full amount of fare, is liable to a fine and not to imprisonment. But before I put the question to the vote, I should like to point out in the first place that this provision stands in the Bill as it exists in the present Act. The alternative given to the Magistrate of imposing imprisonment instead of fine, and not only in default of payment of fine, has been in force since 1866; and this fact is an argument for not changing the law unless anyone happens to know of any grievous injury having been inflicted under the authority of the present law, which shows that there is need for its amendment. It seems to me that there are cases in which the Magistrate might be bound to inflict imprisonment and not fine. I am told that it not unfrequently happens that sailors take a hackney-carriage, and after using it try to defraud the driver and escape by going on board their ship. In a case of that kind a sentence of fine would generally be a *brutum fulmen*. It would have no effect; and the imprisonment which would be imposed in default of payment of the fine would be simple imprisonment, which would be rather in favour of the sailor than a punishment to him, because we know that according to the old saying life on shipboard is imprisonment with the chance of being drowned, and simple imprisonment is imprisonment without the chance of being drowned. To him being detained from his ship by being sent to a prison would not be such a severe punishment, as it would be to any ordinary person. The fact that the Select Committee considered this question and decided that the alternative punishment of imprisonment should remain should of course weigh with the Council to a considerable extent, and unless any strong grounds are put forward to invalidate reasons which led the Select Committee to the conclusion to which they came, we are bound to pay to it the greatest respect. We must also bear in mind that two of the members of the Select Committee are absent, and therefore the voting power of the Select Committee is weaker than usual."

The HON'BLE MAHARAJAH SIR HARENDRA KISHORE SING BAHADUR observed that, in his opinion, the penalty to be inflicted for the offence here provided for, whether it should be fine or imprisonment, should be left to the discretion of the Magistrate.

THE Motion was then put to the vote and negatived.

The HON'BLE THE PRESIDENT said:—"In section 42 a new provision has been adopted taken from the Madras Act III of 1879, under which, if a dispute arises between the hirer and the driver, the hirer may require the driver, or the driver may require the hirer, to proceed forthwith to the nearest Magistrate's Court, and the then sitting Magistrate shall hear and determine the suit in a summary way. The addition to the existing law is contained in the words 'and the driver may require the hirer' to go to the Magistrate's Court and settle the question off-hand. I think the hon'ble members must admit on consideration that very great inconvenience may result to the hirer from this innovation. My hon'ble friend Dr. Rash Behari Ghose, for instance, may be proceeding to the High Court, and if in case of a dispute arising between him and the driver he can be forthwith taken before a Magistrate, he may be put to great inconvenience, and his client, perhaps, may lose his case for want of the valuable services of his advocate; or a gentleman may be on his way to a railway station and may miss his train; and, lastly, there is the strongest case of all, the case put by a memorial presented by my friend Nawab Abdool Latif of a *purdah nashin* lady whose appearance in court would be impossible. I therefore propose that these words which have been imported from the Madras Act be omitted, and that we should fall back on the terms of the original Act with one slight exception to provide for cases in which the Magistrate being engaged in some important case is not able to hear and determine the dispute, or when no Magistrate may be sitting at the time. The section which I propose to substitute for section 42 of the Bill will run thus:—

'In case of any dispute arising between the hirer and the driver of any registered hackney-carriage, the hirer may, if any Magistrate be then sitting, require the driver to drive to the Court of such Magistrate, or if any Magistrate be not then sitting to the Registering Officer; and if any driver shall refuse to obey such requisition, it shall be lawful for the hirer to give such driver into the custody of the nearest Police Officer. Such Police Officer shall thereupon take the driver and the hirer, together with the carriages and horses, to such Court or Registering Officer, and the then sitting Magistrate or Registering Officer shall, in either of the cases aforesaid, hear and determine the dispute in a summary way.'

The HON'BLE DR. RASH BEHARI GHOSE said:—"I have much pleasure in seconding this amendment. I pointed out to my colleagues in the Select Committee that this provision was liable to be abused by the drivers of hackney-carriages. In the case put by Nawab Abdool Latif, the abuse would be very great. But I yielded rather too readily perhaps to the suggestion of my colleagues that the section would practically be a dead letter, and that a corresponding provision was to be found not only in the Madras Act, which had led to no harm, but, if I am not mistaken, in the English Act also. I am glad that this amendment has now been moved."

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT said:—"The next amendment which I have to move is a very small one in section 51, clause (*2*) which provides that 'all the provisions of this Act in any way relating to the taking out, granting, renewing or producing the licenses, or to the issuing, granting, wearing or using tickets granted to drivers of hackney-carriages, shall be applicable in like manner to the bearers of palanquins.' It is proposed to insert the words 'or using' after 'producing,' in order to meet the case of a palanquin-bearer transferring his license to anybody else. I do not think any objection can be taken to the amendment."

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT moved that in section 53, clause (*1*) (*b*), the words 'dimensions of such carriages' be inserted after 'hackney-carriages.'

He said:—"This seems to me a very useful provision suggested by the Commissioners. It will enable the Registering Officer to see that hackney-carriages are not made of a size which is too heavy for the animals drawing them, and will tend to the same humanitarian direction which we are all agreed upon."

The HON'BLE DR. MAHENDRA LAL SIRCAR seconded the motion.

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT moved that in section 56, the following words be substituted for the whole of the proviso from line 8 to the end:—'The omission to register any hackney-carriage or palanquin or to take out a license, shall be deemed to be a continuing offence.'

He said:—"It is the form of words proposed by our legal adviser as better suited to express the intention of the section."

The Motion was put and agreed to.

The HON'BLE DR. MAHENDRA LAL SIRCAR moved that in the first schedule, Rs. 3, the present rate of hire for a second class carriage for a whole day consisting of 9 hours, be substituted for Rs. 3-8, the rate entered in the amended Bill.

He said:—"We have sufficient evidence, and we see it especially from the remarks made by Mr. Phelps at the last meeting of the Municipal Commissioners, that the owners of second class carriages gain ample profit from the present rates of hire. The rates have been enhanced in the Bill in order that the carriages might be improved, but as has already been pointed out the disreputable condition of the hackney-carriages in Calcutta is not due to the smallness of the fares that are paid, but to the want of proper supervision and inspection. With the proper supervision and inspection to be provided by this Bill, we should have better carriages, and I do not see any necessity for enhancing the rates of fare for second class carriages. To enhance the rates will be a great hardship to the middle class people, who are the hirers of these carriages. Besides there is an anomaly in the schedule of rates for second class carriages which will be removed by the amendments which I now propose. The anomaly is that for the first hour the fare is 12 annas, and for every hour or part of an hour after the first the fare is 6 annas, and for half a day of 5 hours the fare is Rs. 2; so that the fare for four hours is Re. 1-14, whilst for the fifth hour it is only 2 annas, and then for every subsequent hour the fare is 6 annas. This anomaly will be removed by the amendment I propose to substitute, Rs. 3 for Rs. 3-8. If that amendment is carried, I am prepared to move other amendments with reference to the rates for the rates for second and third class carriages."

The HON'BLE THE PRESIDENT said:—"As nobody seconds this amendment, I shall take it that the sense of the Council is against it."

The HON'BLE SIR ALFRED CROFT said:—"The reason why I do not second the amendment is that if the Corporation carry out the suggestion I made for the appointment of Inspectors, it will keep the carriages more up to the mark, and there will consequently be more expense to the owners, and they will be so far recompensed by the slight increase of rates proposed in the schedule."

The HON'BLE DR. MAHENDRA LAL SIRCAR said:—"The anomaly is that for four hours the fare will be Re. 1-14, and for five hours Rs. 2, so that for 2 annas the hirer can keep the carriage a whole hour longer; whereas for each of the succeeding hours he will get 6 annas. This is an anomaly which would be removed if my amendment had been carried. I now move that the charge for a second class carriage for the first hour be 12 annas, for the second and third hours, or any part thereof, 6 annas, and for every hour beyond the third hour the charge shall be 4 annas; and then we shall do away with the necessity for fixing the rates for half a day of 5 hours, and a whole day of 9 hours. These rates will themselves amount to Rs. 2 for 5 hours and Rs. 3 for 9 hours. Similarly, in the case of third class carriages, I shall propose that the rate for the first hour shall be 6 annas, 4 annas each for the second and third

hour, and 3 annas for each hour after the third hour; and these rates will amount to Rs. 2 for 9 hours. These amendments have the recommendation of simplicity as well as of logical consistency. They are not unfair to the owner, and they are very fair to the hirer. It will certainly be a hardship to the middle and poorer classes if the rates proposed in the Bill are retained. My present motion is confined to the rates for second class carriages which I have specified."

The HON'BLE THE PRESIDENT said:—"As the motion is not seconded, I take it that the sense of the Council is against this amendment too."

The HON'BLE DR. MAHENDRA LAL SIRCAR then moved that for third class carriages the following rates be entered in lieu of the rates now in the schedule, namely, that the rate for the first hour shall be 6 annas, for the second and third hours or part thereof 4 annas, and for every subsequent hour or part of an hour 3 annas.

The HON'BLE THE PRESIDENT seconded this amendment. He said:—"It is one which I independently intended to bring forward, but I am glad the hon'ble member has forestalled me. The Municipal Commissioners have discussed this subject very fully at their recent meeting, and they proposed the alteration now before the Council. Mr. Phelps, one of the Commissioners, who originally brought forward the proposal to amend the Hackney-carriage Act, suggested this very amendment, and after a long debate it was carried. We want to justify the imposition of the demand to be made upon the owners of third class carriages for the improvement of the condition of their carriages and ponies by making their work a little more remunerative. On the other hand, we are anxious not to make the rates of hire oppressive especially on the poorest and lowest classes. It is these persons whom we are specially bound to protect. The well-to-do middle classes who chiefly hire second class carriages can defend themselves, but those who use third class carriages we, in our position as representing the Government, are above all people bound to consider. The result of the amendment before the Council will be that for each of the second and third hours of hiring one anna more will have to be paid than at present, and the rates would not be different in other respects. But this will justify the Commissioners in demanding that the owners shall put themselves to larger expenditure to put their carriages in good order, and I trust the rates of fare will not be considered too oppressive on the poorer classes in whose behalf the Select Committee, and I believe the Municipal Commissioners also, received many representations, and I hope this amendment will be considered favourably by the Council."

The HON'BLE DR. RASH BEHARI GHOSE said:—"I also think that this amendment should be carried for the reasons which have been given by my colleagues. It will be a decided improvement, and, speaking for myself, I am obliged to the Municipal Commissioners for pointing out the mistake which the members of the Select Committee had made."

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT said:—"Another suggestion has been made by the Municipal Commissioners to the effect that the rates of fare for all classes of carriages after the ninth hour should be specified in the law, because the decision of the Magistrates in this respect have varied, and there is no certain rule for guidance, either of the public or of drivers. I therefore move that another column be added to the schedule providing that for every hour, or part of an hour, after the ninth hour, the rates of fare shall be for first class carriages 8 annas, for second class carriages 6 annas and for third class carriages 3 annas. This will be the best way to simplify and settle a matter in respect of which there is now considerable doubt."

MR. WALLIS seconded the motion.

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT said:—"I have also a suggestion to make with regard to the foot-note to this schedule. According to the foot-note as it now stands in the Bill, the Council will observe that the fares are to be paid, either by distance or by time, at the option of the hirer, to be expressed at the commencement of the hiring; if not otherwise expressed, the fare to be paid according to time. I think it is desirable that we should also provide that the hirer shall not have the benefit of the rate for 5 hours or for 9 hours where it is a reduction upon the rates per hour, unless at the time of the hiring he expresses his intention to engage the carriage for that specific time, that is, that he should state at the first whether he takes the carriage for 5 hours or for 9 hours. I therefore move that the following words be substituted for the present foot-note to the schedule:—

'The above fares to be paid according to time, unless at the commencement of the hiring the hirer expresses his intention of paying according to distance. In the case of a second class carriage the hirer cannot avail himself of the half day or whole day rate unless at the time of hiring he engages the carriage for the half day or whole day as the case may be.'

The HON'BLE MAHARAJAH SIR HARENDRA KISHORE SINGH BAHADUR seconded the motion.

The HON'BLE SIR ALFRED CROFT said:—"I feel some slight difficulty in voting for this amendment. Suppose the hirer has a lot of shopping to do, and does not know whether he will require the carriage for 3, 4, or 5 hours; the driver is quite willing to be hired on these indefinite terms; if it so happens that at the end of 3 or 4 hours the hirer does not want to discharge the carriage, but wishes to keep it till the completion of 5 hours, why should he lose the advantage of the 5 hours' rate merely because he did not make a specific contract with the driver beforehand? I am supposing the case where there is a reduction of charge for the fifth hour."

The HON'BLE MR. WALLIS said:—"I think that this proposal will, to a great extent, remove the anomaly referred to by the Hon'ble Dr. Mahendra Lal Sircar, namely, that the charge for 4 hours is Re. 1-14, and for 5 hours only 2 annas more. If a contract is entered into previously to the hiring, the anomaly will, to a great extent, be removed."

The HON'BLE THE PRESIDENT said:—"The practical effect of the amendment is that the advantage to be gained by the hiring of a second class carriage for half a day of 5 hours will be the payment of 2 annas for the fifth hour, instead of 6 annas. My hon'ble friend thinks it will not be generally practicable for the hirer to say beforehand that he will take the carriage for 5 hours, and that he does not see why the hirer should not get the advantage of the lapse of time that may occur. But I think what has fallen from the Hon'ble Mr. Wallis shows that the effect of the present amendment will be that the driver cannot get rid of the hirer at the end of the fourth hour, and therefore he will be rather an unwilling party to the contract. It seems to me only right that the contract should be made at the commencement of the hiring and that the proposal will be equally fair to the hirer and to the driver."

The Motion was put and agreed to.

The HON'BLE MR. WALLIS moved that the Bill, as now amended, be passed.

The Motion was put and agreed to.

The HON'BLE THE PRESIDENT said:—"In declaring the Bill to be passed into law subject to the approval which we hope to get, and which I have little doubt we will get, of the Government of India, I would only say two words before we break up: one, to express my thanks, on behalf of the Government of Bengal, to the Hon'ble Mr. Wallis for the excellent and practical way in which he has conducted the business of preparing the Bill for the Council; and the other is a word addressed to the Municipal Commissioners. I trust that they will bear in mind what has fallen from the Hon'ble Sir Alfred Croft in regard to his recommendation that they should appoint at least two capable Inspectors

to ensure the satisfactory carrying out of the provisions of this Act—Inspectors who will see not only that these hackney-carriages are more decent and comfortable, that the drivers are better dressed and better able to drive with less danger to human life, but above all that there should be more humanity felt for the animals which are driven in these carriages, and that the reproach thrown upon us—and I think very justly thrown upon us—that there is no town in the whole of the British Empire in which the hackney-carriages and animals are such a disgrace to civilization as they are in Calcutta will be removed. Neither in Bombay nor in Madras nor in Karachi, nor even in a little town like Hyderabad in Sind, can you find anything comparable to the disgraceful state of the carriages or the miserable condition of the ponies which are driven in third class carriages in Calcutta, and I hope sincerely that the effect of the passing of this Act will be to prevent the recurrence of any such sights as those which inflict the eyes and the hearts of philanthropic people at the present day.

"There is a new clause in the Act which authorizes the Municipality to pass bye-laws which shall come into force after the confirmation of the Government. I have considered very carefully whether this would be a sufficient protection to the public. I was very much inclined to propose that more power should be given to the Government, so that they should be able not only to confirm the bye-laws, but if they found that the Commissioners did not pass bye-laws sufficient to meet the spirit of the Bill and the object of the Legislature, that the Government should have the power to take the initiative to draw up bye-laws or at least to modify and amend those framed by the Commissioners. The Bill as it now stands does not give that power. After careful consideration, and after discussing the subject with many gentlemen who were well able to advise me, I came to the conclusion that it was not desirable to propose any such amendment. I think we have reason to believe that we can trust the Municipal Commissioners to follow the spirit in which we have been acting, to follow the spirit which has been expressed by the public press and by many public Corporations, and the views which have led to the formation of the present Bill. I trust that in a very short time the Commissioners will draw up a set of bye-laws which will fully meet the spirit in which this law has been drawn up, and that they will appoint a suitable body of officers, capable and responsible, who will effectually see that the provisions of the law are carried out."

The Council adjourned *sine die.*

GORDON LEITH,

CALCUTTA; *The* 19*th August*, 1891.

Offg. Assistant Secretary to the Govt. of Bengal, Legislative Department.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER 1891-92.

No. 558B, dated Calcutta, the 13th August 1891.

From—T. INGLIS, ESQ., Offg. Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

A. SMITH, ESQ.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the first quarter of 1891-92, comprising the months of April, May and June 1891.

2. The quantity of salt of every description cleared during the quarter under report amounted to 27,65,043 maunds 1 seer 11 chittacks, against 22,65,538 maunds 34 seers 12 chittacks in the previous quarter, and 26,51,986 maunds 8 seers 5 chittacks in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 65,36,650 against Rs. 52,74,742-6 in the previous quarter, and Rs. 62,34,543-12 in the corresponding quarter of the previous year.

3. The quantity of excise salt sold in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter, are shown in table I:—

TABLE I.

	Cuttack.	Pooree.	Balasore.

Sales during the quarter	......	8,005 0	......
Wastage	......	1,807 0	201 0
Total ...	......	9,812 0	201 0
Balance at close of the quarter	......	48,784 20	501 0

4. The total sale of excise salt during the quarter under review amounted to 8,005 maunds, against 23,232 maunds in the previous quarter, and 46,297 maunds in the corresponding quarter of the previous year. The total amount of excise salt cleared, *i.e.*, on which duty was paid during the quarter, was 6,008 maunds. The figures in the table shown in the last paragraph are for the salt removed from the golahs.

5. The subjoined table shows in comparison the importations into the port of Calcutta, and the total clearances of sea-imported salt during the quarter under review, and the corresponding quarters of the previous two years:—

	Narail ...	1·37	
	Bongong ...	1·92	
11	Murshedabad „ 24, '91	0·95	Weather—seasonable. Transplantation of *aman* nearly completed in Kandi subdivision. Harvesting of *bhadoi* going on.
RAJSHAHYE DIVN.			
12	Dinagepur „ 22, '91	1·17	Weather—very hot and cloudy. Transplantation of *haimanti* crop not yet finished. More rain still wanted for high lands. Condition of cattle reported to be good, but in the Sudder subdivision some few cases of cattle disease are reported. Supply of fodder and water sufficient. Price of rice stationary.
	Thakurgaon ...	1·94	
13	Rajshahye „ 22, '91	4·24	Weather—hot and cloudy. Harvesting of *aus* and jute going on. Prospects of standing crops good.
	Nattore	7·44	
	Nowgong ...	1·31	
14	Rungpur „ 22, '91	2·51	Weather—fine with slight east wind. Rainfall of the month up to date has been 3¼ inches, against an average of 12 inches. The absence of rainfall renders the prospect of the winter rice crop less favourable. A considerable area has not been planted out, and the crop which has been planted is weak. Rain wanted for steeping jute. *Aus* harvest nearly over with fair outturn. Rivers and tanks low.
	Nilphamari ...	1·28	
	Gaibanda ...	2·30	
	Kurigram ...	0·80	
15	Bogra „ 22, '91	3·31	Weather—fine with passing clouds. East and south-east winds. *Aman* is being transplanted. Recent rain has done much good to cultivation. *Aus* and jute are being reaped. Common rice is being sold at 16 seers per rupee.
	Sherpur ...	3·06	
	Nowkhilla ...	2·37	
16	Pubna „ 22, '91	0·83	Weather—cloudy and rainy. *Aus* and jute are being cut. Prospects of *aman* favourable. Rainfall has been general and of much good to the *aman* crop. Rivers still rising. Fodder sufficient. Condition of cattle good.
17	Darjeeling „ 22, '91	7·57	Weather—rainy. *Bhadoi* and *chhota marua* are ripe and being cut. Transplantation of *haimanti* paddy is still going on.
18	Julpigoree „ 22, '91	6·45	Weather—hot; cloudy with a few showers. Prospects of crops not good. Price of rice stationary. A few cases of cattle disease reported from Alipur. Supply of fodder and water sufficient.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—concluded.				
		Eastern Districts.		
DACCA DIVN.	19	Dacca August 22, '91	2·37	Weather—seasonable. Jute and *aus* are being cut. Prospect of *aman* appears favourable on the whole, and that of jute fair. In one or two quarters some loss is anticipated owing to unprecedented low floods this season. Fodder available. Common rice is being sold at from 16 to 18 seers per rupee.
	20	Furreedpur „ 22, '91	1·39	Weather—seasonable. State of crops fair. Harvesting of jute going on. Rice selling at 16, 17, and 15 seers per rupee respectively at Sudder, Madaripore, and Goalundo.
	21	Backergunge „ 22, '91	3·24	Weather—seasonable. Prospect of crops good. Common rice selling at from 13 to 18 seers per rupee.
	22	Mymensingh „ 22, '91	6·53	Weather—rainy and hot. Prospects of *aman* fair. Transplantation of *aman* nearly finished. Harvesting of jute going on. Condition of cattle reported to be fair. Common rice sells at 13½ seers a rupee.
CHITTAGONG DIVN.	23	Chittagong „ 22, '91	0·10	Weather—seasonable. *Aus* crop is being harvested in some places, and *aman* transplanted. Prices steady.
	24	Noakholly „ ...	...	Report not received.
	25	Tipperah „ 22, '91	2·35	Weather—seasonable. Prospects of standing crops very good. *Aus* paddy and jute being cut. A rise in the price of jute, favourable to the cultivators. *Aman* promises well. Cattle fodder as usual deficient. Quality of cattle deteriorating.
	26	Chittagong Hill Tracts. „ 20, '91	0·36	Weather—sunny and cloudy with occasional falls of rain. Harvesting of early *jum* paddy commenced. Transplanting in low lands continues. Common rice is being sold at 13 seers 5 chittacks per rupee. Cattle disease (rinder-pest) prevalent adjacent to the head-quarters station. Fodder and water-supply good.
BEHAR.				
PATNA DIVN.	27	Patna „ 22, '91 Barh ... Behar ... Dinapur ...	0·44 5·20 3·31 3·41	Weather—hot and cloudy. Rain in Barh has greatly facilitated transplantation of paddy. In Behar and Sudder subdivisions transplantation in progress, but more rain wanted. Prospects in Dinapur reported to be favourable. *Bhadoi* crops doing well almost throughout the district. Prices generally stationary.
	28	Gya „ 22, '91 Jehanabad ... Nawada ... Aurungabad ...	4·01 1·84 1·99 0·87	Weather—cloudy and rainy. Paddy transplantation vigorously going on. Prospects of *bhadoi* crops good. Prices of food-grains almost stationary. Supply of fodder and water to cattle sufficient.
	29	Shahabad „ 22, '91 Bhabuah ... Sasseram ... Buxar ...	1·20 4·15 2·22 2·93	Weather—bright with occasional clouds. Prospects continue much improved. In Arrah both *bhadoi* and paddy are likely to be good. In Sasseram paddy may be very good and in Bhabuah and Buxar very fair. Prices stationary in Arrah and Bhabuah, slightly fallen in Sasseram and Buxar.
	30	Durbhunga „ 22, '91 Somastipur ... Madhubani ...	0·74 2·48 1·61	Weather—occasionally cloudy with east wind. Harvesting of *bhadoi* commenced in places. Transplantation of late rice going on, but rain still wanted. Indigo manufacture in progress. Price of common rice varies from 13 to 14 seers per rupee.
	31	Mozufferpur „ 22, '91 Hajipur ... Sitamarhi ...	2·52 0·54 3·91	Occasional showers, more or less heavy. Rain has done much good and improved prospects of rice crop. *Bhadoi* crop is better than usual. Cattle in good condition. Supply of fodder and water amply sufficient.
	32	Sarun „ 22, '91	0·92	Light mon-oon weather. Prospects of *bhadoi* excellent. Rice is being transplanted, but wants more rain.
	33	Chumparun „ 22, '91 Bettiah ...	6·68 0·94	Weather—hot and cloudy with occasional rain. Prospects of *bhadoi* continue to be good. More rain wanted for completing transplantation of paddy, specially in the Bettiah subdivision. Prices stationary.
BHAGULPORE DIVN.	34	Monghyr „ 22, '91 Boguserai ... Jamui ...	0·24 3·02 4·40	Weather—hot and occasionally cloudy. *Bhadoi* is being harvested; outturn of 16 annas expected. Transplantation of winter rice continues, but more rain still wanted. Prices almost stationary.
	35	Bhagulpur „ 22, '91	0·59	Weather—rather hot and dry. Prospects much improved, but more rain wanted. Transplantation of winter rice going on. *Marua* and *makai* good. *Makai* being reaped. Price of common rice 13 seers 14 chittacks per rupee.
	36	Purneah „ 22, '91 Kishengunge ... Arrareah ...	0·50 2·09 2·17	Weather—much cooler. The more frequent showers have benefited the *bhadoi* crop and allowed transplanting to go on. In Kishengunge jute steeping is in progress. Some of the streams in the Arrareah subdivision have been bunded to the advantage of the crops. With so much delay it is not possible yet to say the area which will be transplanted. No cattle disease. Fodder plentiful.
	37	Maldah „ 22, '91 Chanchal ... Shibgunge ...	0·07 1·15 0·28	Weather—seasonable. Drizzling rain on 19th and 20th. Rivers rising. Harvesting of *bhadoi* and transplantation of winter rice going on; about 8 annas and 12 annas respectively completed. Flood-water needed for winter rice Jute is still being cut. No change in prices since last report. No difficulty has been felt in grazing and watering cattle.
	38	Sonthal Perghs. „ 22, '91	3·83	Weather—cloudy and wet. State and prospects of crops continue satisfactory. About 4 inches of rain fell since last report, and transplantation of paddy nearly completed. New *janera* is coming into market; an average outturn of this crop is expected.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
ORISSA DIVN.	39	Cuttack ...	...	Report not received.
	40	Pooree „ 20, '91 Khoorda ... Banpur ...	0·88 5·13 1·59	Weather—cloudy with occasional showers. Puddling and transplanting going on. Early rice (*beali*) in ear. The subdivisional officer reports that puddling cannot be done on high lands for want of sufficient rain. More rain urgently wanted. Rain of 18th has done much good. Price of common rice varying from 17 to 21 seers per rupee. Cattle disease reported from Dandimal in Khoorda.
	41	Balasore „ 22, '91	0·64	Weather—seasonable. Crop prospects good.
CHOTA NAGPORE				
		South-West Frontier Agency.		
CHOTA NAGPORE DIVN.	42	Hazaribagh August 22, '91 Giridih ...	1·72 4·56	Weather—wet and seasonable. Prospects of crops excellent.
	43	Lohardugga „ 22, '91 Palamow (up to 18th Aug.)	2·06 6·88	Weather—seasonable. Transplantation of low land paddy continues. *Bhadoi* crops doing well. No cattle disease reported. Fodder and water plentiful.
	44	Singbhoom August 22, '91	3·13	Weather—seasonable. All crops doing well. *Makai* coming into the market. No cattle disease reported. Price of common rice stationary.
	45	Manbhoom „ 22, '91 Govindpur ...	1·81 2·37	Weather—seasonable. Prospect of crops good. Price of rice 12 to 20 seers per rupee.

* Mean of 5 days. † Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 22nd of August 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	District Observations. Rainfall. Of week. Mean for district.	Normal mean.	Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th May 1891. Mean for district.	Normal mean.	Variation.	Of week. Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—......indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 25th August* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 22ND OF AUGUST 1891.

In the second half of the previous week a small depression or feeble cyclonic storm had formed over Central Bengal and had first advanced in a westerly and then in a north-westerly direction, and on the 15th, or the last day of that week, the storm centre was near Allahabad. On the 16th it was between Allahabad and Lucknow, but it had become more feeble on this date, and though feebly perceptible on the 17th, it ceased to exist as a well-defined depression. It gave heavy rain in its progress, but the monsoon current brought up in its rear was feeble. Conditions were therefore of ordinary monsoon character in Bengal on the 16th, but on this day the rainfall reported was only light and local except in Chutia Nagpur, where it was more general. Winds on the 16th, however, showed a tendency for a westerly current to set in over Chutia Nagpur and parts of Orissa and Behar, and these winds commenced to drive back the easterly and south-easterly winds which had previously been blowing. This produced a considerable amount of interaction between the opposing wind systems and therefore of ascensional air motion which had increased by the morning of the 17th, when the westerly current had reached as far as Central Bengal. On the 17th, therefore, much heavier and more general rain was reported, two stations received nearly five inches of rain and a good many received an inch and upwards. Conditions remained practically unaltered on the 18th, except that pressure had become comparatively low at Balasore and Saugor Island and again fairly general rain was received, though the falls were not so heavy as on the 17th. On the 19th the comparatively low pressure still existed at Balasore and Saugor Island, and there was also slight indication of the commencement of a whirl over the extreme south-western parts of Bengal and probably the neighbouring parts of the north-west angle of the Bay. Winds, therefore, again became strongly easterly over almost the whole province; rainfall in Orissa and Behar and over parts of East and North Bengal became rather general and heavy, but the falls in South-West Bengal were lighter and more local. On the 20th a distinct but feeble low-pressure area had formed over the north-west angle of the Bay which was accompanied by a decided cyclonic circulation of winds, the centre of the circulation being apparently to the east of False Point. Again on the 20th Orissa reported fairly general but moderate rain, but in most other districts the falls were rather local. On the 21st the depression in the north-west angle of the Bay was a little more marked than it had been, but the position was practically unchanged, and again on the 22nd the feeble storm had become rather more marked, while the centre of the wind circulation was to the east-north-east of False Point and to the south of Saugor Island. The wind circulation on this day was very complete, and practically the wind system over the whole province was governed by the existence of the small storm, though the wind velocities in connection with it were light. Moderate general rain continued therefore to be received in Orissa and South-West Bengal on the 20th and 21st, but East and North Bengal, and to a considerable extent Chutia Nagpur and Behar, received little or no rain during this period owing to the indraught taking place towards the very feeble storm.

It will be seen, therefore, that the conditions during the earlier part of the week were more favourable for rainfall than they were during the last few days, but on the whole fairly good rain has been received during the week throughout the province.

Pressure.—The mean pressure for the week has been generally rather considerably above the normal, the usual excess ranging from 0·03″ to 0·04.″ The changes throughout the week have been generally small. Pressure usually rose slowly on the 16th; it then fell moderately for the next two days and rose on the following two days; on the 21st and 22nd pressure fell, the largest falls, though they were still small, taking place in the north-west angle of the Bay, where, as previously stated, a distinct barometric depression existed on these dates.

Temperature.—The variations of temperature throughout the week have been of no importance, and the mean temperature of the whole province for the week has not varied from the normal by so much as a tenth of a degree. On the whole, the mean temperature has been very slightly in defect, but this has been mainly owing to the fact that in North Bengal there has been a defect of 1° and in Behar a defect of about half this amount, while, on the other hand, slight excess temperatures have been recorded in Chutia Nagpur, Orissa, and South-West Bengal. In East Bengal temperature has been practically normal, while in Assam a defect of 1·1° has been registered.

Rainfall—Has been in slight excess of the normal in North Bengal, where previously rather defective falls have been registered. In Orissa, East Bengal, and Behar, the falls have been in slight or moderate defect, but in South-West Bengal and Chutia Nagpur the falls have been in rather large defect. The general falls in all divisions except South-West Bengal and North Behar have averaged between 2 and 3 inches, but in North Behar the fall has been only 1·90 inches and in South-West Bengal slightly less than an inch-and-a-half, which is only half the normal amount for the week. The defect in Chutia Nagpur has also equalled about a third of the normal fall.

The rainfall during August up to the 22nd has, however, been in considerable excess of the normal in Orissa and Chutia Nagpur, about normal in South-West Bengal and

South Behar, in slight to moderate defect in North Behar and East Bengal, and in rather considerable defect in North Bengal.

During the week under review the following districts have received falls largely in defect of the normal:—Balasore, Midnapore, 24-Pergunnahs, Moorshedabad, Nuddea, Jessore, Khulna, Chittagong, Noakholly, Chittagong Hill Tracts, Furreedpore, Maldah, and Sarun.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 22nd of August 1891:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1891.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers; lr, lightning reflection; [illegible], dew.

C. Little,

For Meteorological Reporter to the Govt. of India.

Meteorological Office, Govt. of India;

Calcutta, the 24th August 1891.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 8th August 1891.

BIRTHS.

THE total births registered during the week ending with Saturday, the 8th August 1891, in twenty-seven principal towns of Bengal, amounted to 465, and correspond to an annual rate of 22·5 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 3·5 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886–90.	1891.
Ratio of births per 1,000 of the population per annum	20·9	16·2	20·6	20·1	17·3	19·0	22·5

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING— 18th July 1891.	25th July 1891.	1st August 1891.	8th August 1891.	TOWNS.	WEEKS ENDING— 18th July 1891.	25th July 1891.	1st August 1891.	8th August 1891.
Burdwan	19·8	16·8	16·8	9·2	Narainganj	16·6	29·0	24·8	16·6

Howrah	17·2	14·0	16·6	28·2	Arrah	15·6	7·2	23·9	29·9
Bali	10·5	21·1	14·0	3·5	Mozufferpore	29·2	32·8	18·2	24·3
Krishnagar	7·6	13·2	9·5	20·8	Durbhanga	23·6	29·9	20·5	45·6
Ranaghat	6·0	12·0	...	6·0	Chupra	36·2	19·1	35·2	39·2
Santipore	19·3	17·5	14·0	31·5	Bhagulpore	14·5	33·5	14·5	19·1
Jessore	6·1	12·2	6·1	...	Monghyr	34·4	32·5	31·6	30·8
Rampore Beauleah	15·8	15·8	21·0	5·3	Purneah	10·4	10·1	13·9	3·5
Darjiling	22·2	44·5	37·0	51·9	Poori	25·2	25·2	25·2	27·3
Dacca	10·4	14·0	8·4	9·7	Total ...	19·3	20·3	18·3	22·5

It will be seen that last week the highest birth-rate was returned from Darjiling (51·9) and the lowest from Bali (3·5). No births were registered during the week in the Jessore town.

DEATHS.

The total deaths registered during the week under review amounted to 656, and correspond to an annual rate of 31·8 per 1,000 of the population. The rate of the week is 5·4 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886–90.	1891.
Ratio of deaths per 1,000 of the population per annum	28·4	26·7	25·1	28·9	23·0	26·4	31·8

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING— 18th July 1891.	25th July 1891.	1st August 1891.	8th August 1891.	TOWNS.	WEEKS ENDING— 18th July 1891.	25th July 1891.	1st August 1891.	8th August 1891.

Dacca	15·6	22·7	19·5	19·5	Total ...	26·4	27·7	27·5	31·8

According to the figures returned, the highest mortality occurred in the town of Darjiling (81·5) and the lowest in Bali (7·).

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Dysentery and diarrhœa.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Mozufferpore	... 43·8	Darjiling	... 51·9	Darjiling	... 22·2	Chupra	... 22·1
Arrah	... 28·7	Hughli and Chinsurah	... 27 9	Poori	... 12·6	Monghyr	... 14 5
Monghyr	... 19·0	Gya	... 27·3	Monghyr	... 9·0	Midnapore	... 13·9
Gya	... 17·1	Rampore Beauleah	26·3			Gya	... 13·7
Bhagulpore	... 7·6	Bhagulpore	... 20·6				

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 6·6 from cholera, against 6·4 in the preceding week; ·2 from small-pox, against ·1 ; 12·2 from fever, against 9·2 ; 3·4 from dysentery and diarrhœa, against 3·3 ; 3 from injury, against the same ratio; and 9· from other causes, against 8·2 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	32·7	Christians ...	29·9	Under 1 year	... 235·4
Females	30·8	Hindus ...	33·2	1 and under 5 years	... 58·6
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	106	Mahomedans ...	28·4	5 „ 10 „	... 24·7
				10 „ 15 „	... 16·0
				15 „ 20 „	... 19·1
				20 „ 30 „	... 15·8
				30 „ 40 „	... 15 0
				40 „ 50 „	... 24·7
				50 „ 60 „	... 21·9
				60 years and upwards	... 87·7

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

INCREASE.

Jute— Tons.

(1) Raw 49

Due to fair demand at Calcutta.

DECREASE.

	Tons.
Coal	647
This is due to increase during the last month.	
Cotton piece-goods—	
(1) European	14
Due to import by steamer plying between Jiagunj and Calcutta.	
Grains—	
(4) Others	19
Due to less import of paddy.	
Oil-seeds—	
(2) Mustard and rape	19
Less imported owing to dull market.	
Provisions—	
(3) Others	38
Due to failure of mango crop this year.	
Railway plant and rolling-stock	35
Due to less materials carried this year.	
Salt	15
Carried by boat.	
Silk, raw—	
(2) Indian	28
Exported by steamer.	
Sugar—	
(2) Undrained	26
Less imported owing to dull market.	
Timber	16
Not imported this year.	

R. G. MOOKERJEE,
Manager, Nalhati State Railway.

RESOLUTION ON THE PROGRESS REPORT OF THE FOREST ADMINISTRATION IN BENGAL FOR 1890-91.

REVENUE DEPARTMENT—FOREST.

Calcutta, the 25th August 1891.

RESOLUTION No. 504For.

READ—

The Progress Report of the Forest Administration in Bengal for 1890-91.

The report was submitted to Government twelve days after it was due. It is written by Mr. E. P. Dansey, who assumed charge of the circle on the 9th October 1890, on which date Mr. Home availed himself of the furlough for 2 years granted to him. The most important administrative reform introduced by Mr. Dansey, with the sanction of Government, was the abolition of the system under which Divisional Forest Officers supervised the working of groups of subdivisions in addition, in some cases, to holding direct charge of one or more subdivisions, and the substitution of independent divisions, all directly under the Conservator. By this means the services of the Divisional Officers were made available for duties in regard to which the paucity of officers was

being keenly felt. The new and the old arrangement of charges are compared below:—

Old.				*New.*	
No.	Name of Division.	No.	Name of Subdivision.	No.	Name of Division.
1	Darjeeling ...	1	Darjeeling ...	1	Darjeeling.
		2	Tista ...	2	Tista.
		3	Kurseong ...	3	Kurseong.
2	Jalpaigori ...	4	Jalpaigori ...	4	Jalpaigori.
		5	Baxa	5	Baxa.
3	Chota Nagpur ...	6	Palamau ...	6	Palamau.
		7	Singbhum ...	7	Singbhum.
		8	Hazaribagh ...	8	Sundarban.
4	Sundarban.			9	Chittagong.
5	Chittagong.			10	Angul.
6	Orissa ...	9	Angul ...	11	Puri.
		10	Khurda ...	12	Direction.

The Working Plans Division had hitherto a nominal existence, and even after the redistribution of charges the number of officers available is not sufficient for keeping up a separate Working Plans Division. It has therefore been decided to abolish this division and to depute selected officers, when necessary, for the preparation of working plans.

The reconstitution of forest charges above described was only begun during the year under report, and it was not until the current financial year that the arrangements could be completed. The annual forms attached to the report under review have, however, been drawn up in accordance with the new arrangement of charges.

Area.

2. As compared with the preceding year, there was a decrease of 6 square miles in the area of Reserved forests, and 30 square miles in that of Protected forests on account of the disforesting of certain lands in the Sundarban forests for the extension of cultivation. The total area of Reserved forests stood at 5,189 square miles, and of Protected forests at 2,209 square miles, while there was no change in the area of Unclassed State forests and waste lands under the partial management of the Forest Department. There seems to be room for extension of the forest area in Chittagong; but it is mainly in the Darjeeling and Jalpaigori districts and in Chota Nagpur that efforts should be made to increase the forest area and meet the great demand for timber and fuel by the tea estates and the public. The forests in the Government estates of the Sonthal Pergunnahs are under the management of the civil officers: there is perhaps room for expansion here also, but for political reasons the Sonthal Pergunnahs require careful handling. The Conservator has been instructed to visit this district during the cold weather and to report upon the whole question of the forests there.

Boundaries.

3. The state of the boundaries between the Angul Reserves and the neighbouring Tributary States, and between the Singbhum Reserves and the Tributary estate of Keonjhar in Orissa, should be reported to Government separately.

Establishment.

4. Of 8 natives of Bengal who were sent to the Imperial Forest School at Dehra Dun during the past seven years, 5 have resigned their appointments. One has been on sick leave almost continuously since 1888, when he obtained a Ranger's certificate with honours, and one only of the number is reported to have borne a good reputation. This officer has done well and is now a Ranger on Rs. 50. Regarding the remaining individual not much is known, good or bad. On a review of the whole subject of an efficient executive Forest staff for Bengal, the Officiating Conservator thinks it deserving of consideration whether that staff should not be recruited, as far as possible, from among the hardier races of Northern and Central India. This is a serious assertion of the inferiority of the Bengali *personnel* in the Forest service, which the Lieutenant-Governor has perused with regret. If the natives of Bengal cannot show themselves fit for the work required, it will be incumbent on Government to seek for

better material elsewhere, but it is hoped that a greater encouragement of athletic exercises as a part of school education may help to train a generation which will not be liable to this reproach. In any case, Sir Charles Elliott has no wish to make a sudden change and will watch the working of the present system.

Legal Proceedings.

5. A probationary Forest Ranger, in charge of the Darjeeling Forest Depôt, was prosecuted for misappropriation of Government money to the extent of Rs. 970, convicted, and sentenced to three months' rigorous imprisonment with fine. The ringleader in the Chittagong murder and robbery case, referred to in paragraph 3 of the Resolution on the Forest Administration Report for the previous year, is still at large. The total number of prosecutions for breaches of the Forest law was 203, and of cases compounded 1,961, against 120 and 2,524 respectively in the previous year. There was an improvement in the percentage of convictions, being ·87 against ·80 in the year 1889-90. The Sundarbans Division is said to be responsible for the increase in the number of prosecutions, as well as the decrease in the number of cases compounded.

Fires.

6. It is noticeable that the most destructive fires occurred in the specially protected areas of the Jalpigori and Angul Divisions, where the supervision of the Divisional Officers was least efficient. It is reported that Mr. Green, who was in charge of the Jalpigori Division, could not go into camp during the warm months on account of ill-health. The Lieutenant-Governor thinks that Mr. Green ought in the circumstances to have taken leave. In the case of Angul, the Lieutenant-Governor regrets to find that the Divisional Officer, Mr. Richardson, was not aware of the occurrence of fires until he happened to go to the spot with the Conservator, and that he had delegated the duty of protection to a Forester wholly incompetent for the purpose.

Altogether there was an increase of 247 square miles in the specially protected area, 94 per cent. of the total area of reserves escaped fires, while there was a failure to protect 75 square miles, and no attempt made to protect 257 square miles.

Grazing.

7. The Conservator expresses an opinion that grazing is not less injurious than fires to a deteriorated Indian timber forest. The Lieutenant-Governor agrees in this view; but the Conservator appears to be also of opinion that grazing is, as a rule, only permitted for the purpose of increasing the Government revenues. The Lieutenant-Governor believes that the object will usually be found to have been not the increase of revenue, but a desire not to be hard upon the people, who grievously resent any restriction of their grazing rights. He has lately insisted, in the case of the Angul forests, on adequate grazing grounds being reserved for the cattle of the villagers, so that there may be no necessity for a modified admission of grazing rights within the forest area and no risk of injury to the growth of forest produce.

Plantations.

8. There was an increase in the area of plantations during the year from 3,012 acres to 3,143 acres in Darjeeling, Kurseong, and Chittagong, and in cultural operations from 999 acres to 1,138 acres in Darjeeling, Jalpaigori and Orissa. The total cost under this head is Rs. 6,977, against Rs. 6,604 during the previous year.

Outturn.

9. The total outturn of timber during the year was 8,332,421 cubic feet, of which 33,536 were removed departmentally, 8,224,361 were removed by purchasers, and 74,524 were free grants. The corresponding figures for the previous year are 44,173, 10,172,896, and 21,739 cubic feet respectively. The Sundarban Division is chiefly responsible for the large decrease in the quantity of timber removed by purchasers. Various causes are assigned for this. The Divisional Officer attributes the unfavourable result to the glut of sundri timber in the market owing to excessive exports in the previous two or three years. But Mr Dansey seems to favour the idea that indiscriminate fellings spread over wide areas have exhausted the valuable timber in accessible areas, and he thinks that better results may be expected by concentrating the fellings on selected areas by rotation. Sir Charles Elliott has, on his recent tour, considered the subject at Khulna, on the margin of the Sundarban, with the local Forest officers, and

has expressed his concurrence with the Conservator's view that the time has come for the introduction of the system of dividing the total area into blocks for annual operations: he has accordingly authorised the preparation of a Working plan on the lines suggested by Mr. Dansey for professional examination

10. The total outturn of fuel during the year was, excluding free grants, 16,597,245 cubic feet, as compared with 15,232,047 in 1889-90. Part of this increase is attributed to the prohibition practically imposed on the imports of charcoal from Sikhim into the station of Darjeeling. There was a falling off by 70 per cent. in the outturn of fuel by departmental agency in the Kurseong and Tista Divisions. In the latter the decrease is compensated by increase in the removals by purchasers; but in Kurseong there was an unaccountable decrease in both respects, which the Conservator might surely have enquired into himself instead of asking the Divisional Officer to do so.

The figures for the increased consumption of fuel in the Orissa Division are said to have been roughly calculated on the number of licenses issued to the ryots of the Khurda Government estates for fuel required for their own consumption. The data for the increase in free grants of fuel are equally untrustworthy; but in both cases exact figures have been used. Rough estimates of this description should always be in round numbers.

Financial results.

11. The following tables compare the financial results of the year under report and of the preceding year in a collected form:—

Financial results in Forest Divisions for the years 1889-90 and 1890-91, as shown in Form No. 58.

1889-90.

Division.	Receipt. Rs.	A.	P.	Expenditure. Rs.	A.	P.	Profits. Rs.	A.	P.	Loss. Rs.	A.	P.	Remarks.

Total for 1890-91	7,27,392	3	3	4,04,287	14	1	3,94,663	0	0	71,558	10	10	Surplus = Rs. 3,23,104-5-2.

The net revenue was Rs. 55,349 less than the preceding year; but, compared with the average of the five years ending 31st March 1890, there was an increase of Rs. 42,064.

12. There was a fall of Rs. 75,000 in the revenue of the Sundarban Division, though all other divisions show an increase: hence the gross revenue of the province for 1890-91 was less than in the preceding year by Rs. 41,000. On the other hand, the expenditure in all divisions increased by Rs. 14,000, chiefly under the head of Establishment, but the increase includes a sum of Rs. 2,201 written off the accounts in connection with the theft in the Kassalong Range, Chittagong, referred to in paragraph 21 of the Report for 1889 90. Such fluctuations are not uncommon, and, except in the Sundarban case, do not call for

explanation. The decrease in the Sundarban will, it is hoped, be recouped when a regular working-plan is introduced. The Lieutenant-Governor trusts that Mr. Dansey will, in his zeal for the improvement of Forest administration, not forget the necessity of contributing to the general revenue of the province. The Conservator thinks that the price of fuel at Darjeeling may well be raised in consideration of the increased cost of procuring it as the working recedes further from Darjeeling, and also of the price of firewood at other hill stations in India. No statistics are, however, given on the latter point. The deficits in some of the divisions are attributed by the Conservator to two causes: first, that the forests had been already exhausted before they came under the management of the Forest Department; and secondly, that they are surrounded by other forests, the supply in which is practically free: the latter cause serves, in the Conservator's opinion, to strengthen the reserves, which are not yet ripe for extensive cuttings. The idea of the previous depletion of forests as a cause of scanty revenue is one which has been sometimes advanced by Forest officers without sufficient investigation.

13. In conclusion, Sir Charles Elliott desires to express his appreciation of the way in which Mr. Dansey has carried out the duties of Conservator since he assumed charge of this post.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE GOVERNMENT CINCHONA PLANTATION AND CINCHONA FACTORY IN BENGAL FOR THE YEAR 1890-91.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 25th August 1891.

RESOLUTION No. 158T—F.

READ—

The Annual Report of the Government Cinchona Plantation and Cinchona Factory in Bengal for the year 1890-91.

In spite of the heavy rainfall of the year, the number of cinchona plants destroyed by landslips was less than in previous years of smaller rainfall, and no damage at all was done by hail. The policy of replacing the red bark, which, though rich in the inferior alkaloids, is comparatively poor in quinine, by the *Calisaya* and hybrid varieties which yield a large proportion of quinine, was steadily adhered to; 192,000 of the former kind were uprooted and not renewed, and 200,460 of the latter were put out in the plantation. The number of cinchona plants in the plantation on the 1st April 1891 was 4,515,861, while 234,000 seedlings were in the nurseries. The crop collected amounted to 293,972 pounds of dry bark against 304,705 in 1889-90, of which 106,150 pounds were of red bark, 105,848 of bark of *Calisaya Ledgeriana*, 66,730 of hybrid bark, 13,974 of *Verde* and *Morada*, and 1,270 of Crown or *Officinalis* bark. The whole of this crop, with the exception of a small quantity supplied on indent or sold to Government institutions, was made over to the Febrifuge Factory for disposal.

2. The outturn of the factory, which is generally regulated by the demand, was 4,031 pounds of cinchona febrifuge and 4,010 pounds of sulphate of quinine, against 6,578 and 1,833 pounds respectively in the previous year. The entire quantity was manufactured during the year by the fusel oil process, which has, in the last few years, successfully taken the place of the old acid and

alkali method of manufacture. The issues during the year where slightly less than those in 1889-90, as will be seen from the following table:—

	1890-91. lb	oz.	1889-90. lb	oz.
To Medical Depôt, Calcutta	850	0	2,197	0
Ditto, Bombay	1,400	0	2,224	0
Ditto, Meean Meer	1,000	0	......	
To Inspector-General of Civil Hospitals, Bengal	222	12	352	8
To Inspector-General of Jails, Bengal ...	110	8	149	9
To Commissariat Department for Port Blair	75	0	......	
Sold to Government officers and the public	3,973	3¼	2,756	0
Given as samples	15	1	1	0
Total ...	7,646	8¼	7,680	1

The decrease in the quantity of drugs issued to the Medical Depôts at Calcutta and Bombay occurred under the head of cinchona febrifuge. The issues of quinine to these two depôts rose from 674 pounds to 1,050 pounds. Of the total issues during the year, 3,789¼ pounds were of quinine, 3,837 of cinchona febrifuge, and 20 of crystalline febrifuge.

3. The revenue derived from the sale of sulphate of quinine, cinchona and crystalline febrifuge, cinchona barks and other products of the plantation, amounted to Rs. 1,18,576, against Rs 1,13,693-12-6 in the previous year.

	1890-91. Rs.	A.	P.	1889-90. Rs.	A.	P.
By sale of febrifuge, sulphate of quinine, &c. ...	60,881	0	0	43,112	13	0
By credit from the Medical Depôts and the Commissariat Department	52,956	4	0	63,374	11	6
By credit from the Inspector-General of Civil Hospitals, Bengal	3,141	12	0	5,056	2	0
By credit from the Inspector-General of Jails, Bengal ...	1,593	0	0	2,150	2	0
Total ...	1,18,576	0	0	1,13,693	12	6

4. The net profit of the year's working amounts to Rs. 17,040-2, a result which may be considered as satisfactory and quite sufficient. It must be remembered that in starting the cinchona plantations in this country, the Government did not aim at a profit: its object was to secure for the people a cheap remedy for fever, the commonest of all tropical diseases. The quinine manufactured at the Government Factory can now be sold at one rupee per ounce, while, as Dr. King remarks, quinine cost a good many rupees per ounce 29 years ago, when the cinchona enterprize was initiated by the Government of Bengal. This is a matter for much congratulation. Hardly any greater blessing to a fever-stricken country can be imagined than cheap quinine. Dr. King observes that it would be possible still further to reduce the price of quinine if all the charitable dispensaries in the province were to supply themselves with the Government drug instead of buying their quinine elsewhere. The Lieutenant-Governor has ascertained by personal enquiry, since Dr. King's report drew his attention to the subject, that many dispensaries procure their quinine from private stores at Re. 1-2 and Re. 1-4 per ounce, when they could purchase it from Dr. King at Re. 1 per ounce. This is an obvious absurdity. Not only is the Government quinine declared to be purer than much of the foreign quinine imported into the country, but also it is only reasonable that institutions helped by Government should draw their supplies of quinine from the Government Factory, and the Inspector-General of Civil Hospitals will be asked to look into the matter and consider what can be done to extend the demand for Government quinine in order to bring about a further reduction of price.

5. The thanks of Government are again due to Dr. King and Mr. Gammie for their efficient management of the Department.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secretary to the Government of Bengal.

ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND FACTORY IN BENGAL FOR THE YEAR 1890-91.

No. 770, dated Royal Botanic Garden, Seebpore, near Calcutta, the 9th July 1891.

From—BRIGADE-SURGEON GEORGE KING, M.B., F.R.S., C.I.E., Superintendent, Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal.

To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to forward herewith the annual report of the Cinchona Plantations and Factory for the year 1890-91.

Twenty-ninth Annual Report of the Government Cinchona Plantation and Factory in British Sikkim for the year 1890-91, *by* BRIGADE-SURGEON G. KING, M.B., LL.D., F.R.S., C.I.E., *Superintendent of the Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal, and Government Quinologist.*

1. The year under review was remarkable for its very heavy rainfall. This occasioned numerous breaks of communication with Darjeeling and with the plains, but the loss of cinchona trees by landslips was less than in years when the total rainfall was considerably less. No damage was caused by hail during the year.

2. *Changes in the Plantation.*—During the year 367,000 trees were uprooted. Of these, 192,000 were red bark trees and 175,000 were yellow, hybrid, and crown. The renewals amounted to 200,460, and consisted of 18,020 hybrids and 182, 440 yellow-barks (calisaya). In accordance with the policy of eliminating the red-barks, which has been followed for many years, no renewals were made of this sort. And the total number of them now remaining in the Plantation stands at under a million-and-a-half; ten years ago they numbered considerably over four millions. On the other hand, the stock of the quinine-yielding sorts (calisaya and hybrids) has risen within the same period from about half a million to three and three-quarter millions. The table printed as Appendix A to this report gives a census of the plants at the end of the year under review. The totals of all sorts there shown are 4,515,861 plants in the Plantation, and 234,000 seedlings in the nurseries.

3. *The crop for the year.*—The total crop harvested during the year was 293,972 pounds of dry bark. This total is made up of 106,150 pounds of red bark, 105,848 of bark of Calisaya Ledgeriana, 66,730 of hybrid bark, 13,974 of verde and morada, and 1,270 of crown or officinalis bark. The proportion of crop yielded by the old or Mungpoo plantation was 199, 670; by the Sittong plantation 57,440, and by the new plantation at Rungjung 36,862 pounds. The bulk of this crop was made over to the Factory; only a small quantity (784½lbs.) having been supplied to Government institutions or sold to the public.

4. *Expenditure on the Plantation for the year.*—The total budget allotment for the year was Rs. 74,020. It was, however, not found necessary to spend the whole of this, and a saving of Rs. 5,390-9-5 was effected. The net expenditure was therefore only Rs. 68,629-6-7, and it was distributed as follows :—

	Rs.	A.	P.
European establishment (including all salaries except that of Dr. King, Superintendent of the Botanic Garden, Calcutta , coolie labour, and office establishment	60,801	6	1
Keep of animals for plantations ...	900	0	0
Contingencies, &c., including service postage stamps, &c	4,835	9	9
Travelling allowance	279	12	0
Stores from England	1,812	10	9
Total ...	68,629	6	7

In return for this expenditure there was collected, as has just been shown 293,972 pounds of bark. The net cost of each pound of bark was therefore As. 3 pies 8·823.

5. *Factory.*—The whole of the manufacturing operations were conducted by the fusel-oil process, another year's experience of which only increases our previous confidence in its simplicity and efficiency. The budget allotment for the Factory for the year amounted to Rs. 35,950, of which, however, only Rs. 33,007-0-4 were actually spent; and this expenditure includes items of Rs. 4,691-2-5 for stores from England. If to this Factory expenditure there be added the cost of the bark used in the Factory during the year, the amount will stand thus:—

	Rs.	A.	P.
Cash expenditure on Factory (including Rs. 4,691-2-5 for stores from England) ...	33,007	0	4
201,568 pounds of bark (crop of 1889-90) at an average cost of annas 3 pies 4·338 per pound	42,348	2	9
48,662 pounds (crop of 1890-91) at an average cost of annas 3 pies 8·823 per pound ...	11,360	4	8
Total ...	86,715	7	9

The outturn obtained for this sum consisted of 4,031 pounds of cinchona febrifuge and 4,010 pounds of sulphate of quinine. Owing to the larger percentage which is obtained of febrifuge, I reckon that each pound of it cost about Rs. 8, whereas each pound of quinine cost about Rs. 13-9-3·91.

6. *Sales of Febrifuge and Quinine during the year.*—The total issues for the year were 3,837 pounds of febrifuge, 3,789½ pounds of quinine, and 20 pounds of crystalline febrifuge; and these were distributed as follows:—

	lbs.	oz.
To Medical Depôt, Calcutta—		
Cinchona febrifuge	200	0
Sulphate of quinine	650	0
To Medical Depôt, Bombay—		
Cinchona febrifuge	1,000	0
Sulphate of quinine	400	0
To Medical Depôt, Meean Meer—		
Sulphate of quinine	1,000	0
To Inspector-General of Civil Hospitals, Bengal (for district medical officers, Bengal)—		
Cinchona febrifuge	216	0
Crystalline "	6	12
To Inspector-General of Jails, Bengal (for jails and lock-ups in Bengal)—		
Cinchona febrifuge	99	8
Crystalline "	7	0
Sulphate of quinine	4	0
To Commissariat Department for Port Blair—		
Sulphate of quinine	75	0
Sold to Government officers—		
Sulphate of quinine	1,651	11¼
Sold to Government officers and to the general public—		
Cinchona febrifuge	2,315	8
Crystalline "	6	0
Given as samples—		
Cinchona febrifuge	6	0
Crystalline "	0	4
Sulphate of quinine	8	13
Total ...	7,646	8¼

7. *Stock Account.*—At the end of the year the stock of bark on hand amounted to 469,917 pounds. Part of this (viz. 224,607 pounds) was carried forward from previous years, and its average cost (as per last year's account) was annas 3 pies 4·338 per pound. The remainder (245,310 pounds) is the bark crop of the year under review, which has been shown to have cost annas 3 pies 8·823 per pound. The stock account at the end of the year under review, as well as that of the previous year, is given in the following table.

As much of the bark has now been held for some time, I have taken it at an overhead valuation of annas 3 per pound, which I consider a fair rate—

Stock on 31st March 1890.

	Rs.	A.	P.
Chemicals and stores	3,000	0	0
Cinchona febrifuge, 1,559¼ pounds, at Rs. 10-12-3·026 per pound	16,786	13	2
Crystalline febrifuge, 20 pounds, at Rs. 16-6-3 per pound ...	327	11	4
Sulphate of quinine, 1,562 pounds, at Rs. 11-14-3·026 per pound ...	18,583	0	5
Bark, 426,275 pounds, at an average of 3 annas 4·338 pies per pound	89,559	6	1
	1,28,256	15	0
Increase in value ...	100	9	0
Total ...	1,28,357	8	0

Stock on 31st March 1891.

	Rs.	A.	P.
Chemicals and stores ...	2,000	0	0
Cinchona febrifuge, 1,753¼ pounds, at Rs. 8 per pound ...	14,026	0	0
Sulphate of quinine, 1,783 pounds 4½ ounces, at Rs. 13-9-3·91 per pound	24,222	1	0
Bark, 469,917 pounds, valued at an average of 3 annas per pound ...	88,109	7	0
Total ...	1,28,357	8	0

The stock stands, therefore, practically at the same value as it did at the end of the previous year.

8. *Financial result of the year's working.*—If the figures which have been given in the previous paragraphs be collected, a balance sheet can be prepared showing the general result of the year's working. This is as follows:—

BALANCE SHEET.

DR.

	Rs.	A.	P.
To value of stock on 31st March 1890	1,28,256	15	0
To cash received from the Treasury during 1890-91 for expenditure on the plantations, viz., Rungbee, Mungpoo, Sittong, and Rungjung	66,816	11	10
To stores from England for plantations	1,812	10	9
To cash received from Treasury during 1890-91 for expenditure on Factory	28,315	13	11
To stores from England for factory	4,691	2	5
Profit on the year's working ...	17,040	2	1
Total ...	2,46,933	8	0

CR.

Total ...				2,46,933	8	0

The result of the year's working is therefore a profit of Rs. 17,040-2-1. Of this profit, the sum of Rs. 16,939-9-1 is in cash, and only the small sum of Rs. 100-9 represents increase in the value of stock. The largeness of the amount both of raw material and of manufactured product in stock shows that the producing capacity of the Plantation and Factory is greater than the demand for their products. This is a great economic disadvantage, for the best possible results of any producing agency are not obtainable unless it be worked up to its full power. And could the full production of the cinchona estate be taken off, it would be possible still further to reduce the price both of quinine and febrifuge. And I have little doubt that, were all charitable dispensaries to supply themselves with Government quinine, the fullest possible outturn of the Factory and Plantation might be absorbed. But the majority of these dispensaries are now administered by local boards and municipalities, and these bodies appear to prefer in buying their drugs to supplying themselves with quinine from other sources. This practice appears still more unfortunate when it is viewed in the light of the fact that the Government quinine has been shown by repeated analysis to be of the highest possible purity, which is a good deal more than can be said of much of the foreign quinine that is sold in Calcutta.

9. From the beginning of the year that has now been entered upon, the price of febrifuge has been reduced to Government officers to Rs. 10 per pound and the price of quinine to Rs. 16. When the cinchona enterprise was initiated by Government twenty-nine years ago, the price of quinine stood at a good many rupees per ounce, and the repeatedly avowed intention of Government was to reduce its price to one rupee per ounce. That intention has now been fulfilled, and the matter is one, I think, for congratulation.

10. The crop of bark for next year will, as usual, be regulated by the demand for quinine and febrifuge, which, I trust, may be considerably in excess of that of the year under review.

11. The sum of Rs. 2,327-8, received for grazing and land-rent from settlers on the cinchona reserve, was paid into the Darjeeling Treasury, no credit having been taken for it in the cinchona accounts.

12. The progress of the fuel plantation at Mungpoo has been most satisfactory, and a large extension of it above the level of the Sureil bungalow has been arranged for. A great number of Oak thinnings cut out during the previous year were used in the Factory, and proved to make most excellent fuel.

13. The Plantation and Factory have during the year been under the executive charge of the Deputy Superintendent, Mr. J. A. Gammie, whose excellent services require no commendation from me. Mr. R. Pantling, the senior assistant, was absent on furlough during the greater part of the year. His duties were performed to my entire satisfaction by Mr. G. A. Gammie. The other assistants, Mr. Parkes, who is in charge of the Rungjung plantation, and Mr. A. Hartless, who is stationed at Mungpoo, have both done excellent work. And the office staff under Babus Gopal Chandra Datta and Devendranath Basu have worked well.

14. The usual statistical returns are appended.

APPENDIX A.

Table showing the number and distribution of Cinchona plants in the Government Cinchona Plantations, Sikkim, on 1st April 1891.

MUNGPOO DIVISION.

GEORGE KING, M.B., *Brigade-Surgeon,*

Supdt., Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal, and Government Quinologist.

ENDOWMENT MADE BY BABU DWARKANATH PAL FOR THE ENCOURAGEMENT OF VEDIC LEARNING.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 29*th August* 1891.

RESOLUTION No. 490.

READ—the following papers on the subject of an endowment of Rs. 5,000 made by Babu Dwarkanath Pal for the encouragement of Vedic learning in Bengal:—

Letter from Babu Dwarkanath Pal, dated the 14th February 1889.
„ from the Director of Public Instruction, No. 1590, dated the 16th March 1889.
„ to the Director of Public Instruction, No. 263, dated the 28th March 1889.
„ from the Director of Public Instruction, No. 423, dated the 10th June 1889.
„ from the Director of Public Instruction, No. 6825, dated the 12th December 1889.
Letter from the Director of Public Instruction, No. 4528, dated the 1st August 1891.

Babu Dwarkanath Pal having offered to make over Government securities of the value of Rs. 5,000 (which have since been received and deposited with the Accountant-General for safe custody) for the encouragement of Sanskrit learning in Bengal, a Committee was formed for the purpose of drawing up for the consideration of Government a scheme for carrying out the wishes of the donor. The following are the proposals made by the Committee as modified by the Director of Public Instruction:—

(1) that the entire proceeds of the endowment of Rs. 5,000 be devoted to the aid or maintenance of a Tol which should teach the Vedas and the Vedic literature only;
(2) that the Tol be under private management;
(3) that the grant be tenable by the Adhyapak of the Tol, who is to be a native of Bengal and to be appointed by a majority of the Trustees, so long as the Tol is maintained and is reported to be in a satisfactory condition by a body of visitors to be nominated by the Trustees;
(4) that the Trustees appointed to carry out the scheme be the Principal of the Sanskrit College, *ex-officio*, and in the first instance Babu Durga Das Basu, M.A., B.L., Munsif, and Babu Hemendra Nath Mitra, M.A., B.L., Professor in the Free Church Institution; and on the occurrence of any vacancy among the Trustees (other than the *ex-officio* Trustee), the remaining Trustees shall nominate for the sanction of Government, a person to fill the vacancy, provided that one at least of the Trustees shall be a person who is not in the service of Government;
(5) that rules for the proper guidance of the Adhyapak be framed by visitors nominated by the Trustees;
(6) that the Principal of the Sanskrit College be the Administrator of the Fund.

RESOLUTION.—The Lieutenant-Governor accepts the offer and approves the proposed terms of the trust as stated above. His Honour desires that an expression of his thanks may be conveyed to Babu Dwarkanath Pal for his public spirit and liberality. A copy of this Resolution will be published in the *Calcutta Gazette.*

ORDER.—Ordered that a copy of this Resolution be forwarded to the Director of Public Instruction and the Accountant-General, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,
Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE POLICE DEPARTMENT FOR THE YEAR 1890.

RESOLUTION.

POLICE.

Dated Calcutta, the 31st August 1891.

READ—

The Report on the Administration of the Police Department for the year 1890.

Read also—

The Report for the year 1889 and the orders of Government recorded thereon.

General.—The Police Report for 1890 was received on the 23rd July, Mr. Henry, the Officiating Inspector-General of Police, having been allowed by this Government to delay its submission for three weeks in consideration of his time being much occupied with special work arising out of the Report of the Police Committee. Although the Report for 1890 is written by Mr. Henry, who received charge of his office on the 2nd April 1891, Mr. Veasey was Inspector-General of Police during the whole year. The Lieutenant-Governor is glad to observe that the Officiating Inspector-General's remarks are contained in 87 pages, 15 less than in the Report of last year.

2. *Inspection.* - The present Report gives no statistics of the tours of inspection of the Inspector-General and Deputy Inspectors-General, or of the District Superintendents and their Assistants. It is merely said that, with the exception of Noakhali, all the districts were inspected during the year, presumably by the Inspector-General or a Deputy Inspector-General, and that the duty of inspection by District Superintendents and Assistant District Superintendents was on the whole well attended to. In future a statement should be submitted showing who have been District Superintendents and Assistant District Superintendents in each district during the year, and the number of days each officer was out on inspection duty.

3. *Sanctioned strength of the Police Force.*—Including the Railway Police, the sanctioned force in 1890 was 76 superior officers, 3,549 inferior officers, and 18,503 constables; but at the close of the year the subordinate officers were 59 and the constables were 34 below the sanctioned strength. The sanctioned strength for 1890 varied from that of the previous year in the addition of one District Superintendent and one Sub-Inspector, and in the decrease of 7 head constables and 1,274 constables; in place of the decrease in constables, 1,235 town chaukidars were sanctioned. The Police Budget grant was Rs. 41,59,000, but the actual expenditure only came to Rs. 40,19,887 against Rs. 41,81,342 of the year before. The following table shows the proportion of men employed on purely police work to area and population:—

PROVINCE.	Number of police.	Area in square miles.	Population.	Proportion of police to square miles.	Proportion of police to population.
Bengal Proper (excluding Hill Tracts).	12,527	70,956	38,020,611*	1 to 5·6	1 to 3,035
Behar (including Chota Nagpore).	7,222	71,105	28,929,933*	1 to 9·8	1 to 4,005
Orissa	1,447	9,762	3,865,106*	1 to 6·7	1 to 2,671
Total ...	21,196	151,823	70,815,650*	1 to 7·2	1 to 3,340

* These figures are the rough totals of the Census of 1891, which may be taken as approximately correct.

4. *Town Police.*—A large number of the town police have been replaced by town chaukidars. As this is a new measure, several District Officers have hesitated to pronounce an opinion upon its working at present; others seem satisfied. The town police are variously reported upon. They did not work well in the 24-Pergunnahs, Serajgunge, Chupra, Patna, Cuttack, and Puri. The Lieutenant-Governor notices that the working of the town police and of the town chaukidars has in some instances not been reported upon at all. He desires all District Superintendents and District Officers to pay attention to the subject in future reports. Street lighting, which is essential to efficient watch and ward at night, has not made very much progress throughout these Provinces. Not a

and not to punish the inhabitants for misconduct. Three hundred and thirteen special constables were appointed under section 17 of Act V of 1861 in the districts of Bankura, Durbhunga, Shahabad, Patna, Sarun, Khulna, Backergunge, and Sonthal Pergunnahs. Of these, 140 were appointed in Bankura for six days only in consequence of the anti-missionary riots. A portion of the Inspector-General's special reserve, consisting of one subahdar, six havildars, and 49 sepoys, were on duty in the Jessore district from 22nd April to 18th June on account of the anti-indigo riots.

7. *Charges of torture against the Police.*—There is not such a bad list of torture cases as usual. Two Sub-Inspectors of the Lohardugga district were convicted and sentenced to 6 and 3 months' rigorous imprisonment for maltreating several persons during an investigation; one, however, was acquitted on appeal and has been reinstated by the Commissioner. A head-constable in the Rajshahye district was sentenced to three months' rigorous imprisonment by the Sessions Court for conniving at the ill-usage of an accused person during an investigation. Two constables of the Darjeeling district were sentenced to a month's rigorous imprisonment each for maltreating a drunken prisoner in their custody, and another case in this district, which occurred just at the close of the year and was brought to light in 1891, has been visited with severe punishment. A constable in the Lohardugga district was dismissed for a similar offence, but there was not sufficient evidence to prosecute him. In Bogra a Sub-Inspector was dismissed for striking a European prisoner with a cane. Several charges of torture were found to be false, but there was not sufficient evidence on which to prosecute the accusers. Eight cases of extortion by the Police are reported, but no details are given. The Officiating Inspector-General says that these cases were of minor importance. In future the Lieutenant-Governor desires that details of all such cases shall be furnished.

8. *Punishments.*—The returns show that 1·1 per cent. of the officers and 1·5 of the men were punished during the year judicially for offences against the Penal Code; that ·2 of the officers and ·7 per cent. of the men were convicted under Act V of 1861, and that 46·0 of the officers and 16·2 of the men were departmentally punished. The figures for departmental punishments have decreased somewhat during the last three years, but are still exceedingly high. Mr. Henry makes no remarks upon the subject. The Lieutenant-Governor desires to repeat the remarks of Sir Steuart Bayley in last year's Resolution that District Superintendents, when inflicting punishments upon their higher subordinates, should not lose sight of the necessity of preserving the dignity of the latter in the eyes of policemen of the lower ranks, and should remember that injudicious severity may deter persons of respectability from offering themselves as recruits.

9. *Rewards.*—The Lieutenant-Governor is glad to observe that there was an increase of 146 in the total number of men wearing good-conduct stripes. Money rewards were given to 1,657 officers and men, and 39 men were specially promoted for good work. The Lieutenant-Governor notices with satisfaction the list of 39 names including those of Inspectors, Sub-Inspectors, head-constables, and constables who are found deserving of special commendation. The list given does not, however, include the name of writer-constable Mahomed Syed, who in another part of the Report is described as having most gallantly effected the capture of two of a band of Nepali dacoits.

10. *Cognizable cases in Bengal.*—The following statement shows the proportion of cognizable crime to population and police in the various provinces in India:—

Province.	Police.	Population.	Crime, cognizable (*vide* columns 4 and 6 of statement A, Part I).	Proportion of police to population.			Proportion of police to crime (cognizable).			Proportion of crime (cognizable) to population.		
				Policeman.		Persons.	Policeman.		Cases.	Cases.		Persons.
North-Western Provinces and Oudh, 1889	32,683	43,383,599	205,574	1	to	1,328	1	to	6·2	1	to	211
Punjab, 1889	20,175	18,842,264	79,553	1	to	933	1	to	3·9	1	to	238
Central Provinces, 1889	8,768	9,838,791	26,150	1	to	1,122	1	to	2·9	1	to	376
Bombay, including Sind, 1889 ...	18,977	15,676,446	40,463	1	to	826	1	to	2·1	1	to	387
Madras, 1889...	21,142	33,646,666	134,687	1	to	1,591	1	to	6·3	1	to	249
Assam, including Frontier Police, 1889.	4,663	6,173,846	11,555	1	to	1,324	1	to	2·4	1	to	534
Bengal (excluding Chittagong Hill Tracts), 1889.	23,381	65,964,160	121,052	1	to	2,821	1	to	5·1	1	to	544
Bengal (excluding Chittagong Hill Tracts), 1890.	*21,196*	*70,815,650**	*119,148*	*1*	*to*	*3,340*	*1*	*to*	*5·6*	*1*	*to*	*594*

* These figures are the rough totals of the census of 1891, and may be taken as approximately correct.

The following table shows the incidences of crime and police in Bengal arranged by divisions:—

Division.	Police.	Population.	Crimes, cognizable.	Proportion of police to population.	Proportion of police to crime (cognizable).	Proportion of crime (cognizable) to population.
Burdwan ...	3,593	7,660,699	16,580	1 to 2,131	1 to 4·4	1 to 462
Presidency ..	3,508	8,498,973	14,945	1 ,, 2,422	1 ,, 4·2	1 ,, 568
Rajshahye ..	2,485	8,063,751	12,534	1 ,, 3,220	1 ,, 5·0	1 ,, 638
Dacca ...	2,222	9,790,653	13,421	1 ,, 4,406	1 ,, 6·0	1 ,, 729
Chittagong ...	1,713	4,047,138	4,868	1 ,, 2,360	1 ,, 2·8	1 ,, 835
Patna	4,294	15,738,510	29,137	1 ,, 3,665	1 ,, 6·7	1 ,, 540
Bhagulpore ..	2,132	8,545,836	14,515	1 ,, 4,008	1 ,, 6·8	1 ,, 588
Orissa ..	1,521	3,865,106	7,083	1 ,, 2,541	1 ,, 4·6	1 ,, 545
Chota Nagpore	1,476	4,645,387	6,847	1 ,, 3,147	1 ,, 4·6	1 ,, 678

Comparing columns 5 and 7, it appears that the Patna Division is undermanned, whilst Chittagong is overmanned.

The percentages prescribed by the Government of India as tests of Police work are not at all well used in the Report under review, and in some cases are incorrectly worked out. The number introduced in paragraph 54 is much too large for any practical purpose; only the more important tests should be used. Confusion is caused by applying them to each class of crime separately; they should in future be applied to the results of classes I—V taken together, and also to the whole figures in classes I—VI taken together, and should be compared in this way with those of the previous year. Some deductions should then be drawn from the figures obtained.

The more important tests—

a_1 percentage of cases investigated by Police to cases reported;

a_4 percentage of Police cases ending in conviction to cases decided;

b_3 percentage of persons convicted in Police cases to persons sent up for trial,

c_2 percentage of cases in which property was recovered to cases in which property was lost,

should be applied to each district, and a general order of merit established; which should be corrected by the Inspector-General's knowledge of facts and acquaintance with individual cases. The Officiating Inspector-General has attempted to draw no conclusions from the averages given by him, and it is difficult to draw any owing to the arrangement adopted.

11. *Cognizable and non-cognizable cases.*—The following figures show the number of cognizable and non-cognizable cases reported for the last two years:—

	1889.	1890.	Decrease.
Cognizable	119,656	117,443	2,213
Non-cognizable	117,407	116,554	853
Total ...	237,063	233,997	3,066

The decrease in cognizable cases is chiefly under the head "Offences against property." It was under this head that the increases in 1887 and 1888 were chiefly observed. Behar showed the largest fall in cognizable crime in 1890, viz., 1,363 cases; then followed Orissa with 1,016 cases less than in 1889. Bengal and Chota Nagpore had only 535 and 152 cases less respectively. These results doubtless are due to food-grains having been more plentiful.

12. *False cases.*—The provincial percentage of cases declared false decreased somewhat, the figures for 1888, 1889 and 1890 being 6·0, 5·8, and 5·4 respectively. The divisional percentages varied from 6·6 in Chittagong to 3·6 in Orissa. There are considerable variations in the district percentages when compared with one another and with those of the previous year. The Lieutenant-Governor agrees with the Officiating Inspector-General that the disturbing cause of these variations is the system of classification adopted, which depends upon the views of individual Magistrates. The following remarks quoted from the report of the late Mr. Boxwell, Commissioner of Dacca, seem to His Honour to explain the subject clearly:—

"The mistakes we make as to what are and what are not false cases will be greater than the fluctuations in false cases from year to year. When a Magistrate and the High Court with the same facts or representation of the same facts before them, and without differing as

to the truth or falsehood of any one of the series of alleged facts, do not agree whether the case is false or not, it is unlikely that district and divisional returns will show much consistence."

Sir Charles Elliott agrees with the view taken by some officers that many of the so-called false cases merely reflect the innate habits of exaggeration of the people and their desire to drag civil cases into the criminal courts. He believes that it is very seldom that charges are deliberately and malignantly false, but many are magnified from proneness to exaggerate, to look at things perversely, and to be blinded by anger or self-interest. Such habits there is little hope of eradicating from the people, and prosecutions in these cases do little good. The percentage of prosecutions to cases declared false rose from 15·7 in 1889 to 18·9 in 1890, while the percentage of convictions to prosecutions was 32·3 against 27·2 last year. Most of the punishments awarded were slight. The Lieutenant-Governor has examined the records of a great number of these cases, and has found that they entail a great deal of useless and unremunerative work on the Deputy Magistrates. He considers that prosecutions should only be instituted where cases are deliberately and malignantly false, but that, when such cases are proved, severe punishment should be inflicted. The recent amendment of section 250, Criminal Procedure Code, which allows compensation up to Rs. 50 to be given in all cases where frivolous or vexatious charges are made, should meet all the more venial cases.

13. *Cases enquired into by the Police.*—The number of cognizable cases reported either to Magistrates or to the Police in 1890 was 117,443. Of these the Police investigated 81·4 per cent. The percentage of cognizable and non-cognizable cases reported to the Police, in which enquiry was refused, was 4·4 against 5·7 for 1889 and 5·4 for 1888. The Lieutenant Governor approves of the orders of Mr. R. M. Waller, late District Magistrate of Monghyr, who directed the Police to refuse enquiry in all cases of attempts at house-breaking where the criminal was reported to be unknown. His Honour thinks that in cases of house-breaking to commit theft and attempts at the same, where nothing is stolen, and where there is no clue given, enquiry should be refused by the Police. Similarly in cases of theft of sums below Rs. 5, where there is no clue, in cases which are purely of a civil nature, and in embroidered charges of assault, where the embroidery is doubtful, enquiry should be refused. To fix a maximum percentage beyond which cases should not be refused by the Police, as was done in Gya, is objectionable, because the Police are likely to take the percentage as a figure to be worked up to, regardless of the facts of the cases. Again, it is reported that in one district the Police were uselessly employed to investigate cases which were either not offences or not cognizable, their action being due, in the opinion of the District Officer, not to errors of judgment, but to dishonest motives; enquiry is being made by the Commissioner into this charge, and the Lieutenant-Governor trusts that there are few districts in which an assertion so discreditable to the supervision of the District Superintendent of Police can be supported. The whole subject is one that demands much attention from both District Magistrates and District Superintendents.

14. *Results of Police enquiry.*—The total number of persons arrested by the Police *suo motu* in 1890 was 85,989, of whom 60,780, or 70·6 per cent. (against 69·4 in 1889) were afterwards convicted. The number of cases afterwards found by the Magistrates to be true in which the Police enquired was 97,132; the percentage of convictions in those cases was 43·4.

15. *Sessions trials.*—The numbers of persons tried at the Sessions, and not the numbers of cases only, have been given. The following table shows the number convicted and acquitted for 1890 and for 1889:—

Year.	Persons convicted by Sessions or High Court.	Acquitted after Commitment.							Percentage of convictions.
		Class I, offences against the State and public tranquillity.	Class II, serious offences against the person.	Class III, serious offences against property.	Class IV, minor offences against the person.	Class V, minor offences against the property.	Class VI, other offences.	Total of persons acquitted.	
1889 ...	1,318	151	577	494	8	131	4	1,365	49·1
1890 ...	1,230	110	546	297	......	87	1	1,041	54·1

The numbers and percentages for each district in 1890 are as follows :—

Districts.	Persons convicted by the Sessions or High Court.	Persons acquitted.	Percentage of persons convicted to the number tried at the Sessions.	Districts.	Persons convicted by the Sessions or High Court.	Persons acquitted.	Percentage of persons convicted to the number tried at the Sessions.
Chittagong Hill Tracts ...	40	...	100	Midnapore	48	39	55·1

Sarun . ..	51	41	55·4				

* The jury districts are designated by asterisks; their total percentage is 52·0 against 54·1 for all the districts.

The results of Sessions trials, though better than last year's, were far from satisfactory. The returns for England show that about 75 per cent. of the persons committed for trial are usually convicted. The poorness of the figures for Bengal is due, among other things, to wrong commitments being made by Magistrates; but, as the Officiating Inspector-General of Police points out, it is also due to the bad work done by investigating officers, and to the want of interest of the Police generally in Sessions trials. When District Superintendents were required to conduct all important cases before the Sessions, such cases were more carefully looked after. Since 1882 Government has relieved District Superintendents of this duty on account of the increase in their ordinary work. Sir Charles Elliott, however, desires that in districts where there are Assistant Superintendents of Police, these officers should be employed in watching Sessions cases both before the Committing Magistrates and before the Sessions. The Lieutenant-Governor has also under consideration the recommendations of the Police Committee upon this subject. He is endeavouring, in communication with the High Court, to secure Sessions being held at shorter intervals, and he is about to limit the power of commitments by Magistrates of the second class to specially selected officers.

The working of the Jury system in Bengal was much discussed during the year under review, and the conclusions of the Lieutenant-Governor have been submitted to the Government of India since its close.

16. *Class I.—Offences against the State and public tranquillity.*—The increase this year just balances the decrease of last year. The cases of coining were few and generally petty. There was an increase in 1890 of 53 in the total number of riot cases found to be true. The Dacca and Presidency Divisions showed considerable increases of 101 and 94 true cases respectively. The Burdwan and Rajshahye Divisions showed marked decreases. The increase in the Dacca Division occurred chiefly in the Faridpur district, but in all districts of this division the offence is common. For the increase in rioting in the Presidency Division, the Jhenida and Magura sub-divisions of the Jessore district are responsible: in 1889 there were in Jhenida 14 cases, in which 27 persons were sent up for trial, and in Magura 9 cases with 51 persons; for 1890 the figures were—in Jhenida, 65 cases and 418 persons, Magura, 86 cases and 624 persons. This serious increase of rioting was due to the strike against indigo cultivation. His Honour was glad to learn during his recent visit to Jessore that the relations between the indigo planters and the cultivators have since become friendly again. The rupture was to a great extent due to the injudicious interference of outside agitators.

1890	2,874
1889	2,818
1888	2,872

17. *Class II.—Serious offences against the person.*—There has been a net decrease of 362 cases, the numbers being 4,340 against 4,702. Cases of murder increased by 3 only, but the figures are higher than any of the previous years, since 1883. The figures are shown thus:—

1890	4,310
1889	4,702
1888	4,622

1884.	1885.	1886.	1887.	1888.	1889.	1890.
266	288	278	250	268	316	319

The percentages of convictions, both in cases and persons, were greater than in any of the previous years mentioned.

In one of the cases of murder, the jury at Hooghly acquitted a woman accused of murdering a child for the sake of her ornaments; but the High Court, on a reference being made by the Judge, set aside the finding, and sentenced the accused to transportation for life.

In the other cases under this head the chief fluctuations were a decrease of 126 under "Criminal force to public servants, &c.," and a decrease of 54 under "Grievous hurt."

18. *Class III.—Serious offences against property.*—The decrease of 2,739 cases under this head was almost entirely in lurking house-trespass and house-breaking cases (2,377), and the cause was no doubt the more prosperous agricultural season.

1890	... ...	25,085
1889	... ...	27,824
1888	... ...	25,247

There was a decrease of 42 from 172 in dacoity cases, which His Honour observes with satisfaction. There were only 2 cases of dacoity in Midnapore against 11 in the previous year. During the last two years 105 dacoits and their receivers in this district had been consigned to jail and the district now has rest. The Commissioner and the Officiating Inspector-General of Police agree that great credit is due to Mr. Munro, the District Superintendent, and his subordinates. Sir Charles Elliott also desires to acknowledge such good work. His Honour observes in one false charge of dacoity in Midnapore the complainant was convicted and sentenced to five years' rigorous imprisonment under section 211, Indian Penal Code. There was a decrease of 10 in dacoities in the Dacca Division, and none at all are reported from the Chittagong Division; this is attributed to the breaking up of a gang on the Tipperah-Noakhali frontier. There was a reduction from 36 to 20 in the dacoities reported from the Patna Division, but the Officiating Inspector-General of Police does not offer any explanation of this; his observations on the subject are confined to criticisms on the judicial results of the cases sent up for trial. The Lieutenant-Governor notices with pleasure the creditable conduct of Baboo Rash Behary Naik, Deputy Magistrate, who unravelled a difficult case of dacoity at Cuttack, five months after the occurrence, and after two Sub-Inspectors and an Inspector had been unable to find any clue. Cases of mischief by fire fell from 501 to 392, and 19 persons only were convicted. This is in all countries, especially in India, a most difficult crime to bring home. The number of robberies reported was 125, which was considerably below the average of the previous four years.

19. *Class IV—Minor offences against the person.*—The total number of cases under this class was 2,210 against 2,334. The two principal offences covered by these figures are wrongful restraint and wrongful confinement.

20. *Class V—Minor offences against property.*—The total number of cases for the last 3 years is shown in the margin. Mr. Henry does not attach much importance to the explanation that these cases vary with prosperous or bad harvests; and he is not satisfied that the decrease shown in the return is altogether real, as he is of opinion that a good deal of such crime goes unreported in Behar. He has compared the figures of 1890 for the Patna and Bhagulpore Divisions with those for 1889 from the whole of the North-Western Provinces, and from the comparison apparently draws the conclusion that crime is much better reported in those Provinces than it is in Behar. The comparison would have been more effective if the Patna Division in this Province had been compared with its neighbour, the Benares Division in the North-Western Provinces. The latter division, with about ten millions population, had in 1889 14,500 burglaries and 15,800 thefts reported; while Patna, with about 15 millions population, had in 1890, 7,200 bruglaries and 5,500 thefts reported. This certainly shows some difference either as to criminality or as to the registration of crime which requires further investigation.

1890	... ...	38,078
1889	... ...	41,032
1888	... ...	38,281

21. *Class VI—Other offences not specified above.*—Including public and local nuisances, the total number of cases was 76,878, which shows an increase of 4,489. Excluding these the figures are as in the margin. Prosecutions for nuisances, which have steadily increased of late years, showed an excess over last year's figures of 2,794, and over the figures of 1888 of 6,752.

1890	... ...	38,439
1889	... ...	38,950
1888	... ...	30,159

What are known to the Police as "bad livelihood" cases, viz., cases under sections 109 and 110, Criminal Procedure Code, showed an increase of 285 with more favourable judicial results. The total number of cases instituted on report by the Police was 2,359, and conviction was obtained in 1,436; 1,115 were tried in the villages of the accused. The delay in some cases was quite phenomenal. In Durbhunga one case is shown as having lasted 1,073 days up to 31st December 1890, since the report was first made to the Magistrate. The Officiating Inspector-General suggests that it might now be struck off, as the accused has absconded to Nepal. The Lieutenant-Governor thinks it might have been struck off before. One case in Noakhally lasted 350 days after process was issued by the Magistrate, one in Dacca lasted 257 days, and one in Dinagepore lasted 222 days. Special reports explaining the delays in these cases will be submitted by the officers concerned. As the necessity for holding a local enquiry was often pleaded as explanation of the delay in such cases, the Lieutenant-Governor, in Circular No. 3J—D, dated the 4th June last, modified the previous orders of 1877, which insisted upon enquiries being held on the spot. His Honour leaves the discretion to the trying Magistrate, and does so because he prefers a speedy decision in Court to a long deferred one on the spot, but he desires that, as far as possible, such cases shall be tried in or near the villages where the accused persons reside. These orders should have the effect of reducing the enormous average duration of these cases which are returned for some districts, but it is evident that there are other reasons for the delays shown. The Lieutenant-Governor is inclined to think that reports are often made by the Police upon insufficient facts; these reports are generally acted upon by the Magistrates, and when the Police find out that the evidence is weak, they apply for adjournments to get further witnesses. The Lieutenant-Governor directs that no report of this nature should be ordinarily sent to the Magistrate until the District Superintendent has recorded his reasons for thinking that a prosecution will be successful. It is one of the District Superintendent's duties to watch these cases carefully through every stage, and Sir Charles Elliott doubts whether this duty is adequately performed in many districts.

22. *Crime maps.*—The system of maintaining crime-maps, referred to in paragraph 146 of the Report, is an excellent one, and was praised in the Resolution of this Government for 1888; but the Lieutenant-Governor finds that there are many districts in which no such maps exist. Their preparation should be enjoined on every District Superintendent of Police, and they should be included in the Inspection Manual as a record to be produced before every inspecting officer.

23. *Police surveillance.*—The number of persons under Police surveillance is so many as 41,043, which is three times the jail population of the Province. These figures show an increase of 1,231 over those of last year. It is obvious, as the Officiating Inspector-General reports, that the Police are only able to look after a certain portion of this number. The Lieutenant-Governor considers that very much more discrimination in placing persons under surveillance is needed. The orders under which a criminal is placed under supervision are passed by the Magistrates, but besides these there is a system of "Police Registration" which is in the hands of the District Superintendent, and to which the Lieutenant-Governor has lately taken exception. The question is now under consideration.

24. *Miscellaneous cases.*—Excise cases show an increase of 444. Salt cases decreased from 1,713 to 1,448. The numbers of prosecutions under the Arms Act, 1879, for the last three years are 1,436, 1,335, and 1,470 respectively.

25. *Railway Police Work.*—The number of cognizable and non-cognizable Railway cases reported during the year was 3,116 against 3,373 in the preceding year, the decrease being chiefly among non cognizable cases. There were 172 accidents resulting in the death of 121 persons. The Officiating Inspector-General has included in these figures 15 cases of suicide. There were 27 cases of obstruction, for which 18 persons were convicted. No accident was caused, nor was any serious damage done by the obstructions, which are said as a rule to have been placed on the lines either by discontented railway coolies, or by villagers who had some quarrel with the gate-keepers about passing cattle or carts, the object being to get some one into trouble and not really to upset trains.

26. *Non-cognizable crime.*—The following table shows a net decrease of 853 cases throughout these Provinces:—

	Number of cases. 1889.	1890.	Increase.	Decrease.
Class I—Offences against the State and public tranquillity ...	8,581	8,175	...	406
„ II—Serious offences against the person	33	29	...	4
„ III—Serious offences against property	848	857	9	......
„ IV—Minor offences against the person	56,535	56,333	...	202
„ V—Minor offences against property	9,730	10,115	385	.....
„ VI—Other offences	11,356	11,284	...	72
Special laws	30,324	29,761	...	563
Total ...	117,407	116,554	394	1,247
Net decrease ...	......	......	853	

There was an increase of 623 cases under Public Nuisances, which fall under Class VI. In 550 cases less than last year it was found necessary to bind persons down to keep the peace on conviction. There was a decrease of 1,732 cases under the Bengal Municipal Act, 1884; of 733 under the Salt Act; and 344 for failure to register births and deaths. These were only partially counter-balanced by an increase of 710 cases under the Cattle-Trespass Act (B.C.) of 1871, and of 964 "Miscellaneous" cases. Process was issued in 75·7 of all non-cognizable cases. The percentage of non-cognizable cases investigated by the Police was 5·2 against 5·3 of the previous year. 47,393 persons were convicted, and 31, 052 were acquitted or discharged in non-cognizable cases.

27. *Remands.*—The number of A Forms sent up by Police was 37,134 against 38,605 in 1889. The percentage of A Forms decided in the first two hearings was only 54·7. The Lieutenant-Governor observes with much concern that 2,571 or 6·9 per cent. were remanded four times after the first hearing, 1,580 or 4·3 per cent. five times, 987 or 2·6 per cent. six times, and 2,032 or 5·5 more than six times. These numerous delays are unexplained. It seems scarcely credible that the percentages of A Forms in the following districts, which were remanded more than six times after the first hearing, should be as the figures below represent:—

Faridpur	15·5
Khulna	14·6
Dinajpur	13·0
Julpaiguri	12·4
Pubna	12·0

In circular No. 3060J, dated 5th August 1891, the Lieutenant-Governor has laid down rules for the closer supervision of their subordinate Magistrates by District Magistrates. He has directed the record of every case remanded more than three times to be examined by the District Officer when inspecting, and he has prescribed a form to be submitted fortnightly with explanations showing the number of prisoners in hajat on each Magistrate's file. District Officers should insist upon having clear explanations of all cases remanded more than three times. Sir Charles Elliott has found many cases of adjournments by subordinate Magistrates on slight or no reasons. These would have been obviated if the District Magistrates had exercised closer supervision. The Lieutenant-Governor holds District Officers directly responsible for delays which are not satisfactorily explained, and expresses his opinion that the figures quoted in this paragraph are not creditable to the officers concerned.

28. *Reconvictions.*—The number of offenders against whom previous convictions were proved was only 1,824, which shows a decrease of about 5 per cent. from last year's figures. Arrangements have been made to introduce the Bertillon system of anthropometrical measurements into several jails with a view to the better identification of previous convicts. The system is reported to have succeeded in Paris, and the Lieutenant-Governor hopes that it will be successfully introduced into all the jails of these Provinces.

29. *Criminal tribes.*—The only tribe mentioned by Mr. Henry is the Maghaya Domes of Behar, who are now settled in several places in the Chumparun and Sarun districts under the supervision of Government officers.

For want of legal authority, the surveillance over this tribe has been weak, and the management of the settlements has not been successful. This Government has reported to the Government of India that the Punjab Draft Bill, which was circulated for opinion, would suit the requirements of those Provinces.

30. *Absconders.*—The number of absconded offenders at the close of the previous year was 2,831, and the number entered during the year under report was 3,887, making a total of 6,718. Of this number 750 gave themselves up, 1,263 were caught, and 1,587 struck off the list.

31. *Administration.*—Mr. Veasey, who gave over charge after the close of the year, had held the office of Inspector-General since 14th October 1884, with the exception of a period of 15 months spent on leave. His administration has been efficient, being marked by intelligence and energy, and Sir Charles Elliott desires to record here the obligations of Government to him for his services in a difficult post.

32. *Conclusion.*—Since the close of the year under report, the Lieutenant-Governor has received the Report of the Committee appointed by this Government to enquire into the reform of the Police of these Provinces. A number of these recommendations have already been considered and adopted in whole or with modifications. The Government of India have, at the instance of this Government, sanctioned the improvements recommended in the pay and allowance of constables, involving a cost of $1\frac{3}{4}$ lakhs *per annum.* A Draft Bill to amend the Village Police has been submitted for the consideration of the Imperial Government, and is before local officers for report. Arrangements are now being made to improve the investigation of offences by the police, and to distribute investigating officers more in accordance with the criminal wants of the districts. Sir Charles Elliott hopes that most of the changes under consideration will be determined before the expiry of the present year, and that future reports will show that they have resulted in the increased efficiency of the Bengal Police.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Inspector-General of Police and the Commissioner of Police, Calcutta.

Ordered also that a copy of the Resolution be forwarded to all Commissioners of Divisions for information.

Ordered also that the Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

JOHN EDGAR,

Chief Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE WORKING OF THE CALCUTTA SHIPPING OFFICE AND OF THE SHIPPING OFFICES AT THE OUTPORTS FOR THE YEAR 1890-91.

No. 2215Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 31st August 1891.

RESOLUTION.

READ—

The annual report on the working of the Calcutta Shipping Office and of the Shipping Offices at the outports for the year 1890-91.

The Calcutta Shipping Office was moved in December last into the new building erected for the Port and Shipping Offices. By this arrangement the Shipping Office has obtained suitable accommodation, and its work is conducted under the immediate supervision of the Shipping Master. The acknowledgments of the Lieutenant-Governor are due to Lieutenant Petley, R.N., for the efficient manner in which he managed the duties of the Office.

2. The business of the Calcutta Shipping Office continued to increase. The receipts amounted to Rs. 36,908, and the charges, which were unusually low, to Rs. 19,887. The increase in the receipts was chiefly under the heads "Shipping fees" and "Discharging fees," and is attributed to the preference shown for native crews by both British and Foreign ships. The working of the office resulted in a net profit of Rs. 17,021-11-6, against Rs. 7,686-4-7 in the previous year. These sums are credited to Provincial revenue. The question of reducing the "fees" so as to more nearly balance receipts and expenditure is under consideration.

3. There was a decrease in the amount of the funds held in trust by the Calcutta Shipping Office. The decrease was mainly under the head "Deposit money of British seamen," and was due to the activity that prevailed during a part of the year in shipping and discharging transactions. On account of this activity it was possible to permit a relaxation of the rule requiring every British seaman discharged through the Shipping Office to deposit a portion of his wages as a condition of his obtaining his discharge. The total sum deposited amounted to Rs. 48,516, and the balance in hand at the close of the year was Rs. 3,317.

4. The numbers of seamen of all nationalities shipped and discharged through the Shipping Office during the year were 19,572 and 18,915, respectively, against 16,932 and 15,592, the corresponding numbers in the previous year. The increase is most prominent under both the heads in the case of Indian seamen, and, as has already been observed, is the result of the increased employment of lascars.

5. It appears from the returns that, with the exception of those included under the head "Portuguese," not a single Eurasian was shipped or discharged during the year. If Eurasians are included under any other head, the Lieutenant-Governor desires that they may be entered under a separate heading in future.

6. The amount remitted home by seamen's money-orders shows a further increase which is indicative of the beneficial effects of the law forbidding the payment of seamen's wages at a fixed rate of exchange, and requiring that their wages shall be paid at the current rate. It is satisfactory to learn that the condition of British seamen continues to improve.

7. The demand for native seamen during the year was greater than in any preceding year, and it is said that their capacity as sailors has so far been recognised that they are not infrequently taken as crews on board sailing ships.

8. Suitable steps were taken by the authorities of the Shipping Office to protect seamen from imposition. In several cases masters of ships were compelled to pay back money improperly withheld from the seamen working under them, and in one case in which a crew had complained of shortness of provisions, compensation was awarded to the men after due enquiry.

9. The question raised by the Bengal Chamber of Commerce relative to the rate of exchange to be adopted under the provisions of section 4 of 52 and 53 Vic., Cap. 46, for the payment of wages of seamen discharged in India, which was noticed in the Resolution on the Annual Report of the Shipping Office

for the year 1889-90, was decided by the Government of India during the year under review. It has been ruled that at the larger ports where it is possible to ascertain the exact rate, the market rate of exchange should be taken, the rate of the day on which the mail leaves being taken as the rate for the ensuing week, and that at the smaller ports where the market rate is not readily ascertainable the official rate fixed for the adjustment of all financial transactions between the British and Indian Governments should be taken. The market rate is taken at Calcutta and Chittagong, which are the only ports in Bengal where European seamen are ordinarily discharged.

10. The receipts of the Chittagong Shipping Office fell off from Rs. 537 in 1889-90 to Rs. 200 during the year under review. The receipts on account of the Trust Funds, including the balance at the commencement of the year, amounted to Rs. 10,808, and the total amount paid was Rs. 10,461. The numbers of seamen shipped and discharged during the year were 83 and 135, respectively, against 39 and 152 in the year before.

11. One seaman was discharged at False Point against two in 1889-90, but none were shipped. No seamen were shipped or discharged at Balasore or Pooree.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,

Secretary to the Government of Bengal.

LIBERALITY OF BABU ABHOY GOBINDA CHAUDHURY, A ZEMINDAR OF TANTIBUND, IN THE DISTRICT OF PUBNA.

No. 174T.—M., dated Darjeeling, the 21st August 1891.

From—H. H. Risley, Esq., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Rajshahye Division.

I am directed to acknowledge the receipt of your letter No. 298J., dated the 8th August 1891, in which you bring to the notice of Government the liberality of Babu Abhoy Gobinda Chaudhury, a zemindar of Tantibund, in the district of Pubna, in incurring an expenditure of Rs. 1,975 for the construction of a cholera ward in the Pubna Dispensary compound.

2. In reply, I am directed to request that you will be so good as to convey to Babu Abhoy Gobinda Chaudhury the thanks of the Lieutenant-Governor for this act of liberality, and to say that this letter will be published in the *Calcutta Gazette.*

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 29th August, 1891.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
		BENGAL.		
		Western Districts.		
BURDWAN DIVN.	1	Burdwan August 29, '91 Culna ... Cutwa ... Raneegunge ...	1·68 2·98 1·04 0·61	Weather—clear and hot. Transplanting of *aman* nearly complete. Harvesting of *aus* going on. Prospects of *aman* and sugarcane fair. Supply of water and fodder sufficient. Prices of common rice:— Srs. Burdwan ... ... 16 } Culna ... ... 14 } per rupee. Cutwa ... ... 16 } Raneegunge ... ... 16 }
	2	Baukoora „ 29, '91	0·88	Weather—hot; sky lightly clouded. Transplantation of *aman* finished. *Aus* ripening. Sugarcane thriving. Condition of cattle good, and supply of fodder and water sufficient. Common rice selling at 17½ seers per rupee both at Sudder and Bishenpur markets.
	3	Birbhum „ 29, '91 Rampore Haut ...	0·86 2·21	Weather—seasonable. Rice crop doing very well. Sugarcane excellent. Price of common rice from 16 to 20 seers per rupee. Health of cattle normal. Fodder and water plentiful.
	4	Midnapur „ 29, '91	1·45	Weather—showery. Transplantation of *aman* rice nearly finished. Sugarcane doing well. Prices of common rice:— Srs. Sudder ... ... 16 } Contai ... ... 16 } per rupee. Tumluk ... ... 16 }
	5	Hooghly „ 29, '91 Serampore ... Jehanabad ...	1·35 0·99 1·34	Weather—clearing towards the close of the week; a period of fine weather set in by its end. All crops doing well. Water and fodder adequate. Cow-pox reported from Utterpara and Goghat and from Pursura in Jehanabad. In Jehanabad the outbreak is rather severe. Prices of common rice:— Srs. Sudder ... ... 13½ } Serampore ... ... 13½ } per rupee. Jehanabad ... ... 16 }
	6	Howrah „ 29, '91 Uluberia ...	1·05 1·44	Occasional showers. Prospects of crops favourable. Jute being cut. Supply of fodder and water good. Condition of cattle fairly good. Price of common rice 14 to 14½ seers per rupee.
		Central Districts.		
PRESIDENCY DIVN.	7	24-Perghs. September 1, '91	1·65	Weather—sunny and cloudy with occasional light showers. *Aus* in ear. Cutting of jute begun in places. Sugarcane doing well. Transplantation of *aman* still continues. Prospects reported to be favourable. Cultivation is retarded to some extent in some places in Mothurapore and Kulpi thannas in consequence of excessive rain and loss of ploughing cattle by disease. Cattle-disease reported from thanas Harowa and Bussirhat. Supply of fodder and water to cattle sufficient. Prices remain unchanged.
	8	Nuddea August 29, '91 Kushtea ... Meherpur ... Chuadanga ... Ranaghat ...	0·47 0·81 0·37 0·21 1·64	Weather—hot. Harvesting of *aus* continues. Sugarcane and turmeric doing well. *Aman* paddy, which was reported to be under water in parts of the Kushtea subdivision, has been partly saved from destruction by the plants rising above the flood water. Condition of cattle good, and supply of fodder and water sufficient.
	9	Khoolna „ 29, '91 Bagirhat ... Satkhira ...	1·09 0·50 0·88	Weather—hot with little rain. Prospects of *aus*, jute, and sugarcane good. Harvesting of *aus* and jute commenced. Transplantation of *aman* still going on in the south of the district; more rain wanted for it. Supply of fodder and water sufficient. Cattle disease abated in Sudder and Bagirhat subdivisions, but still prevalent in thanas Kaligunj and Asasuni.
	10	Jessore „ 29, '91 Jhenidah ... Magura ... Narail ... Bongong ...	0·83 0·63 0·38 0·60 2·45	Weather—hot and cloudy with occasional slight showers. Harvesting of *aus*, jute, and indigo still going on. *Aman* wants more water. Rivers rising slowly in Narail and Magura. Condition of cattle good, and supply of fodder sufficient. Price of rice stationary.
	11	Murshedabad „ 31, '91	0·91	Weather—hot. Harvesting of *bhadoi* nearly finished in Jungipore subdivision. Transplantation of *aman* still going on. More rain wanted. Cattle-pox has appeared in thana Kagram in Kandi subdivision. There is no want of supply of fodder.
RAJSHAHYE DIVN.	12	Dinagepur „ 29, '91 Thakurgaon ...	0·81 1·47	Weather—very hot and close. Rain badly wanted for transplantation of *haimanti* crop on high lands. Condition of cattle reported to be good. A little cattle disease in the west. Supply of fodder and water sufficient. Prices of rice unchanged.
	13	Rajshahye „ 29, '91 Nattore Nowgong ...	0·09 1·40 Nil	Weather—hot. Harvesting of *aus* and jute going on. Condition of *aman* not good for want of rain. Condition of cattle good. Supply of fodder sufficient.
	14	Rungpur „ 29, '91 Gaibanda ... Kurigram ... Nilphamari ...	0·68 0·05 1·14 0·81	Weather—hot and dry. Showers at the commencement of the week did some good and enabled more rice to be transplanted; about 12 annas have been transplanted, but high lands require rain. Harvesting of *aus* completed; outturn fully 12 annas. Jute harvest going on slowly.
	15	Bogra „ 29, '91 Sherpur ... Nowkhilla ...	0·49 Nil 0·60	Weather—sultry with occasional clouds. *Aus* and jute reported to be in good condition, and are being reaped. Transplantation of *aman* in progress, but some more rain is wanted. Common rice is being sold at 16 seers per rupee.
	16	Pubna „ 29, '91	0·10	Weather—hot and sometimes cloudy. *Aus* paddy and jute still being cut. Prospects of *aman* much improved by rise of rivers. Rainfall scanty during the week. More rain wanted for *aman*. Price of rice stationary. Condition of cattle good, fodder being sufficient.
	17	Darjeeling „ 29, '91	3·45	Weather—fair with occasional showers. Cutting of *bhadoi* crop nearly completed. Transplantation of *haimanti* rice still going on, but more rain needed.
	18	Julpigoree „ 29, '91	3·51	Weather—very hot. Rain wanted. Prospects of crops not favourable. Price of common rice 13 seers per rupee. Cattle disease prevalent at Alipur. Fodder and water sufficient.

No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
	Eastern Districts.			
DACCA DIVN.				
19	Dacca	August 29, '91	0·30	Weather—seasonable. Jute and *aus* are being cut. Prospect of *aman* appears favourable in low lands, but some damage is anticipated in high lands owing to want of sufficient rain and flood. The river is gradually rising. Fodder and water are available. Condition of cattle good. Cheapest rice sold at from 16 to 18 seers per rupee.
20	Furreedpur	„ 29, '91	0·86	Weather—seasonable. Harvesting of *aus* nearly finished. Steeping of jute in progress. Condition of standing crops fair. River floods slowly receding. No want of fodder for cattle. Rice selling at 16, 16, and 17 seers per rupee at Sudder, Goalundo, and Madaripur respectively.
21	Backergunge	„ 29, '91	1·78	Weather—seasonable. Prospect of *aman* crop fair. *Aus* almost harvested. Common rice selling at from 13 to 18 seers per rupee. Condition of cattle generally good, and supply of fodder and water ample.
22	Mymensingh	„ 29, '91	2·43	Weather—hot. Transplantation of *aman* not going on well for want of rain. Condition of cattle is good, and supply of fodder and water sufficient. Common rice sells at 13½ seers per rupee.
CHITTAGONG DIVN.				
23	Chittagong	„ 29, '91	1·61	Weather—seasonable. Transplantation of *aman* and harvesting of *aus* crop still continue. Prices steady.
24	Noakholly	„ 29, '91	0·89	Weather—very hot with little rain. *Aus* harvest almost over; general outturn under the average. *Aman* transplantation retarded for want of rain. Price of common rice has risen somewhat. Condition of cattle and supply of fodder as usual.
25	Tipperah	„ 29, '91	1·57	Weather—hot and close. Standing crops promise well. Rain wanted. Harvesting of jute and *aus* paddy continues. Fodder insufficient.
26	Chittagong Hill Tracts.	„ 27, '91	1·44	Weather—sunny and cloudy with occasional falls of rain. Harvesting of early *jum* paddy commenced. Transplanting of paddy in low lands continues. Common rice is being sold at 13 seers 5 chittacks per rupee. Cattle disease (rinderpest) continues. Fodder and water-supply good.
BEHAR.				
PATNA DIVN.				
27	Patna	„ 29, '91	1·71	Weather—hot and cloudy at times. Transplantation of paddy retarded for want of sufficient rain throughout the district. *Bhadoi* reported to be good all round. Prices generally stationary.
	Barh	...	0·70	
	Behar	...	0·26	
	Hilsa	...	1·73	
28	Gya	„ 29, '91	0·46	Weather—hot and occasionally cloudy. Paddy is being transplanted. Prospects of *bhadoi* crops favourable. More rain wanted in Aurangabad, Jehanabad, and Sudder subdivisions. Prices of food-grains stationary. Supply of fodder and water to cattle sufficient.
	Jehanabad	...	0·12	
	Nawada	...	1·16	
	Aurungabad	...	0·02	
29	Shahabad	„ 29, '91	0·75	Weather—hot and stuffy east winds; often none at all. In Bhabuah and Buxar subdivisions transplantation of paddy proceeding. In Sasseram and Arrah no transplantation going on except in lands irrigated by the canals, and consequently prospects of paddy are not so good as they were a week ago.
	Buxar	...	1·48	
	Bhabuah	...	0·68	
	Sasseram	...	0·16	
30	Durbhunga	„ 29, '91	0·76	Weather—hot with east wind. Prospects of *bhadoi* crop continue good in most places. Transplantation of late rice not progressing for want of sufficient rain. No cattle disease prevailing in the district, and supply of fodder sufficient. Prices remain unchanged.
	Somastipur	...	0·39	
	Madhubani	...	1·30	
31	Mozufferpur	„ 29, '91	0·29	A few showers everywhere in beginning of week; hot and clear weather in latter half of week. *Bhadoi* crop excellent. Rice crop still in good condition, but more rain wanted, and unless there is a good fall it will suffer on the higher lands. Indian-corn and *marua* are being cut in places. Plenty of fodder and water for cattle.
	Hajipur	...	0·64	
	Sitamarhi	...	0·32	
32	Sarun	„ 29, '91	1·01	Light monsoon weather. Hot and cloudy, with occasional showers. Prospects of *bhadoi* crops still good. More rain required for transplantation of paddy. Outturn of indigo above the average. Fodder and water-supply sufficient for cattle.
33	Chumparun	„ 29, '91	0·84	Weather—hot and bright; occasionally cloudy. Paddy transplantation still going on in places in Sudder. Prospects of *bhadoi* crops very good. Reaping of *sathi* commenced. Prospects of *aghani* good, but more rain wanted.
	Bettiah	...	0·83	
BHAUGULPORE DIVN.				
34	Monghyr	„ 29, '91	0·08	Light clouds with occasional showers. A break seems now to have set in. Harvesting of *bhadoi* going on; a full crop is expected. About two annas of rice remain to be transplanted. Prospects of this crop are dependant entirely on rainfall. Supply of fodder and water sufficient. Cattle-pox reported from some villages in Lukhiserai outpost.
	Beguserai	...	0·73	
	Jamui	...	1·26	
35	Bhagulpur	„ 29, '91	0·05	Weather—close and cloudy. *Bhadoi* crops are being harvested; yield expected to be good. Transplantation of winter rice going on. More rain wanted. Cattle disease reported. Price of common rice 14½ seers per rupee.
36	Purneah	„ 29, '91	0·52	Weather—cloudy and hot with light showers. Harvesting of *bhadoi* still in progress. Transplantation of *aghani* finished in Arrareah subdivision, but still going on in Kishengunge and head-quarters subdivisions. More rain wanted. It is estimated that more than half the normal area has been sown with *aghani*. Outturn of jute in Kishengunge subdivision said to be 8 to 10 annas. No cattle disease. Fodder plentiful.
	Kishongunge	...	1·89	
	Arrareah	...	1·63	
37	Maldah	„ 29, '91	0·97	Weather—hot with occasional light showers. Harvesting of *bhadoi* and transplantation of winter rice continue. Outturn of *bhadoi* expected to average about 10 annas. Prospects of other standing crops good. Condition of cattle reported to be good. Supply of fodder and water sufficient. Price of rice stationary.
	Chanchal	...	Nil	
	Shibgunge	...	1·13	
38	Sonthal Perghs.	„ 29, 91	0·70	Light and variable winds with occasional showers. More rain wanted in the east of the district for rice which is nearly all planted. Prospects of Indian-corn most favourable. Fodder and water-supply sufficient.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.			
Orissa Divn.			
39	Cuttack August 29, '91	1·74	Alternate rain and sun. Weather still warm. *Beali* is being reaped in some places. *Sarad* doing well except in some places in Kendrapara where it has been washed-away by floods. Cow-pox prevalent in some places in Kendrapara subdivision. Cattle suffering from want of fodder on account of rain and flood in Jajpur subdivision.
40	Pooree „ 27, '91	6·50	Weather—cloudy with occasional showers of rain. Puddling, transplanting and weeding of winter rice going on. More rain wanted in Banpur. *Beali* or early rice in ear. Miscellaneous crops doing well. Rivers have gone down. Price of common rice varying from 17 to 24 seers per rupee. Cattle disease reported from Kuspalla in Khoorda.
	Pipli ...	4·6	
	Gope ...	4·28	
	Khoorda ...	5·26	
	Banpur ...	1·92	
41	Balasore „ 29, '91	0·88	Weather—seasonable. *Beali* rice is being harvested. Weeding and transplantation of winter rice in progress. Cattle disease prevails in several parts of the district.
CHOTA NAGPORE			
South-West Frontier Agency.			
Chota Nagpore Divn.			
42	Hazaribagh August 29, '91	0·92	Light rain alternating with sun. Prospects of *bhadoi* crops and rice excellent. Prices falling.
	Giridih ...	1·46	
43	Lohardugga „ 29, '91	2·57	Weather—seasonable. Transplantation of winter rice is still carried on. More rain wanted. *Bhadoi* crops doing well. No cattle disease. Water and fodder for cattle are ample.
	Palamow (up to 24th Aug.)	1·28	
44	Singhbhoom August 29, '91	1·93	Weather—seasonable. Crops are all doing well. In the Kolhan *kheri* and *gundli* crops are being cut. *Bhadoi* crops ripening and *makai* being cut in places. Owing to high prices prevailing generally in the Kolhan some distress is reported, but roadworks are being opened in order to assist the people. As soon as the *bhadoi* crops are cut, matters are expected to become right again. Common rice sold at 13 seers per rupee.
45	Manbhoom „ 29, '91	2·25	Weather—seasonable. Prospects of crops good. Indigo outturn 12 annas. Rice selling at 15 to 16 seers per rupee.
	Govindpur ...	1·24

* Mean of 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers
are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the
past stati ns in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 29th of August 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Of week. Normal mean. Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 1st September* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 29TH OF AUGUST 1891.

FOR the last three days of the previous week a small barometric depression had existed in the north-west angle of the Bay, and on the 22nd it was still a feeble depression, but accompanied by a very distinct cyclonic circulation of winds, the centre of which was to the east-north-east of False Point and to the south of Saugor Island. On the morning of the 23rd the centre of the small depression was, if anything, a little further north than on the previous day, but it had not intensified at all, and on the 24th the centre was close to Balasore and probably inland, for the centre of the wind circulation was to the east-north-east of that station. The depression had also to a considerable extent filled up on the 24th, and when it reached the coast it had practically ceased to exist, and by the morning of the 25th there was no sign of its existence in Bengal, and the area of lowest pressure had retreated to the south of Orissa. The depression only brought light to moderate rain in the districts affected by it, but with its disappearance the monsoon winds began again feebly to advance over the province, but the amounts of rain brought up were decidedly small. On the 26th the lowest pressure continued to be reported from the south of Orissa, and on the 27th pressure became lowest at Cuttack and in the west of Behar, but the monsoon current blowing on this date was exceedingly feeble and was bringing up little or no moisture from the Bay, so that on the 28th and 29th, and in some cases from the 27th, a distinct break in the rains set in over practically the whole province On the 28th and 29th also the distribution of pressure over the Bay altered very considerably and pressure became extremely uniform, and on the 29th in particular practically no monsoon current was advancing from the Bay over Bengal. Winds were also becoming variable in direction and decidedly light, while pressure and temperature were increasing very decidedly and a distinct break in the rains was established.

The general conditions were therefore less favourable for rainfall during the past week than they had been for some time past, and practically only the south-western and partly the western districts have been receiving moderate rain, and the rain-bearing current has been to a great extent drawn away from such districts as North Behar and North and East Bengal.

Pressure—Generally rose slowly over the province on the 23rd except at one or two stations in the neighbourhood of the depression in the north-west angle of the Bay, and on the 24th it had risen in all districts, including that occupied by the feeble depression. The rise of pressure continued on the 25th except over parts of Orissa, but on the 26th a slight fall set in which continued on the 27th. The pressure changes on the 28th were a rather rapid rise at the western and south-western stations and a slight rise only in Assam and North Bengal, so that pressure became more uniform, and similar changes took place on the 29th, rendering the differences of pressure over the province exceedingly small. For the whole week the mean pressure has been distinctly in excess of the normal, the usual excess ranging from 0·03″ to 0·05″, but over the area affected by the depression pressure has been normal or even slightly below it as at False Point, Cuttack, and Balasore, while on the other hand at many stations in North Bengal and North Behar an excess of 0·06″ is registered. In Assam there has been a mean excess pressure of 0·029″.

Temperature.—Owing to the scantiness of the rainfall during the week over the greater part of the province, temperature has been rather largely in excess of the normal, the excess in East and North Bengal and in North and South Behar ranging between one and two degrees. In South-West Bengal and Chutia Nagpur the excess is only about half a degree, while in Orissa temperature has been very slightly below the normal. For the whole of the province of Bengal the mean temperature for the week has been almost exactly a degree above the normal. In Assam the excess has averaged 0·8°.

Rainfall—Has been in distinct excess of the normal in Orissa, where an average amount of 2·35 inches has been received, or nearly 20 per cent. in excess. In all other divisions defective falls have been registered, the defect equalling about half the normal fall in South-West Bengal, East Bengal, and Chutia Nagpur, which have each received an average of about an inch and-a quarter of rain, but the defects are even larger than this in the other divisions. South Behar has only received a third of the usual amount, North Behar about a fifth, while in North Bengal the fall for the week is little more than a sixth of the usual fall. In these three divisions the falls have equalled about two-thirds to three quarters of an inch of rain. The number of days of rain has in Orissa also been in distinct excess of the average. In South-West Bengal and Orissa the rainy days have been nearly normal in number, but in all other districts the number of days has been very defective.

The districts where the most largely defective rainfalls have been received are Moorshedabad, Nuddea, Chittagong, Noakholly, Furreedpore, Dacca, Bogra, Pubna, Rajshahye, Maldah, Dinagepore, Rungpore, Julpigoree, Purneah, Mozufferpore, Durbhunga, Chumparun, Sarun, Gya, Patna, and Shahabad.

In Assam, Silchar has received 7·24 inches, Sibsagar 4·19 inches, and Dhubri 0·34 inch of rain during the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 29th of August 1891:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1891.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; d, drizzling rain; p, passing temporary showers; <, lightning; lr, lightning reflection.

N.B.—In the weekly report from 2nd to 8th August 1891 read 86 as the miles recorded on the 7th August 1891.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 31st August 1891.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 15th August 1891.

BIRTHS.

THE total births registered during the week ending with Saturday, the 15th August 1891, in twenty-seven principal towns of Bengal, amounted to 386, and correspond to an annual rate of 18·7 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 1·3 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years except 1887 and 1890, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	22·5	17·7	19·9	21·6	18·5	20·0	18·7

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING— 25th July 1891.	1st August 1891.	8th August 1891.	15th August 1891.	TOWNS.	WEEKS ENDING— 25th July 1891.	1st August 1891.	8th August 1891.	15th August 1891.
Burdwan	16·8	16·8	0·2	13·7	Narainganj	29·0	24·8	16·6	20·7
Midnapore	23·3	6·2	13·9	9·3	Chittagong	9·4	11·7	18·8	2·3

Bali	21·1	14·0	3·5	17·5	Mozufferpore	32·8	18·2	24·3	21·9
Krishnagar	13·2	9·5	20·8	15·1	Durbhanga	20·9	20·5	45·6	24·4
Ranaghat	12·0	...	6·0	41·9	Chupra	19·1	35 2	39·2	28·2
Santipore	17·6	14·0	31·5	8·8	Bhagulpore	33·5	14·5	19·1	19·1
Jessore	12·2	6·1	...	6·1	Monghyr	32·5	31·6	30·8	31·5
Rampore Beauleah	13·8	21·0	5·3	13·1	Purneah	10·4	13·9	3·5	6·9
Darjiling	44·5	37·0	51·9	29·6	Poori	25·2	25·2	27·3	27·3
Dacca	14·9	8·4	9·7	5·2					
					Total ...	20·3	18·3	22·5	18·7

It will be seen that last week the highest birth-rate was returned from Comillah (42·4) and the lowest from Chittagong (2·3).

DEATHS.

The total deaths registered during the week under review amounted to 523, and correspond to an annual rate of 25·4 per 1,000 of the population. The rate of the week is ·3 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years except 1889 and 1890, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	28·1	27·4	25·8	24·3	22·5	25·7	25·4

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

According to the figures returned, the highest mortality occurred in the town of Darjiling (133·4) and the lowest in Chittagong (2·3). No deaths were registered during the week in the Jessore town.

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Dysentery and diarrhœa.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Monghyr ...	20·8	Darjiling ...	59·8	Darjiling ...	74·1	Gya ...	19·8
Gya ...	11·6	Rampore Beauleah	26·3	Poori ...	10·5	Comillah ...	19·2
Mozufferpore ...	10·9	Gya ...	23·2			Chupra ...	17·1
Arrah ...	6·0					Serampore ...	15·7
Patna City ...	5·2					Monghyr ...	13 6
Howrah ...	2·9					Poori ...	12·6
						Hughli and Chinsurah ...	11·5

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 4·2 from cholera, against 6 6 in the preceding week; ·1 from small-pox, against ·2; 10·1 from fever, against 12·2; 3·1 from dysentery and diarrhœa, against 3·4; ·5 from injury, against ·3; and 7·4 from other causes, against 9· in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	24·3	Christians ...	14·9	Under 1 year	211·0
Females	26·5	Hindus ...	28·0	1 and under 5 years	44·3
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	92	Mahomedans ...	19·0	5 „ 10 „	21·9
				10 „ 15 „	14·4
				15 „ 20 „	21·0

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE INCOME-TAX IN BENGAL FOR THE YEAR 1890-91.

FINANCIAL DEPARTMENT—INCOME-TAX.

RESOLUTION No. 170T.—F.

Darjeeling, the 31*st August* 1891.

READ—

The Report of the Board of Revenue on the financial results of the administration of the Income-tax for the year 1890-91.

The principal administrative change recorded by the Board of Revenue was the separation of the offices of Excise Inspector or Sub-Inspector and Assessor of Income-tax, which was decided on in 1889 and was fully carried out during the year under report. Districts were divided into five classes according to their average revenue from income-tax, and five grades of assessors were appointed on somewhat lower rates of pay than had previously been allowed. Service in the Income-tax branch, which had formerly been treated as temporary, was at the same time declared to be permanent and pensionable. It is expected that this reorganization of the staff, which provides every district with an officer whose whole-time is given to income-tax business, together with the recognition of the permanent character of the appointments, will tend to improve the quality of the work done by the assessors, and to make the assessment registers a trustworthy record of the taxable incomes in each district.

Results of the tax.

2. The following statement compares the financial results of the income-tax during the last two years:—

	1889-90.	1890-91.
	Persons.	Persons.
Number of persons finally assessed, including Government servants who pay tax through the Accountant-General ...	110,039	110,779
Number originally assessed, excluding Government servants	105,618	106,083
Number finally assessed, excluding Government servants	102,265	102,988
Number of assessees, including Government servants who paid tax within the year ...	104,106	104,886
	Rs.	Rs.
Final demand of tax for the year, excluding Government servants and interest on securities	37,12,130	37,36,619
Final demand of tax for the year, including Government servants and interest on securities	41,71,205	42,05,791
Final demand of tax for the year, including penalties, fines, and arrears of previous years	44,89,476	45,30,457
Collections of tax within the year, excluding Accountant-General's collections ...	34,36,737	34,86,635
Collections of tax, including Accountant-General's collections ...	38,95,812	39,55,807
Actual receipts, including advance and excess payments and after adjustments ...	41,66,798	42,38,075
Charges	1,66,778	1,83,712
Percentage of charges	4	4 3
Net revenue	40,00,020	40,54,363

The net revenue shows an increase of 1·3 per cent. as compared with 6·1 per cent. in 1889-90. Including advance payments and excess collections, and making allowance for various adjustments, the actual receipts at the close of the year amounted to Rs. 42,38,075 against Rs. 41,66,798 in 1889-90.

Demand, collections and balances.

3. The original demand amounted to Rs. 39,24,643 from 106,083 assessees, as compared with Rs. 39,38,829 in the previous year, representing the demand from 105,618 persons. This was reduced on revision to Rs. 37,36,619 assessed on 102,988 persons, the corresponding figure for 1889-90 being Rs. 37,12,130 to be realised from 102,265 persons. During the past year, therefore, the number of assessees was increased by 723 and the final demand by Rs. 24,489. The percentage of collection on the final demand of the tax was 93·3 against 92·5 in the previous year. The outstanding balance on account of the tax, including penalties and costs, amounted at the close of the year to Rs. 3,29,100 as compared with Rs. 3,45,219 in 1889-90. Of this balance, Rs 1,43,389 are reported to be good and in process of realisation, Rs. 1,19,295 doubtful, and Rs. 66,416 bad and irrecoverable. Eight districts succeeded in collecting their entire demand within the financial year. In ten districts the collections were below 90 per cent. of the final demand, the failure to collect more being explained as mainly due to the fact that assessment work could not be completed until late in the year. This excuse cannot be accepted. Any re-assessment which cannot take effect within the financial year should be held over to the next year, and collection should be based on the old assessment of last year. In future years every district collecting less than 95 per cent. will be named in the Resolution, and the officer in charge of this branch of the work will be deemed to deserve censure unless he can clear himself by some special excuse.

Assessments.

4. The forty-four assessors employed in the mofussil visited 70,318 villages, or on an average nearly ·1,600 a piece, against 67,367 during the previous year. The Board observe that an attempt seems to have been made to cover too much ground, and point, in support of this view, to the fact that in several districts the number of villages in which assessees were found is very small in comparison with the number of villages visited. The seven assessors employed in Calcutta visited 680 streets, against 518 in the previous year. The number of

persons finally assessed was 102,988 against 102,265 in 1889-90, the percentage of exemption falling from 3·1 to 2·9. The increase in the number of assessees was largest in Khoolna, where 1,778 persons were finally assessed, against 1,415 during the previous year. This appears to have been the work of a new assessor with regard to whom the Collector reports that the assessees were labouring under the misapprehension that "the assessor being a stranger and entirely new to the district, could not possibly know the ins and outs of their income." The assessor's estimate of the taxable income of the district seems, however, to have been in the main justified by the results, for, in spite of the fact that 443 objections and seven petitions for revision were filed, only 50 assessees were exempted, and 59 got their assessments reduced, while the final demand of income-tax rose from Rs. 25,283 to Rs. 31,217.

Objections.

5. In the whole of Bengal 13,884 petitions of objection were filed, as compared with 15,027 in the preceding year. Successful objections numbered 5,321, or 38·3 per cent., against 6,361, or 42·3 per cent., in 1889-90. Referring to five districts where the percentage of successful objections exceeded 50, the Board observe that the result is not creditable to the assessing officers, and shows that the initial assessments were made without due care and inquiry. The Lieutenant-Governor is unable to accept this conclusion without reserve. It is at least as likely that these unfavourable results are due to the weakness or carelessness of the judicial officers who hear the objections and accept the pleas put forward for exemption without sufficient scrutiny. During his recent tour of inspection, the Lieutenant-Governor examined several income-tax records, and was very dissatisfied with the manner in which they had been dealt with, and the grounds on which reduction had been granted. Many Deputy Collectors do not even consult or hear the assessor before reversing or modifying his decision. This should never be the case. It is only reasonable that the assessor should be given an opportunity of explaining the grounds upon which his assessment has been based.

In Calcutta, out of 22,796 persons originally assessed, 2,948 filed petitions, 1,669 of which, or 56·6 per cent., proved successful, against 54·6 per cent. in the previous year. The number of persons finally assessed fell from 22,555 to 22,159. The Collector of Income-tax reports that the number of cases in which objections are supported by closed and adjusted books has increased in a marked degree; but it is not stated to what extent the reductions made in the assessment have been due to the production of these books. The fact that the practice of filing regular accounts is on the increase tends of itself to arouse a suspicion that the mercantile classes are setting themselves to combat the income-tax with civilised weapons, and that many of these accounts are specially prepared for the purpose of being filed in appeals against the assessment. Next year's report should deal specially with the justice or otherwise of this apprehension. If it is well founded, we may expect that in course of time the same mode of self-defence will spread to the mofussil. Such accounts must be carefully scrutinized by the appellate authorities before whom they are produced, and it cannot be assumed that because they are regularly balanced, therefore they necessarily contain a complete and trustworthy record of the owner's transactions. No system of book-keeping can prevent the construction of fictitious accounts and the omission of particular items or classes of items from the main account, and it has long been a tradition of the mercantile classes to observe the strictest secrecy concerning their business affairs. Allowance must be made for these peculiarities in determining the value to be put upon a particular set of the books as a measure of the true financial liability of an assessee to income-tax.

Incidence of tax.

6. Excluding the tax on interest of Government securities and the salaries of officials, the average incidence of income-tax for the whole of Bengal with Calcutta during the past year was Re. 1 to every 18·9 persons, as compared with Re. 1 to every 17·9 persons in the preceeding year. For Bengal without Calcutta the average was Re. 1 to every 37 persons against Re. 1 to every 36 persons in 1889-90. Darjeeling again shows the highest mofussil average, Re. 1 to every 4·7 persons, and Cuttack the lowest, Re. 1 to every 90·5 persons. In Calcutta the average incidence was Re. 1 to every ·36 person, and one person in every 30 was assessed to the tax; the proportion assessed for the whole of Bengal being

one in 687 against one in 650 in the previous year. These figures have been calculated from the provisional totals of population issued by the Census Commissioner for India on the 8th May. Those given in the Board's report are based on the population of 1881, and thus exaggerate the incidence of the tax. The same remark applies also in some degree to the figures of incidence for 1889-90, which were necessarily calculated on the population returns of 1881. But until statistical research has advanced far enough in Bengal to enable the normal yearly rate of increase to be accurately determined, no precise comparison can be made between the population statistics of the first year of a new census period and the last year of an old one.

7. In the Board's Report on the income-tax for last year, an interesting statement was given, illustrating the distribution of the yield of the tax as between Calcutta and the rest of Bengal. This is reproduced below, the results of the past year being added. The Lieutenant-Governor desires that this statement may be continued in future reports:—

Year.	Act imposing tax.	Number of persons assessed in—			Amount of tax realised in—		
		Calcutta.	Rest of province.	Total.	Calcutta.	Rest of province.	Total.
					Rs.	Rs.	Rs.
1860-61 ...	Income-tax Act XXXII of 1860	......*	241,297	241,297	30,60,061	34,79,428	65,39,489

* Figures not available.
† Exclusive of the tax on salaries, &c., recovered by the Accountant-General, or the tax on the interest of Government securities.

It will be observed that in 1890-91, as in the preceding year, Calcutta contributed nearly 50 per cent. of the amount collected as the income-tax of the year, excluding penalties, fines, arrears of previous years, the tax on salaries recovered by the Accountant-General, and the tax on the interest of Government securities. Another point to be noticed is that while the yield of the income-tax of 1860 shows a progressive decline for the five years for which it was in force, the proceeds of the present tax, excluding a slight fall due to the inevitable difficulties of a first assessment, exhibit both in Calcutta and the mofussil a steady increase, indicating that the tax has now been established on a permanent footing and may be expected, if discreetly administered, to go on growing with the growth of the incomes which it is intended to touch.

Coercive measures.

8. There were somewhat fewer distress warrants issued than in the previous year, but the number of cases in which actual coercion was resorted to rose from 267 to 346. Sales were most numerous in Rungpore (154), Furreedpore (32), Khulna (29) and Balasore (14). The large increase in Rungpore from 51 to 154 is said to be due to the wilful recusancy of certain assessees who, though well able to pay, allowed their property to go to sale in the belief that they would thus establish a claim to reduction or exemption in future years. In Calcutta no distress warrants were issued during the year.

By rule 13 of the rules made by the Government of Bengal in virtue of the authority delegated by the Government of India under section 38 (1) of the Act, remission is granted at varying rates to private employers who undertake under section 9 (2) to collect from persons in their service. During the past year the number of firms and men of business who entered into agreements under this section fell from 403 to 348, and in the mofussil 13 of them failed to collect

the tax after agreement. In Calcutta the numbers fell from 206 to 183, but all those who agreed kept their engagement to collect the tax. The Board conclude from this that the terms* offered under rule 13 were not sufficient to induce employers to undertake the work of collection, and that the scheme for thus simplifying the administration of the tax "cannot be said to succeed." It seems to the Lieutenant-Governor that this conclusion is premature. The remission granted has induced a substantial number of firms to enter into and fulfil agreements under the rule in question, and it is possible that the falling off in such agreements during the past year may be only of a temporary nature. It is stated in the Report for 1889-90 that native employers, even when they have a large number of well-paid persons in their service, are unwilling to assist in realising the tax from them. The point is one which might properly be followed up in future reports.

* 5 per cent. for yearly payment.
3 ,, quarterly ,,
1 ,, monthly ,,

10. The expenditure incurred in the working of the tax rose from Rs. 1,66,778 in 1889-90 to Rs. 1,83,712 in the year under review, the entire increase being due to the separation in twenty districts of the appointment of Assessor of Income-tax from that of Inspector of Excise. The percentage of expenditure for the whole province was 4·9 as compared with 4·5 in the previous year. This part of the subject is treated by the Board with extreme brevity.

11. Analysing the proceeds of the tax with reference to the various grades of income liable to assessment, it will be seen that the two extremes—the richest and the poorest among those who are liable to pay the tax—contribute most to the total collected. From the first or lowest class of assessees, numbering 57,098, whose yearly incomes range from Rs. 500 to Rs. 750, the State draws Rs. 5,74,754, or 14·5 of the entire tax, while in the highest or fifteenth class the 91 persons who are assessed on incomes of a lakh and over make up Rs. 5,53,328, or 13·9 of the total. Next in order follow 5,535 persons in class VIII with incomes between Rs 2,500 and Rs. 5,000, paying Rs. 4,85,202; and 2,328 persons in class IX, assessed on yearly incomes varying from Rs. 5,000 to Rs. 10,000, contribute Rs. 4,03,307 to the yield of the tax. The smallest contribution (Rs 74,870) comes from the 70 persons in class XIII, with incomes between Rs. 40,000 and Rs. 50,000.

The following statement shows for the last two years the classes from whom income-tax payments exceeding a lakh were levied :—

	1890-91.		1889-90.	
	Rs.	Percentage of total collections.	Rs.	Percentage of total collections.
Money-lending and changing ...	5,93,311	14·9	5,72,092	14·6
Salaries paid by Government ...	4,00,957	10·1	3,93,059	10
General merchants... ...	3,84,771	9·7	3,63,550	9·3
Dealers in other articles ...	2,04,686	5·1	1,96,671	5
Piece-goods merchants ...	1,50,137	3·7	1,59,973	4 1
Taxable estate-holders ...	1,39,643	3·5	1,28,081	3·2
Barristers, &c.	1,23,705	3·1	1,23,254	3·1
Clerks paid by Companies, &c. ...	1,18,745	3	1,52,828	3·9
Banking	1,09,890	2·7	......	...
Managers, &c.	1,08,429	2·7	1,06,135	2·7
House proprietors	1,06,113	2·6	1,16,050	2·9
Others	1,00,493	2·5	......	...
Grain merchants	1,00,483	2 5	1,04,677	2·6
Jute and hemp	......	...	1,05,606	2·7

It will be seen that "banking," which paid less than a lakh in 1889-90, has regained its position during the last year, while "jute and hemp" have fallen below their former standard and thus disappear from the statement. In the percentages of contribution there is little change. The proceeds under the head of "taxable estate-holders," including, it is understood, the proceeds of water and fishing rights and the rent of mining lands, show a satisfactory increase.

12. An examination of the classified statement of incomes (Return No. V) annexed to the Report throws some light upon the distribution of wealth, the employment of capital, and the comparative profits of different trades and professions. Taking for example the three large groups of money-lenders, Government officials, and general merchants, who between them pay more than a third of the tax, it will be seen that the Rs. 5,93,311

paid by the money-lenders is levied from 27,419 persons, while 4 lakhs assessed on officials fall on 7,791 persons, and the Rs. 3,84,771 collected from general merchants are paid by only 1,539 persons. Among general merchants, again, no less than 31 pay on incomes exceeding a lakh, and 32 on incomes between half a lakh and a lakh, while only two officials and five money-lenders attain the distinction of figuring in the former class, and six officials and ten money-lenders appear in the latter. It will further be observed that general merchandise and jute account for a fraction more than one-half of the 91 assessments on incomes of a lakh and over, the other half being distributed in driblets among various trades and professions. The statistics of professional incomes furnish interesting data for estimating the comparative prospects of different occupations, and serve, among other things, to cast doubts upon the popular impression that at least half a dozen barristers in Calcutta make more than a lakh a year by their practice. If the income-tax returns can be relied on, there is only one whose income exceeded a lakh of rupees last year. In 1889-90 there were two, assessed on an average of Rs. 1,36,000 a piece. There seems, however, to be no reason to apprehend any serious decline in the profits of the Indian bar, for no less than seven barristers paid tax on incomes averaging Rs. 85,000, four returned from Rs. 40,000 to Rs. 50,000, and the same number earned between Rs. 30,000 and Rs. 40,000. The average income of the groups of assessees described as "barristers and others" comes to about Rs. 2,500 a year, which contrasts favourably with the earnings of the 12 school-masters, all of whom were assessed in the lowest class, on incomes between Rs. 500 and Rs. 750. Success in the higher branches of the medical profession brings with it a substantial reward, as may be judged from the fact that one doctor was assessed on an income of Rs. 73,000, another on Rs. 40,000 to Rs. 50,000, and two more on incomes between Rs. 30,000 and Rs. 40,000. Engineering also seems to be doing well, seeing that tax was collected on one income of Rs. 2,33,000, and on another between Rs. 40,000 and Rs. 50,000, while the average profits of the profession, as given in these returns, come to Rs. 7,500 a year, or three times as much as the average barrister and nearly six times as much as the average doctor can expect to earn. Turning now to commerce, it will be seen that the profits of some brokers reach a very respectable figure. Two members of this profession were assessed on incomes exceeding a lakh, eight on half a lakh to a lakh, five on incomes between Rs. 40,000 and Rs. 50,000, and seven on Rs. 30,000 to Rs. 40,000, the average of the class being Rs. 3,600. Under the comprehensive head "general merchants," the average income returned amounts to Rs. 9,600, a tolerably high figure when it is remembered how many petty native traders are in the habit of describing themselves as general merchants. The average profits of "agents" calculated from these returns come to Rs. 7,500 a year. Under the head of trade as distinguished from commerce and manufacture, only three incomes were assessed at a lakh and over—one a dealer in metals, and two dealers in dress, the latter paying tax on Rs. 3,79,000 between them. Notwithstanding the large profits made in these two instances, the average profits of the dress business, as shown in the returns, barely exceed Rs. 1,800 a year. Eleven newspaper proprietors appear in the returns, of whom one paid income-tax on Rs. 40,000 to Rs. 50,000, two on Rs. 5,000 to Rs. 10,000, one on Rs. 2,500 to Rs. 5,000, and two on Rs. 2,000 to Rs. 2,500, the remaining five being assessed on incomes between Rs. 500 and Rs 750. The average earnings of the eleven, as returned for income-tax purposes, amount to Rs. 6,000, but this figure includes papers under European as well as under native management, and it covers too wide variations of profit to be of any practical value, except as showing what a very small proportion of the large number of newspapers in Bengal make enough to render them liable to income-tax.

13. The payment of income-tax by means of postal money-orders is said to have worked well during the year. Not only does it save the assessees trouble and money, but by keeping them away from the touts who hang about the courts, it tends to diminish the number of frivolous objections. Only one difficulty is referred to, that the money-order coupon does not contain distinct headings for penalty and costs, so that sums paid on these accounts are incorrectly credited as tax. The Board will doubtless consider this point in communication with the Postmaster-General.

14. A bad case of embezzlement occurred in Rajshahye, resulting in a loss of Rs. 688 to Government. This fraud was made possible only by the disregard of a fundamental rule of treasury administration, and by the grossest carelessness in admitting receipts which contained blank spaces expressly left for fraudulent purposes. For both pieces of neglect the treasury officer was to blame, and his name should be reported to the Appointment Department of the Secretariat.

15. In referring to popular feeling on the subject of the income-tax, the Board say "the tax is and always must be unpopular." The enquiries it necessitates "are resented as inquisitorial and oppressive," and are often met by "the fabrication of false accounts" or "a garbled balance sheet." Of the truth of this description the Lieutenant-Governor has no doubt. Nothing but financial necessity can justify the retention of a tax which can only be based on a series of more or less accurate guesses. At the same time the principal hardship is felt by those whose incomes are smallest, and if the assessable minimum could be fixed at Rs. 1,000 instead of Rs. 500, the greater part of the complaints against the tax would be stilled. This change would exempt 70,807 persons out of the 104,886 who paid income-tax during the year, but would only lower the produce of the tax by Rs. 7,87,603 out of Rs. 39,55,807, or 19·9 of the whole receipts. It will be a profound relief both to the administration and the people when the day comes when the Government of India can afford to permit itself the luxury of granting this relaxation.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE STATIONERY DEPARTMENT FOR THE YEAR 1890-91.

FINANCIAL DEPARTMENT.—MISCELLANEOUS.

RESOLUTION—No. 175T.—F.

Darjeeling, the 3rd September 1891.

READ—

Letter No. 519B., dated the 31st July 1891, from the Board of Revenue, submitting the Report on the Administration of the Stationery Department for the year 1890-91.

As in the previous year, the Board have reviewed the report of the Superintendent of Stationery, dealing with the salient features of the year's administration.

2. The following statement, reproduced from the Board's report, shows the value of the stocks, receipts and issues of the year under review, as compared with those of 1889-90:—

	1889-90. Rs.	1890-91. Rs.
Value of stores at the beginning of the year	11,46,468	8,07,666
Ditto received and credited during the year	15,27,658	18,87,799
Total ...	26,74,126	26,95,465
Value of stores issued	18,66,460	20,79,399
Balance ...	8,07,666	6,16,066

These figures are based on the particulars given in the body of the Superintendent's report (paragraph 3), and appear in none of the statements annexed to the report except Appendix C, which only shows the value of the issues according to the different kinds of articles supplied. This defect should be corrected in future reports by the addition of tabular statements which work up to the figures used in the report.

3. There was a rise in the value of the stores both received and issued from the Stationery Office. The increase in "Receipts" occurred chiefly in the purchase of locally-made pape[illegible] [illegible]e to the requirements of the Census Department. [illegible]he steady decline* in the last few years in the value of stores received from the India Office, due to the policy of substituting local products for European stores, received a slight check in the year under review. This increase (Rs. 5,880) is attributed to larger imports of drawing papers, pencil and copying press materials which could not be obtained locally. Much of the increase under "Issues" is attributed to census work, and to the value of a large quantity of unserviceable stores having been written off the accounts. A considerable increase occurred in the issues to Provincial Governments and to the departments and offices under the Government of India. The real causes of this increase are nowhere indicated in the report, and the explanation furnished by the Board merely amounts to a reiteration of the fact. An examination of the detailed statement promised in paragraph 5 of the Superintendent's report may be expected to throw some light on the subject. The largest increase occurred in Bengal (Rs 61,681), and the highest decrease (Rs. 40,418) in Burma.

	Rs.
* 1887-88 ...	5,03,109
1888-89	3,37,348
1889-90	2,01,273
1890-91 ...	2,10,153

4. After eliminating from the total issues (Rs. 20,79,399) the cost of the items noted in the margin, aggregating Rs. 15,76,819, which comprise certain paper adjustments and the consumption of Government presses, the actual cost of stationery supplied to Government offices, including State Railways and local bodies, amounts to Rs. 5,02,580, against Rs. 4,94,033 in the previous year. This expenditure does not seem extravagant, when it is remembered that it includes not only the ordinary supplies of pens, ink, and writing paper, but drawing paper, water colours, book-binding materials and articles used for survey or map-drawing in the whole of Upper India. Taking the total number of indenting offices at about 3,250, the average cost to each indenting

	Rs.
Cost of water-marked paper	1,75,657
Value of stores issued to printing presses ...	25,242
Value of unserviceable stores writen off and sold	20,596
Value of stores transferred to Bombay and Madras	376
Value of deficiences in stock-taking	618
Value of other miscellaneous adjustments ...	7,487
Loss by revaluing the closing balance at the issue rates of 1890-91 ...	7,077
Supplies to presses ...	13,39,766
Total ...	15,76,819

office comes to Rs. 154. The above figure, showing the cost of stationery supplied to Government offices, is worked out in a general way in paragraph 7 of the Board's report, but the details should in future be clearly shown in an appendix attached to the report. A list of the new offices which indented on the Stationery Office during the year is given in Appendix B, which shows that the number was 70 against 60 added last year. But the statement, to be more accurate and useful, ought also to show the offices which ceased indenting on the Stationery Office. Some of the survey parties must have been closed, while in certain cases the so-called new offices appear to be really old offices under new names.

5. The Superintendent thus summarises the financial results of the year:—"The Imperial Government bears the charges of Rs. 2,10,153 for imported stores (plus the difference in exchange required to adjust the transactions with the Secretary of State), of Rs. 14,04,119 for country-made stores, and of Rs. 8,55,723 for the supplies to departments and offices directly subordinate to it, and to the Census offices. On the other hand, it recovers from local Governments and paying departments, &c, the sum of Rs 10,51,692 and Rs. 1,10,588 respectively, and holds a stock balance valued at Rs. 6,16,066." The items referred to here are no doubt the principal heads of expenditure, but the Superintendent has omitted to notice some which involve real expenditure, such as the "value of English stores purchased locally" and "value of stores issued to printing presses" for blank books, &c.

6. The income and expenditure of the Stationery Department amounted during the year to Rs. 78,715 and Rs. 70,701 respectively against Rs. 62,240 and Rs 69,568 in 1889-90. The receipts were chiefly derived from an allowance of 5 per cent. commission which the supplier pays to the Stationery Office on the purchase of local stores. Another item of receipt is a charge of 10 per cent. which is realized in addition to the prime cost of the articles from public officers who are not entitled to free supply, but who are supplied on their certifying that the stationery is required for official use only. This allowance is realised to cover the cost of the establishment employed and other incidental charges. The charges are mainly on account of establishment, godown rent, and freight. There was an increase of about Rs. 2,000 in establishment as compared with the previous year, which is due partly to the fact that the Superintendent's office required to be strengthened in some of its branches, and partly to the yearly increments allowed to clerks.

7. In paragraph 13 of his report, the Superintendent refers to the cost of paper of Indian manufacture and of imported English paper. He writes:—

> "After a careful examination of the method of comparing the cost of printing paper purchased in India with the estimated cost of obtaining it through the India Office, the Director-General of Stores of the India Office came to the conclusion that the paper could have been supplied cheaper from England. In order that in future the rates charged for locally manufactured paper may be tested with the current prices of English paper, it has been decided that the Superintendent of Stationery shall send samples of paper direct to the Store Department of the India Office seven or eight weeks at least before he calls for tenders, and ascertain, in correspondence with the Director-General of Stores, at what cost similar paper could be obtained in England. The recent establishment of the Bengal Paper Mills at Raneegunge by Messrs. Balmer, Lawrie and Company has increased the competition for Government patronage, and consequently a considerable reduction in the rates of all the Indian Paper Mills for the current year's supply has been effected. There can be little doubt, I think, that the Indian paper now supplied to the Stationery Office is as cheap, if not cheaper, than English paper, and the price of the latter has apparently reached a minimum."

The Lieutenant-Governor fully agrees in the above view. It is certain that in the end it will be cheaper to buy paper in India, and probably it is so now. Competition has already compelled Indian manufacturers to reduce their prices, and will reduce them still further.

8. The operations of the Form Store Department are confined to checking the indents received for forms from Bengal and Assam, obtaining the forms from the Presidency Jail Press, fixing the quality and size of paper to be used, despatching them to indenting officers, and maintaining a reserve to meet emergent demands. 66,871,662 forms were received from the Press, and 68,403,460 were issued in 1890-91 against 74,667,827 received and 71,201,429 issued in 1889-90. The decrease in issues is attributed to the check exercised over indents by the Stationery Office, and the falling off in receipts to certain

forms not having been received from the Press until after the close of the year. There have been several complaints regarding the delay in meeting the indents of officers, which, among other reasons, is attributed to the inability of the Presidency Jail Press to keep up with the demands of the Stationery Office for new proofs, and to meet the requirements of the Superintendent of Census Operations. The attention of the Inspector-General of Jails and the Superintendent of Government Printing, Bengal, will be invited to this matter.

9. Appendix II shows the number of standard forms with the number of new forms that have been added and old forms that have been revised during the year. There is, however, reason to believe that in addition to the forms requiring revision, there are many old forms which have been superseded and require to be cancelled. It is necessary that some officer should constantly be on the watch to detect such cases, and His Honour would wish the Superintendent of Stationery to report when he sees one form overlapping another. For instance, the High Court new criminal forms overlap and should supersede several police forms, and the Sonthal Pergunnahs forms are almost identical with ordinary district forms, and there is apparently no justification for keeping up the separate forms. The total cost of printing and paper for the forms supplied to Government offices was Rs. 3,79,877 against Rs. 4,10,018 during 1889-90.

10. The Lieutenant-Governor is glad to observe that the system of supplying newspapers and periodicals through the agency of Messrs. King Hamilton and Company, and rubber stamps and ink through the Stationery Office, is working well. The total expenditure incurred on account of subscriptions to newspapers, &c., amounts to Rs. 78,148 against Rs. 70,110 in 1889-90. The expenditure incurred in the purchase of rubber stamps and inks was Rs. 7,104, while under the old arrangement the expenditure averaged more than Rs. 25,000 a year.

11. The Lieutenant-Governor notices with satisfaction the good work performed by Mr. Drake, who held the appointment of Superintendent of Stationery up to the 22nd January, on which date he was relieved of his duties by the permanent incumbent.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secy to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE DACCA DIVISION FOR THE YEAR 1890-91.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 8th September 1891.

RESOLUTION No. 1087.

READ—

The Annual General Administration Report of the Dacca Division for the year 1890-91.

Tours.

The tours of the Commissioners in charge of the division during the year only amounted in all to 67 days, of which Mr. Power completed the first 42 days during the months of April, June, July, August and September. The Lieutenant-Governor is of opinion that this is far too brief a tour to enable a Commissioner to thoroughly inspect and make himself acquainted with the division. In the present case it is matter for regret that the shortness of the tour resulted in the great district of Backergunge and its treasury and the sub-treasuries not being visited at all, while the sub-divisions of Munshigunge in Dacca, and of Madaripore in the Furreedpore district, were also left uninspected. His Honour has lately seen the two places last mentioned and satisfied himself that they are both of sufficient importance and interest to merit periodical visits from an officer of a Commissioner's position.

As the prescribed period of duration for the tours of district officers and of sub-divisional officers has for some time past been fixed at 90 days and has been generally observed, the amount cannot be regarded as excessive, and yet the Lieutenant-Governor observes a tendency to treat it rather as a maximum than as a minimum, and to grudge even an extra day or two in addition. In Furreedpore, for instance, the total touring amounted to only 93 days, counting 6 days which were spent on tour by an officer who was not then in charge of the district, and which may therefore be properly excluded. In Dacca, again, the minimum was only exceeded by 4 days, and in Maimansingh by 11. Backergunge shows by far the most creditable total, amounting to 114 days. The sub-divisions show even worse results. By a special provision the Sub-divisional Officer of Naraingunge is permitted, owing to the small size of the sub-division and the quantity of work at his head-quarters, to show a minimum of 80 days, but in spite of this his tour amounted to only 76 days. The Commissioner remarks that the deficiency of 4 days appears inconsiderable. The Lieutenant-Governor is unable to agree in this view, and considers that, with such a small minimum prescribed, there was no excuse whatever for disregarding it. The same remark applies to the Madaripore sub-division, where Babu Hari Mohan Sen travelled for only 80 days, while Munshigunge with 90, Bhola with 93, and Kishoregunge with 92, show plainly the tendency above mentioned to grudge the least excess.

All the sub-divisions were duly inspected by the district officers during the year.

Material condition of the people.

2. The accounts given from all parts of the division of the condition of the people are satisfactory, and in this respect Dacca is probably the most favoured division of Bengal. From Backergunge, Mr. Savage writes:—"The material condition of the cultivating class, *i.e.*, the mass of the population, continues to be one of great prosperity." From Maimansingh, Mr. Phillips gives an interesting and more graphic description. He says:—

"Their homesteads are generally comfortable, with a good bit of *palan* attached. On this are grown vegetables, fruits, tobacco, betelnut, pâns, &c., the surplus produce being taken to market. The cultivators are also well-dressed and look well-nourished. I noticed this well-fed appearance even in the jail, and the criminal population does not display that squalid poverty which is found in many districts. Fish is a chief article of diet, as the cultivators generally catch them in rivers, khals and bheels, and for this no rent is paid. Almost every cultivator has a *piran*, an umbrella of Manchester make, and shoes. Cheap pottery has been largely superseded by metal utensils, and women wear no ornaments made of any cheaper metal than silver."

From Dacca, again, Mr. Hare writes that the work of artificially raising house sites is largely done by imported labour. He adds:—"When people can afford to pay for such work to be done for them, instead of

doing it themselves, they are clearly a long way removed from extreme poverty." The fact that few of the cultivators become rich is attributed by the Commissioner to the comparatively high standard of living. The cultivator of the Dacca Division gets regularly two cooked meals a day, while in Behar, or even Western Bengal, this is rather the exception than the rule. The curse of indebtedness arises here, as elsewhere in Bengal, from unthrift, extravagance at marriages and on similar occasions, and inconsiderate litigation; but the Lieutenant-Governor is unable to agree with the Collector of Maimansingh that what is required is a State-aided bank. The State has other work to do, which fully occupies the time of its officers. He has had the opportunity recently of impressing upon an assemblage of the chief persons of the district the need for individual effort instead of looking to Government for everything.

The price of common rice rose slightly in Maimansingh during the year owing to expansion in the cultivation of jute, but the rise was fully compensated by a fall in the price of other food products. It is possible that, as reported, the price of rice may rise still higher if the cultivation of jute is persisted in; but it may be presumed that the cultivator knows his own interest in growing a more valuable crop.

Trade and commerce.

3. The course of trade exhibited few striking features during the year. Jute dealings fell off heavily here, as in other parts of Bengal, owing to the collapse in the Calcutta market. The local view now entertained, as ascertained by His Honour personally on his recent tour, is that the crop of 1890 was of unusual magnitude, which resulted by the end of the season in a fall of prices so serious as to be in some places almost disastrous. The effect is naturally to induce a smaller cultivation in the following year. The fish trade appears to be flourishing. It is reported that in the cold season two fish trains run daily from Goalundo to supply Calcutta, while a new trade in salted hilsa, also for the Calcutta market, has arisen in the Perozepore sub-division of Backergunge.

Crime.

4. The total number of reported cases shows an increase of 1,243, from 29,793 in 1889 to 31,036 in 1890. The rise was entirely due to cognizable cases, and is attributed to a large number of prosecutions in nuisance cases, owing to greater activity on the part of the municipal subordinates and of the town police. Rioting shows an increase in the divisional figures, but the figures for the several districts are not given; and, speaking generally, the Lieutenant-Governor notices a want of detail and of care in selecting the figures given in the paragraphs dealing with crime. No doubt it may be said that the subject has been fully treated in the separate report on Criminal Justice, but the Lieutenant-Governor thinks that a good deal more information might have been shown in little more space than is already afforded to the subject of crime in the annual report.

Civil and Criminal Justice.

5. The statistics of civil cases are set forth in the prescribed form in the statements appended to the report, but the remarks recorded above as to crime apply also to the paragraphs which deal with the subject of criminal justice.

The figures showing the total number of civil suits pending from the preceding year, instituted and disposed of, are not understood. It is said that 104,459 suits were instituted and 105,216 disposed of: the pending file should therefore have decreased by 757, whereas it is said to have increased from 19,059 to 20,695, or by 1,636 cases.

The remarks of the Magistrate of Maimansingh on the disinclination of Civil Courts to lighten their own work by making due use of the Criminal Courts are worthy of attention. He writes :—

"The Civil Courts increase their work by their unwillingness to commit to the Criminal Courts persons guilty of flagrant perjury and forgery and other offences against civil justice. If litigants know that the chances are 100 to 1 against their being prosecuted for such offences, they will certainly commit them Again, it is considered a point of honour, I believe, among persons of wealth or influence, not to obey a Civil Court process—at any rate not the first two or three processes. It is only when they are called upon to show cause why they should not be sent to the fouzdari that they think it compatible with their dignity to come in. And yet, since I have been here, only four persons have been committed by the Civil Courts under section 174, Penal Code, and of those three were committed by the Judge. This delay in coming in causes the utmost inconvenience and harassment to the parties.

"Again, though failure to give a proper rent receipt is a criminal offence, Munsifs never send such cases to the Criminal Courts. They receive receipts written on scraps of dirty country paper, and thereby needlessly increase their labours tenfold. If they would impound the receipts and send them to the Collector now and again, they would find their labours considerably lightened."

The figures quoted by the Commissioner under the head of Criminal Justice, regarding the recovery of stolen property, correspond with those given in paragraph 70 of the Annual Police Report for the province. The test is not considered one of the best of the efficiency of the Police, as percentages are so much affected by a few cases of high value easily detected. But, so far as the test goes for comparison with other divisions, it shows that in respect of the percentage of cases of property recovered to property lost, Dacca was the worst division, and in respect of the value of the same, it was the worst division but two. The results given of prosecutions in cognizable cases show a little improvement. In Sessions cases the districts of Maimansingh, Backergunge, and Furreedpore stand 13th, 14th, and 30th respectively in the list of districts. Complete figures are given showing the number of cases disposed of and the number of persons convicted and acquitted by the various Benches and Honorary Magistrates of the division. The results appear to have been only fairly satisfactory, 3,909 cases having been completed, in which 2,096 persons were convicted and 2,117, or over 50 per cent., were acquitted. It would be useful if similar figures were given in a tabular form showing the work done by the Stipendiary Magistrates, and orders will issue in a separate Resolution regarding the statistical information which the Lieutenant-Governor wishes to see included in these reports. The attendance of Honorary Magistrates has in many cases, notably in Jamalpore, Haridaspore and Madaripore, been irregular, one reason assigned being that a large number of the Magistrates are Pleaders, who presumably have much work of their own to attend to, and may also be connected in many instances with the cases under trial. The names of such Magistrates who are frequently absent when put upon the roster should be removed from the list.

Registration.

6. A falling off in the receipts, accompanied by an increase of expenditure, is reported. The Lieutenant-Governor desires that reference may be made in future reports to the amounts paid and received or refused by the zemindars on account of landlord's fees, as prescribed by sections 12, 13, and 15 of the Bengal Tenancy Act VIII of 1885.

Land Revenue Administration.

7. The collections amounted to Rs. 34,72,481, being 92·9 per cent. on the total dues (including both arrear and current), which are stated to have been Rs. 37,33,918. Fuller statistics might with advantage be given. The subject has apparently been slightly dealt with in the present report owing to its having been fully discussed in the Annual Land Revenue Administration Report submitted to the Board of Revenue, which is separately laid before and reviewed by Government. The statistics given as to the working of the certificate procedure are also insufficient. Information should be given showing for each district the different departments for which certificates were made, and the success with which they met, namely, how many were realized on the first issue, how many on attachment, and how many on actual sale or by warrant of arrest. It should also be reported whether any persons, and if so how many, were actually sent to the civil jail for default.

The partition work of the division shows that 121 partitions were effected during the year, against 93 in 1889-90. But in consequence of the number of new cases the arrear list is heavier at the close of the year than at the commencement. There is nothing to show that the officers engaged were fully employed or did all that could be expected of them. A separate report should be submitted through the Board, giving the names of the Special Deputy Collectors, and showing specifically the work done by each. The information as to settlements is extremely meagre.

Attached estates.

8. The Lieutenant-Governor agrees with the Commissioner that the management of the Dakhin Shabazpore estate reflects credit on the Manager, Babu Sasi Kumar Dutta. The same cannot be said of all the other estates, especially those of Talipabad in the Dacca district, under the management of Babu Kasi Chandra Rai, and of Dhankora in the Maimansingh district. The former shows a realization

of Rs. 12,248 only out of a demand of Rs. 17,875 and an arrear balance of Rs. 30,112, leaving a balance at the end of the year now reported on of Rs. 35,739. In the latter estate there was at the commencement of the year an arrear of Rs. 2,70,228, and a current demand of Rs. 1,32,419, out of which only Rs. 1,28,108 were realized. It is not stated for how long these enormous arrears have been accumulating. The Lieutenant-Governor has taken steps to have the names of the Managers of all Wards' Estates reported to Government.

Excise.

9. Paragraph 52 of the report mentions, as one of the administrative changes of the division, the introduction of the distillery system throughout the district of Maimansingh only; but this appears to conflict with the statement under the head of Excise, that the complete introduction of the distillery system throughout the division formed the chief feature of the Excise administration. Considering how important a change this was, the statistics given as to its financial effect are insufficient. The report shows that the general result was favourable, as the receipts show a large increase of revenue from country spirits from Rs. 1,88,265 to Rs. 2,11,699; but it is not stated how much of this income arises from still-head duty and how much from license fees, nor is any information given as to the number of shops in either this or previous years.

Money-orders.

10. Remittances of money by postal order show an excellent development, the number of orders having increased from 293,228 in 1889-90 to 369,024 in 1890-91. The money value of these orders was Rs. 79,95,964, against Rs. 64,81,393 in the previous year—an increase of no less than Rs. 15,14,571. The money-orders paid in the division showed a similar increase of Rs. 16,12,000.

Dispensaries and hospitals.

11. There are 32 dispensaries in the division, of which 11 are managed by municipalities, 18 by private bodies, 2 by private managers, and 1 by the Backergunge District Board. Of these, 18 gave relief to both in and out-door patients. Figures might with advantage have been given showing the average number of out-door and in-door patients for each dispensary and the cost of management.

The Lieutenant-Governor notices with great pleasure the handsome offer of Nawab Ahsanullah Khan Bahadur, C.I.E., to subscribe Rs. 50,000 as an endowment to, and of Raja Sreenath Roy to subscribe Rs. 10,000 for the purchase of a site for, a female hospital at Dacca with private wards and dispensary in connection with the Dufferin Memorial Fund. Raja Sreenath Roy has also provided funds for an eye hospital, which it is expected will be taken in hand during the present year.

Zemindari dák.

12. Under this head statistics should be given showing for each district the demand, collections, and arrears, with an explanation of any change that may have been made in the rate of assessment or in the amount of expenditure. Figures should also be supplied showing the number of certificates that have been issued for realization of arrears and with what results. It appears from the figures previously submitted by the Commissioner in accordance with Government Circular No 30, dated the 29th November 1871, that there was a total demand of Rs. 55,232-3-10, and that Rs. 52,999-9-3 were collected during the year. There was a fall of 2 annas, from Re. 1-8 to Re. 1-6, per cent. on the land revenue in the rate of assessment of this cess in the Backergunge district.

13. In conclusion, the Lieutenant-Governor desires to express his acknowledgments to Mr. Power, who held charge of the division up to the 30th November 1890, and to the District Officers for their administration of their charges under unusual pressure owing to the census operations and other causes. The lamented death of Mr. Boxwell, who was Commissioner of the Division for the latter part of the year, has already formed the subject of a special obituary notice in the Gazette.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 5th September, 1891.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		*Western Districts.*		
BURDWAN DIVN.	1	Burdwan Sept. 5, '91 Culna ... Cutwa ... Raneegunge ...	0·24 0·99 0·33 0·95	Weather—hot. Transplanting of *aman* nearly finished. Harvesting of *aus* going on. Prospects of *aman* and sugarcane fair. A few cases of cattle-pox here and there. Supply of fodder and water sufficient. Prices of common rice:— Srs. Burdwan ... ... 17 Culna ... ... 14 Cutwa ... ... 16 Raneegunge ... ... 16 } per rupee.
	2	Bankoora „ 5, '91	1·74	Weather—showery. Prospects of rice and sugarcane good. Condition of cattle good. Supply of fodder sufficient. Common rice selling at 17½ seers per rupee at Bishenpur and 18½ seers at Bankoora.
	3	Birbhum „ 5, '91 Rampore Haut ...	1·80 0·59	Break in the rains seems over. Rice crop doing very well. All reports agree that sugarcane is the worse for heavy rain, but yet the rain cannot be said to have been excessive. Price of common rice slightly lower, being from 17 to 20 seers per rupee. Health of cattle good. Fodder and water everywhere plentiful.
	4	Midnapur „ 5, '91	2·47	Weather—rainy. Transplanting still going on. Indigo all gathered. Prices of common rice:— Srs. Sudder ... ... 15 Contai ... ... 16 Tamluk ... ... 17 Ghatal ... ... 17 } per rupee.
	5	Hooghly „ 5, '91 Serampore ... Jehanabad ...	2·31 1·8 1·58	Weather—sultry and showery all the week. Prospects of crops good. Fodder and water-supply sufficient. Cattle disease in Jehanabad (Goghat thana and Buddungunge outpost) and Pandua (Sudder). Prices of common rice:— Srs. Sudder ... ... 13 Serampore ... ... 13 Jehanabad ... ... 16 } per rupee.
	6	Howrah „ 5, '91 Uluberia ...	1·58 1·50	Weather—rainy. Jute, paddy, and sugarcane crops doing well. Jute being cut. Condition of cattle good. Fodder and water-supply sufficient. Price of common rice 14 to 14½ seers per rupee.
		Central Districts.		
PRESIDENCY DIVN.	7	24-Perghs. Sept. 8, '91	2·11	Alternate rain and sun. Weather still warm. *Aus* ripening and jute being cut. Sugarcane thriving. Transplantation is still being carried on. *Aman* wants more rain in Baraset. Prospects continue favourable. Lands flooded in Kulpi are now free from water and (?) are being transplanted. Cattle-disease abated in Diamond Harbour, but still prevalent in thanas Harowa, Canning, and Joynagore. Water and fodder adequate. Prices steady.
	8	Nuddea „ 5, '91 Kushtea ... Ranaghat ...	0·95 0·89 0·99	Weather—seasonable. Harvesting of *aus* and jute going on. Rain wanted for *aman*. Lands being ploughed for winter crops. Health of cattle good, and supply of fodder and water sufficient.
	9	Khoolna „ 5, '91 Bagirhat ... Satkhira ...	0·17 0·74 0·29	Weather—hot with little rain. More rain is wanted for the crops. Harvesting of *aus* and jute going on. Transplantation of *aman* nearly finished. Cattle-disease prevalent in parts. Supply of fodder and water for cattle sufficient.
	10	Jessore „ 5, '91 Jhenidah ... Magura ... Narail ... Bongong ...	2·64 0·42 0·31 1·09 1·44	Weather—hot. *Aus* paddy harvest nearly completed; outturn good. *Aman* crop requires still more flood-water throughout the district, especially in the high lands.
	11	Murshedabad „ 7, '91	1·83	Weather—hot and cloudy. Harvesting of *bhadoi* nearly finished; average outturn estimated to be 14 annas. Cultivation of *aman* not yet completed. Sugarcane doing well. 33 head of cattle died from small-pox in Kandi subdivision. There is sufficient fodder for cattle.
RAJSHAHYE DIVN.	12	Dinagepur „ 5, '91 Thakurgaon ...	0·37 0·93	Weather—cloudy with east wind. Rain urgently wanted for standing crops. Prospects fair. Condition of cattle reported to be good. Supply of fodder and water sufficient. Price of rice stationary, but a rise is probable.
	13	Rajshahye „ 5, '91 Nattore Nowgong ...	0·23 0·47 0·67	Not enough rain for the time of the year. In parts there is a great want of rain; and the country generally requires more water. Crops will be seriously affected if it does not rain heavily soon.
	14	Rungpur „ 5, '91 Gaibanda ... Kurigram ... Nilphamari ...	2·26 0·12 Nil 0·23	Weather—cloudy with easterly wind. Showers have done some good, but transplantation of winter rice is almost stopped. Rice on high lands is being injured, and more rain generally required. Prospects of sugarcane good. Outturn of *aus* rice very fair. Rivers and tanks low. Fodder plentiful.
	15	Bogra „ 5, '91 Sherpur ... Nowkhilla ...	0·98 0·80 0·93	Weather—generally fine, with high winds. Jute is still being cut; outturn will be on the whole about 12 annas. *Aus* almost all harvested, with an outturn of 16 annas. Transplantation of *aman* going on slowly, and unless heavy rain very soon falls, the crop will be a very poor one. Sugarcane doing well. Rivers are very low. Price of common rice has slightly risen—15 seers a rupee.
	16	Pubna „ 5, '91	0·75	Weather—seasonable. *Aus* paddy is still being reaped, and yielding an outturn of 12 annas. Jute is also being reaped. *Aman* paddy doing well. Rivers falling. Condition of cattle good. Fodder sufficient.
	17	Darjeeling „ 5, '91	1·01	Weather—fair. Cutting of *bhadoi* crop still continues. Transplantation of *haimanti* nearly completed. Sufficient fodder for cattle at present.
	18	Julpigoree „ 5, '91	0·27	Weather—very hot and cloudy at intervals. Prospects of crops not good. Transplantation of *haimanti* paddy going on. Rain much wanted. Price of rice rising. Fodder and water-supply abundant. Cattle-disease prevalent at Alipore and Patgram.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*					
		Eastern Districts.			
DACCA DIVN.	19	Dacca	Sept. 5, '91	1·18	Weather—seasonable. Harvesting of *aus* paddy nearly completed, and that of jute still going on. Damage is anticipated to *aman* crop for insufficient rain and flood. Fodder and water are available. Condition of cattle is good. Cheapest rice sold at from 15 to 18 seers per rupee.
	20	Furreedpur	„ 5, '91	0·86	Weather—seasonable. Prospects of crops fair. There is no want of fodder and no cattle disease. Rice selling at 16 and 17 seers per rupee respectively at Sudder and Madaripore.
	21	Backergunge	„ 5, '91	2·19	Weather—seasonable. Prospects of crops generally fair. Price of common rice varies from 13 to 18 seers per rupee. Condition of cattle generally good. Supply of fodder and water is as usual in the rainy season.
	22	Mymensingh	„ 5, '91	...	Weather—clear and cloudy by turn. Prospects of crops fair. More rain wanted for *aman* paddy. State of cattle good. Plentiful supply of fodder and water. Common rice sells at 13½ seers per rupee.
CHITTAGONG DIVN.	23	Chittagong	„ 5, '91	0·74	Weather—seasonable with occasional showers of rain. *Aus* is still harvested and *aman* transplanted. Prices steady.
	24	Noakholly	„ 5, '91	1·06	Weather—hot with little rain. Rain much wanted for transplantation of *aman* rice. Prospects not good. Prices, however, show no material change. Some *aus* rice still unharvested. Condition of cattle and fodder-supply normal.
	25	Tipperah	„ 5, '91	0·23	Weather—hot and steamy. Rain badly wanted in Brahmanbera subdivision Price of jute rising. Prospects of crops good. Fodder insufficient.
	26	Chittagong Hill Tracts.	„ 3, '91	5·31	Weather—sunny and cloudy with occasional falls of rain. Harvesting of *jum* paddy continues. Transplanting of paddy in low lands going on Common rice is being sold at 13 seers 5 chittacks per rupee. Cattle-disease (rinderpest) continues in some places. Fodder and water-supply good.
BEHAR.					
PATNA DIVN.	27	Patna	„ 5, '91	0·11	Weather—hot and cloudy. Transplantation of paddy is being retarded for want of rain. *Bhadoi* promises a good harvest. Prices slightly rising.
		Barh	...	0·10	
		Behar	...	0·06	
		Dinapur	...	0·10	
	28	Gya	„ 5, '91	2·34	Weather—hot, cloudy and occasionally rainy. Transplantation of paddy continues. Rainfall during the week has been beneficial to both the *bhadoi* and paddy crops. But more rain is wanted still for transplantation purposes. Prices of food-grains rising. Supply of fodder and water to cattle is sufficient.
		Nawada	...	1·80	
		Jehanabad	...	Nil	
		Aurungabad	...	0·24	
	29	Shahabad	„ 5, '91	0·39	Weather—slightly cooler than last week, but still hot; sky sometimes clouded. More rain urgently needed. Transplantation still going on in parts of Sasseram and Bhabuah, but stopped in Arrah and Buxar except where canal water is available. Prospects in Sasseram have improved. In Arrah *bhadoi* promises well; in Bhabuah this crop is reported to be withering. In Buxar half an inch of rain fell on the 3rd, not included in this return. Rainfall is very local. Fodder and water for cattle sufficient.
		Buxar	...	0·17	
		Sasseram	...	1·78	
		Bhabuah	...	0·63	
	30	Durbhunga	„ 5, '91	2·67	Weather—cloudy. Rice crop much benefited by rain, but more rain required. *Bhadoi* in the south a splendid crop, in the north not so good, and in places a poor crop. A good deal more rain is required for the north and east of the district. Condition of cattle good. Supply of fodder and water sufficient.
		Somastipur	...	0·65	
		Madhubani	...	2·97	
	31	Mozufferpur	„ 5, '91	0·73	A few showers in most parts of the district. Indian-corn and *marua* are being cut; the crops are generally excellent. Paddy is still in fairly good condition, and will be a good crop if good rain falls this month. It looks a little dried up in places in the north of the district. A few cases of cattle disease reported, but condition is generally good. Plenty of fodder and water.
		Sitamarhi	...	1·79	
		Hajipur	...	Nil	
	32	Sarun	„ 5, '91	0·47	Weather—hot and cloudy. Rain urgently wanted for the rice crop, a considerable portion of which has not been planted out yet. *Bhadoi* good. Fodder and water-supply sufficient for cattle.
	33	Chumparun	„ 5, '91	1·55	Weather—hot and occasionally cloudy. Paddy transplantation almost over. Prospects of *bhadoi* continue good throughout the district. Reaping of *sathi* going on. Rain urgently wanted for *aghani* paddy.
BHAGULPORE DIVN.	34	Monghyr	„ 5, '91	1·09	Weather—hot with occasional light showers. Harvesting of *bhadoi* crops going on; outturn expected to be good all round. Transplantation of winter rice almost finished, but what remains is retarded for want of sufficient rain. Condition of cattle good throughout the district except in some villages in the Lukhiserai outpost where cow-pox is prevailing. Supply of fodder and water sufficient.
		Beguserai	...	1·09	
		Jamui	...	0·93	
	35	Bhagulpur	„ 5, '91	1·35	Weather—cloudy with occasional rain. *Bhadoi* crops being harvested; yield expected to be good. Transplantation of winter rice going on. More rain wanted. Cattle disease reported. Price of common rice 15 seers 2 chittacks per rupee.
	36	Purneah	„ 5, '91	0·54	Weather—sultry. Sky cloudy, but no rain. Transplantation of *aghani* retarded almost everywhere for want of rain. In Sudder subdivision this crop is suffering in most places. In Kishengunge and Arrareah subdivisions the rice on low lands and places irrigated by bunds is doing well. In Kishengunge the ryots are bunding up small streams and rivers to irrigate their fields. Harvesting of *bhadoi* continues. Cutting of jute is going on, but steeping is hindered in some parts of Kishengunge for want of water. No cattle-disease. Fodder and water for cattle plentiful. Average price of common rice as follows:— Srs. In Sudder ... ... 17; „ Kishengunge ... 13; „ Arrareah ... ... 16 } per rupee.
		Kishengunge	...	0·04	
		Arrareah	...	0·48	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR—*concld.*				
BHAGULPORE DIVN.—*concld.*	37	Maldah Sept. 5, '91	0·58	Weather—hot and bright with occasional light showers. Harvesting of *bhadoi* continues. Rain badly wanted for winter rice in several parts of the district. Transplantation of this crop has been retarded in Gajole, Bamongola, and Maldah for want of sufficient rainfall. Condition of cattle reported to be good. Supply of fodder and water sufficient. Common rice selling at from 14 to 20 seers per rupee.
		Chanchal ...	0·82	
		Gajole ...	1·05	
	38	Sonthal Perghs. „ 5, 91	0·95	Weather—sultry and thundery with showers. Easterly winds. Indian-corn harvest begun, and new grain coming to market. There will probably be a 16 anna crop. Rice doing well, but more rain wanted for the high lands. Fodder and water-supply good. Cattle doing well.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 5, '91	1·78	Weather—seasonable. *Beali* being reaped. *Sarad* and other crops doing well. Supply of fodder and water adequate at present.
	40	Pooree „ '91	3 97	Weather—seasonable. Transplanting, puddling and weeding of winter rice (*sarad*) going on. Early rice (*beali*) ripening. Price of common rice stationary. Cattle-disease reported from thana Gope.
		Pipli ...	3·86	
		Gope ...	3·90	
	41	Balasore „ 5, '91	1·77	Weather—close and sultry. Damage from floods reported from Bhadrak subdivision. Prospects elsewhere good. Cattle disease abating.
CHOTA NAGPORE				
South-West Frontier Agency.				
CHOTA NAGPORE DIVN.	42	Hazaribagh Sept. 5, '91	1·65	Weather—alternate clouds and sun and occasional showers. *Bhadoi* prospects excellent. More rain much wanted for rice transplantation, especially in west.
		Giridih ..	0·36	
	43	Lohardugga „ 5, '91	4·30	Weather—seasonable. Transplantation of winter rice is still being carried on here and there. *Bhadoi* crops doing well, but want of rain is reported about Palkote. Fodder and water plentiful.
		Palamow (up to 1st Sept.)	0·32	
	44	Singbhoom Sept. 5, '91	3·40	Weather—seasonable. State of crops good. *Bhadoi* being cut. Indian-corn giving a good outturn. Common rice sold in Chybassa market at 14 seers per rupee, against 13 seers in the previous week. Road works have been opened where distress was reported last week, but very few people are working, because the rates of remuneration do not please them. The rates are those fixed by the Famine Code.
	45	Manbhoom „ 5, '91	1·55	Weather—seasonable. Prospects of crops still continue good. Common rice selling at from 11 to 18 seers per rupee. Fodder-supply plentiful.

STATISTICAL DEPARTMENT,
The 7th September, 1891.

C. E. BUCKLAND,
Offg. Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of August 1891.

	Inches.	Date.	Hour.
The mean pressure of the month	29·579		
The average pressure of August from 24 years' registers ...	29·598		
The highest pressure in the month	29·763	29th	10
The lowest pressure in the month	29·325	2nd	16
The range of pressure	0·438		
	Hours.		
The total number of hours of bright sunshine during the month	119·9		
The maximum possible number of hours of sunshine ...	398·4		
	°		
The mean temperature of the month	82·6		
The average temperature of August from 24 years' registers ...	83·1		
The highest temperature in the month	92·1	1st.	
The lowest temperature in the month	74·5	12th	
The range of temperature during the month	17·6		
The mean daily range of temperature	8·5		
The greatest range of temperature in one day	12·9	1st.	
	Per cent.		
The mean humidity of the month	88		
The average humidity of August from 24 years' registers ...	86		
	Inches.		
The mean vapour tension of the month	0·979		
The average vapour tension of August from 9 years' registers ...	1·002		
The mean cloud proportion of the month	8·04		
The average cloud proportion of August from 14 years' registers	8·09		
The total rainfall of the month	13·28		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	12·83		
The average fall of August from 48 years' registers ...	13·94		
The greatest fall in 24 hours	2·81	12th.	
	Days.		
The number of rainy days in the month	30		
The average number of rainy days in August from 24 years' registers	25		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	143·4		
The mean difference of sun and air temperatures	56·5		
The greatest sun temperature	154·6	29th.	
The greatest excess of sun over air temperature	66·3	23rd.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·5		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	2·9	22nd & 28th.	
	Miles.		
The mean movement of the wind per day	121·1		
The greatest movement of the wind in one day	287·0	3rd.	
The greatest movement of the wind in one hour	19·0	2nd,	3 to 4 P.M.

The number of hours with winds from each of the 8 points—

N. 14. N.E. 17, E. 169, S.E. 205, S. 148, S.W. 106, W. 52, N.W. 16, Calm 17.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 8 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° higher; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. LITTLE,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 7th September 1891.

Meteorological Report of the Province of Bengal

* Mean of 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers
are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the
past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 5th of September 1891.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 8th September* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY, THE 5TH OF SEPTEMBER 1891.

At the close of the previous week pressure had become decidedly uniform over the northern half of the Bay, and pressure was also becoming relatively low along the North Madras coast, the lowest readings being reported from Vizagapatam and Coconada. Pressure was also somewhat low over parts of North Bengal and Assam, but owing to the distribution of pressure over the Bay, little or no monsoon current was drifting over Bengal, and rainfall had become to a great extent absent. On the 30th pressure was falling along the Madras coast and in Bengal, while it was rising rather rapidly in Burma, so that the differences of pressure over the Bay became decidedly larger than they had been, and pressure was still lowest at Coconada and Vizagapatam. There was also slight indraught shown in the wind directions towards a low-pressure area off the west coast in the northern half of the Bay, and it was evident that squally unsettled weather existed over the westen part of the northern half of the Bay on this date. With this distribution of pressure rainfall was again practically absent in Bengal. By the morning of the 31st a distinct barometric depression had been formed in the west of the Bay, the centre of which was to the east of Gopalpore and apparently at some little distance from the coast. The conditions in the south-west of the province on this day were rather more favourable, and moderate rain was reported in South and Central Bengal and in Orissa and at some of the stations in North Behar. On 1st September the centre of the small depression had advanced in a north-westerly direction and was opposite or near Pooree, but it had not intensified to any extent and was still accompanied by rather feeble winds, though there was a complete cyclonic circulation. With this northerly advance conditions again became rather more favourable for rainfall in Bengal, and fairly general but light rain was received in Orissa, South-West, East and North Bengal, and a few showers in Chutia Nagpur. From the 1st to the 2nd the depression filled up decidedly, and on the 2nd it simply existed as a very shallow low-pressure area extending over the north of the Bay, Orissa, and part of South-West Bengal with a centre near the north-west angle of the Bay, round which there was an extremely feeble cyclonic circulation of winds, and again the winds were very light in force. Scattered rainfall was reported over the greater part of the province on the 2nd, but the falls were generally very light. On the 3rd the feeble low-pressure area in the north-west of the Bay had quite disappeared, and winds became of normal monsoon direction, and on this day rainfall was general over the whole province, though usually rather light. On the 4th again a slight low-pressure area commenced to form in the north-west angle of the Bay, and winds showed slight indraught towards a point between Saugor Island and False Point, while rainfall began to fall off both in area and in heaviness. From the 4th to the 5th, however, very heavy rain fell over the north and north-west of the Bay and the neighbouring parts of South-West Bengal and Orissa; Saugor Island reporting 5·93 inches of rain and Contai 4·65 inches, and with the heaviness of the rainfall the depression in the north-west angle of the Bay distinctly deepened, and on the morning of the 5th, a very distinct but small and feeble storm existed near the Sandheads, which was accompanied by the usual cyclonic circulation of winds, though the wind force in all cases was light.

It will therefore be seen that rainfall during the week has been light though fairly well distributed. Almost the only heavy falls indeed occurred in connection with the depression on the 4th and 5th in the extreme south-western districts of the province, and in all districts practically except these, rainfall has again been below the normal during the week.

Pressure.—The mean pressure for the whole week has been below the normal, but the defects have been small at the northern and eastern stations, where they average about 0·02″ to 0·03″; they are rather larger at the western stations, where they equal about 0·03″ to 0·04,″ and they are largest in the north-west angle of the Bay and the neighbouring parts of South-West Bengal and Orissa, where they are from 0·05″ to 0·07;″ the largest defects being 0·072″ at Saugor Island, 0·067″ at False Point, and 0·064″ at Balasore. This tendency to low pressure in the north-west angle of the Bay has existed almost continuously for many weeks.

Temperature.—Owing to the lightness of the rainfall during the week, the mean temperature has been above the normal in all districts. The excess in all districts except Orissa equals from about 1° to 2°, but in Orissa, where there has been fairly good rainfall, the excess only equals 0·2°. For the whole province the mean temperature for the week has been about 1·5° in excess of the normal. In Assam the excess has equalled 1·6°.

Rainfall—Has in all divisions been less than the normal for the week; the defects in Orissa, Chutia Nagpur, and South-West Bengal have been moderate only, but in East and North Bengal and in Behar they have been large. The falls in Chutia Nagpur, Orissa, South-West and East Bengal have averaged from about one and-three-quarters to two inches, those in Behar about one inch, while in North Bengal they have only equalled 0·87 inch. In the case of Orissa, Chutia Nagpur, and South-West Bengal, the defects from normal amounts have been from about half an inch to one inch, in Behar they have equalled about one and-a-half inches, in East Bengal about two inches, while North Bengal has received three inches less rainfall than usual during the week. The defects therefore

in East and South Bengal and in Behar have been serious, for the falls have only equalled from a little less than half the normal in South Behar to less than a fourth of the normal in North Bengal.

The following smaller divisions have received very defective falls during the week:— Burdwan, Bankoora, Beerbhoom, Moorshedabad, Jessore, Khoolna, Chittagong, Chittagong Hill Tracts, Backergunge, Noakholly, Furreedpore, Comillah,—all in North Bengal except Darjeeling, Purneah, Sarun, Patna, and Sonthal Pergunnahs.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 5th of September 1891:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1891.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; d, drizzling rain; p, passing temporary showers; <, lightning.

METEOROLOGICAL OFFICE, INDIA,
The 7th September 1891.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 22nd August 1891.

BIRTHS.

THE total births registered during the week ending with Saturday, the 22nd August 1891, in twenty-seven principal towns of Bengal, amounted to 523, and correspond to an annual rate of 25·4 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 4·1 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of births per 1,000 of the population per annum	23·2	18·9	19·6	24·2	20·5	21·3	25·4

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 1st August 1891.	8th August 1891.	15th August 1891.	22nd August 1891.	Towns.	Weeks ending— 1st August 1891.	8th August 1891.	15th August 1891.	22nd August 1891.
Burdwan	16·8	9·2	13·7	13·7	Narainganj	24·8	16·6	20·7	33·1

Hughli and Chinsurah	32·8	24·6	19·7	34·5	Comillah	11·6	27·0	42·4	27·0
Serampore	25·5	20·4	30·3	37·3	Patna City	12·0	10·7	13·0	13·6
Utterpara	18·9	18·9	28·3	47·2	Gya	26·0	25·3	28·7	11·6
Howrah	16·6	28·2	19·5	23·5	Arrah	23·9	29·9	8·4	10·1
Bali	14·0	3·5	17·5	17·5	Mozufferpore	18·2	24·3	21·9	41·4
Krishnagar	9·5	20·8	15·1	7·6	Durbhanga	20·5	45·6	24·4	47·2
Ranaghat	...	6·0	41·9	47·9	Chupra	35·2	39·2	28·2	62·4
Santipore	14·0	31·5	8·8	15·8	Bhagulpore	14·5	19·1	19·1	29·7
Jessore	6·1	...	6·1	...	Monghyr	31·6	39·8	3·5	47·6
Rampore Beauleah	21·0	5·3	13·1	36·6	Purneah	13·9	3·5	0·9	13·9
Darjiling	37·0	51·9	29·6	22·2	Poori	25·2	27·3	27·3	33·6
Dacca	8·4	9·7	5·2	9·7	Total ...	18·3	22·5	19·7	25·4

It will be seen that last week the highest birth-rate was returned from Chupra (62·4) and the lowest from Chittagong (7·). No births were registered during the week in the Jessore town.

DEATHS.

The total deaths registered during the week under review amounted to 641, and correspond to an annual rate of 31·1 per 1,000 of the population. The rate of the week is 3·3 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1888, *vide* the figures below—

	1886.	1887.	1888.	1889.	1890.	Weekly average of five years, 1886—90.	1891.
Ratio of deaths per 1,000 of the population per annum	26·5	28·8	32·1	27·3	24·5	27·8	31·1

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 1st August 1891.	8th August 1891.	15th August 1891.	22nd August 1891.	Towns.	Weeks ending— 1st August 1891.	8th August 1891.	15th August 1891.	22nd August 1891.

Santipore	8·8	12·3	12·3	19·3	Bhagulpore	32·0	38·1	22·1	36·6
Jessore	...	12·2	...	21·5	Monghyr	38·0	57·9	52·4	49·7
Rampore Beauleah	34·2	28·9	31·5	52·5	Purneah	3·5	20·8	21·2	13·9
Darjiling	88·9	81·5	133·4	90·3	Poori	23·1	35·7	31·5	18·9
Dacca	19·5	19·5	16·2	12·3	Total ...	27·5	31·8	25·4	31·1

According to the figures returned, the highest mortality occurred in the town of Darjiling (96·3) and the lowest in Chittagong (9·4).

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Dysentery and diarrhœa.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Mozufferpore ...	19·5	Rampore Beauleah	47·3	Darjiling ...	44·4	Chupra ...	22·1
Gya ...	18·4	Darjiling ...	44·4	Hughli and Chinsurah ...	21·3	Serampore ...	19·6
Monghyr ...	16·3	Arrah ...	29·9	Serampore ...	15·7	Hughli and Chinsurah ...	16·4
Arrah ...	12·0	Hughli and Chinsurah ...	27·9			Monghyr ...	12·6
Patna City ...	9·7	Gya ...	26·0				
Serampore ...	7·8						
Bhagulpore ...	6·9						
Chupra ...	4·0						

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 6·2 from cholera, against 4·2 in the preceding week; ·04 from small-pox, against ·1; 12·7 from fever, against 10·1; 3·7 from dysentery and diarrhœa, against 3·1; ·8 from injury, against ·5; and 7·6 from other causes, against 7·4 in the preceding week.

The mortality of last week according to *Sex, Class* and *Age* was as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	29·6	Christians ...	7·5	Under 1 year ...	253·7
Females	32·6	Hindus ...	33·4	1 and under 5 years ...	53·7
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	91	Mahomedans ...	25·8	5 " 10 " ...	20·5
				10 " 15 " ...	18·2
				15 " 20 " ...	22·3
				20 " 30 " ...	20·2
				30 " 40 " ...	17·9
				40 " 50 " ...	16·9
				50 " 60 " ...	27·9
				60 years and upwards ...	61·8

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 7th September 1891.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 22nd August 1891.

* Includes 7,841 tons carried for revenue, in which no "Up" and "Down" mentioned.

Comparative statement, Eastern Bengal State Railway for June 1891.

INCREASES.

	Tons.
Coal ...	9,278
For railway and flotilla consumption.	
Cotton piece-goods ...	834
Ordinary fluctuations.	
Gunny-bags and cloth ...	905
This increase was contributed principally by Haldibari and Raiganj, the Calcutta market being favourable.	
Oil-seeds ...	1,866
Good crops in the district and an improved market.	
Kerosine oil ...	2,666
Due to the opening of the Budge-Budge Branch.	
Salt ...	980
The increase appears principally in the bookings to Alamdanga and Rungpur.	

DECREASES.

	Tons.
Railway plant and rolling stock ...	7,999
Probably due to reduction in repairs and renewals.	

G. M. DRURY,
Traffic Superintendent.

CALCUTTA, *the 25th August* 1891.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE CUSTOMS DEPARTMENT FOR THE YEAR 1890-91.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 14th September 1891.

RESOLUTION.

READ—

The Report on the administration of the Customs Department for the official year 1890-91.

1. *Customs Receipts.*—The following table shows the gross and net customs duty, inclusive of that on imported salt, collected in Bengal during the past five years:—

	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.
	Rs.	Rs.	Rs.	Rs.	Rs.
Import duty (excluding duty on salt).	15,05,764	14,86,057	21,61,242	24,45,683	26,75,754
Import duty on salt ...	1,94,85,102	1,85,30,955	2,27,28,687	2,25,83,827	2,30,66,656
Export duty ...	15,80,340	21,37,248	17,09,406	16,08,445	20,89,014
Total gross duty ...	2,25,71,206	2,21,54,260	2,65,99,335	2,66,37,955	2,78,31,424
Refunds and drawbacks—					
Imports ...	2,48,992	2,46,759	2,81,544	3,12,697	3,13,188
Exports ...	40,363	81,742	84,930	31.606	70,223
Total ...	2,89,355	3,28,501	3,66,474	3,44,303	3,83,411
Total net duty ...	2,22,81,851	2,18,25,759	2,62,32,861	2,62,93,652	2,74,48,013

The increase in the year under review amounts to Rs. 11,54,361, and the total duty collected is now 87 per cent. of what it was previous to the abolition of the general import duties in 1881-82. The increased import duty on general merchandise is the result of larger realizations from spirits and kerosine oil. The imposition of a duty has not stopped the steady growth of trade in the latter article. The most marked increase in the year has been in the revenue derived from rice exported to foreign ports, due to a good demand, plentiful crops, and a low local price.

2. *Value of trade.*—The following statement shows for the purpose of comparison the value of the export and import trade during the last two years, classified under the three main heads of goods, treasure, and Government transactions, and also the total trade of the Province, both export and import:—

	Goods.		Treasure.		Government transactions.		Total.		Increase.	Decrease.
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.		
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
I.—Export trade	46,70,04,587	45,09,27,765	85,74,302	1,35,45,678	2,74,195	5,20,590	47,58,53,174	46,49,94,033	......	1,08,59,141
II.—Import "	30,08,74,495	31,63,23,350	1,47,78,066	4,18,44,740	97,68,073	97,34,492	32,54,20,634	36,79,02,582	4,24,81,948	......
III.—Total Trade of Province ...	76,78,79,082	76,72,51,115	2,33,52,458	5,53,90,418	1,00,42,268	1,02,55,082	80,12,73,808	83,28,96,615	3,16,22,807	....

It will be observed that, excluding Government transactions, the total value of exports in the foreign and coasting trade amounted to Rs. 46,44,73,443, as compared with Rs. 47,55,78,979 in the previous year—a decrease of Rs. 1,11,05,536. In the foreign trade alone the decrease in the value of exports of Indian produce amounted to nearly 2¼ crores, which is attributable both to smaller shipments and a heavy fall in price of some of the principal articles exported. This is a natural result of the high rate of exchange which prevailed during part of the year.

3. The total value of imports rose from Rs. 31,56,52,561 in 1889-90 to Rs. 35,81,68,090 in the year under review—an increase of Rs. 4,25,15,529. The total value of the trade of the Province, inclusive of treasure, but exclusive of Government transactions, shows an increase of Rs. 3,14,09,993 over the figures for 1889-90, but this is covered by the increased value of treasure imported and exported, which shows an advance of Rs. 3,20,37,960.

4. The value of imports on Government account is almost the same as in the preceding year, and amounted to Rs. 97,34,492. The exports made by Government rose from Rs. 2,74,195 to Rs. 5,20,590; foreign stores, principally arms ammunition and drugs, were re-exported to a much greater extent, and the exports of Indian produce, consisting chiefly of copper coin shipped to the Straits and Ceylon, increased by nearly a lakh.

5. *Calcutta. Foreign trade.*—The bulk of the foreign trade of Calcutta is carried on with the United Kingdom, but the percentage, which in 1889-90 was the lowest for ten years, has again declined, and now stands at 57·86 per cent. The total trade with China shows an advance in percentage owing to increased trade with the Treaty Ports, and this country continues to stand second in the list. The United States comes third. Germany has again advanced, the percentage having risen from 2·46 to 4·08 per cent. Australia and Ceylon have advanced and taken up a position above France.

The proportion of the foreign trade of Calcutta carried through the Suez Canal to the total trade stands at 64·4 per cent., as compared with 63·7 per cent. in the year 1889-90; the total value of the trade showing an increase of over 1⅓ crore, and being the highest recorded since the opening of the canal.

6. The following table shows the fluctuations that took place in shipping during the past two years:—

Arrivals and Departures.

	No.	Tonnage.
1889-90.		
Steam vessels	521	961,104
Sailing "	554	824,724
Native craft	42	6,111
1890-91.		
Steam vessels	548	1,041,060
Sailing "	446	711,233
Native craft	28	4,978

Account is here taken of those steamers only which arrive and leave without touching at any other Indian port. The continued decrease in the number of sailing vessels, which fell from 603 in 1888-89 to 554 in 1889-90, is very noticeable. In the past year the reduction of 108 sailing vessels with a tonnage of 113,491 is to some extent counterbalanced by an increase of 27 steamers carrying 79,956 tons. The direct trade with Germany shows an increase of 13 steamers and 11 sailing vessels, representing a tonnage of 49,726. At the same time the number of vessels sailing direct to London declined by sixty owing, it is believed, mainly to the rise in the dock charges brought about by the strikes of 1889, which have induced many continental merchants to make their shipments through Hamburg and Antwerp instead of through London.

7. *Imports.*—The total value of imports, including treasure, into Calcutta from foreign countries rose from Rs. 26,24,11,018 in 1889-90 to Rs. 29,90,13,666 in 1890-91, the increase in merchandise amounting to Rs. 92,50,486 and in treasure to Rs. 2,73,52,162. The total imports are higher than in any preceding year.

The following table shows the values of the principal articles of merchandise imported during the past two years:—

	1889-90.	1890-91.
	Rs.	Rs.
Cotton goods (including twist and yarn)	13,96,56,378	14,57,75,345
Metals	2,46,68,410	2,36,10,461
Mineral oils	1,18,08,390	1,25,55,206
Machinery	74,07,618	81,27,985
Woollen goods	70,11,664	75,10,294
Sugar	28,40,197	61,90,073
Salt	73,38,054	59,21,724
Liquors	49,00,323	47,88,915
Apparel	41,33,901	42,28,332
Hardware	30,88,318	32,41,100

Cotton goods form 56 per cent. of the total foreign import trade of Calcutta. Notwithstanding an increase of more than 42 lakhs in the imports of cotton piece-goods, as distinguished from twist and yarn, the Collector remarks that the statistics of the last five years show no signs of marked expansion in this trade. The rapid rise in the value of silver, brought about by American legislation, disorganized the piece-goods business, as it did not affect all engaged in it to an equal degree. Importers who had fixed the exchange for forward delivery lost heavily owing to the bazar dealers catching at any pretext to repudiate their contracts; while merchants who had sold forward without fixing the exchange made a large profit by the rise. On the other hand, the bazar dealers, men of small capital, working an enormous business chiefly on credit, saved themselves by rejecting their contracts, and are said not to have done badly on the whole.

The importation of metals declined by about 10½ lakhs. There was a decline of 38¾ per cent. in the importations of copper. The importations of galvanized iron have steadily advanced, showing how much more largely iron is being used in the construction of buildings than formerly. Under this head it would be interesting, if possible, to trace the effect of the growing preference for corrugated iron roofs in Eastern Bengal; but it is not quite clear how the iron thus used appears in the returns, whether as galvanized or sheet iron, or under both of these designations. The trade in mineral oils continues to show steady expansion. The quantity of sugar imported during the year under review was unusually heavy owing to low prices on the Continent and the sudden high rate of exchange here. The increase is in beet sugar from United Kingdom, Austria, and Germany. The bounty system in Europe has led to an enormous production there, and it is almost hopeless to expect any revival in the export trade of Bengal sugar. There was a decrease in the total import of salt, though the amount of duty collected, including that of salt taken out of bond, rose to the extent of over 3 lakhs. Mr. Armstrong writes that "the steadily increasing introduction of crushed salt in competition with Liverpool salt continues to be a most interesting and noteworthy feature of the salt trade." He thinks that this crushed salt will in time succeed in achieving a large market, and the Liverpool salt will gradually disappear. The subject will be discussed more fully in reviewing the report of the Salt Department.

Under the head of liquors there is a decrease of 3 lakhs in malt liquors, an increase of nearly 1¾ lakhs in spirits, and a very slight increase in wines and liqueurs. The decrease in malt liquors is attributed to the very heavy importations of the year 1889-90, which probably exceeded the demand of that year. The imports of Bass's beer continue to decline, and the attempt to displace the light German beers has not yet proved successful. The Collector again refers to the inferior quality of a large quantity of the spirits imported. The increase in the importation of spirits is due to the recovery of brandy from its fall in the previous year. As regards wines, Mr. Armstrong writes:—"A new and objectionable feature in the wine trade has been the importing, under the name of port, sherry, and other wines, of liquors which, from their price, can only be concoctions of cheap German spirit, coloured and flavoured to resemble the wines they are called after."

It is satisfactory to observe that the imports of coal have largely declined, and that the exports now exceed the imports. Country coal is used by all the large steamer firms, and out of 286,761 tons taken on board during the past year, only 2,244 tons were English. This trade may be expected to expand still further with the opening out of new coal-fields, the extension of railways, and the reduction of mineral freights. As regards other articles of importation, it is noted that there was a falling off in the importation of matches owing to a rise in price, and that the trade in Japanese matches is expanding rapidly. The imports from the United Kingdom declined in value from Rs. 5,26,597 to Rs. 2,48,459. Quinine, which is now abnormally cheap, shows the highest figures yet recorded, 25,757lbs. being imported, chiefly of Howard's manufacture. The number of umbrellas imported was 1,871,418, of which the United Kingdom supplied all but 77. The imports of the past year, though larger than those of 1889-90, represent a considerable falling off from the 2,621,745 imported in 1888-89 It is curious to observe that the imports of China tea, which stood at 158,323lbs. in 1886-87 and fell to 39,188lbs. in 1888-89, rose to 58,008lbs. during the past year. The trade is of little importance, but it would be interesting to know what becomes of this tea and who consumes it. Natives are known to prefer China tea to Indian, but they use tea only as an occasional luxury; and it seems hardly likely that they would take as much as 58,000lbs. Possibly some of it, in spite of Afghan trade restrictions, still finds its way beyond the north-western frontier of India.

8. *Exports.*—The total value of exports from Calcutta to foreign countries, including treasure, declined from Rs. 38,18,78,636 in 1889-90 to Rs. 35,93,66,166 in 1890-91, the decrease in merchandise amounting to Rs. 2,28,68,548, and the increase in treasure Rs. 3,56,078—a net decrease of Rs. 2,25,12,470.

The falling off was confined to free goods, and the principal items of decrease were—raw jute, 82 lakhs; seeds, 65¼ lakhs; dyeing materials, 43¾ lakhs; opium, 39¼ lakhs; jute manufactures, 30¾ lakhs; and raw cotton, 26¼ lakhs. The following statement shows the variations more clearly:—

	1889-90.	1890-91.
	Rs.	Rs.
Raw jute	7,26,67,026	6,44,78,477
Opium	6,37,25,170	5,97,99,265
Tea	5,12,39,079	5,03,78,662
Oil-seeds	4,13,04,984	3,46,22,681
Rice	2,48,74,668	3,13,06,827
Indigo	2,49,05,266	2,05,11,354
Hides and skins ...	1,84,21,934	2,07,04,763
Raw cotton	1,13,68,812	87,28,419
Wheat	60,11,810	50,37,082

The exports of jute advanced in quantity, but fell in value. Prices were high in the previous year, and ryots increased their sowings, so that the crop in the year under review was the largest ever known. Owing, however, to unseasonable rain and floods, the quality was inferior and prices fell heavily—in some cases from Rs. 5 to Rs. 1-8 a maund—a state of things calculated to discourage cultivation. Although prices in the jute districts fell 70 per cent., the decline in the English market was not so marked. In March 1890

good medium jute was selling in Dundee at £14 per ton, and at the end of the year, after the low quality of the crop had declared itself, the price still stood at £11-15.

The exports of tea amounted to 104,491,177lbs., being an advance, in comparison with 1889-90, of about 2¾ million pounds, but the average declared value was only 7 annas 8 pies per pound, as against 8 annas 1 pie the previous year. The following statement shows the importations of tea into the United Kingdom during the last two years : —

	1889. lbs.	1890. lbs.
India	96,693,000	101,557,000
Ceylon	31,191,000	40,012,000
China	93,208,000	77,174,000

There was a great increase in consumption of tea in the United Kingdom during the year 1890, the total stock of tea at the end of 1890 being nearly 12 million pounds less than at the close of 1889. This increased consumption was undoubtedly due to the reduction of duty. Indian tea is evidently gaining ground in the United Kingdom as compared with China teas. It is also satisfactory to note that the exports to Australia have increased by more than 1¾ million pounds, and that Indian tea seems likely to gain a firm footing there.

In this section of his report the Collector tells a flattering tale about the effect of a rise in the value of silver on the prospects of the tea industry, and sets himself to persuade the tea-planting community that they have in the long run little to fear from a rise in exchange, whether sudden or gradual. He abandons the theoretical argument that silver being only a commodity, when the price of silver rises the price of other commodities, including tea, will rise also, and so an equilibrium will be established and the same number of pounds of tea will purchase enough gold to provide the planter with the same number of rupees. He admits that the effect of a rise in exchange will be that the planter will get fewer rupees for his tea, but he argues that his expenditure will be proportionately less, and his profits therefore will remain the same. It is to be feared, however, that this statement does not agree with the tea planter's experience. It is true that he will pay less for machinery, European stores, and other articles purchased in England. It is also true that as all tea-growing countries use a silver currency, the tea planter is free from the special disadvantages which hamper the Indian wheat-grower in his attempt to compete with rivals in gold-using countries. But as the bulk of the planter's expenditure is incurred in India, where the value of the rupee remains unaltered or rises very slowly, he cannot protect himself by reducing his payments for wages and articles produced locally. In the case supposed, then, it would seem that the gardens which fail year after year to gain the normal profit of capital must sooner or later go out of cultivation, and only those will survive in which the cost of production is cheapest. It cannot be assumed that the contraction of output, caused by the closure of the more expensive gardens in India, will so reduce the total supply as to cause the price of tea to rise to a figure at which it will pay to reopen and work those gardens. The sterling price of tea in London is the resultant of many causes, affecting several sources of supply, and Indian tea-planters have to reckon with other competitors, and notably with the planters of Ceylon, who have within the last few years shown great energy in pushing their tea on the London market and bringing it to the notice of the public.

The exports of rice rose from 5,366,807 cwt. to 7,066,443 cwt., the increase being chiefly due to larger supplies drawn by Ceylon. The United Kingdom took 18 per cent. more than usual owing to the failure of the Japanese rice crop. The imposition of a heavy import duty killed the Italian demand. The indigo crop was the smallest since 1879, the total production in 1890 being estimated at only 95,000 maunds, a sagainst 1,44,718 maunds in 1889. It is not clear why actual figures cannot be given in the report. Prices, though higher than last year, were lower than in the three previous years.

The exports of raw cotton fell from 452,134 cwt. to 355,434 cwt., which the Collector attributes to the poorness of the crop and the interference with business caused by the sudden rise of exchange. It may be doubted, however, whether these causes alone fully account for the decline of the exports from Calcutta, which seems rather to be due to the fact that since the opening of the Rajputana Railway, Bombay has gone on attracting an increasing share of the cotton trade of Upper India, and the opening of the Indian Midland Railway has given Bombay a still further advantage. Independently of the fact that the distance by rail to Bombay is less, that port offers a larger and more advantageous market to producers; the freights to Europe are lower; and steamers bound for continental ports are available at shorter intervals than in Calcutta. The following statistics taken from the reports of the Chamber of Commerce illustrate the course of competition between the two ports:—

Receip's of Upper India cotton in Bombay and Calcutta.

		1887-88.	1888-89.	1889-90.	1890-91.
		Cwt.	Cwt.	Cwt.	Cwt.
Calcutta	...	433,221	450,003	615,825	317,342
Bombay	...	749,729	1,045,232	1,279,743	1,124,393
Total	...	1,182,950	1,495,235	1,895,568	1,441,735

Adding to the Calcutta returns for 1890-91 10,000 bales or 35,714 cwt., being the estimated outturn of cotton produced in Tipperah, Dacca, and Assam, which is necessarily exported by Calcutta, the total receipts of the past year derived from mercantile sources of information come to 353,056 cwt.—a figure which corresponds closely to the Custom House returns.

There has been a further decline in the export of wheat of 13 per cent., and the trade does not appear to be likely to expand at present. It is noticeable that there are now nearly 5¾ million cwt. of oil-seeds exported and only 1⅓ million cwt. of wheat.

The exports of opium show an increase from 55,985 chests to 57,597 chests, or 2·8 per cent.; but there was a heavy decline in average declared value, the price per chest being Rs. 1,038, against Rs. 1,138 in 1889-90.

The exports of silk were the lowest for five years, owing partly to the French demand having fallen off, and partly to the prices asked for coarse Bengal silk having risen, thus shutting it out from some of the uses to which it was formerly applied.

9. *Treasure.*—The advance in the net imports of gold was over 48 lakhs, and in that of silver was 2 crores 21¾ lakhs. The large imports were from the United Kingdom, China, Straits Settlements, and Australia, and are attributed to the fluctuations that occurred during the year in the value of silver. It is noticed that this is the first year of large direct importations of gold from Australia.

10. *Calcutta. Coasting Trade.*—After a fall in two successive years, the total value of the coasting trade rose by 1 crore and 57 lakhs, of which 78 lakhs were in imports. The whole of this increase was in Indian products, imports and exports of foreign merchandise having both declined. The trade is now higher than it has been since the abnormally high figures of 1877-78, which were due to heavy exports of grain at the time of the Madras famine.

11. *Chittagong Port.*—The total value of the trade of Chittagong, though lower than that of the preceding year, is above the average of the previous four years. The decline is chiefly due to the falling off of jute from Naraingunge, which comes to Chittagong for re-export to foreign countries. The total trade amounts in value to 2 crores and 87 lakhs.

12. *The Orissa Ports.*—The following statement shows the trade of the Orissa ports during the past two years:—

	1889-90.	1890-91.
	Rs.	Rs.
Balasore.		
Foreign	4,37,513	1,75,709
Coasting	93,03,035	99,96,542
Cuttack.		
Foreign	13,15,803	21,90,555
Coasting	4,39,940	8,66,418
Pooree.		
Foreign	39,842	1,82,561
Coasting	1,76,934	3,60,326

These figures show that there has been again a general improvement in the sea-borne trade of all three ports. The aggregate value of the entire trade rose 18 per cent. compared with 1889-90.

13. *Naraingunge.*—The total value of trade stands at Rs. 96,02,874—a falling off of nearly 19 lakhs from last year. In explanation, it is said that exporters of jute sent it by inland routes to Calcutta instead of by sea to Chittagong during the past year.

14. The Lieutenant-Governor's thanks are due to the Board of Revenue for their supervision of the Customs Department during the year, and to Mr. Armstrong for his efficient administration of the department and for the full and clear report submitted by him. The names of the officers who are favourably noticed by the Board, with the remarks recorded, will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 12th September, 1891.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
BURDWAN DIVN.			
1	Burdwan Sept. 12, '91	0·76	Weather—hot. *Burdwan* :—Rice selling at 16 seers. Prospects good, but more rain needed. *Culna* :—*Aus* crop expected to be 16 annas. Prospects of *aman* good. Rice selling at 14 seers. *Cutwa* :—*Aus* is a good crop. *Aman* promises well, but rain needed. Rice sells at 16 seers. *Raneegunge* :—Rain wanted. Rice selling at 16 seers.
	Culna ...	1·75	
	Cutwa ...	0·79	
	Raneegunge ...	1·03	
2	Bankoora „ 12, '91	0·89	Very light monsoon weather. Harvesting of *aus* commenced. Prospects of *aman* continue good. Health of cattle good. Supply of fodder sufficient. Prices stationary.
3	Birbhum „ 12, '91	1·26	Light rain. Crop prospects very good. Rice is as good now as it was at the same time last year, and if the rest of the season be favourable, there will be another bumper harvest. Price of common rice from 17 to 19 seers per rupee. Fodder and water are abundant, and cattle are in normal health.
	Rampore Haut ...	1·48	
4	Midnapur „ 12, '91	2·78	Seasonable rain. Cultivation of paddy crop all but finished. Prospects good everywhere. Prices of common rice :— Srs. Sudder ... 15; Contai ... 16; Tamluk ... 16; Ghatal ... 16 } per rupee.
5	Hooghly „ 12, '91	2·39	Weather—sultry. Harvesting of *aus* commenced. Winter paddy doing well. More rain wanted in Serampore subdivision. Fodder and water-supply sufficient. Cattle-disease reported from thana Paudooa. Prices of common rice :— Srs. Sudder ... 13; Serampore ... 13; Jehanabad ... 16 } per rupee.
	Serampore ...	1·15	
	Jehanabad ...	2·17	
6	Howrah „ 12, '91	1·61	Weather—showery. *Aus* and jute crops are being cut. *Aman* and sugarcane doing well. Prospects of harvest satisfactory. Price of common rice 14 to 14½ seers per rupee. No disease amongst cattle. Fodder and water-supply adequate.
	Central Districts.		
PRESIDENCY DIVN.			
7	24-Perghs. Sept. 15, '91	2·96	Weather—hot and cloudy with occasional light showers. *Aus* and jute are being cut and harvested; outturn expected to be good all round. Sugarcane doing well. Transplantation nearly finished. *Aman* doing well, but rain wanted in Baraset. Prospects continue good throughout the district. Cattle-disease prevalent in Harowa. Supply of fodder and water good.
8	Nuddea „ 12, '91	1·03	Weather—seasonable. Harvesting of *aus* nearly at an end. Sugarcane and turmeric doing well. Health of cattle good, and supply of fodder and water ample.
	Kushtea ...	0·68	
	Meherpur ...	1·13	
	Chuadanga ...	1·48	
	Ranaghat ...	1·98	
9	Khoolna „ 12, '91	0·31	Weather—hot with occasional showers. *Aus* and jute being cut. General prospects fair. More rain required for *aman*. Fodder sufficient. Cattle-disease still prevalent in parts.
	Bagirhat ...	0·06	
	Satkhira ...	1·55	
10	Jessore „ 12, '91	0·75	Weather sultry. Outturn of *aus* about 16 annas. Jute being cut. *Aman* paddy wants more flood-water. Rivers, however, are unfortunately beginning to fall.
	Jhenidah ...	0·89	
	Magura ...	0·46	
	Narail ...	1·95	
	Bongong ...	0·70	
11	Murshedabad „ 14, '91	0·16	Weather—hot. Harvesting of *bhadoi* still going on. Prospects good. Transplantation of *aman* almost completed. More rain wanted. Small-pox among cattle in thana Kahangunge in Lalbagh subdivision. No want of supply of fodder.
RAJSHAHYE DIVN.			
12	Dinagepur „ 12, '91	Nil	Weather—sultry. Cloudy but no rain. Rain badly wanted for winter rice crop, which will be seriously affected if it does not rain heavily within a week or so. Outturn anyhow will not be good. Price of rice has slightly risen. Common rice selling at Sudder 14½ seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.
	Thakurgaon ...	Nil	
13	Rajshahye „ 12, '91	0·88	Weather—very sultry, and rain very deficient. *Aus* has scarcely anywhere exceeded an 8-anna crop, and *aman* is suffering badly from want of rain. The river, too, is low. Prospects are not favourable. Cattle-disease prevailing in places. Drinking-water and fodder-supply ample.
	Nattore	0·46	
	Nowgong ...	0·16	
14	Rungpur „ 12, '91	Nil	Weather—very hot. Transplantation stopped for want of rain. Rain very urgently required. Cattle-disease heard of from a few places. Fodder plentiful.
	Nilphamari ...	0·23	
	Kurigram ...	1·05	
	Gaibanda ...	Nil	
15	Bogra „ 12, '91	0·76	Weather—generally fine and hot, with high winds. Outturn of *aus* rice about 16 annas, and of jute about 12 annas. Sugarcane doing well. Heavy rain urgently wanted for *aman* rice. Transplantation has already been seriously retarded. Price of common rice has not risen during the week; it is selling at 15 seers a rupee. There is no lack of water or fodder for cattle.
	Sherpur ...	0·14	
	Nowkhilla ...	0·17	
16	Pubna „ 12, '91	0·28	Weather—hot and cloudy. Rainfall very scanty. Standing crops suffering from want of rain. Reaping of *aus* paddy finished. Jute being reaped, and yielding an outturn of 14 annas. Rivers considerably fell, but now rising. Condition of cattle good. Fodder sufficient.
17	Darjeeling „ 12, '91	0·30	Weather—fair. Harvesting of *bhadoi* nearly completed. Transplantation of *haimanti* almost finished. More rain urgently wanted. Condition of cattle good. Supply of fodder and water sufficient.
18	Julpigoree „ 12, '91	0·80	Weather—very hot. Prospects of crops not good. Rain much wanted. Price of rice rising. Fodder and water-supply sufficient. Cattle-disease reported from Patgram and Boda.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*					
		Eastern Districts.			
DACCA DIVN.	19	Dacca	Sept. 12, '91	Figures not given	Weather—seasonable. Harvesting of *aus* paddy and jute still going on. *Aman* paddy on high lands partially damaged for want of sufficient rain and flood. Fodder and water available. Condition of cattle good. Cheapest rice sold at from 15 to 18 seers per rupee.
	20	Furreedpur	„ 12, '91	0·68	Weather—seasonable, but complaint generally heard of want of rain. Prospects of crops good. Rice selling at Sudder, Madaripore, and Goalundo at 16, 17, and 16 seers per rupee respectively. Jute steeping going on. No cattle disease.
	21	Backergunge	„ 12, '91	1·67	Weather—somewhat hot. Prospects of crops not so good in the Sudder on account of insufficiency of flood-waters. Price of common rice varies from 13 to 18 seers per rupee. Condition of cattle good. Supply of fodder and water not insufficient.
	22	Mymensingh	„ 12, '91	0·10	Weather—very hot and unseasonable. Prospects of standing crops fair. Rain wanted. Supply of water and fodder plentiful. Common rice sells at 13½ seers a rupee. Jute already fetches as much as Rs. 5-8 a maund, so that price is compensating for bad outturn.
CHITTAGONG DIVN.	23	Chittagong	„ 12, '91	0·19	Weather—seasonable with occasional rain. *Aus* is being harvested and *aman* transplanted, but want of rain is being felt in some places for the latter crop. Prices stationary. Condition of cattle and supply of fodder good.
	24	Noakhally	„ 12, '91	0·53	Weather—very hot. Rain greatly wanted for continuance of *aman* rice transplantation. Prospects not favourable, but prices unaltered. Condition of cattle and fodder supply normal.
	25	Tipperah	„ 12, '91	0·07	Weather—hot; unusually dry. Rain badly wanted throughout the district for standing crops and for transplantation of rice. Jute market favourable to cultivators. Harvesting of *aus* paddy almost complete. Prices generally stationary. Fodder insufficient as usual.
	26	Chittagong Hill Tracts.	„ 10, '91	0·85	Weather—extremely hot and close throughout the week. Harvesting of *jum* paddy still continues. Transplanting in low lands in rapid progress. Common rice being sold at 13 seers 5 chittack per rupee.
BEHAR.					
PATNA DIVN.	27	Patna	„ 12, '91	0·11	Weather—intensely hot and cloudy. Transplantation of paddy being delayed. Seedlings drying. Immediate rain wanted. *Bhadoi* good; being harvested in places. Prices of food-grains rising.
		Barh	...	1·50	
		Behar	...	1·13	
		Hilsa	...	0·60	
	28	Gya	„ 12, '91	0·25	Weather—hot and sometimes cloudy. Transplantation of rice seedlings almost over. Rain urgently wanted. Prospects of *bhadoi* crops still favourable. Prices of food-grains almost stationary. Supply of fodder and water for cattle sufficient.
		Nawada	...	1·25	
		Aurungabad	...	0·12	
		Jehanabad	...	0·49	
	29	Shahabad	„ 12, '91	0·62	Weather—very hot and stifling. Sugarcane still excellent. Reaping of *bhadoi* crops is beginning. Paddy has been transplanted during the week in Sasseram and Bhabuah, and a little transplantation also done in Arrah subdivision. Prospects have rather improved, but more rain is wanted. Prices unchanged. Fodder for cattle sufficient.
		Buxar	...	2·23	
		Bhabuah	...	2·84	
		Sasseram	...	0·99	
	30	Durbhunga	„ 12, '91	0·20	Weather—hot with passing clouds. Prospects of rice crop again gloomy owing to continued absence of rain. Harvesting of *bhadoi* crops in progress. The *bhadoi* crops are very good in some parts, fair in others, and bad in a few of the northern thanas. Condition of cattle good. Water sufficient.
	31	Mozufferpur	„ 12, '91	Nil	Weather—hot. Indian-corn and *marua* still being cut, with excellent outturn. Rain urgently wanted for paddy on high lands. Prices falling. Plenty of fodder and water for cattle.
		Sitamarhi	...	0·62	
		Hajipur	...	1·29	
	32	Sarun	„ 12, '91	0 52	Weather—very hot; cloudy. *Bhadoi* crops being cut here and there. Rain urgently wanted for paddy. Without rain this crop will be almost an entire failure. Ample fodder and water for cattle.
	33	Chumparun	„ 12, '91	..	Weather—hot and occasionally cloudy. Transplantation of *aghani* paddy retarded in some places in the Bettiah subdivision for want of rain. Rain now urgently wanted throughout the district. *Bhadoi* promises to be a good harvest. No cattle disease. Fodder and water for cattle plentiful. Price of common rice from 14 to 16 seers per rupee.
		Bettiah	...	0·14	
BHAGULPORE DIVN.	34	Monghyr	„ 12, '91	0·53	Weather—very hot and close. *Bhadoi* harvest continues; sixteen annas outturn assured. Rice crop suffering in some parts from want of rain which is urgently needed. Two annas of the crop reported to be still untransplanted in Jamui. Supply of fodder sufficient. No cattle-disease reported.
		Beguserai	...	0·77	
		Jamui	..	1·68	
	35	Bhagulpur	„ 12, '91	0·32	Weather—hot with occasional showers. To the north of the Ganges there has been little or no rain this week, and prospects of *aghani* rice will become serious unless there is good rain in 10 days. In the south also more rain is wanted, but here prospects are better. *Bhadoi* rice, *marua*, and *makai* have been mostly cut. Outturn of *bhadoi* rice is about 13 annas. Cattle are in better condition, and there is enough fodder so far.
	36	Purneah	„ 12, '91	Nil	Weather—hot; cloudy occasionally, but no rain. Want of rain beginning to be badly felt. Some irrigation from hill-streams going on in the north. Prices rising. Fodder plentiful. No cattle-disease.

37	**Maldah** Sept. 12, '91	0·03	Weather—hot with little rain. Harvesting of *bhadoi* almost over; outturn as estimated and reported before has been altered, and is now reported to be about 15 to 20 annas. Rain much wanted for transplantation of winter rice. In certain parts of the district lands are being prepared for *rabi* crops. Condition of cattle good. Fodder and water-supply adequate. No change in price of rice.
	Chanchal ...	Nil	
	Shibgunge ...	0·59	
	Gajole ...	0·40	
38	**Sonthal Perghs.** „ 12, '91	0·71	Weather—cloudy with passing light showers. Prospects of crops continue good. Rice crop generally doing well. A little more rain wanted for it in Deoghur and Pakour. *Janera* harvest commenced; a 16-anna outturn anticipated. Fodder and water-supply sufficient. Cattle in good condition.
ORISSA.			
ORISSA DIVN.			
39	**Cuttack**		Report not received.
40	**Pooree** „ 10, '91		Weather—cloudy with drizzling showers of rain. Transplanting and weeding of winter crop (*sarad*) going on. *Beali* rice ripening. Subdivisional officer reports that in some mowzahs of Kuspalla and Khoorda damage done to *sarad* paddy by root disease has not been recouped. Price of common rice varies from 18 seers 6 chittacks to 24 seers per rupee. Cattle-disease reported from Daudimal in Khoorda.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers; <, lightning; △, dew; ≡, fog.

J. H. Gilliland,
